January 15, 2014

As we expected:

- Title I and IDEA – FY 2013 sequester cuts restored and future threats removed
- About \$2 billion of previously carried over in Title I district reserves to create large purchasing cycle February-June
- Four SIG intervention models expanded to include whole school reform partnership model and promising alternatives recommended by states
- Head Start/Early Childhood – biggest winner \$1 billion restore cuts and \$500 million for Early Head Start/childcare partnerships

More to come after expected passage by Congress and signature by President next week.
