ACKNOWLEDGMENTS

I would like to thank the faculty and staff of the Texas A&M University Department of Entomology, my co-chairs Drs. Roger E. Gold and Jeffery K. Tomberlin. Thank you to the other members of my committee, Drs. James W. Austin and Leon H. Russell, who provided invaluable input and information. Thank you all for your support, advice, and wisdom through the development and completion of this idea. To my fellow graduate students in the Center for Urban Structural Entomology and F.L.I.E.S. lab, I thank you for the support, feedback, and technical advice throughout this project.

Without y’all this research may not have come to fruition and my sanity may have gone off the deep end in the process. Thank you. A special thanks to Dr. Jimmy K. Olson whom through the past two years has become a mentor and friend. I can not truly express how much I appreciate you pushing me to become a better student and person through my academic and personal trials and tribulations.

Finally, I would like to thank my family, my dad, mom, sisters, and brother for being there when needed and knowing the encouragement I needed to finish what they knew I could accomplish. Also, thank you to the faculty and staff at the Texas Veterinary Medical Diagnostic Laboratory at Texas A&M University, including my sister-in-law, for their technical advice, assistance in plating techniques, and bacteria identification. Last but not least I would like to thank the person who kept it all in perspective throughout the years. During the writing process you would always humor me. Thank you for the love, encouragement, and support you have shown.
