

Seed Testing Laboratory Service Providers for Texas Agriculture July 2013

All seed sold commercially in Texas must be labeled with a lab test from an official state seed laboratory (Texas or another state), or a Registered Seed Technologist/Society of Commercial Seed Technologist member laboratory.

Standards for Seed Testing

Like in soil testing, water sample testing, etc., a lab that is certified or has individuals who are certified, is a means of ensuring that a lab and/or its employees meets industry standards. So any seed lab that is either a member of Association of Official Seed Analysts (AOSA) or has staff affiliated with Society of Commercial Seed Technologists (SCST; these employ a Registered Seed Technician, or RST) has met industry standards for certification.

Texas Department of Agriculture (http://www.texasagriculture.gov)

Limited Texas Department of Agriculture (TDA) seed testing services for pubic testing of seed samples for either standard germination or vigor only (\$50 for each test) have resumed at the remaining seed lab in Giddings. This is after TDA closed their seed testing labs at Lubbock and Stephenville in late 2011 due to budget cuts. You may review the current TDA "Request for Seed Testing" form (RST-1112A) for the type of test and pricing online at

http://www.texasagriculture.gov/Portals/0/forms/REG/Seed/rst_1112a_Request_for_Seed_Testing_Sche dule_A_Additional_Sample.pdf

If you have questions about Texas seed law or seed test certification you may contact the Giddings TDA Seed Lab.

 Texas Dept. of Agriculture—Giddings Seed Lab P.O. Box 629 1010 CR 226 Giddings, TX 78942 E-mail: jeffery.claxton@TexasAgriculture.gov Phone: 979-542-3691 Fax: 888-205-8417

Other Public & Private Testing Laboratories

Producers and commercial interests, whether for individual samples or large-scale testing, may also use other suitable laboratories.

The Texas Seed Trade Association (<u>http://www.texasseedtrade.com</u>) and its nearly 150 members, who require large amounts of seed testing, have provided a list of suggested seed testing laboratories (see below) for their members as well as the public.

These additional seed testing resources include:

• Association of Official Seed Analysts, Inc.

The Association of Official Seed Analysts (AOSA) is an organization of member laboratories, which include official state, federal, and university seed laboratories across the United States and Canada. Phone: 607-256-3313 <u>www.aosaseed.com</u> (click 'Directories' for a list of member labs; the listings for TDA at Lubbock & Stephenville remain in error on this website's list of labs)

• Society of Commercial Seed Technologists

A sister organization to AOSA, SCST is comprised of commercial, independent and government seed technologists. Though the labs themselves may not be members of AOSA, these technologists working there are certified. Phone: 607-256-3313 <u>www.seedtechnology.net</u> (click on 'Directories' then 'Members')

Texas Seed Trade Association Member Preferred Seed Labs

These labs are not certified, endorsed, or evaluated by Texas A&M AgriLife Extension nor does the agency have any financial or partnering agreement with any lab. This list is provided as a courtesy from TSTA, which frequently partners with Texas A&M AgriLife on numerous issues related to seed and general agribusiness in Texas.
