Research Methods in Science and Technology Journalism

VIBS 658-600—Spring 2020
Mondays 8:45-11:30 am, VIDI 208

Instructor: Yasha Hartberg, PhD
Office: VIDI 394, (979) 458-7816
yhartberg@cvm.tamu.edu

Office hours: Whenever my door is open or by appointment. To set up an appointment, first consult the link on the eCampus course homepage. If none of the times listed work, then please email me to see what other times I might be available.

Syllabus & Course Policies

Welcome to VIBS 658! As the title suggests, this is a methods course. I know that many of you come into this class with some research experience. For most of you, though, that experience is in disciplines far afield from Science and Technology Journalism. Some of the specific goals for this course, then, are to increase your ability to:

- Understand research methods commonly used in journalism, communication, and other related fields
- Evaluate research on science and technology journalism
- Perform research in science and technology journalism, both in academic and private sector settings
- Think critically about all research, regardless of the field

No single course could hope to cover every methodology employed by researchers in any field, nor will we cover any single method in enough depth that you could apply it with confidence in your own research. The hope, rather, is that this class will provide you with a conceptual toolkit, an inventory of methods to consider as you move forward with your work.

We will spend significant time this semester delving into the primary literature in science and technology journalism research. Not only will this help you see how the methods we discuss have been applied to answer research questions, it will also give you a broader perspective on what kinds of problems the field engages. This should prove valuable for those of you considering the thesis option for Science and Technology Journalism. For those of you thinking of the internship option, a greater understanding of research methods will help you to write more effectively about scientific and technological developments.
We will pursue these goals largely through readings and in class discussions. As such, it is expected that you attend class each week, that you complete assigned readings before arriving, and that you actively participate. Most of our readings will come from two required sources:

- *Naked Statistics: Stripping the Dread from the Data*, by Charles Wheelan

Note that *Mass Media Research* is an insanely expensive book to purchase new, especially considering its flimsy binding and poor page quality. I therefore strongly recommend that you find a used copy, which can usually be found readily online for far less. You would probably also be fine using an older edition of the book.

**Grading**

Your grade in VIBS 658 will come from a combination of writing assignments, literature searches, and class participation. Due dates for assignments will be announced in class and on eCampus. The contributions of the various components to your final grade will be as follows:

- Writing assignments: 40%
- Literature searches: 35%
- Participation: 15%

**Attendance and Punctuality**

Much of the substantive content in VIBS 657 comes about through in class discussions, presentations, and activities. Therefore, it’s important that you attend each class unless you have a university approved excuse or otherwise make arrangements with the instructor in advance. It is also important that you arrive on time. Not only is this a professional courtesy, course activities are often planned with a specific number of students in mind. Showing up late or not at all can significantly affect the class dynamic. Keep in mind that parking near VENI is extremely limited. That will not change as the semester progresses so you need to plan accordingly. Arriving late or having an excessive number of unexcused absences will negatively impact your attendance grade in VIBS 657.
A note about my grading philosophy

You are all graduate students with proven records of excellent academic achievement. You wouldn’t be in your program if you weren’t. I therefore expect “A” quality work from each of you and I start with the assumption that you will perform to those expectations. I see no reason, then, to fret about numerical grades in graduate classes. Instead, each of your graded assignments will receive one of three marks:

√ Your work meets my expectations for excellent, graduate level performance

√+ Your work exceeds my expectations in some way

√- Your work doesn’t meet my expectations

Note that the most frequent reason students have received a check minus in previous semesters is because they neglected to address some key element asked for in the writing prompt, so please read prompts carefully. Your final grade for each course component, then, will be determined by the balance of checks on all assignments. If that balance comes out as checks or better, you’ll receive an A for the class.

Schedule

There is not a set schedule for VIBS 658. I will assign readings each week that you’re expected to complete before coming to class. Prompts for assignments will be given in class and posted to eCampus.

Academic Integrity Statement

As the Aggie Honor Code states, “An Aggie does not lie, cheat, or steal or tolerate those who do.” It is expected that you will neither give nor receive unauthorized aid on work in this course. All writing for this course must be your original work. For Texas A&M Honor Council Rules and Procedures, please see http://aggiehonor.tamu.edu.

The Americans with Disabilities Act

Texas A&M University is committed to providing equitable access to learning opportunities for all students. If you experience barriers to your education due to a disability or think you may have a disability, please contact Disability Resources in the Student Services Building or at (979) 845-1637 or visit http://disability.tamu.edu. Disabilities may include, but are not limited to attentional, learning, mental health, sensory, physical, or chronic health conditions. All students are encouraged to discuss their disability related needs with Disability Resources and their instructors as soon as possible.

The Americans with Disabilities Act

Texas A&M University is committed to providing equitable access to learning opportunities for all students. If you experience barriers to your education due to a disability or think you may have a disability, please contact Disability Resources in the Student Services Building or at (979) 845-1637 or visit http://disability.tamu.edu. Disabilities may include, but are not limited to attentional, learning, mental health, sensory, physical, or chronic health conditions. All students are encouraged to discuss their disability related needs with Disability Resources and their instructors as soon as possible.
Research Methods in Science and Technology Journalism

VIBS 658-600 — Spring 2020
Mondays 8:45-11:30 am, VIDI 208

Instructor: Yasha Hartberg, PhD
Office: VIDI 394, (979) 458-7816
yhartberg@cvm.tamu.edu

Office hours: Whenever my door is open or by appointment. To set up an appointment, first consult the link on the eCampus course homepage. If none of the times listed work, then please email me to see what other times I might be available.

Syllabus & Course Policies

Welcome to VIBS 658! As the title suggests, this is a methods course. I know that many of you come into this class with some research experience. For most of you, though, that experience is in disciplines far afield from Science and Technology Journalism. Some of the specific goals for this course, then, are to increase your ability to:

- Understand research methods commonly used in journalism, communication, and other related fields
- Evaluate research on science and technology journalism
- Perform research in science and technology journalism, both in academic and private sector settings
- Think critically about all research, regardless of the field

No single course could hope to cover every methodology employed by researchers in any field, nor will we cover any single method in enough depth that you could apply it with confidence in your own research. The hope, rather, is that this class will provide you with a conceptual toolkit, an inventory of methods to consider as you move forward with your work.

We will spend significant time this semester delving into the primary literature in science and technology journalism research. Not only will this help you see how the methods we discuss have been applied to answer research questions, it will also give you a broader perspective on what kinds of problems the field engages. This should prove valuable for those of you considering the thesis option for Science and Technology Journalism. For those of you thinking of the internship option, a greater understanding of research methods will help you to write more effectively about scientific and technological developments.
We will pursue these goals largely through readings and in class discussions. As such, it is expected that you attend class each week, that you complete assigned readings before arriving, and that you actively participate. Most of our readings will come from two required sources:

- *Naked Statistics: Stripping the Dread from the Data*, by Charles Wheelan

Note that *Mass Media Research* is an insanely expensive book to purchase new, especially considering its flimsy binding and poor page quality. I therefore strongly recommend that you find a used copy, which can usually be found readily online for far less. You would probably also be fine using an older edition of the book.

**Grading**

Your grade in VIBS 658 will come from a combination of writing assignments, literature searches, and class participation. Due dates for assignments will be announced in class and on eCampus. The contributions of the various components to your final grade will be as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing assignments</td>
<td>40%</td>
</tr>
<tr>
<td>Literature searches</td>
<td>35%</td>
</tr>
<tr>
<td>Participation</td>
<td>15%</td>
</tr>
</tbody>
</table>

**Attendance and Punctuality**

Much of the substantive content in VIBS 657 comes about through in class discussions, presentations, and activities. Therefore, it’s important that you attend each class unless you have a university approved excuse or otherwise make arrangements with the instructor in advance. It is also important that you arrive on time. Not only is this a professional courtesy, course activities are often planned with a specific number of students in mind. Showing up late or not at all can significantly affect the class dynamic. Keep in mind that parking near VENI is extremely limited. That will not change as the semester progresses so you need to plan accordingly. Arriving late or having an excessive number of unexcused absences will negatively impact your attendance grade in VIBS 657.
A note about my grading philosophy

You are all graduate students with proven records of excellent academic achievement. You wouldn’t be in your program if you weren’t. I therefore expect “A” quality work from each of you and I start with the assumption that you will perform to those expectations. I see no reason, then, to fret about numerical grades in graduate classes. Instead, each of your graded assignments will receive one of three marks:

√ Your work meets my expectations for excellent, graduate level performance
√+ Your work exceeds my expectations in some way
√- Your work doesn’t meet my expectations

Note that the most frequent reason students have received a check minus in previous semesters is because they neglected to address some key element asked for in the writing prompt, so please read prompts carefully. Your final grade for each course component, then, will be determined by the balance of checks on all assignments. If that balance comes out as checks or better, you’ll receive an A for the class.

Schedule

There is not a set schedule for VIBS 658. I will assign readings each week that you’re expected to complete before coming to class. Prompts for assignments will be given in class and posted to eCampus.

Academic Integrity Statement

As the Aggie Honor Code states, “An Aggie does not lie, cheat, or steal or tolerate those who do.” It is expected that you will neither give nor receive unauthorized aid on work in this course. All writing for this course must be your original work. For Texas A&M Honor Council Rules and Procedures, please see http://aggiehonor.tamu.edu.

The Americans with Disabilities Act

Texas A&M University is committed to providing equitable access to learning opportunities for all students.
