SALES, INCENTIVE PAYMENTS AND PRICES FOR TEXAS WOOL,
1956 MARKETING YEAR

R. L. Holland and L. P. Gabbard*

The National Wool Act of 1954 provided for an incentive payment for wool and mohair from April 1, 1955 to March 31, 1959. The incentive price is established for each marketing year at such levels as the Secretary of Agriculture deems necessary to encourage an annual production consistent with the declared policy of the law. The incentive level was established at 62 cents per pound for shorn wool for the marketing years 1955-56 and 1956-57. The marketing year runs from April 1 of one year through March 31 of the next year.

The shorn wool percentage rate of payment for the 1956 marketing year was 40.0 percent of the total gross proceeds received by the producer for his wool, less marketing deductions. No payment was made on mohair since the national average price received was in excess of the incentive level of 70 cents per pound.

A deduction was made of 1 cent per pound, grease basis, from each producer's shorn wool payment and 5 cents per hundredweight of the market price for lambs and yearlings sold for slaughter to develop and conduct advertising and sales promotion programs on a national basis for wool, sheep and lambs, and the products thereof.

According to the applications filed in the 1956 marketing year with the Texas office of Agricultural Stabilization and Conservation in connection with the incentive payment program, 237 Texas counties sold some wool under the program, as shown in the following county tabulations. Sales ranged from less than 100 to more than 2,500,000 pounds per county. Sales in 15 counties were more than 1,000,000 pounds each. Growers did not make applications under the program in 17 Texas counties.

Some 21,114 applications were filed in 1956, an average of nearly 89 per county. The number of applications ranged from 1 to more than 1,000 per county. The average number of pounds per application was 2,120.

Texas wool growers received more than \$7,700,000 through the incentive payment program on shorn wool for the 1956 marketing year. The net sales on which incentive payments were made, gross sales minus marketing costs, amounted to \$20,300,000. The two items totaled slightly more than \$28,000,000.

The incentive payment program on unshorn lambs brought slightly more than \$627,000 to Texas wool producers.

Texas producers contributed almost \$500,000 to the promotional program on wool, sheep and lambs, and the products thereof.

*Respectively, cooperative agent, Market Research Division, Agricultural Marketing Service, U. S. Department of Agriculture; and professor, Department of Agricultural Economics and Sociology, Texas Agricultural Experiment Station.

The average price received for wool in Texas in 1956 before incentive payments was 45.6 cents per pound; the incentive payment paid averaged 17 cents per pound in 1956, making a total of 62.8 cents per pound. Prices during the 1955 marketing year to Texas producers were 43.2 and 61.6 cents per pound, respectively.

Wide variations in prices paid exist among Texas counties. In 1956, the lowest average price, including incentive payments, was near 25.0 cents per pound and the highest near 75.0 cents per pound. No significant differences exist in high and low county average prices between the 1955 and 1956 marketing years.

These variations exist for several reasons. The most important is due to differences in shrinkage, but closely associated with it are the amount and type of vegetable matter present. The quality of wool grown in different areas accounts for some of the variation. The most important of the quality factors affecting prices are fineness and length of staple. Differences in price also are noted when sales are completed at different times of the year.
