

Livestock Safety

Uel D. Thompson, Extension Animal Husbandman
And

F. I. Dahlberg, Professor, Animal Husbandry Department
Texas A. & M. College System

I'm all set to cause injury to man and animal. Please let me stay here so I can beat you out of that profit! You don't care if I cripple you or your cow and cause blood poisoning, do you?

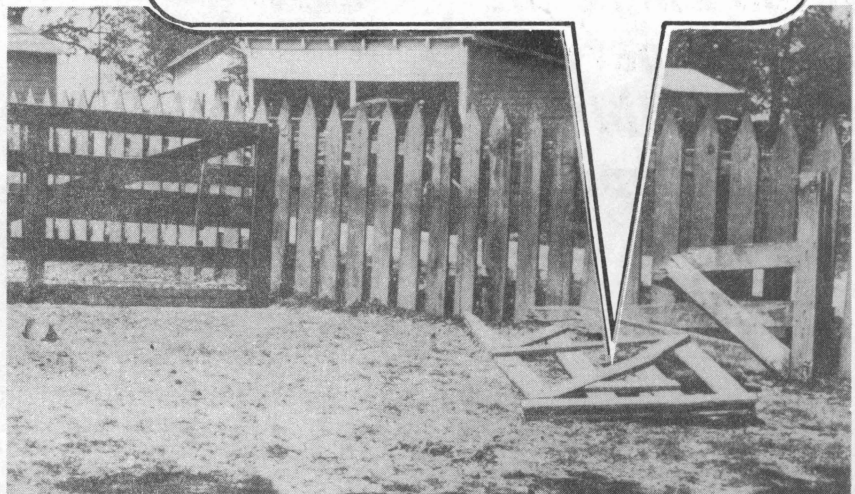

**Pick 'em up
and
Burn 'em.**

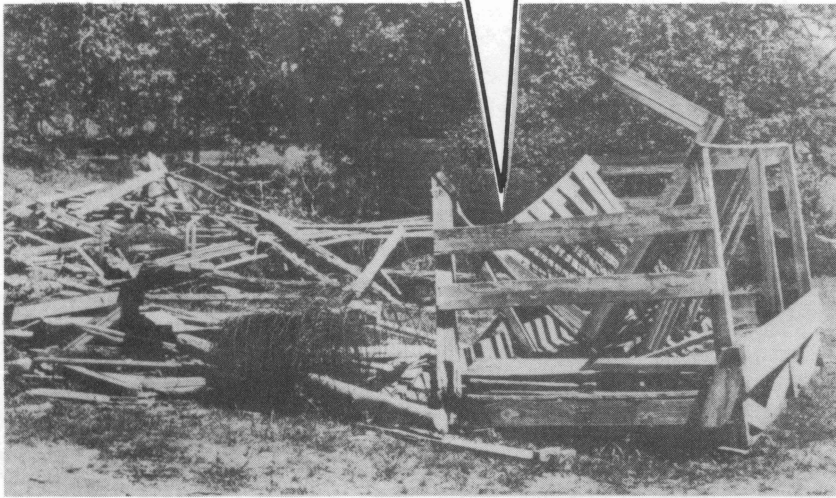

I couldn't be in a better position to tackle anything that comes through that gate. Since beef is worth so much this might be a good place to reduce the profits to the producers.

**Tear apart-
save
the good.**

I'm a feed bunk and used to make money for my master. Now, I have a chance to get some of it back. If he will just leave me here with the rest of this junk to snag some of the animals I'm sure I'll get even with him.

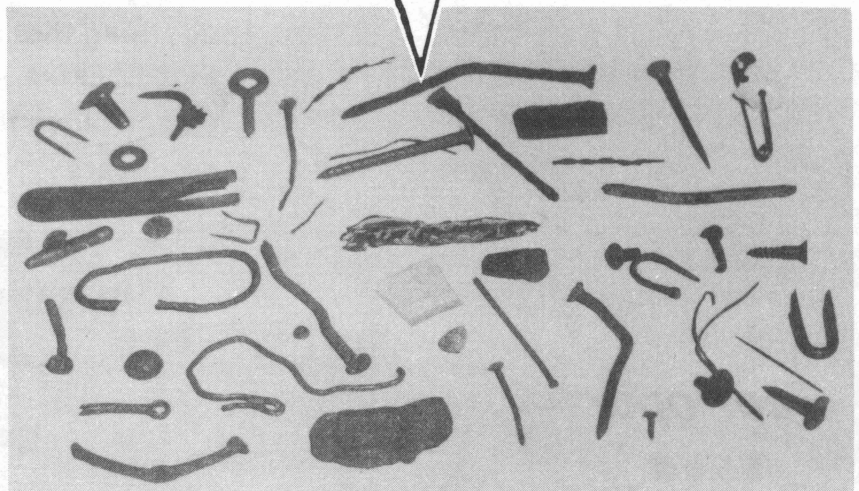

***Burn the trash.
Provide for a
protected
scrap yard.***

We were removed from the stomach of cattle at the A. & M. College Veterinary Hospital. In a good many cases we actually kill 'em.

***Don't leave your
watch where the
cow can get it;
she may think
it is an appetizer.***

TEXAS AGRICULTURAL EXTENSION SERVICE

G. G. GIBSON, DIRECTOR, COLLEGE STATION, TEXAS
