HISTORY OF THE 42D BOMBARDMENT SQUADRON (H) 11TH BOMBARDMENT GROUP (H) SEVENTH AIR FORCE

SECRET

Compiled April - May 1944 by Lieutenant Edward B. Petersen 42D Bombardment Squadron (H)

The most accomplished crystal ball gazer would have been hard put to it to predict the significance of the Hawaiian Department General Order # 2 dated 15 January 1940, (Exhibit A attached) which directed the activation of the 11th Bombardment Group (M) and its component squadrons, one of which was the 42D Bombardment Squadron (M). The activation date was designated as 1 February 1940.

SECRET

To a casual bystander the growth of a newly activated unit must seem a slow process. For instance, the total personnel on 1 February 1940 consisted of 2D Lieutenant Nils C. Ohman, Commanding Officer, and Staff Sergeant Pierce M. Manley. But underlying it all is a definite plan of procedure through which various established units are combed for officers and enlisted men with the necessary qualifications and specification numbers. It was through this processing that the first sizeable contingent of enlisted men arrived on 19 February. They came from the following organizations: Headquarters and Headquarters Squadron, 5th Bombardment Group; 4th and 50th Reconnaissance Squadrons; 25rd, 51st, and 72nd Bombardment Squadrons; Base Headquarters and 17th Air Base Squadrons.

This was the pre-war army where enlisted men were rated from Sixth to First Class, where a private with a 2d class Air Mechanic's rating drew an additional \$42.00 per month, where a private with a 1st class Air Mechanic's rating drew an additional \$66.00 per month, and where an enlisted man who was married could ration separately from his organization mess. Men drew K.P. for a month at a time and grass cutting and policing details were the rule rather than the exception. Planes had not yet acquired names, but rather carried their squadron colors on engine comlings.

SCORET

The 42D Bombardment Squadron was originally designated as a Medium bombardment unit. Its equipment at that time was the B-18. Considerable time was to elapse before B-17s were brought to this area and the designation of the squadron changed from Medium to Heavy.

On 20 March 1940 the first officer of field grade was assigned, namely Major C.K. Rich. Lieutenant Ohman was thereby relieved of command and appointed Squadron Adjutant. However he was also detailed additional duties, i.e. Technical Supply, Communications, Engineering, Operations, Armament, Athletic and Supply Officer. Apparently the functions of Mess and Transportation did not seem important enough to be listed.

From the date of activation through 16 June 1940, the organization was probably proceeding through the various stages of growing up. From the standpoint of physical equipment at Hickam Field, everything was favorable to the organization. The men were quartered in the "Big Barracks", with the hangars and work areas just across the street.

Presumably there were no unusual occurences in the development of the squadron during this period judging from the repeated Morning Report entries; "Hickam Field, T.H. Usual garrison duties performed." However, for a considerable period there had occurred a series of incidents in which sabotage was suspected. As a result the 42D, together with other units, was placed on an 'Alert' status. The alert period terminated 21 December 1940.

The growth of the unit during its first six months was not at all phenominal; its strength as of 51 July 1940 consisted of five assigned and two attached officers and one hundred eighty-one assigned enlisted men, together with an additional twenty-five enlisted men in the squadron on detached service. On 21 October 1940 Captain R.W. Ramey succeeded Major C.K. Fich as

the Squadron Commanding Officer and in January and February of 1941 the designation of the squadron was changed from Medium to Heavy. However, this would appear to have been an anticipatory move, as B-17s did not make their appearance in this theater until May of 1941. (Orders for this redesignation are not available at this time.) Until then the squadron continued to operate with the B-18s assigned to it. Indications of the expansion of the Air Force appeared in the transfer of men to the mainland as flying cadets.

SECRET

The assignment of two B-17s was a highly significant event in the development of the organization. With a long background of war talk, the newly-arrived Flying Fortresses seemed to be the answer, the offensive weapon that could do something about the terrific expanses of water to be coped with in this theater. The universal belief in precision bombing made possible through the combination of the Flying Fortress and the secret bombsight must have given the organization a feeling of potency and offensive power and the knowlege that it had finally "arrived." But there must also have been a feeling of inadequacy; two B-17s for one squadron, not enough equipment by any calculation. The two B-17s and five B-18s made up the striking force of the squadron from May through November of 1941.

The terse remarks of the Morning Report for 7 December 1941 need no comment: "Hickam Field, T.H. Squadron withstood air attack; moved by marching to area across mat from hangars. Command Post established at head of by-road; twenty-nine casualties." Of the planes, only two - one B-17 and one B-18 - could be repaired and restored to flying status. The other B-17 and four B-18s were destroyed or damaged beyond repair.

The next entry is 9 Dec 1941: "Squaaron movea by marching toe Depot

GECRET

area. Command Post established in dir Comps unoccupied building." Actual

casualties on 7 Seconder were as follows:

Killed: Corporal Robert R. Garrett Private First Class William Coyne Jr. Private First Class Eigene B. Denson Private Leland V. Beasley Private Joseph H. Jencius Private Hal H. Perry Jr. Private First Class Robert Kelly Private First Class Charles L. Hrusecky Private Carey K. Stockwell

Woundeds Technical Sergeant Elmer Anderson Technical Sergeant Robert W. Ray Sergeant Mathias E. Donart Corporal Theedore C. Luczyk Corporal Leith C. Morgan Private First Class Charles W. Eartlett Private First Class Henry C. Beitler Private First Class Vernon W. Evans Private First Class Albert C. Le Call Private First Class Donald Latson Private Jerry Denoit Private Paul T. Lowsher Jr. Private William E. Hudson Private Kenneth A. Fuller Frivate Walter E. Stephanik Private James F. Jones Frivate First Class James F. Williams Second Lieutenant Bruce E. Barker Frivate First Class Charles N. Narchood Private First Class Charles P. Porterfield Frivate John P. Holloway. Private First Class Ivan C. Lewis

On the nineteenth of December 1941, Major Moger M. Mamey was relieved as Squadron Commanding Officer and transferred to Headquarters and Headquarters Squadron, 18th ming, and Captain Gray assumed command. Two days later, December 21st, Major (now Brigadier General) Truman H. Landon with twenty other

officers, five air cadets and twenty eight enlisted men were attached to the Squadron from the 58th keconnaisance Squadron, Albuquerque, New Lexico. Lajor Landon assumed command the following day. His formation had arrived in the Hawaiian area late in the afternoon of 7 December, well aware that something was seriously wrong with the Hickam radio silent, but not knowing the exact situation there. The E-17s in the formation were ordered to proceed to other landing fields throughout the island. In the course of the next few weeks several of these Fortresses were assigned to the 42D.

SECRET

Lajor Lanuon was not to stay long, however, for on the 13th of January 1942 he was relieved from his attached status to the squadron and attached to the Headquarters and Headquarters Squadron of the 18th Hombardment Wing. Captain Swenson was attached to the 422, assuming command, and in turn he was succeeded by Lieutenant Colonel ...oland Akre. The latter was relieved of assignment and command on 23 February 1942 and was succeeded by Lajor Brook L. Allen.

From 7 December 1941 things were "different" within the squadron. The reality of being at war crystalized a great many plans and activities which heretofore had been training activities. The search missions which had been instituted as training exercises for the crews now became serious expeditions; tomb bays no longer were loaded with practice bombs but with live explosives.

The squadron lost a crew on 5 April 1942 when Lt Allan's plane crashed on Meaheakahoe Feak, Jahu, T.J.. The crew comprised the following:

SECRE

First Lieutenant Charles O. Ellen (Filot) First Lieutenant ward Cox Jr. Second Lieutenant James W. Erushee Staff Sergeant Edward L. Hokes Staff Sergeant Mathias E. Donart

Staff Sergeant Luther L. Ferry Sergeant Wilbur L. Gravity Corporal John D. Lorris Corporal John D. Luchey

Lany officers and enlisted men thought they knew the Japs fairly well as a result of their casual contacts with them in Honolulu. There they were encountered in almost every walk of life as clerks in hotels and banks, in drugstores, bars, grocery and haberdushery stores, as bus drivers, taxi arivers etc. But the effectiveness of the Jap treachery on 7 December 1941 brought to most service men the realization that they really dign't jmow them and it left an indelible uncertainty as so the time of the next attempt to take the bawaiian Islands. The determination to forestall any such move inspired every activity from 7 December on.

This was the spirit which marked the crews who were detailed from the 422 equation to betached service at lidway Island where other squarrons and potent naval units had assembled for participation in the spic Bastle of fidway. That battle which raped from the ord through the 6th of June 1942 frustrated what is believed to be Japan's second major attempt to occupy the Islands.

The battle tested crews returned here to find that the squadron had moved on 5 June 1942 to a new station at Aualoa point, T.H. (Orders covering this move are not available.) on 1 July 1942 Captain Howard succeeded Lajor Allen as Squadron Commander, and in turn he was succeeded on 8 July by Lajor Ernest R. Sanierre. That same day the squadron again moved to a new station at Sahuku, f.H. (Orders for this move are not available.) This move was only a temporary one, for on 21 July 1942 the squadron embarked at Honolulu aboard the 0.5.5. Fresident Fylor for "down under" station which was reached on 11

August 1942 and groved to be Plaines Des Gaiacs in New Caledonia. Nine of the squadron's 3-17's were flown to the new station, landing there on 22 July 1942.

Low things began to move in earnest. between 24th of July and 11th of August when the ground personnel a rived, the bomber crews had performed ten search, forty two patrol, one photo reconnaisance and eighteen bombing sorties in the Madalcanal Island area. Although interception had not been severe, three Zeros were shot cut of the air. One E-17 had been lost in a water landing off Espiritu Santo Island, from which the entire crew had been rescued. Those sorties were the squadron's contribution to the reconnaissance and softening upof duadalcanal preparatory to the Larines landing. During these operations the 42D Squadron operated under the direction of the 15th Air Force.

For the balance of the month the squaaron performed nineteen search and seven bombing sorties. The latter were pulled against land installations and Jap naval tak forces. Due to weather conditions observations were difficult, but one four engine flying boat was destroyed and many near misses scored against a carrier and a number of destroyers. Dieutenant dunther was killed and in a night crash landing.

September fou a the squadron pulling twenty nine search and twenty bombing sorties. It was a fateful and eventful month, combing raids were pulled against both ground installations and large Japanese naval task forces. Results were one Jap tanker sunk, three float planes destroyed. During these engagements Private First Class Edwin La furns and Sergeant mobert S. Lowrie were injured. Two of our bombers on search missions failed to return. The personnel aboard these airplanes were:

Captain Abbert H. Michards, Filot First Lieutenant Motert H. LoGhee

Second Lieutenant Hilliam F.B. Lorris (Filot) Staff Sergeant Charles E. Hoyer Corporel Yvon .. Hailey Sergeant Hugh L. Hing Corporal Otis G. Black Jr. Corporal Peter Charuk Private William Imanoff

First Lieutenant Charles E. Morton First Lieutenant Leo L. Lminger (Filot) Second Lieutenant Eruce E.J. Carber Staff Sergeant Fred S. Croyle Staff Sergeant Fillian L. Hotard Staff Sergeant Feter F. Novah Sergeant James A. Lathewson Sergeant Bruce A. Osborne Frivate First Class Edward A. Jarroll

In the latter part of 1945, long after the occulation of Buadalcanal, the wreckage of Dieutenant Norton's plane was found in an isolated section of the island. Identification was established through the dog tags of several crew members and a section of the fuselage bearing the plane's name, "lessie Jap Easher."

Suring Cetober air activity moved farther north in the Solomons with Reykata hay and vicinity receiving considerable attention. The squaaron tallied three photo reconnaissance, thirty five search and eleven bombing sorties during this period. Several Jap naval Jask forces were the targets. Many near misses were scored and five type Zeros and one four engined flying boat were shot down. Combat injuries were suffered by Japtain Carl E. Thertele, Master Sergeant K. Lawton, Technical Sergeant Shepherd and Sergeant Gordon. The latter, a radio operator, was severely injured over neykata bay. After being propped up to his set, Sergeant Gordon continued to operate his set back to the base. His injuries were so serious that it was necessary to amputate his leg after reaching the hospital.

> 8**.** 12

Two members of the ground personnel met an untimely death during the early part of October when the truck that Corporal Leonard Donafira and Frivate Peter Fox were riging in left the road and crashed in a ravine.

The pace for October had seemed fast but in November it stepped up to a still higher pitch with forty search and twenty seven bombing sorties order. Hardly a day went by without a search plane spotting a naval task force. Hardly a day went by without a search plane spotting a naval task force. Here, a proportunity seemed available of while On several occasions the heavy bombers reached the scene after other allied bombers had made their runs with the result that they spotted Aks and destroyers on fire and abandoned and numerous rafts filled with survivors. Furing this period land targets also came in for their share of attention. All is all the tally for the month showed one cargo vessel sunk, several damaged, eleven type Zeros destroyed and land installations hit hard. The raid of 15 November over the Huin area resulted in the injury of Corporal Joseph A. Hammara.

Since the action was extending farther and arther to the north, it was often advisable to send the heavies to a forward staging area at Effate and later at Guadalcanal. It was accordingly determined to move the ground echelon to a forward point. On 20 November the transfer to Espiritu Santo was accomlished. (Copies of this order are not available for exhibition.)

becember brought to the squadron's bomber crews several brand new experiences, one of which must have made them feel they weren't too completely outflown by the Zeros. The first new experience took tangible form in the use of P-33s as escorts in their raid on bunda Point on 10 December. The second new experience was staging night bombing raids, the first of which was run on 13 December with Kahili Airfield as the target.

9. .

Altogether thirty three search and thirty nine bombing sorties were made during the month. Moree type Zeros were destroyed in combat which also resulted in injuries to Sergeant James C. Stephens Jr. One heavy, piloted by Captain Donald L. Hyland, was shot down but successfully negotiated a water landing and the crew rescued the same evening by a FEY. Mether or not the FET was designated "Dumbo", this was the first "Dumbo" rescue service experionced by this squadron. A second E-17 which was mocked down was not so fortunate and was reported missing in action on 23 December. This crew consisted of the following officers and enlisted men:

First Lieutenant James K. Sorp, Filot First Lieutenant Omar D. Thomas First Lieutenant Thornton K. Lewis Technical Sergeant Elwood D. Liller Technical Sergeant Charles Foble Staff Sergeant Howard L. Frantz Corporal Sanford S. Caviness Corporal Malter E. Stephanik Frivate First Class Tenry Lajeski

The records for January, 1940, are incomplete in that no late is avail-Table for the period from the 1st through the 7th. But from the records it would seem that the tempo had fallen, with twenty two search and three bombing sorties conducted during the last three weeks for that month. The sorties were flown over fourdinville, Judalcanal and sussell Islands and in addition to their regular reconnaissance task included are ping tons of food to american troops on Guadalcanal. Two type Zeros wore shot adwn. During this month the squadron received a new Commanding officer in the person of Captain 2.0. Hall who succeeded hajor manierre.

February proved the most fateful month during the 42D hombardment Squadron's operations. On February 1st, three crews were dispatched on a bombing

10.

mission and failed to return. The crews were made up of the following per-

sonnel:

Captain Earl C. Hall, Pilot and Squadron Commander First Lieutenant Joaquin Castro Second Lieutenant Frank E. Stern Jr. fechnical Sergeant Faul Adler Staff Sergeant James C. Stephens Jr. Staff Sergeant James Y. Bales Staff Sergeant Francis S. banasiak Sergeant Lartin T. Grady Sergeant Jesse N. Olmstead

Japtain Harold P. Hensley, Filot First Lieutenant Charles D. Bingham Second Lieutenant John J. Jackson Staff Sergeant Jorste G. Hatiello Technical Sergeant Lester L. Judenschwajer Staff Sergeant Milliam J. Jomko Staff Sergeant John H. Powers Sergeant Peter R. Fabiano Staff Sergeant Millott J. Allen

Captain Frank L. houx, Filot First Lieutenant George H. Ganmans Second Lieutenant Latin L. Carper-Second Lieutenant LaVerne P. Mite Staff Sergeant kichard K. Mayne Staff Sergeant brnest L. Koch Staff Sergeant Leonard S. Mnight Corporal Ernest Sweigert Frivate First Class Joseph A. Carvey

This irreparable loss materially reduced the effectiveness of the squadron. The one remaining crew, piloted by Captain Louis L. Sowers, pulled two photo, one bombing and one search sortie to bring the squadron's combat activities to an end on 7 February 1943. Under authority of USAFISFA Lovement Order fil dated 17 Earch 1943 (Copy not available for exhibition) the squadron prepared to return to the Hawaiian Islands. Embarking on the United States Army Fransport President Polk on 28 Earch, the squadron arrived at Honolulu, T.:. on 8 April 1943 and proceeve to its new station at Kualoa Point, T.:.

11.

The first step in the reorganization of the unit was undertaken. All enlisted men were given their choice of a thirty day furlough on the mainland and rejoining the squadron or of being sent back to the States for reassignment. Approximately one third of the men chose the first course.

\* SECRET

The duty status of the squadron was defense of the hawaiian Island area. Its equipment from this point on was to be B-24 Liberators. Combat crews and ground personnel were assigned to the organization to bring it up to fable of Organization strength. The training of newly assigned combat crews followed a pattern which included shooting strange field landings, practice bombing missions, formation flying and the standard "Y" searches, Major Jack D. Whidden, who had become Squadron Commanding Officer, was succeeded by Captain Earl J. Cooper on 21 May 1943.

One search mission which was detailed on 27 kmy 1943 to look for a transport plane which had made a later landing somewhere southwest of the Hawaiian Islands had a tragic ending. The details were reconstructed from a Japanese prisoner of war interrogation report captures on Hwajelein on 1 February 1944. Lieutenant Hussell A. Phillips and his crew were conducting their search at an altitude of five hundred feet when one of theirengines cut out. The engineer proceeded to cut off the gas to the adjoining engine. With only two engines operating and such minimum altitude, a water landing was inevitable. Three crew members survived the crash and succeeded in getting aboard a raft. From details as to civilian schooling and locations of army training fields, the surviving officers were identified as First Lieutenants Louis S. Zamperini and Phillips. The identity of the lone surviving enlisted man could not be established. He died on the thirty third aay.

The raft continued in a westerly direction for forty six days when it was picked up by a Jap patrol boat three miles southwest of Taroa Island of maloelap Atoll in the Marshall Islands. Whether or not Lieutenants Phillips and Zamperini are still alive as prisoners of war can only be conjectured. The other members of the search crew were:

SECRET

First Lieutenant Charles H. Suppernell
First Lieutenant Robert H. Litchell
Staif Sergeant Jay S. Mansen
Staif Sergeant Frank Glassman
Sergeant Otto Anderson
Sergeant Francis P. Lolamara
Combral Fichael J. Malsh
Private Leslie A. Dean
```

Flights by the Squadron were not limited solely to training. For example on 14 June three tombers piloted by Lieutenants Storm, Scholar and Smith were detailed to fly to Funafuti. The take-off for this mission ended almost disastrously.

The B-24 piloted by Lieutenant George A. Smith was almost air-borne when it suddenly aropped forward at which time the nose wheel collapsed. The plane continued sliding on its nose and landing gear, finally coming to rest on the east boundary of the field, its landing gear in a ditch and the nose extending onto the rozaway. It is probably miraculous that the crew survived this crash, but they did as is shown below:

Emig Fractured wrist Contusions of right hand General body contusions Fractured arm No injury Contusions above knee No injury Abrasion above right knee No injury No injury No injury No injury No injury No Injury

## SECRET

Following the loss of Lieutenant Smith's plane, arrangements were made for a **crew** on D/S from the 26th Homb Squadron to proceed to Funafuti to join Lieutenants Storm and Scholar. The plane which was piloted by Lieutenant Houchins took off on 15 June landing at Funafuti on the 17th.

That same afternoon the three bombers took off for a night photo mission of bille Island while the 98th Squaaron bombed Tarawa and the 26th ran a photo mission over Jaluit.

Un 22 June the same three planes took off from **Canton** Island and completed a photo mission over the following Islands in the Gilbert Group; Beru, Nukunau, Taputeola, Onotoa, Tamana and Arora. An especially important color photo was taken of Beru Island.

Following this mission the planes landed at Canton Island. Two days later Lieutenants Scholar and Storm flew a search from there. The following day, 25 June, Lieutenant Stay joined them. The next day Lieutanant Gall arrived. On June 17th, the flight proceeded to Funafuti.

Plans had been drawn for a raid on 27 June on Nauru in conjunction with the 26th, 98th and 431st squadrons. Lieutenant Stay was detailed to fly with the 26th to fill out a thre plane formation. It was a disastrous mission, the first and eighth planes to take off crashing into the water just beyond the runway. Lieutenants Gall, Scholar and Storm taxiing into position were advised that the mission had been cancelled and did not take off. Lieutenants Stay and Holland (of the 26th) were the only two to reach the target.

On 8 July Lieutenants Gall, Şands, Storm and Thompson took off for "down under", landing at Funafuti. Their mission, staged on 11 July was to be a photo mission, primary target Jaluit, secondary target Makin and Little Makin. Kesults were classed as highly successful. Complete photographic

reconnaissance of Makin and Little Makin was obtained inspite of adverse weather with tropical front almost over primary target. Important colored photos were secured of a large sea plane base at Jaluit Atoll. Lieutenants Gall, Sands and Storm returned to Aualoa on 13 July, Lieutenant Phompson returning the following day.

SECRET

Five planes took off on 22July for Midway Island. From there, four heavies from the 42D, one from the 98th and five from the 431st Bombarament Squadrons (H) staged bombing raids on Wake Island on July 24th. Considerable damage was done to ground installations, nine fighters were destroyed, four probably destroyed and three damaged. We lost one bomber which crashed into the ocean after a mid-air collision with an enemy fighter which was falling out of control. Following are listed the personnel of the lost bomber:

First Lieutenant James R. Cason, Pilot First Lieutenant Loren E. Thompson Second Lieutenant Robert B. EcConnell Second Lieutenant Ernest W. Moore Second Lieutenant Louis N. Kane Technical Sergeant Lee R. Sterher Staff Sergeant James W. Strope Staff Sergeant Lloyd R. Taylor Staff Sergeant Harlan G. Davis Sermeant Robert O. Stephens Corporal Walter F. Kowalski

In addition to the above, Lieutenant Lyron W. Jenson and Sergeant Joseph P. Evans were killed and Lieutenant kichard S. Thompson, Technical Sergeant Robert L. Patterson and Staff Sergeant Francis J. Ferkins were wounded by ack-ack. Lieutenant Lyron W. Jenson and Sergeant Joseph P. Evans were buried at sea off hidway in keeping with Navy regulations in that area. One bomber, "Daisy Mae", was so badly damaged in combat that she was left at Midway for salvage.

15.

SECRET

\* Exhibit "C"

Six planes tock off for "down under" on 15 September, landing at Funafuti. They carried out successful bombing missions on Betio Island, Tarawa Atoll, on the 18th and 19th. On the 21st, the day of their return to Kualoa, the squadron lost Flight Officer John N. Van Horn whose A-20 airplane crashed off-shore from the landing strip when his engines failed.

SECRET

Until November 1st, the 42D Squadron's activities were limited to training flights. On 1 November the ground echelon embarked aboard the S.S. Fresident Tyler, arriving at its destination, Funafuti, on the 9th." The air echelon arrived on the 12th of November. The Japs were quick to extend them a welcome by sending six or eight bombers over the area at 0030, 13 November. The most important damage cone by the raid was the complete destruction of Captain Alf H. Storm's bomber, "Peggy". But it was good training for all personnel, for after that raid there was no question whether every man had a fox hole. They came in very handy for early on the morning of the 15th, twelve more Jap bombers raided the area destroying one bomber, the "Wicked Witch" and badly damaging "Tail Wind" and "Brunehilda".

On their first raid the Jap bombers must have had a particular target in mind, for nine of the Liberators tucked away in the revetments were fully loaded with gas and bombs, ready for an early morning take-off. In one respect they missed their target, for the bomber they did hit was not scheduled to fly that mission.

Our strike got off to an early start and bombed Betio Island in the face of intense anti-aircraft fire. On the return to the base, a B-24 piloted by First Lieutenant Charles Friedrich presumably had navigational difficulties and was observed by radar to be passing the home island some fifty miles to the west. Radio contact failed to bring a response. The crew, presumed to be \* Exhibit "D"

SECRE

#### lost at sea, consistea of the following:

First Lieutenant Charles Friedrich Jr., Filot Second Lieutenant William D. Morrison Jr. Second Lieutenant Charles P. Pangonis Jr. Second Lieutenant Paul R. Byers Technical Sergeant Niel Putman Sergeant Otis M. Jordan Sergeant Norbert O. Finks Corporal William H. Rutherford Private Charles W. Malsh

During the belance of the month a seven plane mission was pulled against Jaluit, a four plane mission against Mille and seven plane raid against Nauru. Three men, Lieutenant Benjamin I. Weiss, Technical Sergeant Thomas Wyckoff and Technical Sergeant Arvid Ambur were injured on the Nauru raid,

By this time Tarawa had fallen to the Allies and the tide of battle and conquest was moving northwest. Pargets for becember were killi Atoll, Jaluit Atoll, Maloelap Atoll and Taroa Island in particular. Diversionary strikes were also carried out against Nauru Island. Such targets naturally raised questions as to where the next Navy task force would strike. It was not until the task force had landed at Kwajalein that the question was answered.

The December raids on Nauru, (eight sorties) on Milli, (thirteen sorties) on Jaluit, (two sorties) on Maloelap (seven sorties) on Taroa, (eight sorties) gave the tomber crews a taste of practically every conceivable obstacle to a bombing mission: heavy tropical fronts, intense anti-aircraft fire, Zeros, shot riddled landing gear, a burned out mess hall, just to name a few. Captains Stay and Storm encountered one of the worst weather fronts and succeeded in reaching their alternate target Filots met anti-aircraft fire with evasive action and let it go at that. Gunners had little opportunity to bring Zeros under their sights until the Taroa raid, when Jap

SECKET

## SECRET

interceptors were knocked down by Sergeants Anthony R. Kernyat, Otto G. Brannan, Phillip Roth, James F. Ball and Staff Sergeant Henry E. Tanner Jr. The shot out hydraulic system (sustained by Lieutenant Charles F. Pratte's bomber during the Taroa raid) resulted in some first class ingenuity being exercised." Two crew members in the waist and one in the tail released their parachutes after strapping them to their gun mounts, just as the wheels touched the runway at Tarawa. In this way the landing speed was reduced by an estimated forty miles per hour. When the "Belle of Texas" stopped rolling, she was at the very end of the runway and but a few feet from the ocean. As for the burned out mess hall, K rations under the palm trees served as a substitute.

But the December strikes demanded their price, namely Lieutenant Dechert's and Lieutenant Smith's crews. Lieutenant Dechert's plane was last seen over the target during the December 1st raid on Milli. The weather was very bad and prevented any accurate observation. Whether or not he succeeded in getting away from the target is not known. The personnel of this plane was composed of the following:

Second Lieutenant George R. Dechert, Pilot Second Lieutenant Robert S. Baker Second Lieutenant William E. Barwick Second Lieutenant William G. Roy Technical Sergeant Bugene L. Snodgrass Technical Sergeant Balph J. Walbeck Staff Sergeant Robert E. Lipe Staff Sergeant David L. Buckles Staff Sergeant Carl J. Anderson Staff Sergeant Willie T. Little

Lieutenant Smith's loss was undoubtedly the result of flak damage received over Taroa on December 20th. Two engines were shot out and a water landing made. Other bombers in the formation circled the crash area and observed at least four crew members climb into a raft. "Dumbo" was called but when she reached the scene nothing could be found. Whether or not the sur-\* Exhibit "F" 22

vivors were picked up by a Jap patrol boat is not known. The following were

SECONT

members of the crew:

First Lieutenant George W. Smith, Pilot Second Lieutenant John E. Lowry Jr. Second Lieutenant Carl A. Hortenson First Lieutenant Ralph P. Ortiz Technical Sergeant Clarence T. Sopko Technical Sergeant Koy T. Gearon Staff Sergeant Jesse E. Hudmon Staff Sergeant Jesse E. Hudmon Staff Sergeant Arnold J. Paradise Staff Sergeant Carl N. Dell Staff Sergeant Earl D. Nielson

The November and December raids were the 42D Squaaron's contribution to the softening of the Gilbert and Marshall Islands. Their task accomplished, the squadron embarked on the U.S.T. George N. Julian on 25 December and returned to the Hawaiian Islands, taking up its new station at hokuleia on 9 January 1944.\* From this point on the mission for the squadron was to be two-fold: defense of the Hawaiian Islands and providing an orientation and training program for crews newly arrived from the States.

During the two war years of 1942 and 1943 the squarron's activities had been manifold and important. Considering the cost in lives of combat crewmen it is to be hoped that the squadron's contribution was a vital one. The campaigns in which the squadron participated are: Guadalcanal, Solomon Islands, Earshall Islands, the Gilberts and Eidway. The 11th Group of which the 42D Squadron is a component part received the Presidential Citation for outstanding performance from 7/31/42 to 11/30/42 per Mar Department General Order 74, dated 23 January 1943. (Exhibit "B")

Shortly after arrival at Eckuleia, Captain John J. Deasy assumed command of the squadron, succeeding Eajor Geoper who returned to the mainland. Almost immediately crews newly arrived from the States were attached to receive the six weeks training course preparatory to going "down under" for combat duty. The \* Exhibit "E"

program called for three weeks in gunnery school and three weeks of ground work. The latter emphasized formation flying, co-pilot transition, strenge field lendings, bombing and navigation missions and standard "Y" searches. The classroom subjects stressed water landing procedure, the geography of the Central Facific, the always important recognition and identification, radar p communications, ordnance and chemical warfare. By the end of Larch thirty four crews had been put through the course.

On Earch 19th the unit moves to a new station at schuke Foint T.H. It was a familiar spot to many in the squadron who remembered their two week stay at the field during July, 1942. During this month, to be exact on Earch 26th, Corporal Harold E. Shadbolt, a member of the ground echelon, died as a result of injuries received when he fell from a G.I. truck.

Not all crews assigned to the squadron were present with the squadron. The following pilots and their crews were on D/S "down under": First Lieutenant Warren H. Sands and First Lieutenant Joseph H. Gall were with the 98th Homb Sq.; Captain Alf H. Storm and First Lieutenant Robert G. Kerr were with the 431st Bomb Sq.; First Lieutenant John Wattich and First Lieutenant Walter C. Schmidt were with the 26th Homb Sq. Lieutenant Vincent J. Fridrich who had been Lieutenant Schmidt's co-pilot was killed on 6 Earch 1944 in a plane crash while making a co-pilot transition flight. Lieutenant Gall and his crew returned from D/S for squadron duty during the latter part of Earch.

SECRET

\* Exhibit "G"

It is regrettable that, during the various changes of station undergone since the activation of the squadron, certain records have been lost. The awards listed here were made while these men were with the 42D Squadron, and the orders are taken from the best available information.

#### Majors

Ernest R. Manierre - Distinquished Flying Cross (G.O. 1, USAFISPA, January 1943). Earl J. Cooper - Distinquished Flying Cross (G.O. 113, HHD, August 1943).

<u>Captains</u>

VII--Citation of unit in United States Forces in South Pacific. As authorized by Executive Order 9075 (see III, Bull. 11, W.D., 1942), a citation in the name of the President of the United States, as public evidence of deserved honor and distinction, is awarded to the following-named unit. The citation reads as follows:

SEORET

The 11TH BOMBARDMENT GROUP (H), United States Army Air Forces in the South Pacific, is cited for outstanding performance of duty in action during the period July 31 to November 30, 1942. Opposing the full force of the numerical y superior Japanese with all available aircraft, the 11TH BOMB-ARDMENT GROUP (E) participated continually in attacking the enemy in his efforts to obtain a stronger foothold on strategic territories. Heavy damage was inflicted on Japanese airfields, storage and supply areas, seaplane bases, docks, troop positions and other installations. In addition, the action by this group resulted in the sinking of four enemy ships, the damaging of fifteen and the probable damaging of nine others. Throughout its operations, the group was faced with extremely difficult problems of logistics, airdrome improvement and the necessity for long, hazardous overwater flights to reach to reach enemy objectives, which frequently were located at extreme flying range of its bombardment airplanes. The superior courage and devotion to duty shown by combat crews and ground units of this bombardment group is in the highest traditions of the United States Army and will always be worthy of emulation.

BY ORDER OF THE SECRETARY OF WAR:

G. C. MARSHALL, Chief of Staff.

#### Address Reply to Commanding General, Army Air Forces SEORT Washington, D.C.

#### WAR DEPARTMENT HEADQUARTERS OF THE ARMY AIR FORCES WASHINGTON, D.C.

March 8, 1944

Major General Willis H. Hale, Commanding General, Seventh Air Force.

Dear Hale:

The remarkable landing on Tarawa executed by the pilot and crew of the "Belle of Texas" has come to my attention. Photographs of the exploits are on my desk.

After distinguishing themselves in aerial combat over Maloelap, 1st Lieutenant Pratte and his crew effected a landing on a short fighter strip with a badly riddled airplane. With one engine inoperative and the brakes entirely useless, they had the skill and resourcefulness to employ three parachutes to cut the speed of the airplane and to bring it to a safe stop at the very edge of the runway. This represents an achievement of a high order - unique, as far as I know, in operational history.

I would appreciate your conveying to the men my warm congratulations.

Sincerely,

/s/ H.H. Arnold /t/ H.H. ARNOLD General, U. S. Army, Commanding General, Army Air Forces.
