

## SURVEY RESULTS

# Medication Safety Fair

Presented by Merlyn Joseph, PharmD  
Texas A&M University

# Today's Presentation

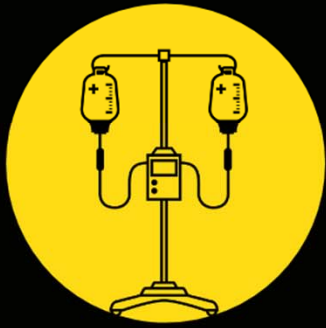

## **DISCUSSION POINTS**

What topics were discussed on the survey?

Who did we survey?

What did we find?

# Survey Topics

Alaris Pump Use

## ALARIS PUMP USE

The "Basic Infusion" profile in Alaris should be selected when programming the pump to run IV fluids.

*False*

## Survey Questions

## HIGH RISK MEDICATIONS

Which of these high alert medications requires an independent double-check by a charge-capable nurse?

*Heparin infusions*

## Survey Questions

# Survey Characteristics

## WHO WAS SURVEYED?

IRB approved survey included nurses at MHMC who completed pre- and post-surveys.

# Baseline characteristics

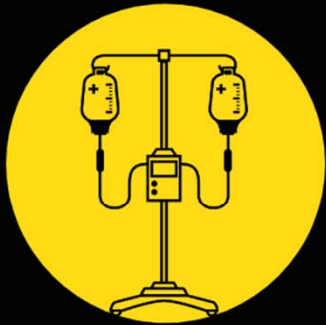

## # OF NURSES

79 nurses completed the pre- and post- survey  
(75% response rate)

# How did we do?

## SURVEY SUMMARY

### Alaris Pump Use

Pre: 41.8%

Post: 59.5%

$p=0.001$

# Discussion

#1

Statistically significant improvement in nurses' knowledge in 4 of the 5 medication safety areas.

## Summary

Continued education needed to ensure 100% of our nurses follow safe medication practices, especially with high-risk medications.
