INTRODUCTION

This bibliography was compiled for the Texas state and local literature component of the United States Agriculture Information Network (USAIN) Preservation Project Plan. The USAIN Preservation Project Plan is a national coordinated effort to preserve United States agricultural literature. This bibliography is an attempt to identify all Texas agricultural literature published by state and local entities, both governmental and commercial, prior to 1946.

Each item was only assigned to one subject and format category that most closely fit the majority of the publication’s content. The academic theses and dissertations were all put in the category of “Theses”. The items were put into the format category of either “Monographs” for books, pamphlets, and other singly issued works, or “Serials” for magazines, academic journals, report or bulletin series, and items with periodic publication over time.
