

YOU CAN HELP WIN THE WAR

# STOP

## Heat Damage and Egg Losses

- The internal temperature of a fresh laid egg is 106 degrees F.
- Eggs should be gathered often to allow them to cool.
- Iceless refrigerator reduces egg temperature and checks evaporation.

## BLITZ the Heat

- Gather eggs three times daily.
- Hold in wire baskets for cooling.
- Market at least twice each week.
- Remember: It's patriotic and profitable to eliminate egg waste.
