

# Student Lecture Tour

## European Association of Geoscientists and Engineers

Last year the following Universities participated in this incredibly successful tour:

- Sultan Qaboos University - Muscat, Oman
- United Arab Emirates University - Al Ain, UAE
- Petroleum Institute - Abu Dhabi, UAE
- King Fahd University of Petroleum & Minerals - Dhahran, Saudi Arabia
- Tehran University - Tehran, Iran
- University of Sana'a - Sana'a, Yemen

They had **over 550 participants** total attend the lecture tour 2007 by Dr. Alain-Yves Huc.

This year all the previous Universities have agreed to host the tour again and Texas A&M University at Qatar will be hosting one of lectures on **October 28<sup>th</sup>, 12:00 to 4:00 PM, LH 238.**

### New Applications in Petroleum Geochemistry

This lecture aims to give an overview of recent developments in petroleum geochemistry. After a short review of established methods, the presentation focuses on the latest geochemical applications in the exploration and production of 'conventional' hydrocarbons. Recent technology to support the development of 'unconventional' resources such as shale gas, acid gas and heavy oil will also be discussed. Although the presentation is targeting a wide audience, students with a basic understanding of (petroleum) geology and chemistry will benefit most from this lecture.

#### Schedule

- 12:00 – 1:00 Lunch [For Registered Participants Only]
- 1:00 – 2:15 Lecture
- 2:15 – 2:30 Break
- 2:30 – 4:00 Lecture

#### Registration

Faculty, Students and Staff can register for the event for **FREE** at

[www.eage.org/students](http://www.eage.org/students)
