Jay B. Ganz
Texas A&M University

James E. Pustejovsky
University of Wisconsin-Madison

Joe Reichle
University of Minnesota

Kimberly J. Vannest
University of Vermont

Lauren M. Pierson
Sanikan Wattanawongwan
Texas A&M University

Man Chen
University of Wisconsin-Madison
Margaret Foster
Texas A&M University

Marcus C. Fuller
University of Vermont

April N. Haas
Life Skills Autism Academy

Bethany Hamilton
University of Texas at Austin

Mary R. Sallese
Texas A&M University

S. D. Smith
Southeast Missouri State University

Valeria Yllades
Texas A&M University

Authors Contribution Statements using Contribution Roles Taxonomy (CRediT)

Authors were listed alphabetical order by tier with an explanation of the contributions that are indicated for each tier by using CRediT (Allen et al., 2019).

**Tier 1:** Ganz, Pustejovsky, Reichle, Vannest ( Principal Investigators )

**Tier 2:** Pierson, Wattanawongwan ( Project staff )

**Tier 3:** Chen, Foster, Fuller, Haas, Hamilton, Sallese, Smith, Yllades ( Additional staff or investigators who contributed substantively )

**Jay B. Ganz:** Conceptualization (lead); formal analysis (supporting); funding acquisition (lead); investigation (supporting); methodology (lead); project administration and supervision (lead); writing - original draft preparation (lead); writing - review and editing (lead). **James E. Pustejovsky:** Conceptualization (supporting); data curation (equal); formal analysis (lead); funding acquisition (equal); investigation (supporting); methodology (equal); project administration and supervision (equal); resources (equal); software (lead); visualization (lead); writing - original draft preparation (supporting); writing - review and editing (equal).

**Joe Reichle:** Conceptualization (equal); data curation (supporting); formal analysis (supporting); funding acquisition (equal); investigation (supporting); methodology (equal); project administration and supervision (equal); resources (supporting); software (supporting); writing - original draft preparation (equal); writing - review and editing (equal). **Kimberly J. Vannest:** Conceptualization (equal); data curation (supporting); formal analysis (supporting); funding acquisition (supporting); investigation (equal); methodology (equal); project administration and supervision (equal); resources (equal); software (supporting); writing - original draft preparation (equal); writing - review and editing (equal). **Lauren Pierson:** Conceptualization (supporting); data curation (supporting); investigation (equal); methodology (supporting); resources (supporting); visualization (supporting); writing - original draft preparation (supporting); writing - review and editing (supporting). **Sanikan**
Wattanawongwan: Conceptualization (supporting); data curation (equal); formal analysis (supporting); investigation (equal); methodology (supporting); project administration and supervision (equal); resources (supporting); software (supporting); visualization (equal); writing - original draft preparation (equal); writing - review and editing (equal). Man Chen: Data curation (supporting); formal analysis (supporting); investigation (supporting); visualization (supporting). Margaret Foster: Conceptualization (supporting); data curation (supporting); investigation (supporting); methodology (supporting); project administration (supporting). Marcus Fuller: investigation (supporting). April N. Haas: investigation (supporting). Bethany Hamilton: data curation (supporting); investigation (supporting). Mary R. Sallese: investigation (supporting). S. D. Smith: investigation (supporting). Valeria Yllades: data curation (supporting); investigation (supporting).

Funding Acknowledgement

The research described here is supported by the Institute of Education Sciences, U.S. Department of Education, through Grant R324A180110 to Texas A&M University. The opinions expressed are those of the authors and do not represent views of the Institute or the U.S. Department of Education.

</tbody>
</table>

**Exclude**

- Participants that had primary diagnoses of physical impairments
- Participants with developmental disabilities other than ASD, who do not report an IQ score demonstrating an intellectual impairment
- Persons with sensory impairments

**Exclude**

- Studies that involved only interaction with a computer and no human-to-human interaction;
- Studies that involve reporting of only academic responses/behavior or communication

**Include**

- people with complex communication needs (CCN).
- Aided Communication includes (e.g., non-exchange and exchange-based systems), high-tech (e.g., SGDs, speech-generating devices (sometimes referred to as voice output communication aid (VOCA), AAC-dedicated devices, tablet-computer AAC apps, and use of multimodal approaches (more than one AAC mode). Display formats can include grid and/or to visual scene display
- Include functional communication training (FCT), mention of functional communication that include mention of
- - gestures and/or signs (e.g. gestures, body language, facial expression, affect).

**Challenging/problem behaviors** will include behaviors that are socially unacceptable and have a history of mediating the actions of others:
- Behavioral forms include tantrums, repetitive speech/echolalia, physical aggression, screaming, and other disruptive behavior.

Include adult outcomes for implementation (e.g., procedural/ treatment integrity, procedural/ treatment fidelity, social validity, feasibility/acceptability)
