

TEXAS AGRICULTURAL EXTENSION SERVICE J. E. Hutchison, Director, College Station. Texas

Commercial Vegetable Varieties for Texas

EACH FIELD OPERATION in producing high yields of quality vegetables is costly. Hence, it is imperative that Texas vegetable growers select and plant the best adapted varieties to assure maximum returns from all practices including soil preparation, fertilizing, planting, control of weeds, insects and diseases, irrigating and harvesting.

Vegetable workers of the Texas Agricultural Experiment Station and Texas Agricultural Extension Service have compiled the revised list of recommended varieties. Recommendations were based on the results of research tests and/or field observations. The ability of each variety to withstand shipment to distant markets was a primary consideration.

Vegetable	Fresh Market	Processing
Bean, Bush	Contender Resistant Asgrow Valentine	Pearl Green Topcrop Topmost
Bean, Pinto	Varieties available locally.	
Bean, Pole	Ky 191 Ky Wonder	Stringless Blue Lake
Beet	Detroit Dark Red Asgrow Wonder Green Top Bunching	Detroit Dark Red
Broccoli	Waltham 29	Waltham 29
Cabbage	Globe yr Marion Market yr Greenback yr Wisconsin Ballhead Improved yr	Globe yr
	(Red) Red Acre (Savoy) Drumhead	

¹Research and Extension personnel are grateful to representatives of the Texas Seedsmen's Association for their assistance in compiling this revised list of recommended varieties.
