Mississippi River	2.2 – 16.9	5.7	[9, 26-28]
United States Rivers	0.5 – 212	10.7	[8, 9, 26-29]
United States South Coast Rivers	5.5 – 212	16.6	[26]
Surface seawater, Gulf of Mexico	–	500	[8, 29]
Seawater, North Atlantic	354 – 512	440	[20]
Seawater, Arabian Sea	545 – 945 ^a	545	[30]
Seawater, specific iodine (total iodine normalized to salinity) (nM/ ^o /oo)	12.7 – 14.9	~13	[19, 24, 30, 31, this work]

^aValues (> 545 nM) in excess of specific iodine in this study are attributed to lateral transport of iodide diffusing out from margin sediments [30]. ^bTotal iodine refers to total inorganic iodine in most previous studies; see discussion in text.
