Commercial Feeding Stuffs, 1914-15.

TEXAS FEED LAW,

BY

B. YOUNGBLOOD, DIRECTOR.

The Twenty-ninth Legislature of the State of Texas passed an act—

(1) Regulating the sale of concentrated commercial feeding stuffs and the material from which they are manufactured.

(2) Defining them.

(3) Prohibiting their adulteration.

(4) Providing for their correct weighing and marking.

(5) Providing for the collection of samples.

(6) Providing for the expenses of enforcing the law.

(7) Fixing penalties for violations, and

(8) Empowering the Director of the Experiment Station (a) to adopt standards, names and definitions; (b) to refuse registration of any feeding stuff under a name which would be misleading as to the materials of which it is made up, or which does not conform to the standards, names and definitions aforesaid, and (c) after ten days' notice to cancel such registration as may, from time to time, be found to be in violation of the law or the names, standards and definitions adopted by the Director of the Experiment Station in accordance with this law.

The law is printed in the back of this bulletin.

The Purpose of the Feed Control Service.—The purpose of the Feed Control Service is to afford protection alike to the sellers and the buyers of concentrated commercial feeding stuffs in the State of Texas. This end is attained by the Feed Control Service by

(I) Requiring that no feeding stuff shall be sold under a name that is in the least misleading. This means that no person or corporation shall sell a *mixture* for a *pure product.* For instance, it is a violation of the law to sell a mixture of cottonseed meal and hulls under the name of "Cottonseed Meal," when obviously the correct definition is "Cottonseed Meal and Hulls."

(II) Requiring that the correct analysis of each and every feeding stuff sold within the State *shall be printed—not stamped—on the inspection tag.* By a comparison of the constituents, analysis and the price of a given feeding stuff with those of another, the buyer is enabled to determine for himself which feeding stuff is the cheapest and the best suited for his particular purpose. If he should have any difficulty in this regard he should write the Feed Control Service for additional information.

The seller of feeding stuffs is protected by the development of uniform standards which eliminate unfair competition. He is expected to comply with the law, not merely for the sake of compliance, but because in the long run it is the wiser course. The seller who habitually complies

with the law has the confidence of the feeders and the public generally and avoids the unnecessary expense and the unsavory reputation incident to prosecution for violations.

What the Term Includes.—The term "concentrated commercial feeding stuff," as herein used, shall include wheat bran, wheat shorts, linseed meal, cottonseed meal, cottonseed cake, peanut cake, cocoanut meal, gluten meal, gluten feeds, sugar feeds, dried brewers' grains, malt sprouts, hominy feeds, cerealine feeds, rice bran, rice polish, oat feeds, corn chops, ground beef, kafir feed, alfalfa meal, corn feed meal, rolled oats, cold pressed cottonseed, ground cold pressed cottonseed, rice hulls, corn bran, blood meal, digester tankage, cracklings, meat scrap, meat meal, meat and bone scrap, meat and bone meal, buckwheat shorts, corn germ meal, flax plant by-products, oat groats, oat middlings, poultry feed, oat shorts, mixed feeds, and all other materials of a similar nature.

What is not Included.—The term "concentrated commercial feeding stuff," as herein used, *shall not include* hay, straw, the whole seeds of grains of wheat, barley, rye, oats, Indian corn, rice, buckwheat or broom corn, or any other whole or unground grains or seeds. However, should there be added to hay, straw, whole or unground grains or seeds, any cracked grains or seeds which come under concentrated commercial feeding stuffs, the whole would then be treated as a concentrated commercial feeding stuff, and subject to the requirements of the law.

Adulterants.—The following ingredients are classed as adulterants: screenings, rice hulls, peanut hulls, chaff, oat hulls, oat meal by-products, ground corn cobs, ground alfalfa, ground hay and all other materials of a similar nature.

How to Comply with the Law.—Briefly summarized, the law requires manufacturers and importers of concentrated commercial feeding stuffs, or the party or parties who cause them to be sold or offered or exposed for sale, to comply with the following requirements:

All Concentrated Commercial Feeding Stuffs Must Be Registered.—Any person, manufacturer, importer or agent desiring to sell or offer for sale within this State any concentrated commercial feeding stuff shall submit a sample of the feeding stuff to be registered, of at least one pound for analysis. This sample should be shipped prepaid either by parcel post or express, in a sealed glass jar or bottle. The sample must be a fair average of the feeding stuff to be registered. Upon receipt of this sample, registration forms will be furnished. If, upon analysis, the feeding stuff is found to conform to the required names, definitions and standards and otherwise complies with the intent of the law, the feeding stuff will be registered.

Concentrated Commercial Feeding Stuffs Must Be Tagged.—After a feeding stuff is registered the person, manufacturer, agent or importer is notified that he may offer it for sale, provided he attaches the official tax tag as required by law. Tags are purchased from the Feed Control Service and are sold at such a price as will make the inspection tax 10 cents per ton on all concentrated commercial feeding stuffs sold or offered for sale within the State of Texas. One tag should be attached

to each bag, barrel or other package of feeding stuff sold or offered for sale.

The following information is required to be printed on the reverse side of tax tags, by the person, agent, dealer, manufacturer or importer. Under no circumstances will the Feed Control Service print this information on the tags:

(1) Number of net pounds of feeding stuff the package contains.

(2) Name of feeding stuff, exactly as shown in registration.

(3) Names of material of which such feed is composed, where the contents are of a mixed nature.

(4) Percentage of all ingredients where corn cobs, rice hulls, or any other adulterant, is present.

(5) Name and address of manufacturer or importer and place of manufacture.

(6) Guaranteed analysis, stating the minimum percentage of crude protein, crude fat, nitrogen-free extract, and the maximum percentage of crude fiber, in the feeding stuff, exactly as shown in registration.

Attention is called to the fact that all information on the tax tag must be *printed. The use of rubber stamp for this purpose is not permitted.*

We suggest that the foregoing information be PRINTED on the reverse side of the tag in the following form:

100 Pounds (Net) Corn Chops

Manufactured by

JOHN DOE MILLING COMPANY

Doeville, Texas.

GUARANTEED ANALYSIS.

Protein not less than	9.00 per cent.
Fat not less than	3.50 per cent.
Nitrogen-free Extract not less than	70.00 per cent.
Crude Fiber not MORE than	3.00 per cent.

Weights.—The law fixes the standard weights for feeding stuffs as follows:

Mill products have the following standard weights, viz.: Flour, one-hundred and ninety-six (196) pounds per barrel or forty-eight (48) pounds per sack. Corn meal, bolted or unbolted, thirty-five (35) pounds per sack; rice bran, one hundred and forty-three (143) pounds per sack; rice polish, two hundred (200) pounds per sack; and other feeding stuffs made from cereals of any kind, whether pure, mixed or adulterated, one hundred (100) pounds per sack. Fractional barrels, sacks or packages, shall weigh in the same proportion, as, one-sixteenth, one-eighth, one-fourth, one-half, and three-fourths. Sacks and barrels of odd weights, as for instance, 90 or 90 pounds, are not contemplated in the feed law and tax tags for such odd weights as these are not carried in stock by the Feed Control Service.

Bulk Sales.—It shall be the duty of the manufacturer or importer or agent in the sale and shipment of concentrated commercial feeding stuffs in bulk, to furnish the purchaser with tags to cover, at the regular tonnage rate of twenty tags per ton. For instance, if Cotton Oil Co., manufacturers, or Jones & Co., importers, sell to Roberts & Son, ranchmen, Odessa, Texas, a carload of loose cake, it will be the duty of Cotton Oil Co. or Jones & Co. to transmit to Roberts & Son tags sufficient to cover the shipment. In the event that Roberts & Son fail to receive these tags simultaneously with the shipment it will be their duty to immediately notify the Feed Control Service. A complete record of such sales, with number of tags furnished, should at all times be kept by manufacturers, agents or importers, for the information of the Feed Control Service.

Penalties.—The penalty for using any bag, box or barrel, or any other receptacle into which to put a product other than one bearing the name of such mill manufacturing the product, is a fine of any sum from one hundred dollars ($100.00) to one thousand dollars ($1000.00) or confinement in the county jail for a term of thirty (30) days or both such fine and imprisonment.

The penalty for selling or offering for sale concentrated commercial feeding stuffs without tax tags, or with a label stating that the feeding stuff contains substantially a larger percentage of protein, crude fat or nitrogen-free extract, or a smaller quantity of crude fiber than it does contain, is a fine of not less than one hundred dollars ($100.00) nor more than five hundred dollars ($500.00) for the first conviction, and not less than five hundred dollars ($500.00) nor more than one thousand dollars ($1000.00) for each subsequent conviction.

A fine of not more than five hundred dollars ($500.00) is the penalty for counterfeiting or using a tax tag the second time. This penalty may be increased for subsequent offenses. The law provides that one-half the fine be paid to the informer.

The penalty for selling adulterated feeding stuffs is a fine of not less than twenty-five dollars ($25.00) or imprisonment in the county jail for not less than thirty (30) days and not more than sixty (60) days, or both such fine and imprisonment.

Copy of the feeding stuff law and blank forms for registering feeding stuffs for sale, will be furnished upon request.

Feeders Must Inform Themselves.—Feeds must be wholesome. They must be composed of hays, grains, and the by-products of the various grains, with the elimination of all unnecessary or injurious substances. In order to secure the full benefit of the feeding stuff law, feeders must familiarize themselves with the meaning of the terms "protein," "fat," and so forth; they must read the information on the tax tags on the feeding stuffs they purchase, and understand the meaning of the guarantee thereon. Every feeder should know, for example, that cottonseed meal containing 49 per cent protein is worth more for feeding purposes than meal containing 43 per cent protein. Especially in the purchase of mixed feeds, the feeder should carefully consider the analysis and the materials of which it is composed. The margin of profit in feeding is at best so small that the feeder should carefully consider the com-

position, digestibility and prices of the various feeding stuffs before determining which he shall buy.

Publications showing the digestibility of various ingredients, and therefore indicating the real value of different feeding stuffs, may be had upon application to the Director of the Experiment Station, College Station, Texas.

Definition of Terms.—The Texas feed law requires a guarantee of minimum percentages of protein, fat, nitrogen-free extract, and a maximum percentage of crude fiber.

The complete analysis of a feeding stuff gives its content of water, ash, protein, fat, crude fiber, and nitrogen-free extract, expressed in percentages.

Protein, being the constituent of food which forms flesh, muscle, hair, ligament and other portions of the animal body, is of great importance. It replaces the wear and tear of the animal tissue and furnishes material for additional flesh. Besides furnishing material for tissue, protein may be burned in the body to produce heat or it may serve as a source of fat in case of a deficiency in carbohydrates and fat accompanied by excess of protein. It is, however, a costly source of heat and fat.

Value of Protein: Protein is the most expensive portion of a feeding stuff, and feeding stuffs rich in protein usually sell for a higher price than feeding stuffs low in protein, though the difference is not as great in Texas as it is in the Northern States. With a given feeding stuff, the more protein it contains the better its quality, compared with other feeding stuffs of the same class. For example, cottonseed meal containing 48 per cent. protein is of better quality than cottonseed meal containing 45 per cent. protein. A low protein content accompanied by a high content of crude fiber indicates that the cottonseed meal contains an excessive amount of hulls.

We cannot, however, compare the value of feeding stuffs of different kinds on a protein basis alone. For example, a cottonseed meal containing 45 per cent. of protein does not have five times the value of corn chops containing 9 per cent. protein. There are other constituents of both feeding stuffs (fat and nitrogen-free extract), which are of value to the animal, and corn chops contains much more nitrogen-free extract than cottonseed meal. The digestibility of the constituents is also of importance. This is discussed in special bulletins of the Experiment Station, which may be had upon application to the director.

Fat (or *Ether Extract*) is composed mainly of fats and oils in the case of concentrated commercial feeding stuffs, but with fodders and hays it is often composed to a considerable extent of waxes, coloring matter, and other substances. Fat is used in the animal body as a source of body fat, and to furnish heat and energy. The animal requires heat to keep its body warm, and energy to run the animal mechanism, or to do the outside work. The beating of the heart, chewing, movements of the intestines, and the involuntary muscular movements require energy which is furnished by the oxidation of fats, car-

bohydrates or protein. One pound of fat is equal to 2.25 pounds of carbohydrates.

Value of Fat: Fat ranks next to protein in value as a feeding constituent. The more protein and fat a given feeding stuff contains the better its quality compared with other feeding stuffs of the same class. Cottonseed meal containing 58 per cent. of protein and fat combined, is of higher value than cottonseed meal containing 50 per cent of protein and fat combined. Cottonseed meal is indeed often sold on the basis of its protein and fat content, as determined by chemical analysis.

As with protein alone, however, two feeds of different kinds cannot be compared on the basis of their content of protein and fat, since other factors enter into consideration. These factors will be discussed later.

Crude Fiber is the proportion of the plant which resists the intense action of acids and alkalies. It consists mostly of the cell walls and woody fiber of the plant, and is the most indigestible part of the feeding stuff. By means of fermentation in the intestines, crude fiber is digested to some extent by animals which chew the cud. The operation, however, consumes so much energy that a large proportion of the value of the crude fiber is taken up by the process of digestion. Hays and fodders and other roughages generally contain much crude fiber, but concentrated feeding stuffs contain comparatively small quantities of it.

Value of Crude Fiber: Crude fiber is the woody and less digestible portion of a feeding stuff. The more crude fiber a feeding stuff contains the poorer its quality compared with other feeding stuffs of the same class. Feeding materials of low commercial value and of low value to the animal, such as straw, cottonseed hulls, rice hulls, oat hulls, corn cobs, and so forth, contain large quantities of crude fiber, and their addition to a concentrated feeding stuff increases its content of crude fiber. Thus, if the crude fiber in cottonseed meal exceeds certain limits, it indicates that the meal is adulterated with cottonseed hulls. In a similar way, crude fiber in excess of a given minimum indicates corn cobs or corn bran in corn chops; rice hulls in rice bran, and so on. The amount of crude fiber is much more sensitive indication of the low quality or of adulteration than the protein and fat, since the adulterants generally contain large percentages of crude fiber.

To repeat, the more crude fiber a feeding stuff contains the poorer its quality compared with other feeding stuffs of the same class. This also holds good in comparing feeding stuffs of different kinds, but not entirely; we must also consider the protein and fat content of the two kinds of feeding stuffs. Thus, wheat bran contains considerably more crude fiber than corn chops, but has a higher value when protein is worth more than fat and nitrogen-free extract.

Nitrogen-free Extract is composed of starch, sugar, dextrin, and other substances of a similar nature. These substances are mostly carbohydrates; that is, they contain carbon and hydrogen and oxygen in proportions to form water. Crude fiber is also composed largely of carbohydrates.

Value of Nitrogen-free Extract: The nitrogen-free extract of most concentrated commercial feeding stuffs, such as corn chops, wheat bran, cottonseed meal, kafir, and so forth, is composed largely of sugars and starches which are readily digested and have considerable value to the animal.

The nitrogen-free extract of wheat skins, corn bran, corn cobs, rice hulls, hays and straws, and similar feeding stuffs, is composed mostly of other substances than sugar and starch, and has a lower value to animal. The nitrogen-free extract of these two kinds of feeding stuffs, therefore, cannot be compared directly.

In general, we may say that the more protein, fat and nitrogen-free extract, and the less crude fiber and ash, a given feed contains, compared with other feeding stuffs of the same kind, the better the quality.

The same statement also holds in comparing feeding stuffs of different kinds, but not altogether, since in comparing feeding stuffs of different kinds we must also consider the digestibility and the productive value of the digested materials.

Ash is the residue left when the plant is burned. It represents mostly the mineral portion of the plant and the portion which comes from the soil, although a part of the ingredients withdrawn from the soil are volatilized during combustion. Nitrogen particularly is driven out completely. Ash is valuable to the animal, inasmuch as it furnishes material for bone, and some constituents of it, particularly the phosphoric acid and sulphur, are essential constituents of the animal cell.

Value of Ash: Ash is necessarily present in feeding stuffs. An excessive amount indicates contamination with dirt, sand, or other mineral matter. Too little ash in the ration feed may give rise to disorders, especially in young animals.

Water (moisture) is always contained in feeding stuffs, but since it is furnished for the most part in liquid form it cannot be considered as having any special nutritive value.

Value of Water: The more water a feeding stuff contains the less of the other nutrients it contains, and the more liable it is to be injured by heating, mold, and so forth. The water content of feed varies, being larger in fresh grain.

Enforcement of the Law.—Enforcement of the feeding stuff law is a matter of protection to the feeder against adulteration with low grade feeding stuffs, and affords protection to honest dealers and manufacturers of feeding stuff against dishonest competition. When a feeding stuff is adulterated it is by means of the introduction of cheaper or low-grade materials. There is a tendency on the part of some manufacturers to lower the feeding value of feeding stuffs, for the purpose of reducing the price of a given product. Feed inspectors travel continuously throughout the year, visiting all sections of the State, examining feeding stuffs for adulteration, false weights, untagged goods, and other violations; collecting information concerning feeding stuffs, giving information to the farmer, feeder and miller, and taking samples of feed-

ing stuffs offered for sale. The samples collected are forwarded to the Feed Control Service, at College Station, and submitted to the State Chemist, who is chemist to the Feed Control Service. They are then submitted to physical and chemical analysis. If physical analysis shows the presence of adulterants the manufacturer or importer is notified that registration is cancelled, and he is no longer permitted to offer this product for sale until properly registered and tagged. Prosecution often follows.

Inspection samples are analyzed in the order in which they are received in the office, the purpose of analysis being to verify the guarantee made by the manufacturer and to see that they maintain the standard adopted for such feeding stuffs.

Complaints: Upon receiving a complaint that the feed law is being violated a thorough investigation is made, often necessitating sending an inspector to see the complainant. The inspector gathers evidence, reports fully to headquarters, and such action is then taken as will give justice to both miller and consumer.

What Has Been Accomplished.—Some of the results of the feed law are as follows:

(1) It has placed the feeding stuff trade on such a basis that mixtures of corn chops, wheat bran, wheat shorts, cottonseed meal, and other products with corn bran, screenage, sweepings, cottonseed hulls and such materials, are now sold *for what they really are,* and not as pure corn chops, wheat bran, cottonseed meal, and so forth.

(2) It has equalized and promoted uniformity in the selling price of feeding stuffs.

(3) It has induced farmers and feeders to investigate the relative values of feeding stuffs, and has thus increased the sale of feeding stuffs of known value.

(4) It has prevented the sale of a number of worthless feeding stuffs.

(5) It has encouraged the manufacturers to maintain a high standard.

(6) It has prevented the shipment into the State of inferior feeding stuffs, barred from other States that have feeding stuff laws.

(7) It has prevented the sale of adulterated feeds as pure products.

Co-operation with the United States Department of Agriculture.—On March 9, 1912, the Director received a commission from the United States Department of Agriculture to collect samples of feeding stuffs and other products as defined in the Texas feeding stuffs law, which are manufactured or offered for sale in the District of Columbia or in any State or Territory of the United States, or which shall be offered for sale in unbroken packages in any State other than that in which they shall have been respectively manufactured or purchased, for examination under the direction or supervision of the Bureau of Chemistry, at Washington, D. C.

By means of this appointment the Director of the Experiment Station and his assistants are authorized to procure samples under the Federal Food and Drugs Act without the necessity of waiting, as previously, for

the services of a Federal inspector, and by this commission we are in a much better position to control interstate shipments and protect the purchaser who buys feeding stuffs manufactured outside of the State of Texas.

Relation to the Experiment Station.—The Texas Agricultural Experiment Station is carrying on investigations of the chemical composition, digestibility and nutritive values of feeding stuffs. It is also conducting feeding experiments at College Station, and at other points in the State. The Feed Control Service, therefore, is in the position to secure expert advice and assistance with respect to various problems arising under the operation of the law. The Veterinary Division of the Experiment Station, for example, has tested various feeding stuffs suspected of having caused the death of live stock by poisoning. The Division of Chemistry has made a study of the moisture in corn chops as related to the spoiling of this product—a matter which has caused great losses during years past, especially during the spring of 1912. The Division of Chemistry has also investigated and still has under investigation various methods for the examination of feeding stuffs with respect to adulteration. The connection with the Experiment Station is thus of advantage both to the Feed Control Service and to the Experiment Station. The Feed Control Service brings various problems to the attention of the Experiment Station which require solution.

Bulletins of the Feed Control Service are sent out by the Experiment Station from time to time. These publications are sent free upon application.

Educational Value of Feed Control Service.—When the feed law first went into effect in Texas most of the millers knew very little of the composition of feeding stuffs. Analyses were made for the purpose of complying with the law by chemists who had little knowledge of feeding stuffs, whatever their qualifications. The results of some of these analyses were very surprising indeed. The Feed Control Service thus had, in the beginning, considerable educational work to do among the manufacturers, supplying them with various information in regard to the law and the composition and nature of feeding stuffs. Many millers were not permitted to make guarantees which they could not possibly maintain. At the present time the manufacturers have become more or less familiar with the law, the chemical analyses of feeding stuffs and their significance, but there is much educational work to be done among the feeders. The feed Control Service, therefore, includes in its bulletins information concerning the protein, fat and other constituents of feeding stuffs, and other information concerning the nature and value of the various feeding stuffs, and endeavors to circulate its bulletins as widely as possible among the farmers and feeders of the State, so that they may have information concerning feeding stuffs in general, and the specific feeding stuffs in particular available in various markets of the State.

Standards and Definitions.—The law empowers the Director of the Experiment Station to adopt names, standards and definitions for feeding stuffs. He may refuse the registration of any feeding stuff under

a name which would be misleading as to the materials of which it is made, or which does not conform to the standards and definitions adopted. If a feeding stuff is registered and then discovered to be in violation of the standards and definitions adopted, the director has the power to cancel registration after ten days' notice.

Feeding stuffs cannot be sold under names that are false or misleading. Should the manufacturer desire to use a name not included in the list herein given, it will be well for him to correspond with the Feed Control Service before making application for registration.

The following standards and definitions have been adopted:

ALFALFA PRODUCTS.

Alfalfa Meal is the entire alfalfa hay finely ground, and must not contain an admixture of ground alfalfa straw or other foreign materials. It must contain not less than 12 per cent. of protein, 1 per cent. of fat, and not more than 28 per cent. of crude fiber.

CORN PRODUCTS.

Corn Chops consists of the pure grain of corn from sound seed and good quality, chopped. It must contain not less than 9 per cent, of protein, 3.50 per cent. of fat, and not more than 3 per cent. of crude fiber.

Earn Corn Chops is husked corn and cob chopped with not a greater proportion of cob than occurs in the ear corn in its natural state. It must contain not less than 8 per cent. of protein, 3 per cent. of fat, and not more than 8 per cent. of crude fiber. The percentages of grain and cob must be shown on the tax tag.

Ear Corn Meal corresponds to ear corn chops. The percentages of grain and cob must be shown on the tax tag.

Corn Bran is the outer covering of the corn grain, and must contain not less thon 8 per. cent. of protein, 3 per cent. of fat, and not more than 12 per cent. of crude fiber.

Hominy Feeds, Hominy Meal or Hominy Chops is a mixture of the bran coating, the germ and a part of the starchy portion of the corn kernel obtained in the manufacture of hominy grits for human consumption. It must contain not less than 10 per cent. of protein, 10 per cent. of fat, and not more than 7 per cent. of crude fiber.

Corn Feed Meal is the sifting obtained in the manufacture of cracked corn and table meal made from the whole grains. It must contain not less than 8 per cent. of protein, 3 per cent. of fat, and not more than 4 per cent. of crude fiber.

COTTONSEED PRODUCTS.

Cottonseed Meal is composed of the decorticated kernels of cottonseed, free from excess of hulls and other foreign materials. It must contain not less than 43 per cent. of protein, 7 per cent. of fat (not

less than 50 per cent. of protein and fat combined), and not more than 9 per cent. of crude fiber.

Prime Cottonseed Meal is composed of the decorticated kernels of cottonseed, free from excess of hulls and other foreign materials. Must be finely ground, of sweet odor, reasonably bright in color and must contain not less than 44 per cent. of protein, 7 per cent. of fat (not less than 51 per cent. of protein and fat combined), and *not more* than 9 per cent. of crude fiber.

Choice Cottonseed Meal is composed of the decorticated kernels of cottonseed, free from excess of hulls and other materials. Must be finely ground, of sweet odor, reasonably bright in color and must contain not less than 48 per cent. of protein, 7 per cent. of fat (not less than 55 per cent. of protein and fat combined), and *not more* than 9 per cent of crude fiber.

Cottonseed Cake should correspond to cottonseed meal in composition.

Cottonseed Meal and Hulls is any mixture of cottonseed meal and hulls containing not less than 9 per cent. and not more than 20 per cent. of crude fiber.

Mixed Cottonseed Meal and Hulls is any mixture of cottonseed meal and hulls containing not less than 20 per cent. and not more than 40 per cent. of crude fiber.

Cold Pressed Cottonseed is the product obtained by subjecting undecorticated cottonseed to the cold pressure process for the extraction of the oil, and includes the entire cottonseed, less the lint and oil extracted.

Ground Cold Pressed Cottonseed is cold pressed cottonseed, ground.

FETERITA PRODUCTS.

Feterita Chops consists of the entire grain removed from the head and chopped. It must contain not less than 11 per cent. of protein, 2.75 per cent. of fat, and not more than 3 per cent. of crude fiber.

Feterita Head Chops consists of the entire head, chopped. It must contain not less than 10 per cent. of protein, 2.75 per cent. of fat, and not more than 7.50 per cent. of crude fiber.

KAFIR PRODUCTS.

Kafir Chops consists of the entire grain removed from the head and chopped. It must contain not less than 9 per cent. of protein, 2.50 per cent. of fat, and not more than 3.50 per cent. of crude fiber.

Kafir Head Chops consists of the entire head chopped. It must contain not less than 8 per cent. of protein, 2.50 per cent. of fat, and not more than 8 per cent. of crude fiber.

MILO PRODUCTS.

Milo Chops consists of the entire grain removed from the head and chopped. It must contain not less than 9 per cent. of protein, 2.50 per cent. of fat, and not more than 3.50 per cent. of crude fiber.

Milo Head Chops consists of the entire head, chopped. It must contain not less than 8 per cent. of protein, 2.50 per cent. of fat, and not more than 8 per cent. of crude fiber.

RICE PRODUCTS.

Rice Bran is the cuticle of the rice grain, and must contain not less than 11 per cent. of protein, 10 per cent. of fat, and not more than 12 per cent. of crude fiber.

Rice Polish is the finely powdered material secured in polishing rice. It must contain not less than 11 per cent. of protein, 6 per cent. of fat, and not more than 4 per cent. of crude fiber.

SORGO PRODUCTS.

Sorgo Chops consists of the entire grain removed from the head and chopped. It must contain not less than 8 per cent. of protein, 2.50 per cent. of fat, and not more than 3 per cent. of crude fiber.

Sorgo Head Chops consists of the entire head chopped. It must contain not less than 8 per cent. of protein, 2.50 per cent. of fat, and not more than 8 per cent. of crude fiber.

WHEAT PRODUCTS.

Wheat Bran is the coarse outer coating of the wheat kernel as separated from cleaned and scoured wheat in the usual process of commercial milling, and must contain not less than 14.50 per cent. of protein, 3 per cent. of fat, and not more than 10 per cent. of crude fiber.

Wheat Bran and Screenings is the coarse outer coating of the wheat kernel as separated from cleaned and scoured wheat in the usual process of commercial milling plus the various impurities separated from the wheat during the cleaning process, and known collectively as *Screenings*, and must contain not less than 14.50 per cent. of protein, 3 per cent. of fat, and not more than 10 per cent. of crude fiber. This product must not contain more than 8 per cent. of screenings.

Standard Wheat Shorts is the fine particles of the outer bran, the inner of "be wing" bran, germ, and the offal or fibrous material obtained in the last reductions of middlings, and must contain not less than 15 per cent. of protein, 3.50 per cent. of fat, and not more than 5 per cent. of crude fiber.

Wheat Brown Shorts as compared with standard wheat shorts contain mostly the fine particles of bran and germ, and contain much less of fibrous offal obtained from the "tail of the mill," and must contain not

less than 15 per cent. of protein, 3.50 per cent. of fat, and not more than 6 per cent. of crude fiber.

Wheat White Shorts as compared with standard wheat shorts shall contain a smaller portion of the fine bran particles and germ and much greater portion of the fibrous offal from the "tail of the mill," and must contain not less than 14.50 per cent. of protein, 3 per cent. of fat, and not more than 3.50 per cent. of crude fiber.

If to any of the above brands of shorts there should be added, either ground or unground, bolted or unbolted, the various impurities separated from the wheat during the cleaning process and known collectively as Screenings, the same shall be registered, labeled, and sold as Wheat Shorts and Screenings, Wheat Brown Shorts and Screenings; or Wheat White Shorts and Screenings, as the case may be, and each must equal the guarantee required for the pure product.

Wheat Screenings shall consist of the smaller, imperfect grains, weed seeds and other foreign materials having a feeding value, separated in cleaning the grain. (Sand, dirt or other substances without feeding value must be eliminated from screenings before they are added to any feed.)

Recleaned Wheat Screenings shall consist of the smaller, imperfect grains of wheat after all weed seeds and other foreign materials have been removed.

The word *Screenings* shall appear as part of the label or brand name that is required, and shall be printed in the same size and face of type as the remainder of the label. For example, "WHEAT BRAN AND SCREENINGS," and not "WHEAT BRAN and screenings."

Wheat Mixed Feed shall consist of wheat bran and wheat shorts combined in the proportions obtained in the usual process of commercial milling, and must contain not less than 16 per cent. of protein, 3.50 per cent. of fat, and not more than 8.50 per cent. of crude fiber. The name of each ingredient, for example, wheat bran, wheat shorts, should also be given on the tag. (This feed has commonly been known as Mill Run or Mill Run Bran.)

Wheat Mixed Feed and Screenings shall consist of the wheat bran and wheat shorts to which have been added the various impurities separated from wheat during the cleaning process and known collectively as *Screenings*. The name of each ingredient—wheat bran, wheat shorts and wheat screenings—and the maximum percentage of screenings, which is 8 per cent., shall appear on the tag. This product must contain not less than 16 per cent. of protein, 3.50 per cent. of fat, and not more than 8.50 per cent. of crude fiber.

Wheat Chops is the entire berry of sound wheat, chopped. It must contain not less than 14 per cent. of protein, 2 per cent. of fat, and not more than 5 per cent. of crude fiber.

MIXED PRODUCTS.

Mixed Bran consists of a mixture of wheat bran and corn bran, or

rice bran. It must not contain any materials *not bran.* The composition must be shown on the tax tag.

Corn Bran and Wheat Bran or Wheat Bran and Corn Bran consists of a mixture of corn bran and wheat bran, and the composition must be shown on the tax tag.

Mixed Feed is a mixture of wholesome feeding stuffs. The name and percentage of each ingredient used in the feeding stuff must be stated in the registration. If corn cobs, ground hay, rice hulls, oat hulls, or similar materials are present in the feeding stuff, *the name of each ingredient,* and the *percentages of each ingredient must also be shown on the tax tag.*

Poultry Feed is a mixed feed, and is no exception to the names, definitions and standards set forth in this bulletin. If grit, oyster shell, charcoal or similar substances be added to this product, it must be shown in the name of the feed. For example, *"Poultry Feed With Grit."* Not more than 2 per cent. of grits or similar materials are permitted to be added to poultry feed.

Any other names must have the approval of the Feed Control Service.

ADULTERANTS.

Any feeding stuff which contains corn cobs, peanut hulls, rice hulls, oat hulls, chaff, ground hay or straw, roughage, or any other material of low feeding value, is considered as adulterated. The percentage of each ingredient of such adulterated feeding stuff must be stated on the registration form and on tags to be attached to such products.

GROUND RICE HULLS.

In many instances manufacturers in this and other States have been using ground rice hulls extensively as an ingredient in their various mixed feeds. We give below some facts concerning the feeding value of this material.

Dr. G. S. Fraps, State Chemist, and Chemist to the Experiment Station, has the following to say as to the feeding value of rice hulls:

"In view of the fact that rice hulls is now being used in some mixed feeds, it is well to call attention to its feeding value. Rice hulls contains about 0.3 digestible protein in 100 pounds, which is about one-tenth of the digestible protein in Johnson grass hay; about one-thirty-sixth of the quantity in wheat bran, and about one-one-hundred twentieth of the quantity in cottonseed meal. Ground rice hulls has a productive value of approximately 3.2 per cent. That is to say, 100 pounds of ground rice hulls fed to an animal receiving enough feed for maintenance will produce 3.2 pounds of fat. This is about two-fifths of the productive value of Johnson grass hay; one-fourth of the productive value of wheat bran, and one-sixth of the productive value of cottonseed meal. Rice hulls has a much lower feeding value than any hay, straw or fodder now being used for feeding purposes in the State of Texas. It can, in no sense, be regarded as a concentrated feeding

stuff; but, on the contrary, it is even inferior to the poorest roughage ordinarily used, such as rice straw, wheat straw, or corn cobs. For these reasons, rice hulls cannot be regarded as a very desirable addition to a mixed feed, as it acts chiefly as a filler and has very little feeding value."

Dr. W. A. Henry, formerly Dean of the College of Agriculture and Director of the Agricultural Experiment Station, University of Wisconsin, in his book entitled "Feeds and Feeding," says:

"The hulls of rice grains are tasteless, tough, and woody. They are also heavily charged with silica or sand, and have sharp, roughened flinty edges and needle-like points which do not soften in the digestive tracts, and so are irritating and dangerous to the walls of the stomach and intestines. The Louisiana Station reports cases of vomiting and death with cattle fed rice hulls. Rice hulls should never be fed to farm animals, yet they have been extensively employed by unscrupulous dealers for adulterating commercial feeding stuffs. Such use should be prohibited by law, since rice hulls in any form are worse than worthless."

In view of the foregoing statements, feeders should inform themselves as to the composition of all mixed feeds. This can be done by examining the tag attached, which gives the composition of all mixed feeds, and where an adulterant is present the percentages of all ingredients are given.

TENTATIVE GUARANTEE FOR A FEED.

The following table shows a tentative guarantee which may be used in registering feed stuffs with the Feed Control Service. The guarantees suggested below are based on actual analyses made by our Chemist during the past five years, and should be used by manufacturers in registering a given feed:

Name of Feedstuff.	Crude Protein not less than per cent.	Crude Fat not less than per cent.	Nitrogen-Free Extract not less than per cent.	Crude Fiber not more than per cent.
Alfalfa Meal	13.50	1.50	36.00	30.00
Barley Chops	11.00	1.50	65.00	6.00
Beet Molasses	9.00	.....	59.00	.....
Beet Pulp	0.75	.....	6.00	2.50
Blood Dried	84.00	2.50	.....	.....
Brewers' Grain, dried	24.00	6.00	40.00	18.00
Corn Bran	9.00	5.00	63.00	10.00
Corn Chops	9.50	3.50	70.00	3.00
Corn Cob	2.00	.50	54.00	31.00
Corn Feed Meal	9.00	4.00	67.00	4.00
Corn, Ear Chops	8.00	3.00	64.00	7.50
Corn, Ear Chops with Shuck	7.75	2.75	62.00	10.00
Corn Germ Meal	10.00	3.50	66.00	5.00
Cottonseed Cake	44.00	7.50	24.00	8.50
Cottonseed Chops	23.00	20.00	25.00	18.00
Cottonseed, Cold Pressed	26.00	7.00	28.00	26.00
Cottonseed, Cold Pressed (ground)	26.00	7.00	28.00	26.00
Cottonseed Hulls	3.00	.25	28.00	51.00
Cottonseed Meal	44.00	7.50	24.00	8.50
Feterita Chops	11.00	2.50	69.00	3.00
Feterita Head Chops	10.00	2.50	64.00	8.50
Hominy Feed	9.00	6.00	60.00	7.00
Kafir Chops	10.50	2.75	69.50	3.00
Kafir Head Chops	9.50	2.50	65.00	8.00
Linseed Meal, new process	33.00	3.00	38.00	10.00
Linseed Meal, old process	32.00	7.50	35.00	9.00
Meat Scraps	65.00	13.00	2.50	3.00
Meat Meal	65.00	13.00	2.50	3.00
Millet Seed	11.00	4.00	57.00	10.00

Name of Feedstuff.	Crude Protein not less than per cent.	Crude Fat not less than per cent.	Nitrogen-Free Extract not less than per cent.	Crude Fiber not more than per cent.
Milo Chops	10.00	2.50	71.00	3.00
Milo Head Chops	9.75	2.40	65.00	7.50
Molasses, black strap	2.40	.....	65.00	.....
Oats, ground	11.00	4.00	58.00	10.00
Oat Hulls	3.00	1.00	51.00	30.00
Peanut Cake, cold pressed	30.00	10.00	23.00	23.00
Peanut Meal	44.00	7.50	23.00	7.50
Rice Bran	12.00	11.00	42.00	12.00
Rice Polish	12.00	7.00	60.00	3.50
Rice, ground rough	7.00	1.75	63.00	10.00
Rice Hulls	3.00	.50	37.00	36.00
Rye Chops	10.00	1.50	72.00	2.00
Sorgo Chops	9.50	3.00	69.00	3.00
Sunflower Seed	16.00	21.00	21.00	30.00
Wheat Bran	15.00	3.50	54.00	9.00
Wheat Chops	15.00	2.00	65.00	3.50
Wheat Mixed Feed	16.00	3.60	55.00	8.00
Wheat Shorts, Standard	17.00	3.80	60.00	4.50

Tentative Guarantee for a Mixed Feed.—In order to arrive at a guarantee for a mixed feed, it is necessary that the percentage of each ingredient be known. For instance, a mixed feed is composed of 50 per cent. Corn Chops and 50 per cent. Wheat Bran. The percentage of Protein in Corn Chops is 9.00; thus 50 per cent. of this feed would be 4.50, and the percentage of Protein in Wheat Bran is 14.50; thus 50 per cent. of this feed would be 7.25; therefore, the percentage of Protein in the mixed feed would be 4.50 plus 7.25, or 11.75. This method may be continued throughout to find the different percentages for each content. In case more than two feeds enter into the mixture, the same procedure may be used in ascertaining a guarantee, only, of course, using the exact percentage of the different ingredients each time instead of 50 per cent., as above.

Redemption of Tags.—When tags are printed in error, or if for any reason not in correct form, they will be redeemed by the Feed Control Service at their full value less the original cost of the tags. In sending tags to us for redemption, you should make shipment by prepaid express, writing the Feed Control Service at the time you make the shipment, stating the number and denomination of tags you are sending and enclose express receipt.

Change in Name of Firm.—When the name of firm is changed in any way whatever it requires a new registration. A form must be filled out and a new sample sent to the Feed Control Service by prepaid express. Sample must be sent in a sealed glass jar.

Name of Millrun Bran Changed.—The term "Millrun Bran" in connection with registering this product is no longer permitted. The term "Wheat Mixed Feed" is now used to designate this product. When filling out registration forms for this product, please bear this in mind.

Name of Milo and Kafir Products Changed.—Because of the fact that the correct designation of Milo and Kafir products heretofore referred to as "Milo Maize" and "Kafir Corn" are "Milo" and "Kafir," one "f" has been dropped from the word "Kafir," and the words "corn" and

"maize" have been omitted from the two names. Manufacturers are requested to conform to these changes in the names of their Kafir and Milo products. Registrations are not permitted to read "Kafir *or* Milo"; they may, however, read "Kafir *and* Milo," and in this instance the feed referred to MUST contain both products.

PRICE LIST OF TAX TAGS.

5	pound tags	$ .25	per M
6¼	*pound tags*	*.31¼*	*per M*
8⅓	pound tags	.41⅔	per M
10	pound tags	.50	per M
12½	pound tags	.62½	per M

200	pound tags	10.00	per M

Inasmuch as no detailed publication of samples analyzed by the Feed Control Service was issued for the season of 1913-14, the following table showing the average contents of protein, fat, crude fiber, nitrogen-free extract, water and ash of samples analyzed during that time is given as a matter of information:

No. of Samples.	Name of Feedstuff.	Protein.	Fat.	Crude	Nitrogen-Free Extract.	Water.	Ash.
5	Alfalfa Meal	12.86	1.61	34.27	36.31	7.46	7.49
2	Barley Chops	12.30	1.40	4.83	70.01	8.69	2.77
1	Blood Meal	76.07	0.60	1.87	1.09	15.27	5.10
34	Cold Pressed Cottonseed	26.21	8.03	24.13	28.06	9.40	4.17
6	Corn Bran	10.44	6.27	8.26	63.14	9.76	2.13
148	Corn Chops	9.85	3.94	2.58	70.34	11.88	1.41
1	Corn Feed Meal	11.08	7.39	6.05	61.87	11.52	2.09
75	CottonSeed Cake	44.95	7.38	9.53	24.21	8.31	5.62
94	Cottonseed Meal	46.38	8.64	8.63	23.76	7.19	5.40
3	Dried Beet Pulp	9.36	0.59	16.08	59.04	10.25	4.68
4	Ear Corn Chops	9.13	3.29	9.45	66.16	10.46	1.51
1	Flax Seed Meal	28.41	30.43	18.41	11.76	7.01	3.98
1	Ground Oats	12.10	3.54	12.83	56.88	10.75	3.90
3	Hominy Feed	10.59	6.44	7.23	62.94	10.20	2.60
9	Kafir Chops	11.28	2.96	2.43	71.22	10.55	1.56
23	Milo Chops	10.78	2.92	2.63	70.88	11.03	1.76
8	Milo Head Chops	10.27	2.55	7.37	66.21	10.67	2.93
35	Rice Bran	12.02	10.11	11.72	43.77	11.47	10.92
22	Rice Polish	11.46	8.26	2.63	60.97	11.52	5.16

66	Wheat Shorts	17.39	3.99	4.08	61.19	10.05	3.30

ALPHABETICAL LIST OF MANUFACTURERS REGISTERED.

The following is an alphabetical list of all firms registered with the Feed Control Service. By noting the address of any given firm, then referring to the following pages showing the analyses, the different feeds manufactured by any registered firm may be found.

Aaron, T. M., Quail, Texas.
Abbott, E. C., Caldwell, Texas.
Abernathy, E. M., Lexington, Oklahoma.
Abilene Milling Company, Abilene, Kansas.
Acme Mill, Houston, Texas.
Acme Milling Company, Oklahoma City, Oklahoma.
Acme Roller Mills, Leonard, Texas.
Ada Milling Company, Ada, Oklahoma.
Aetna Mill & Elevator Company, Wellington, Kansas.
Ahrenbeck Mill & Manufacturing Company, Navasota, Texas.
Ahrenbeck Vehicle Company, Navasota, Texas.
Ainsa, M., & Sons, Inc., El Paso, Texas.
Alamo Oil & Refining Company, San Antonio, Texas.
Alexander Milling Company, Drummond, Oklahoma.
Alexander, S. T., Kingfisher, Oklahoma.
Alfalfa Meal & Milling Company, Cherokee, Oklahoma.
Alfalfa Milling Company, Byron, Oklahoma.
Alfalfa Milling Company, Hobart, Oklahoma.
Alice Cotton Oil Company, Alice, Texas.
Allen, E. A., Groesbeck, Texas.
Alliance Milling Company, Denton, Texas.
Alliance Rice & Milling Company, Houston, Texas.
Allneda Mills Company, East St. Louis, Missouri.
Allred, S. H., Hillsboro, Texas.
Alto Cotton Oil Company, Alto, Texas.
Altus Alfalfa Milling Company, Altus, Oklahoma.
Alva Roller Mills, Alva, Oklahoma.
Alvarado Cotton Oil Mill, Alvarado, Texas.
Alvin Mercantile Company, Alvin, Texas.
Amarillo Commercial Company, Amarillo, Texas.
Amarillo Mill & Elevator Company, Amarillo, Texas.
American Brewing Association, Houston, Texas.
American Alfalfa Food Company, Wichita, Kansas.
American Beet Sugar Company, Chino, California.
American Hominy Company, St. Joseph, Missouri.
American Seed Company, Fort Worth, Texas.
Amsler's, C., Estate, Hempstead, Texas.
Anardako Milling Company, Anadarko, Oklahoma.
Anaheim Sugar Company, Anaheim, California.
Anchor Mills, Waco, Texas.
Anderson, W. C., Winnsboro, Texas.
Anderson Brothers Roller Mills, Cleburne, Texas.
Anderson County Cotton Oil Company, Palestine, Texas.
Anderson & Hannah Mill Company, Sulphur, Oklahoma.
Andrews, W. A., & Sons, Necessity, Texas.

Anson Milling Company, Anson, Texas.
Apache Cotton Oil & Manufacturing Company, Chickasha, Oklahoma.
Apache Milling Company, Apache, Oklahoma.
Appleby, W. O., Carnegie, Oklahoma.
Arapaho Mill & Elevator Company, Arapaho, Oklahoma.
Ardmore Milling Company, Ardmore, Oklahoma.
Arendell & Son, Stephenville, Texas.
Archer Grain & Lumber Company, Purcell, Oklahoma.
Arhelger, G. A., San Saba, Texas.
Arizona Alfalfa Mill Company, Phoenix, Arizona.
Arkansas Milling Company, Denton, Texas.
Arkansas City Milling Company, Arkansas City, Kansas.
Arlington Light, Power, Ice & Water Company, Arlington, Texas.
Arkansas Cotton Oil Company, Texarkana, Arkansas.
Arkadelphia Milling Company, Arkadelphia, Arkansas.
Armengol, J., Laredo, Texas.
Armour Fertilizer Works, Fort Worth, Texas.
Arnold, H. G., Silverton, Texas.
Artesia Alfalfa Milling Company, Artesia, New Mexico.
Ashby & Sons, Leavenworth, Kansas.
Ash Grove Milling Company, Ash Grove, Missouri.
Athens Cotton Oil Company, Athens, Texas.
Atlantic Rice Mills Company, Beaumont, Texas.
Atlas Oats Company, Kansas City, Missouri.
Aubrey Milling Company, Aubrey, Texas.
Aunt Jemima Mills Company, St. Joseph, Missouri.
Aurora Milling Company, Aurora, Missouri.
Austin Oil Manufacturing Company, Austin, Texas.
Austin Mill & Grain Company, Brownwood, Texas.
Austwell Oil Mill, Austwell, Texas.
Axe, John, Humby, Texas.

Badge-Johnson Company, Burnet, Texas.
Bailey, S. J., Rule, Texas.
Baird Light & Ice Company, Baird, Texas.
Baker Bros., Prosper, Texas.
Baker, J. I., Gin & Mill Company, Purcell, Oklahoma.
Ballinger Cotton Oil Company, Ballinger, Texas.
Balzer Bros., Sagerton, Texas.
Balzer & Mehrhusen, La Grange, Texas.
Barnes, John R., Estelline, Texas.
Barteldes Seed Company, Oklahoma City, Oklahoma.
Bartlett Oil Mill, Bartlett, Texas.
Barton County Flour Mills, Great Bend, Kansas.
Barrett, C. W., & Son, Temple, Texas.
Barry Grain Company, Navasota, Texas.
Barry Milling Company, Barry, Texas.
Barwell, J. W., Waukegan, Illinois.
Bawden, D., & Son, Yukon, Oklahoma.
Bay City Rice Milling Company, Bay City, Texas.
Bay City Grain Company, Bay City, Texas.

Bean, Paul, Grain Company, Howe, Texas.
Beasley, D. C., Arthur City, Texas.
Beatrice Corn Mills, Lincoln, Nebraska.
Beatrice Milling Company, Whitewright, Texas.
Beaumont Rice Mills, Beaumont, Texas.
Becker & Company, Brenham, Texas.
Becker, John, Company, Belen, New Mexico.
Becker & Longenberg Milling Company, Republic, Missouri.
Beeville Cottonseed Oil Mill Company, Beeville, Texas.
Bellville Cotton Oil Company, Bellville, Texas.
Bell County Roller Mills Company, Belton, Texas.
Bell Grain Company, Crowell, Texas.
Bell & Gunning Milling Company, Webb City, Missouri.
Bells Mill & Grain Company, Bells, Texas.
Belton Mill & Grain Company, Belton, Texas.
Belton Oil Company, Belton, Texas.
Bennett, E. W., & Son, Fort Stockton, Texas.
Bennett, John W., Mart, Texas.
Bennett, S. J., Sunset, Texas.
Bennett-Sims Mill & Elevator Company, Clarendon, Texas.
Bennington Grain & Elevator Company, Bennington, Oklahoma.
Benson, T. L., Eldorado, Texas.
Bernheimer Marcus Flour Mills, Clinton, Missouri.
Berry, D. C., St. Jo, Texas.
Berry, J. W., Snyder, Texas.
Besterio, M., Brownsville, Texas.
Bewley Mills, Fort Worth, Texas.
Bias, R. B., Fuel Company, El Paso, Texas.
Binding-Stevens Grain Company, Tulsa, Oklahoma.
Binger Elevator Company, Binger, Oklahoma.
Bishop Manufacturing Company, Bishop, Texas.
Black, J. W., Justin, Texas.
Black & Braly, Leonard, Texas.
Black Bros., Beatrice, Nebraska.
Blackerby, J. M., Stanton, Texas.
Blair Elevator Company, Atchison, Kansas.
Blair Milling Company, Atchison, Kansas.
Blanco Milling Company, Blanco, Texas.

Zeiset, John, Harrold, Texas.
Zeiss Brothers, Brenham, Texas.

AVERAGE COMPOSITION OF CONCENTRATED COMMERCIAL FEEDING STUFFS.

Table I shows the average composition of the concentrated commercial feeding stuffs, the analyses of which are printed in this bulletin.

TABLE I.

AVERAGE CONTENT OF PROTEIN, FAT, CRUDE FIBER, NITROGEN-FREE EXTRACT, WATER AND ASH IN FEED CONTROL SAMPLES.

Number samples.	Name of Feedstuff.	Protein.	Crude Fat.	Crude Fiber.	Nitrogen-Free Extract.	Water.	Ash.
5	Alfalfa Meal	13.47	1.65	30.86	36.85	9.32	7.85
1	Beef Meal	57.23	6.14	6.86	4.61	6.37	18.79
3	Blood Meal	79.28	1.16	1.39	3.59	9.27	5.31
191	Corn Chops	9.83	4.09	2.42	70.49	11.76	1.41
19	Corn Bran	10.02	5.61	9.31	62.38	10.53	2.15
10	Corn Feed Meal	9.69	5.06	2.69	69.02	11.69	1.85
100	Cottonseed Cake	44.72	7.40	8.92	25.56	7.67	5.73
313	Cottonseed Meal	45.66	8.18	8.85	25.03	6.82	5.46
36	Cold Pressed Cottonseed	26.61	7.86	24.79	28.36	8.39	3.99
4	Cold Pressed Cottonseed (ground)	26.47	8.08	23.47	28.70	9.00	4.28
1	Digester Tankage	61.60	10.03	3.05	3.14	7.69	14.49
5	Ear Corn Chops	9.05	3.28	8.00	67.15	10.76	1.76
8	Feterita Chops	12.12	2.73	3.37	69.26	10.52	2.00
2	Feterita Head Chops	11.16	2.89	8.21	65.18	9.38	3.18
3	Ground Oats	13.15	4.79	9.88	59.52	9.17	3.49
5	Hominy Feed	10.79	6.90	6.93	62.61	10.01	2.76
16	Kafir Chops	12.33	3.07	2.21	68.21	12.30	1.88
2	Kafir Head Chops	9.31	2.78	8.24	66.92	9.60	3.15
135	Milo Chops	11.17	2.81	2.23	70.63	11.53	1.63
17	Milo Head Chops	10.60	2.48	6.17	66.48	11.07	3.20
1	Meat Meal	64.80	14.14	2.28	3.19	3.70	11.89
3	Meat Scraps	62.97	14.54	2.81	2.84	6.05	10.80
1	Peanut Meal	45.78	8.26	6.69	24.31	6.71	8.25
46	Rice Bran	12.65	11.75	13.54	41.27	10.23	10.56
22	Rice Polish	12.30	9.31	2.48	60.22	10.24	5.45
32	Wheat Bran	17.43	4.23	8.22	54.38	10.30	5.44
15	Wheat Mixed Feed	17.37	4.52	8.10	54.24	10.44	5.33
59	Wheat Shorts	17.92	4.08	3.95	61.26	9.58	3.21
5	Wheat Chops	15.90	1.97	3.52	65.17	10.66	2.78

It will be observed that some of the above averages are below the standard required by the Feed Control Service. This is explained by the fact that the samples analyzed include the inspectors' samples, many of which were found to be below the requirements.

FEED CONTROL SERVICE ANALYSES.

The following pages contain a detailed report of analyses completed during the season of 1914-15. Please note that this list is arranged alphabetically by towns, showing the names of all manufacturers alphabetically in each city or town. An alphabetical list of all firms registered is shown on pages 22 to 55 of this bulletin. Figures in *black face type* show wherein the manufacturer has not maintained his guarantee.

ACKNOWLEDGMENT.

The analytical work involved in the preparation of this bulletin was done under the direction of Dr. G. S. Fraps, State Chemist and Chemist to the Experiment Station.

TABLES OF ANALYSES

ABILENE, TEXAS.

No.	Name of Feed.	Name of Manufacturer.	Analysis.	Protein.	Fat.	Crude Fiber.	Nitrogen-Free Extract.	Ingredients.	Remarks.
586A	Cottonseed Meal	Continental Oil and Cotton Co.	Guarantee	43.00	7.00	9.00	24.00		
30W	Cottonseed Meal		Found	**42.83**	10.56	7.75	25.19		
586B	Cottonseed Cake		Guarantee	43.00	7.00	9.00	24.00		
586C	Coweta Mixed Feed		Guarantee	10.60	3.00	40.00	30.00	Cottonseed meal and hulls	
28W	Coweta Mixed Feed		Found	**5.07**	**1.73**	**45.81**	35.36	Cottonseed meal and hulls	Excess hulls.
29W	Coweta Mixed Feed		Found	**9.13**	**2.37**	**44.56**	32.36	Cottonseed meal and hulls	
1843A	Mixed Chicken Feed	L. D. Kenedy	Guarantee	9.00	4.00	3.00	70.00	Wheat, milo, corn, oyster shell	
1888A	Milo Chops	T. N. Ramsey	Guarantee	9.00	2.50	3.50	71.00		
1888A	Milo Chops		Found	11.61	2.89	2.67	**69.36**		
1888B	Milo Head Chops		Guarantee	8.50	2.50	7.50	66.00		
1888B	Milo Head Chops		Found	10.42	**2.15**	7.27	**65.85**		
1888C	Mixed Feed		Guarantee	13.00	3.00	6.00	62.00	Wheat bran, milo chops	
1888C	Mixed Feed		Found	14.99	3.73	5.43	**61.85**	Wheat bran, milo chops	Adulterated screenings.
1989A	Milo Chops	Gus Roberts Grain Co	Guarantee	9.00	2.50	3.00	70.00		
1989A	Milo Chops		Found	11.21	1.65	1.75	72.55		
1989B	Mixed Feed		Guarantee	14.00	2.00	6.00	50.00	Wheat bran and milo chops	
1989B	Mixed Feed		Found	**13.49**	3.15	4.73	65.27	Wheat bran and milo chops	
1972A	Milo Chops	Wiley Turner	Guarantee	10.00	2.50	3.00	70.50		
1972A	Milo Chops		Found	11.97	2.85	2.14	**69.60**		

ABILENE, KANSAS.

No.	Name of Feed.	Name of Manufacturer.	Analysis.	Protein.	Fat.	Crude Fiber.	Nitrogen-Free Extract.	Ingredients.	Remarks.

[Blank Page in Original Bulletin]

COPY OF LAW REGULATING SALE OF FEED STUFFS IN THE STATE OF TEXAS.

EFFECTIVE JULY 11, 1907.

An Act to amend Sections 1, 4, 5, 6 and 11, of Chapter 108, Acts of the Twenty-ninth Legislature, being an Act entitled "An Act regulating the sale of concentrated commercial feeding stuffs and the materials from which they are manufactured, defining concentrated feeding stuffs, prohibiting their adulteration, providing for their correct weighing and marking, and providing for the collection of samples, the expenses of the enforcement of the law, and fixing penalties for its violation," and to add thereto:

"Section 11A. Empowering the director of the Experiment Station to adopt standards and definitions for concentrated feeding stuffs and to refuse the registration of feeding stuff under certain circumstances, and to cancel registration under certain circumstances after notice, and to empower said director to adopt rules and regulations for the enforcement of all of the provisions of this act."

Be it enacted by the Legislature of the State of Texas:

SECTION 1. That Sections 1, 4, 5, 6 and 11, of Chapter 108, of the Twenty-ninth Legislature, entitled "An Act regulating the sale of concentrated commercial feeding stuffs and the materials from which they are manufactured, defining concentrated feeding stuffs, prohibiting their adulteration, providing for their correct weighing and marking and providing for the collection of samples, the expenses of the enforcement of the law and fixing penalties for its violation," be so amended as to hereafter read as follows, and that

Section 11A, empowering the director of the Experiment Station to adopt standards and definitions for concentrated feeding stuffs and to refuse the registration of feeding stuffs under certain circumstances and to cancel registration under certain circumstances after notice, and to empower said director to adopt rules and regulations for the enforcement of all the provisions of this act, be enacted so as to read as follows:

"SECTION 1. Every lot or parcel of concentrated feeding stuffs, as defined in Section 3 of this act, used for feeding farm live stock, sold, offered or exposed for sale in the State of Texas for use within this State, shall have printed on a tax tag, described in Section 5 of this act, a plainly printed statement clearly and truly certifying the number of net pounds of feeding stuff in the package, stating the name or names of materials of which such weight is composed where the contents are of a mixed nature, the name, brand or trade-mark under which the article is sold, the name and the address of the manufacturer or importer, the place of manufacture, such information as is required by Section 11, if any, and a chemical analysis stating the minimum percentages it contains of crude protein, allowing 1 per cent. of nitro-

gen to equal 6¼ per cent. of protein, of crude fat, of nitrogen-free extract, and the minimum percentage it contains of crude fiber; these constituents to be determined by the methods adopted at the time by the Association of Official Agricultural Chemists of the United States. Mill products hereinafter mentioned shall have the following standard weights, viz.: Flour, one hundred and ninety-six (196) pounds per barrel, or forty-eight (48) pounds per sack; corn meal, bolted or unbolted, thirty-five (35) pounds per sack; rice bran, one hundred and forty-three (143) pounds per sack; rice polish, two hundred (200) pounds per sack; and other feeds made from cereals of any kind, whether pure, mixed, or adulterated, one hundred (100) pounds per sack. Fractional barrels and sacks shall weigh in the same proportion, and these weights shall be net and exclusive of the barrel or sack in which said product is packed. Any person, firm or association of persons engaged in the manufacture of mill products of any character whatsoever, who shall use any bag, box, barrel or any other receptacle into which to put such product other than one bearing the name of such mill manufacturing the same, shall be guilty of a misdemeanor, and upon conviction therefor shall be fined in any sum from one hundred dollars to one thousand dollars, or in addition thereto be confined in the county jail for a term of thirty days, or both such fine and imprisonment."

SEC. 2. The term concentrated commercial feeding stuffs, as herein used, shall not include hay and straw, the whole seed or grains of wheat, barley, rye, oats, Indian corn, rice, buckwheat or broom corn, or any other whole or unground grains or seeds.

SEC. 3. The term concentrated feedstuffs, as herein used, shall include wheat bran, wheat shorts, linseed meals, cottonseed meals, pea meals, cocoanut meals, gluten meals, gluten feeds, maize feeds, starch feeds, sugar feeds, dried brewer's grains, malt sprouts, hominy feeds, ceraline feeds, rice meals, rice bran, rice polish, rice hulls, oat feeds, corn and oat chops, corn chops, ground beef, or mixed fish feeds, and all other materials of similar nature not included in Section 3 of this act.

SEC. 4. Before any concentrated feeding stuff, as defined in Section 3 of this act, is so offered or exposed for sale, the importer, manufacturer, and party who causes it to be sold or offered for sale within the State of Texas for use within this State shall, for each and every feedstuff bearing a distinguishing name and trade-mark, file with the director of the Texas Agricultural Experiment Station a certified copy of the statement named in Section 1 of this act, and shall also deposit with said director a sealed glass jar or bottle containing not less than one pound of the feeding stuff to be sold or offered for sale, accompanied by an affidavit that it is a fair average sample thereof and corresponds within reasonable limits to the feeding stuff which it represents in the percentage of protein, fat and crude fiber and nitrogen-free extract which it contains. This shall not be construed to apply to farmers who grind their own feedstuff and who do not adulterate same.

SEC. 5. The manufacturer, importer, agent or seller of each concentrated commercial feeding stuff, as defined in Section 3 of this act,

shall, before the article is offered for sale, pay to the director of the Texas Agricultural Experiment Station an inspection tax of 10 cents per ton for each ton of such concentrated feeding stuff sold or offered for sale in the State of Texas for use within this State, and shall affix to each lot shipped in bulk, and to each bag, barrel or other package of such concentrated feeding stuffs a tag to be furnished by said director stating that all charges specified in said section have been paid. The director of said Texas Agricultural Experiment Station is hereby empowered to prescribe the form of such tags and adopt such regulations as may be necessary for the enforcement of this law. Whenever the manufacturer, or importer or shipper of a concentrated feeding stuff shall have filed a statement made in Section 1 of this act, and have paid the inspection tax, no agent or seller of said manufacturer, importer or shipper, shall be required to file such statement or pay such tax. The amount of the inspection tax and penalties received by said director shall be paid into the State Treasury. So much of the inspection tax and penalties collected under this act shall be paid by the State Treasurer to the Treasurer of the Texas Agricultural and Mechanical College as the director of the Texas Agricultural Experiment Station may show by his bills has been expended in performing the duties required by this act, but in no case to exceed the amount of the inspection tax and penalties received by the State Treasurer under this act. Provided the excess, if any, for the next two years may be used as it accrues by the Board of Directors of the Agricultural and Mechanical College for the purpose of putting up a station administration building to provide the necessary offices and laboratory space, in order that the purposes of this act may be carried out.

SEC. 6. Any manufacturer, importer or agent selling, offering or exposing for sale any concentrated commercial feeding stuff as defined in Section 3 of this act, without the statement required by Section 1 and the tax required by Section 5 of this act, or with a label stating that said feeding stuff contains substantially a larger percentage of protein, fat or nitrogen-free extract, or a smaller quantity of crude fiber than is contained therein, and any person violating any other provisions of this act shall, on conviction in a court of competent jurisdiction, be fined not less than one hundred dollars nor more than five hundred dollars for the first conviction, and not less than five hundred dollars nor more than one thousand dollars for each subsequent conviction.

SEC. 7. Any person who shall counterfeit or use a counterfeit of the tag or tags prescribed by this act, knowing the same to be counterfeited, or who shall use them a second time after the said tags shall have once been attached, shall be guilty of a misdemeanor, and on conviction thereof shall be fined in a sum not exceeding five hundred dollars, one-half of which shall be paid to the informer; which fine may be doubled or tripled at each second or third conviction, and so on progressively for subsequent convictions.

SEC. 8. All manufacturers and importers of concentrated commercial feeding stuffs, or dealers in same, shall, when requested, furnish the director of the Texas Experiment Station with a complete list of names or trade-marks of such feeding stuffs.

SEC. 9. The director of the Texas Agricultural Experiment Station shall cause one analysis or more to be made annually of each concentrated commercial feeding stuff sold or offered for sale under the provisions of this act. Said director is hereby authorized in person, or by deputy, to take a sample not exceeding two pounds in weight for analysis from any lot or packages of concentrated commercial feeding stuffs which may be in the possession of any manufacturer, importer, agent, dealer or buyer in this State, but said sample shall be drawn or taken in the presence of said party or parties at interest or their representative, and shall be taken from a parcel, lot or number of parcels which shall not be less than 5 per cent of the whole lot inspected, and shall be thoroughly mixed and divided into two samples and placed in glass or metal vessels carefully sealed and label placed on each stating the name or brand of the feeding stuff or material sampled, and the name of the party from whose stock the sample is drawn and the date and place of taking such sample, and said label shall be signed by the director or his deputy and the party or parties at interest, or their representatives present at the taking and sealing of said sample; provided, that where the party or parties at interest refuse to be present and take part in the sampling of the said feedstuffs, the director or his deputies may take said samples in the presence of two disinterested witnesses, one of said duplicate samples shall be retained by the director and the other shall be left with the party whose stock was sampled, and the sample or samples retained by the director shall be for comparison with the certified statements made in Sections 1 and 4 of this act. The result of the analysis of the sample or samples so prescribed, together with such additional information as circumstances advise, shall be published in reports or bulletins by the Texas Agricultural and Mechanical College from time to time.

SEC. 10. The term importer for all purposes of this act shall be taken to mean all such persons as shall bring into or offer for sale within the State concentrated commercial feeding stuffs manufactured without this State.

SEC. 11. Any person manufacturing, selling or offering for sale any adulterated feeding stuff within this State, shall, upon conviction therefor, be punished by fine of not less than twenty-five dollars and not more than two hundred dollars, or be imprisoned in the county jail for a term of not less than thirty days and not more than sixty days, or by both such fine and imprisonment. For the purpose of this act a feeding stuff shall be deemed to be adulterated if it contains any sawdust, dirt, damaged feed, or any foreign matter whatever, or if it is in any respect not what it is represented to be, or if any rice hulls or chaff, peanut shells, corn cobs, oat hulls, or other similar substances of little or no feeding value are admixed therewith; provided, that no wholesome mixture of feeding stuff shall be deemed to be adulterated if the true percentage of constituents thereof is plainly and clearly stated on the package and made known to the purchaser at the time of the sale. It shall be the duty of the director of the Experiment Station to examine, or have examined for adulteration, all suspicious samples of feeding stuffs and such other samples as may be desirable.

SEC. 11a. The director of the Experiment Station is hereby em-

powered to adopt standards or definitions for concentrated feeding stuffs and such regulations as may be necessary for the enforcement of the law. The said director shall have the power to refuse the registration of any feeding stuff under a name which would be misleading as to the materials of which it is made up, or which does not conform to the standards and definitions aforesaid. Should any of said materials be registered and it is afterwards discovered that they are in violation of the above provisions, the said director shall have the power to cancel the registration ten days after notice. The director of the Texas Experiment Station is hereby empowered to adopt such regulations as may be necessary for the enforcement of all the provisions of this act.

SEC. 12. The fact that the present feedstuff law imposes a greater tax than is necessary for the enforcement of the provisions thereof and is indefinite and uncertain in some of its provisions, creates an emergency and an imperative public necessity that the constitutional rule requiring bills to be read on three several days be suspended, and that this act take effect from and after its passage, and it is so enacted.

(Note.—This law becomes effective July 11, 1907.)
