SHIBBOLETH

PRESERVATION NETWORK

- Core component of TDL's mission
- Early stages of development
- State-wide network, geographically distributed
- Format forward-migration

HARVESTING IN DSPACE

- DSpace is already an OAI *provider*
- Adding to DSpace an OAI *harvester*
 - Uses PMH and ORE to deliver metadata and files
- Enables remotely “mounted” collections
 - Administration from a web page
 - Enhance collaboration and backup options

MANAKIN / DSPACE

Manakin introduces a modular interface layer to DSpace

The screenshot shows the PolicyArchive website. At the top, there is a navigation bar with the PolicyArchive logo and a search bar. Below the navigation bar, there are several sections: "Upload Research", "Receive Newsletters", "Featured Content" (with links to articles like "The Burkle (Dis)Connection" and "Power Beams on the Top Spot Really? Redux"), "Latest Additions" (with links to articles like "Use of Mental Health and Social Support Services by People with AIDS" and "Snow Job?: The Efficacy of Source Country Cocaine Policies"), and "Topic Quick Links" (with a grid of topic categories like Agriculture, Law and ethics, Banking and finance, etc.).

The screenshot shows the Texas A&M Libraries Digital Repository interface. It features a search bar, a map of the United States with red callout boxes indicating the location of various folios, and a list of repository items. The map is titled "76 Austin folio, Texas" and shows the location of the folio in Austin, Texas. Below the map, there is a description of the Geologic Atlas of the United States and a link to view the complete folio. The interface also includes a "My Account" section and a footer with contact information.
