INTRODUCTION

SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX is an annual publication designed to identify and provide bibliographic access to science fiction and fantasy book reviews, and to other books of potential interest to students and readers of science fiction and fantasy. To achieve that goal, most of the commercial science fiction and fantasy magazines are indexed comprehensively. The few exceptions are primarily the exclusively reprint magazines which do not carry book reviews. In addition, certain amateur publications (fanzines) are comprehensively indexed for science fiction and fantasy book reviews. Choice of fanzines for inclusion is based on such factors as quality of reviewing and availability of the fanzine. Finally, a number of general magazines and library-oriented magazines are indexed selectively. In this context, "selectively" indicates that all science fiction and related reviews are from each issue of the magazine are cited. Since not all general and library-oriented magazines could be covered, titles were chosen primarily for high density of reviews per issue, or because the quality of the reviews was particularly high. In all categories, the editor will welcome suggestions for additional magazine titles to be indexed. A directory of magazines regularly indexed is provided in each volume. Reviews from magazines other than those listed in the directory are sometimes included. Such items are cited as they are found to make them accessible to the user, even though the magazines are not regularly covered.

SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX covers all levels of books, from children's fantasy through technical books, which were reviewed in the source journals. History and criticism, bibliography, and reference works on science fiction and fantasy are indexed in **SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX**. Reviews of this type of material are cited wherever found, even though the magazine may not be regularly covered. Technical books and popularized science books are sometimes cited, if, in the opinion of the editor, the books are of potential interest to index users.

SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX is divided into two sections. The first section is an alphabetical listing by author. Multiple titles by a single author are alphabetized by book title following the author's name. Author's names are most frequently cited as they were given in the reviewing source; few pseudonym cross-references are provided in annual volumes. In the case of obvious errors, a correction has been made, with the correction verified through some reliable source. Citations in the author section consist of the following items, which appear in the citation in the order listed: author; title and subtitle; imprint; source journal; volume number and issue number, or whole number; pagination of review; date of review; reviewer (if identified). Full bibliographic data on the books is not verified in the annual volumes of **SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX**; this data is presented as supplied by the source journals. Users should be aware that the bibliographic data is given in source journals is sometimes inaccurate. The second section is a title index to the books reviewed. The title index is truncated, with subtitles omitted unless essential to identify the book. Index users are referred to the author's name, or alerted that the item is a title entry. In the case of co-authors or co-editors, only the name of the person under whose name the book is filed is given in the title index. Entries in the author section are filed under the first author's name. Abbreviations such as "Dr." are filed as if they were spelled out in full, as "Doctor." Numbers are filed as if spelled out. One exception is that of serial items, such as Orbit 1, Orbit 2, etc., which are filed in numerical order.

SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX annuals provide the most accurate information possible, but are limited by the degree of accuracy provided in the source journals. When conflicting data is noted, the material is verified, and correct data is provided. Since some journals carry prepublication reviews, there is the possibility of blind entries, resulting from the either from the nonpublication of an announced book, or from a last-minute title change on the part of the publisher. The editor would be grateful for any corrections or additions to this index, to improve the accuracy of future cumulations.

SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX Volume 19, 1988, provides access to 4739 reviews of 2192 books. The complete file of **SCIENCE FICTION AND FANTASY BOOK REVIEW INDEX**, covering the years 1923 through 1987, provides access to over 52,598 book reviews.
