## INTRODUCTION

SCIENCE FICTION BOOK REVIEW INDEX is an annual publication designed to identify and provide a means of access to science fiction and fantasy book reviews, and to other books of interest to students and readers of that genre of literature.

To achieve that end, most commercial science fiction and fantasy magazines were indexed in full. In addition, certain amateur publications were comprehensively indexed for book reviews, and two library-oriented periodicals were selectively indexed. A complete directory of magazines indexed is provided on pages II and III.

SFBRI 1970 identifies 1484 reviews of 961 books.

## EDITORIAL POLICY

SFBRI covers all levels of books, from children's fantasy through technical books, which were reviewed in the source journals.

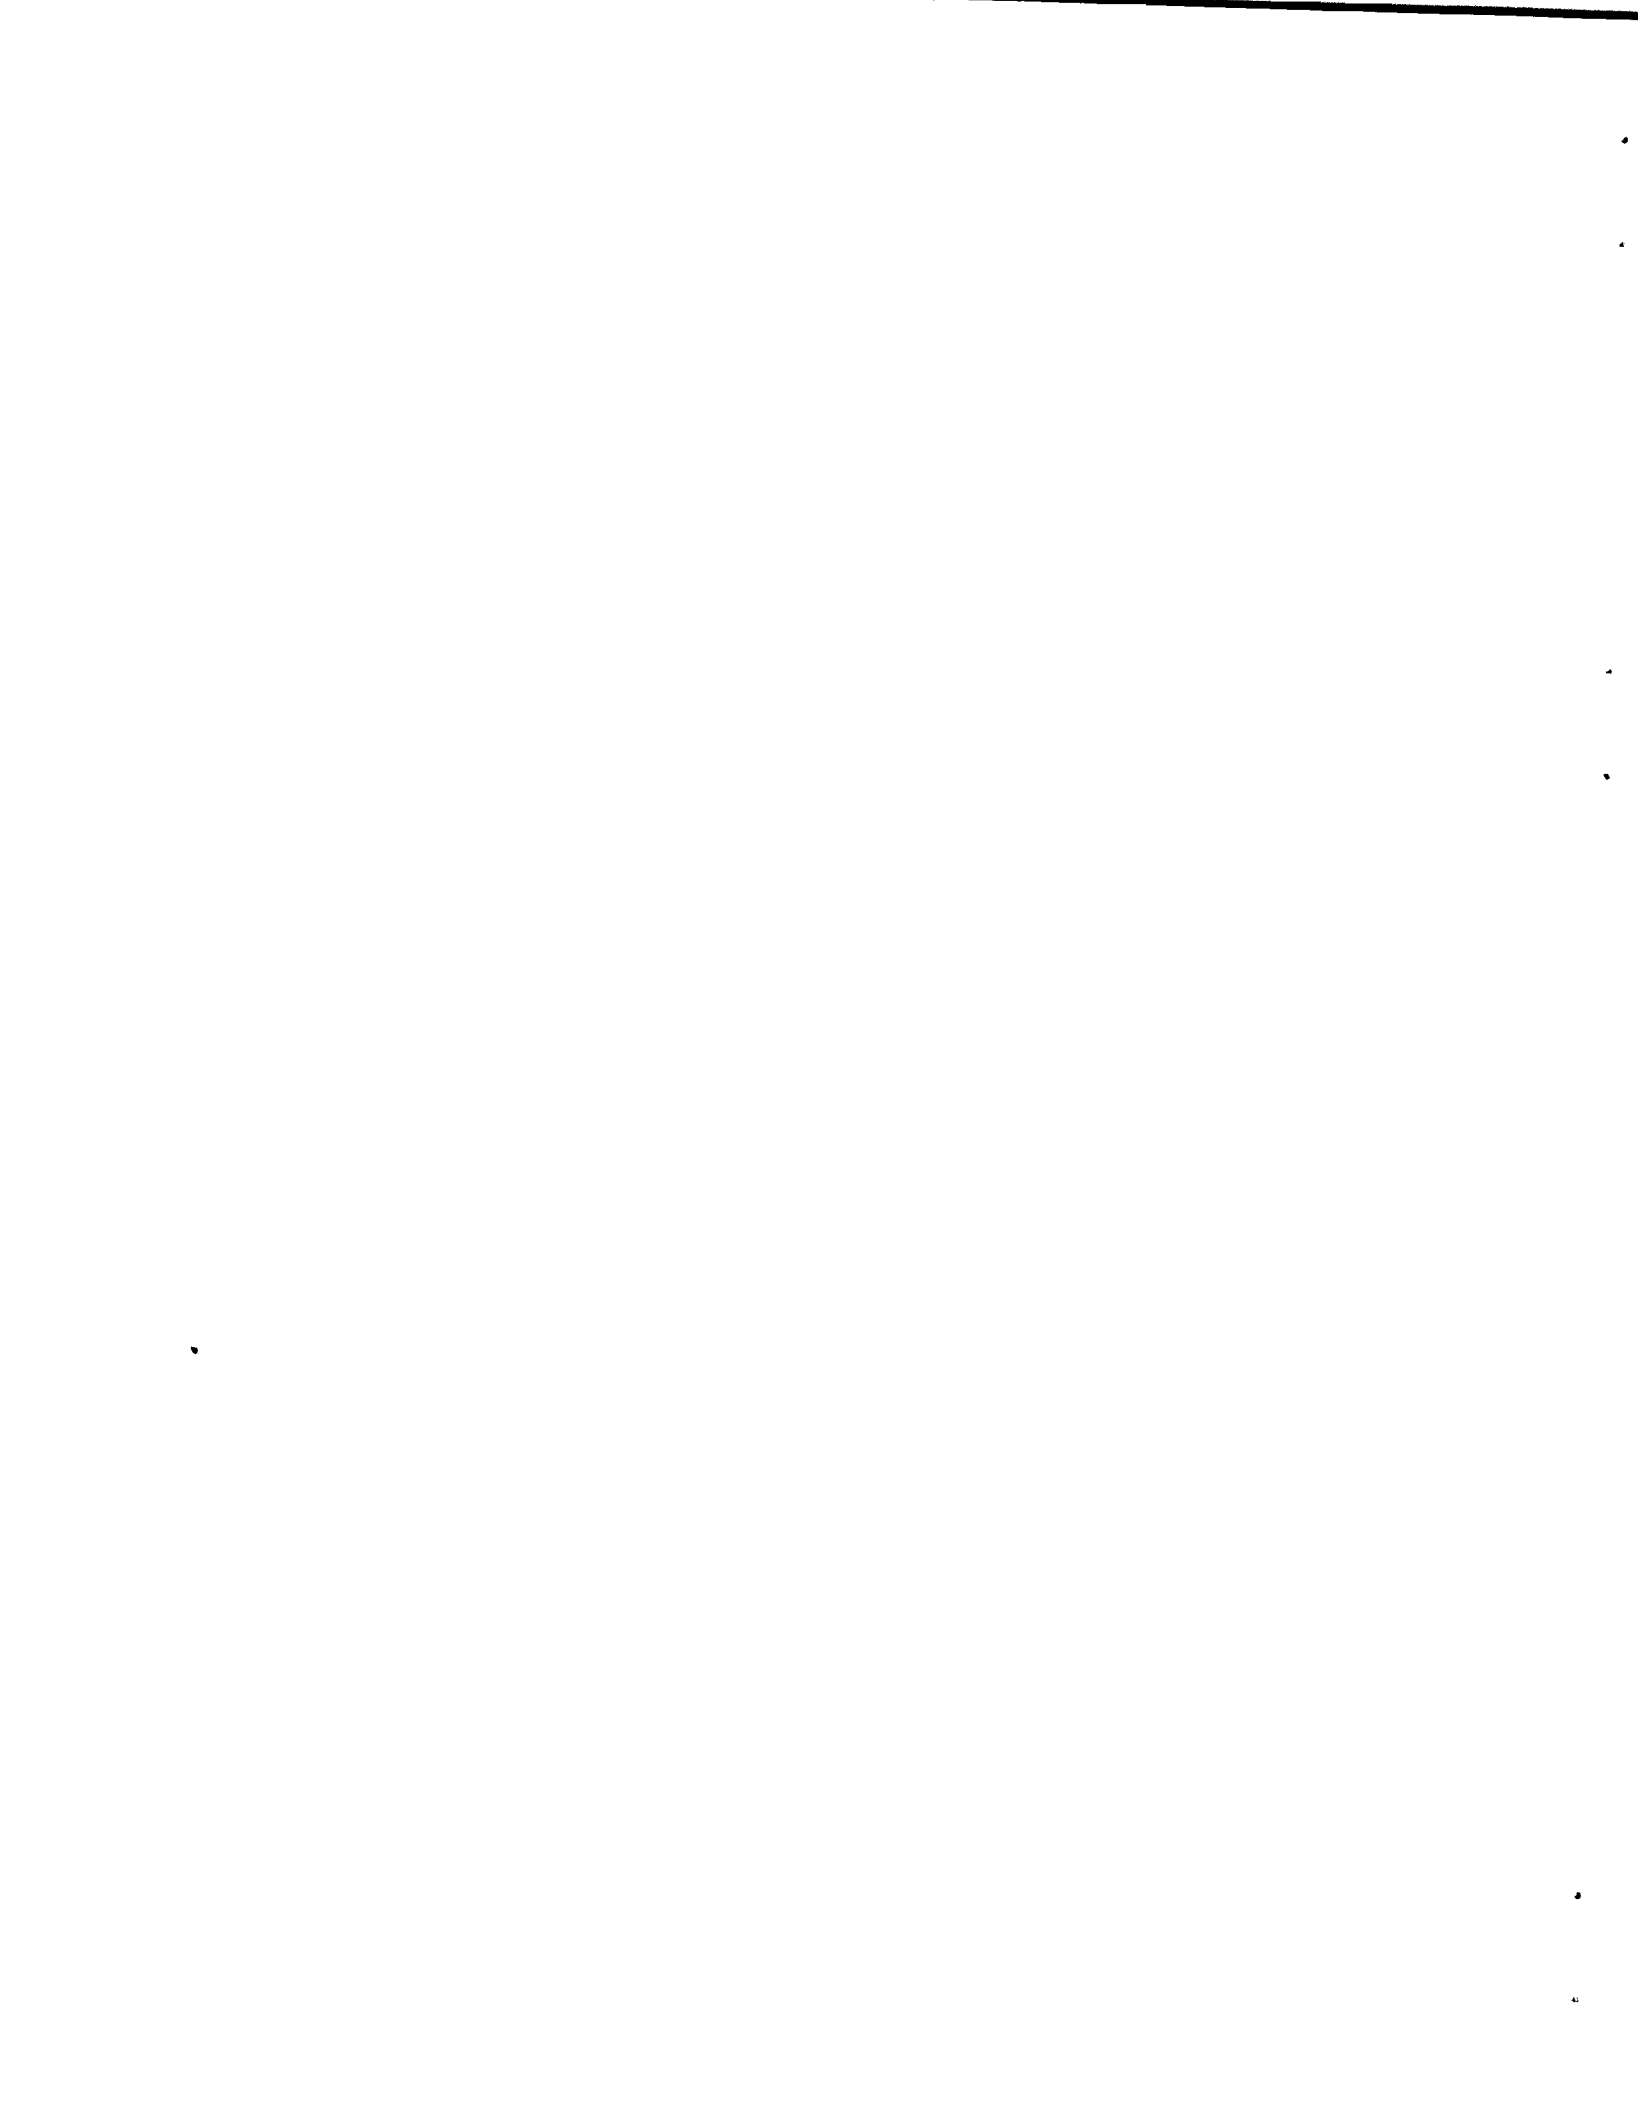

Bibliographic information is given in this index exactly as it was found in the review. As a result, it is in many cases incomplete, and sometimes inaccurate.

Citations to reviews are abbreviated, generally following standard abbreviations used in other indexes to science fiction.

Each citation consists of the applicable items from the following list, and appear in the citation in the order listed here: abbreviated title; volume number or whole number; issue number; pages; month; year; reviewer.
