Local Market and Home Garden Vegetable Varieties

LOCAL MARKET AND HOME GARDENERS frequently are misled by advertisements of vegetable varieties. Varieties adapted to other areas of the United States may not be suitable in Texas. Hence, only varieties which have been shown to be adapted to Texas conditions should be planted.

The following list of recommended varieties for local market and home gardeners was compiled by vegetable workers of the Texas Agricultural Experiment Station and Texas Agricultural Extension Service.¹ Decisions were based on recent research results and field observations.

Bean, bush

Contender
Top Crop*
Asgrow Resistant Valentine*
Cherokee Wax
Choctow (Lower Rio Grande Valley)

Bean, pinto

U. I. 111
Columbia
U. S. #5
