BACK ISSUES

Volumes 1-4 of SFBRU are included in the cumulative volume published by Gale Research Company, titled SCIENCE FICTION BOOK REVIEW INDEX, 1923-1973, available from Gale Research for $45.00. Volumes 1-4 have been out-of-print for several years, and will not be reprinted because of their inclusion in the cumulated volume. For those few people who want the annual volumes, photocopies will be supplied at the prices noted below.

INTRODUCTION

SCIENCE FICTION BOOK REVIEW INDEX is an annual publication designed to identify and provide bibliographic access to science fiction and fantasy book reviews, and to other books of potential interest to students and readers of science fiction and fantasy. To achieve that goal, most of the commercial science fiction and fantasy magazines are indexed comprehensively. The few exceptions are the exclusively reprint magazines which do not carry book reviews. In addition, certain amateur publications (fanzines) are comprehensively indexed for science fiction and fantasy book reviews. Choice of fanzines for inclusion is based on such factors as quality of reviewing, and availability of the fanzine. Finally, a number of general magazines and library-oriented magazines are indexed selectively. In this context, "selectively" indicates that all science fiction and related reviews from each issue of the magazine are cited. Since not all general and library-oriented magazines could be covered, titles were chosen primarily for high density of reviews per issue, or because the quality of the reviews was particularly high. In all categories, the editor will welcome suggestions for additional magazine titles to be indexed. A directory of magazines regularly indexed is provided in each volume.

SFBRi covers all levels of books, from children's fantasy through technical books, which are reviewed in the source journals. History and criticism, bibliography, and reference works on science fiction are indexed in SFBRi. Reviews of this type are also cited wherever found, even though the magazine carrying the review is not normally indexed in SFBRi. The inclusion of such citations does not imply that SFBRi gives access to all science fiction material reviewed in those titles. Technical books and popularized science books are sometimes cited, if, in the opinion of the editor, they are of potential interest to index users.

SFBRi is divided into two sections. Section I is an alphabetical listing by author. Multiple titles by a single author are alphabetized by book title following the author's name. Author's names are cited as they were given in the reviewing source; no pseudonym cross-references are provided in annual volumes. In the case of obvious errors, a correction has been made, with the correction verified through some reliable source. Citations in the author section consist of the following items, which appear in the citation in the order listed: author; title and subtitle; publisher; source journal, volume number and issue number, or whole number; pagination of review; date of review; reviewer (if identified). Citations to the source journals are abbreviated, following standard abbreviations wherever possible. Full bibliographic data on the books is not provided in the annual SFBRi volumes; this data will be added in cumulated volumes, which will continue to update SFBRi: SCIENCE FICTION BOOK REVIEW INDEX 1923-1973, and will match the data found in that volume.

Section II is a title index to the books reviewed. The title index is truncated, with subtitles omitted unless essential to identify the book. Index users are referred to the author's name. In the case of co-authors or co-editors, only the person under whose name the book is filed is given in the title index.

Entries in the author section are filed under the first author's name. Co-authors are disregarded in filing. Abbreviations such as "Dr." are filed as if they were spelled out in full, as "Doctor." Likewise, numbers are filed as if spelled out. One exception must be noted here. Serial publications, such as Orbit 1, Orbit 2, etc., are filed in proper numerical order, rather than by number spelled out.

SFBRi annuals are not designed to be accurate bibliographic records of books cited, although every effort is made to correct errors. Almost every author and title entry is derived from secondary sources, and errors may be carried over to this index. Also, since some of the journals indexed carry pre-publication reviews, there is always the possibility of a blind entry, resulting either from nonpublication of the book, or from a last-minute title change on the part of the publisher. The editor would be grateful for any additions or corrections to this index, to improve the accuracy of future cumulations.

SFBRi Volume 8, 1977, provides access to 2605 reviews of 1495 books.
