PRT Pre-Observation Form

Instructor:                                                                 | Course Name: |
Date of Scheduled Observation:                                               | PRT Observer: |

Instructions:
- Instructor should provide the syllabus and pertinent session material(s) to the Observer to provide context for the upcoming observation.
- Instructor should complete the following questions and submit to the Observer prior to the upcoming observation.

1. What are the goals for this observation? This may include learning outcomes.

2. What is the plan for achieving your goals?
3. What teaching and active learning strategies will be used (e.g., small group discussion, case-review facilitation)?

4. How have students been asked to prepare for the upcoming session?

5. On what specific aspects of your teaching would you like the PRT Observer to focus?

6. What additional information, if any, should the PRT Observer know before the observation?
