To Whom It May Concern:

I am a doctoral student at Texas A&M University and am writing for permission to include in my dissertation of the material from ACM Transactions on Architecture and Code Optimization, "GenMatcher: A Generic Clustering-Bashed Arbitrary Matching Framework", Volume 15, Issue 4, November 2018, Article No. 51.

The dissertation will be made available to the public on the Web through Texas A&M University Libraries. In addition the dissertation will be microfilmed by ProQuest Information and Learning Company, and copies of the dissertation will be sold on demand. Please supply a statement granting me permission to use the work. You can email the permission to pingwang.tamu@gmail.com.

Thank you for your help.

Sincerely,
Ping

Ping,

This is expected. There is no concern on my part. I am copying the ACM office.

Regards,

David Kaeli

Hi Barbara,

Below is a permissions request for a TACO article.

Thank you.

Laura

Dear Ping Wang;

Please see your rights as an ACM Author on the ACM Author's Rights page on the ACM website:
<https://authors.acm.org/main.html>

Reuse

Authors can reuse any portion of their own work in a new work of their own (and no fee is expected) as long as a citation and DOI pointer to the Version of Record in the ACM Digital Library are included.

- Contributing complete papers to any edited collection of reprints for which the author is not the editor, requires permission and usually a republication fee.
- Authors can include partial or complete papers of their own (and no fee is expected) in a dissertation as long as citations and DOI pointers to the Versions of Record in the ACM Digital Library are included. Authors can use any portion of their own work in presentations and in the classroom (and no fee is expected).
- Commercially produced course-packs that are sold to students require permission and possibly a fee.

Regards,

Barbara
