Introduction to Research

Data Management

Working collaboratively
Workshops

1. Build an overview
2. Collect and document data
3. Store digital data
4. Work with data
5. Share and preserve data
6. Plan ahead
Introduction

Goal: introduce a useful tool for working collaboratively on projects.
Open Science Framework

- Cloud-based tools for collaborative research projects.
- Document and permissions management.
- Integration with third-party services.
