## ACADEMIC CALENDAR

### Fall Semester 2002

August 28 - 30	Wednesday - Friday. Registration.
August 30	Friday. Last day to register for fall semester classes and pay fees.
September 2	Monday. First day of fall semester classes.
September 5	Thursday. Last day for dropping courses with no record.
September 6	Friday. Last day for adding courses for the fall semester.
September 13	Friday. Last day to apply for all degrees to be awarded in December.
October 21	Monday. Mid-semester grades due in Registrar's Office, 10 a.m.
November 4	Monday. Preregistration begins for 2003 spring semester.
November 8	Friday. Last day for all students to drop courses with no penalty (Q-drop). Last day to change Kinesiology 198/199 to S/U grade on BONFIRE. Last day to officially withdraw from the University.
November 28 - 29	Thursday - Friday. Thanksgiving. Faculty and staff holiday.
December 9	Monday. Redefined day, students attend their Friday classes. Dead day, classes meet but no major exams.
December 10	Tuesday. Last day of fall semester classes. Redefined day, students attend their Thursday classes. Dead day, classes meet but no major exams.
December 11 - 12	Wednesday - Thursday. Reading days, no classes.
Dec. 13, 16 - 18	Friday, Monday - Wednesday. Fall semester final examinations for all students.
December 20	Friday. Final grades for all students due in Registrar's Office, 10 a.m. Last day for undergraduate degree candidates for December to apply for \$1000 Tuition Rebate, 5 p.m.
December 21	Saturday. Commencement and Commissioning.
December 23 - 31	Monday - Tuesday. Faculty and staff holiday.

### Spring Semester 2003\*

January 1	Wednesday. Faculty and staff holiday.
January 9 - 10	Thursday - Friday. Registration.
January 10	Friday. Last day to register for spring semester classes and pay fees.
January 13	Monday. First day of spring semester classes.
January 16	Thursday. Last day for dropping courses with no record.
January 17	Friday. Last day for adding courses for the spring semester.
January 20	Monday. Martin Luther King, Jr. Day. Faculty and staff holiday.
January 24	Friday. Last day to apply for all degrees to be awarded in May.
March 3	Monday. Mid-semester grades due in Registrar's Office, 10 a.m.
March 10 - 14	Monday - Friday. Spring break.
March 13 - 14	Thursday - Friday. Faculty and staff holiday.
March 31	Monday. Last day for all students to drop courses with no penalty (Q-drop). Last day to change Kinesiology 198/199 to S/U grade on BONFIRE. Last day to officially withdraw from the University.
March 31	Monday. Pre-registration begins for the 2003 first term, second term, 10-week summer semester and fall semester.
April 18	Friday. Reading day, no classes.
April 21	Monday. Muster. Campus ceremony.
April 28	Monday. Dead day, classes meet but no major exams.
April 29	Tuesday. Last day of spring semester classes. Redefined day, students attend their Friday classes.

	Dead day, classes meet but no major exams.
April 30 - May 1	Wednesday - Thursday. Reading days, no classes.
May 2, 5 - 7	Friday, Monday - Wednesday. Spring semester final examinations for all students.
May 9	Friday. Last day for undergraduate degree candidates for May to apply for \$1000 Tuition Rebate, 5 p.m.
May 10	Saturday. Commencement and Commissioning.
May 12	Monday. Final grades for all students due in Registrar's Office, 10 a.m.
<b>Summer Session 2003*</b>	
May 26	Monday. Memorial Day. Faculty and staff holiday.
May 30	Friday. Registration and drop/add for first term and 10-week semester. Last day to register for first term and 10-week semester and pay fees.
June 2	Monday. First day of first term and 10-week semester classes.
June 4	Wednesday. Last day for dropping courses with no record for the first term and 10-week semester.
June 5	Thursday. Last day for adding courses for the first term and the 10-week semester.
June 6	Friday. Last day to apply for degrees to be awarded in August for students completing degree requirements in the first term.
June 20	Friday. Last day for all students to drop courses with no penalty for the first term (Q-drop). Last day to change Kinesiology 198/199 to S/U grade on BONFIRE. Last day to officially withdraw from the University for first term.
July 3	Thursday. Last day of first term classes.
July 4	Friday. Independence Day. Faculty and staff holiday.
July 7	Monday. First term final examinations. No 10-week semester classes. Last day to register for the second term and pay fees.
July 8	Tuesday. First day of second term classes.
July 10	Thursday. First term final grades due in Registrar's Office, 10 a.m. Last day to drop courses with no record for the second term.
July 11	Friday. Last day for adding courses for the second term. Last day to apply for all degrees to be awarded in August for students completing degree requirements in the second term or 10-week semester.
July 22	Tuesday. Last day for all students to drop courses with no penalty for the 10-week semester (Q-drop). Last day to officially withdraw from the University for 10-week semester.
July 28	Monday. Last day for all students to drop courses with no penalty for the second term (Q-drop). Last day to change Kinesiology 198/199 to S/U grade on BONFIRE. Last day to officially withdraw from the University for second term.
August 11	Monday. Last day of second term and 10-week semester classes.
August 12 - 13	Tuesday - Wednesday. Second term and 10-week semester final examinations for all students.
August 14	Thursday. Grades for degree candidates due in Registrar's Office, 10 a.m.
August 15	Friday. Last day for undergraduate degree candidates for August to apply for \$1000 Tuition Rebate, 5 p.m.
August 16	Saturday. Commencement and Commissioning.
August 18	Monday. Final grades for second term and 10-week semester due in Registrar's Office, 10 a.m.

\*All dates are subject to change.

# ADMINISTRATION

## The Texas A&M University System

### Board of Regents\*

Phillip D. Adams	Bryan
Anne Armstrong	Armstrong
Dionel E. Avilés (Vice Chairman)	Houston
Wendy Lee Gramm	Washington, D.C.
L. Lowry Mays	San Antonio
Erle Nye (Chairman)	Dallas
Lionel Sosa	Floresville
R. H. (Steve) Stevens, Jr.	Houston
Susan Rudd Wynn	Fort Worth

### Chief Executive Officers\*

Howard D. Graves	Chancellor
Jerry Gaston	Deputy Chancellor
Delmar Cain	General Counsel
Stanton C. Calvert	Vice Chancellor for Governmental Relations
James Fletcher	Vice Chancellor for Administration
C. Roland Haden	Vice Chancellor for Engineering
Edward A. Hiler	Vice Chancellor for Agriculture and Life Sciences
Tom D. Kale	Vice Chancellor for Business Services
Leo Sayavedra	Vice Chancellor for Academic and Student Affairs
Tami Davis Sayko	Chief of Staff

### Texas A&M System Components\*

Prairie View A&M University	
Charles A. Hines	President
Tarleton State University	
Dennis P. McCabe	President
Texas A&M International University	
Ray M. Keck	President
Texas A&M University	
Ray M. Bowen	President
Texas A&M University-Commerce	
Keith McFarland	President
Texas A&M University System Health Science Center	
Nancy Dickey	President
Texas A&M University-Corpus Christi	
Robert R. Furgason	President
Texas A&M University-Kingsville	
Kermeta J. "Kay" Clayton	Interim President
West Texas A&M University	
Russell Long	President

Texas A&M University - Texarkana	
Stephen Hensley . . . . .	President
Texas Agricultural Experiment Station and Texas Cooperative Extension	
Edward A. Hiler . . . . .	Director
Texas Forest Service	
James B. Hull . . . . .	Director
Texas Transportation Institute	
Herbert H. Richardson . . . . .	Director
Texas Veterinary Medical Diagnostic Laboratory	
Lelve G. Gayle . . . . .	Executive Director
Texas Engineering Extension Service	
G. Kemble Bennett . . . . .	Director
Texas Engineering Experiment Station	
C. Roland Haden . . . . .	Director
Texas Wildlife Damage Management Service	
Gary L. Nunley . . . . .	Director

\* - Correct as of Spring 2002

## Texas A&M University at Galveston

### Board of Visitors\*

Michael E. Cokinos, Chairman . . . . .	Houston
Ray Holbrook, Vice Chairman . . . . .	Santa Fe
Searcy Bracewell . . . . .	Houston
John W. Carnes . . . . .	New Orleans
John H. Lindsey . . . . .	Houston
John W. "Bill" Lyons Jr. . . . .	Texas City
Carla Jane Mitcham . . . . .	Houston
George Mitchell . . . . .	Galveston
Erma Lee Mooney . . . . .	Farmers Branch
Bernie Stewart . . . . .	Houston

### Administrative Officers\*

W. Michael Kemp . . . . .	Vice President and Chief Executive Officer
William C. Hearn . . . . .	Associate Vice President for Student Affairs and Administration
James M. McCloy . . . . .	Associate Vice President for Research and Academic Affairs
Richard Lukens . . . . .	Superintendent, Texas State Maritime Program
Donna Lang . . . . .	Assistant Vice President for Academic Services
Brad McGonagle . . . . .	Assistant Vice President for Administration
Grant Shallenberger . . . . .	Assistant Vice President for Student Affairs and Auxillary
Armin M. Cantini . . . . .	Director of Development
Steve Conway . . . . .	Director, Computing and Information Services
Terry Lovell . . . . .	Manager, Accounting Services

\* - Correct as of Spring 2002

## INTRODUCTION

Texas A&M University at Galveston (TAMUG) is an ocean-oriented campus offering academic degrees, research, continuing education, and public service in marine science, engineering, business, and transportation. Because TAMUG is a branch campus of Texas A&M University in College Station, students receive their degrees from Texas A&M University. TAMUG includes the Texas State Maritime Academy, one of only six state maritime training academies in the United States and the only one located on the Gulf of Mexico. It is also the only training academy affiliated with a comprehensive research and teaching university.

TAMUG is located near the mouth of Galveston Bay with close access to the Gulf of Mexico. The University has facilities at three separate campus locations. Most instructional programs are taught at the 130-acre Mitchell Campus on Pelican Island (with housing for 600+ students). Research and classroom work are conducted at the three-acre Ft. Crockett Campus on Galveston Island, including an additional 15,200 sq. ft. of space leased from the National Marine Fisheries Services (which together provide approximately 90,000 sq. ft. for marine laboratory research). The 10-acre Offatts Bayou Campus houses the Center for Marine Training and Safety and student recreational facilities.

### Academic Programs

TAMUG provides undergraduate academic instruction in marine and maritime-related degree programs in Ocean and Coastal Resources, Marine Biology, Marine Biology/Biomedical Sciences, Marine Sciences (Oceanography), Marine Engineering Technology, Marine Transportation, Marine Fisheries, Maritime Systems Engineering (ocean/civil), Maritime Administration (policy/business) and Maritime Studies. All students complete the core curriculum requirements set by TAMU to ensure a broad-based education.

A new program offering a Master of Marine Resources Management began in 2002. Other cooperative graduate degree programs, at both the master and doctorate levels, are in place with the departments of Oceanography, Biology, and Wildlife and Fisheries Sciences at TAMU. The Texas State Maritime Academy is headquartered on the Galveston Campus.

### Academic Facilities

Classrooms, laboratories, and meeting spaces are housed within 12 major buildings on the Mitchell Campus. There are three residence halls on campus, a physical education facility and the Mary Moody Northen Student Center with cafeteria services. The Jack K. Williams Library contains over 43,000 books, 35,000 bound volumes of journals and a collection of charts and maps. Public access computers in the Library guide the user to the holdings of the Williams Library, the Galveston Bay bibliography, and many other library catalogs and computerized databases. The training ship Texas Clipper II, in addition to being a floating campus during summer cruises, provides additional classroom, meeting, and training space during the school year. TAMUG has telecommunications systems established to communicate statewide within the Texas A&M University System universities and agencies. TAMUG has direct access to the TAMU computer network in College Station via remote job entry connect lines.

### Research Programs

Over 35 TAMUG faculty actively participate in extramural research encompassing both the basic and applied aspects of fields such as marine environmental and conservation studies; and marine/maritime engineering, business, law, policy, and management. Research is focused largely in the areas of coastal and beach processes, marine life studies, bay and estuary ecosystems, the offshore/deepwater environments, and geochemical cycling in the marine/aquatic/atmospheric systems.

In addition to the approximately 70 M.S. and PH.D. students supported by the research projects of TAMUG faculty, there exist numerous opportunities for undergraduate students to participate in research projects throughout the academic year and summer months.

An average of 50 to 100 funded research projects are active at any one time. These projects bring an average of \$2.7 million/year to the Galveston campus from agencies such as the National Science Foundation, the Office of Naval Research, NOAA, EPA, Sea Grant, the State of Texas, and a variety of private foundations and businesses. Most notable of these is the TAMUG-based Texas Institute of Oceanography, whose mission is to support Texas scientists conducting basic research in the marine sciences, and to provide the research and technological base for the development of marine-related businesses in Texas and around the Gulf of Mexico. Other research programs at TAMUG include the:

- Benthic Ecology Laboratory
- Center for Bioacoustical Research
- Center for Texas Beaches and Shores
- Center for the Theory of Complex Natural Systems
- Center for Ports and Waterways
- Center for Marine Life Studies
- Laboratory for Aquatic Animal Performance
- Laboratory for Oceanographic and Environmental Research
- Coastal Zone Laboratory
- Laboratory for Applied Biotelemetry and Biotechnology
- Marine Biospeleology Laboratory
- Marine Mammal Research Program
- Physiological Ecology Bioenergetics Laboratory
- Seafood Safety Laboratory
- Sea Turtle and Fisheries Ecology Research Laboratory

In recent years, TAMUG has further strengthened its research program by developing agreements to foster collaboration between TAMUG researchers and scientists at federal and state research laboratories such as the Army Corps of Engineers, the National Marine Fisheries Service, the Texas Transportation Institute and the Galveston Bay National Estuary Program.

### Accreditation

Texas A&M University at Galveston is fully accredited by the Southern Association of Colleges and Schools. Maritime Systems Engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Documents certifying accreditation may be viewed in the Office of the CEO.

### Mission

Texas A&M University at Galveston is a special-purpose institution of higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering, and business and for research and public service related to the general field of marine resources. The institution is under the management and control of the Board of Regents of The Texas A&M University System, with degrees offered under the name and authority of Texas A&M University at College Station.

### Compliance Policy

Within published requirements for admission, Texas A&M University at Galveston does not discriminate in admission of students to study at TAMUG, enrollment in classes, housing or use of facilities in the academic program because of race, color, religion, sex, age, marital status, national origin, condition of handicap, veteran or disabled veteran status. TAMUG does not, and will not, discriminate against any employee or applicant for employment because of race, color, religion, sex, age, marital status, national origin, condition of handicap, veteran or disabled veteran status.

TAMUG embraces affirmative action practices to ensure that applicants are hired fairly, and that employees are treated during their employment without regard to race, color, religion, sex, age, marital status, national origin, condition of handicap, veteran or disabled veteran status. Such action includes, but is not limited to, employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for employment training, including apprenticeship. Any questions or complaints relative to discrimination should be referred to the Human Resources Office.

Limited services and facilities are available to students with handicaps. Individuals should contact the Office of Student Affairs if they have special needs before they commit to enrollment.

### Continuing Education Programs

The outreach programs of the university include Sea Camp (a marine biology summer camp for youths 10-16 years of age) and Elderhostel (a marine environment-oriented camp for senior citizens). The Oil Spill School and the Oil Spill Response Center both serve to provide protection from disasters. Marine safety programs, radar observer schools, workshops on beach ecology, and summer programs are regularly offered. The Center for Marine Training and Safety offers broad-based professional development to employees of coastal and offshore maritime industries. Computer Simulation systems for ship operations (bridge, engine room, radar, oil spill management and communications) provide realistic hands-on experiences for undergraduate and continuing education programs.

### Public Service Programs

The Galveston Bay Information Center has developed a Galveston Bay bibliography which is linked with a local network including an interactive model of Galveston Bay circulation and Compass, an information system developed by NOAA. The Texas Agricultural Experiment Station (TAES) helps TAMUG serve the educational needs of the Galveston area agricultural community. The Texas Marine Mammal Stranding Network is linked statewide to aid in the recovery and study of stranded marine mammals. The Texas Transportation Institute regional office is established to link waterway components to the state's intermodal transportation research and it houses the Center for Ports and Waterways.

### Teacher Certification Program

Students may now complete teacher certification while attending Texas A&M University at Galveston through a collaborative program with Texas A&M-Commerce. Education courses will be offered via distance education. Student teaching will be completed at a Galveston secondary school.

Students majoring in Marine Biology can be eligible for a secondary teaching field in Life Sciences and students majoring in Marine Sciences or Ocean and Coastal Resources can be eligible for a secondary teaching field in Physical Sciences, pending a passing score on the state certification test (ExCET).

## GENERAL INFORMATION

Students who complete the academic programs of Texas A&M University at Galveston (TAMUG) are awarded the degree of Texas A&M University (College Station). Therefore, students enrolled in Texas A&M University at Galveston must adhere to the same basic academic requirements as students enrolled at Texas A&M University (College Station). Students are advised of these requirements and are encouraged to be familiar with the Texas A&M University at Galveston University Rules.

Students are required to complete the courses listed in a curriculum; however, the display of a curriculum does not necessarily indicate the length of time required to complete the degree requirements. Rather, this display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be made by petition, through the Department Head to the Vice President or designee.

This catalog was prepared in advance of its effective date; therefore, some course descriptions may vary from actual course content due to advancements in the discipline, interests of individual professors or recent decisions to change the scope of a course. The catalog is not intended to be a contract, but simply an information bulletin and the University reserves the right to change any of the provisions. Some new courses and changes to existing courses are included in this catalog pending their approval by the Texas Higher Education Coordinating Board. A separate class schedule giving course offerings and other pertinent information is published each semester and is available on request from the Student Relations Office. Students should refer to the class schedule for the offerings in any given semester. For various administrative reasons, such as insufficient enrollment, some scheduled courses might not be offered in the announced semester.

### Academic Year

The academic year of Texas A&M University at Galveston is divided into the fall and spring semesters and the summer session which consists of either two terms of five weeks each or one 10-week summer semester.

During the summer session, most departments offer courses which are selected to meet the needs of regular university students.

### University Core Curriculum

The University Core Curriculum at Texas A&M University assures that all undergraduate programs provide for breadth of understanding. The Core Curriculum emphasizes competence in the process of learning, the capacity to engage in rigorous and analytical inquiry, and the ability to communicate clearly and effectively. University Core Curriculum requirements are described in the sections that follow. These requirements must be met by every student pursuing a baccalaureate degree program at Texas A&M University, regardless of his or her major. Individual degree programs may require that specific courses from the general University list be used to satisfy University Core Curriculum requirements. Please check with individual program advisors for details (see notes 1, 2, 3 and 6).

### Specific Requirements

#### 1. Communication (6 hours)

A course used to satisfy this requirement shall have as its primary focus the improvement of student expression in communication. This focus on student expression should be demonstrated both in course instruction and assessment. Acceptable forms of student expression may range from creative to technical. Acceptable courses may include those embedded in subject areas other than writing. This requirement must be satisfied by ENGL 104 (3 hours) and one of the following: ENGL 203, ENGL 210, ENGL 235, ENGL 236, ENGL 241, ENGL 301, SCOM 203, SCOM 205 and SCOM 243.

2. Mathematics (6 hours, at least 3 of which must be in mathematics)

To be selected from any mathematics course except: MATH 102, MATH 103, MATH 150, MATH 365 and MATH 366. Also may select 3 hours from: PHIL 240, PHIL 341 and PHIL 342.

3. Natural Sciences (8 hours)

Two or more natural sciences courses which deal with fundamental principles and in which critical evaluation and analysis of data and processes are required. A minimum of one course shall include a corresponding laboratory. Non-technical courses are specifically excluded.

Four hours to be selected from: BIOL 113/123, BOTN 101, CHEM 101, CHEM 103/113, GEOL 101, PHYS 201, PHYS 218 and ZOO 107.

Remaining hours to be selected from courses listed and/or: AGRO 105, AGRO 301, AGRO 405, ANTH 225, ATMO 201/202, ATMO 326, BESC 201, BIOL 114/124, CHEM 102, CHEM 104/114, CHEM 106/116, CHEM 222/242, FRSC 304, GENE 301, GENE 310, GEOG 203/213, GEOL 106, GEOL 307, GEOS 410, HORT 201/202, OCNG 251/252, PHYS 202, PHYS 208, PHYS 219, PHYS 306/307, RENR 205/215 and ZOO 225.

4. Humanities (see Note 4).

A. Humanities (3 hours) Courses used to satisfy this requirement shall address one of the following subject areas: history, philosophy, literature, the arts, culture or language (exclusive of courses devoted predominantly to acquiring language skills in a student's native language).

Acceptable courses are: AGE 316, ANTH 202, ANTH 205, ANTH 301, ANTH 302, ANTH 303, ANTH 306, ANTH 308, ANTH 313, ANTH 315, ANTH 317, ANTH 324, ANTH 350, ANTH 351, ARCH 349, ARCH 430, ARCH 434, ARCH 448, ARTS 149, ARTS 150, ARTS 350, ENDS 149, ENDS 150, ENDS 249, ENDS 329, ENGL 203, ENGL 212, ENGL 221, ENGL 222, ENGL 227, ENGL 228, ENGL 231, ENGL 232, ENGL 235, ENGL 236, ENGL 251, ENGL 310, ENGL 313, ENGL 314, ENGL 315, ENGL 316, ENGL 317, ENGL 319, ENGL 321, ENGL 322, ENGL 323, ENGL 330, ENGL 334, ENGL 335, ENGL 336, ENGL 337, ENGL 338, ENGL 339, ENGL 340, ENGL 345, ENGL 346, ENGL 347, ENGL 348, ENGL 350, ENGL 351, ENGL 352, ENGL 353, ENGL 354, ENGL 355, ENGL 360, ENGL 361, ENGL 362, ENGL 365, ENGL 368, ENGL 374, ENGL 375, ENGL 376, ENGL 377, ENGL 378, ENGL 385, ENGL 390, ENGL 394, ENGL 396, ENGL 401, ENGL 412, ENGL 414, ENGL 431, ENGL 474, ENGL 481, ENGR 482, GEOG 202, GEOG 301, GEOG 305, GEOG 323, HIST (any course), HORT 203, HUMA 211, HUMA 213, HUMA 303, HUMA 304, LAND 240, LAND 340, LBAR 203, LBAR 331, LING 307, LING 310, LING 451, MODL \* MUSC 200, MUSC 201, MUSC 311, MUSC 312, MUSC 315, MUSC 319, MUSC 321, MUSC 324, PHIL (any course except 240, 341, 342), RELS 211, RELS 213, RELS 303, RELS 304, RELS 317, RELS 360, RELS 368, SCOM 301, SCOM 327, SCOM 425, SCOM 430, THAR 101, THAR 155, THAR 280, THAR 281, THAR 380, WMST 200, WMST 333, WMST 368, WMST 374, WMST 412, WMST 461, WMST 473, WMST 474 and WMST 477.

\* any course from the Department of Modern and Classical Languages, which includes CLAS, FREN, GERM, ITAL, JAPN, MODL, RUSS, SPAN-see note 5

B. Visual and Performing Arts\* (3 hours) Acceptable courses are: ARCH 349, ARCH 430, ARCH 434, ARCH 437, ARCH 448, ARTS 103, ARTS 111, ARTS 112, ARTS 149, ARTS 150, ARTS 305, ARTS 312, ARTS 329, ARTS 350, CARC 335, CLAS 352, ENDS 101, ENDS 115, ENDS 149, ENDS 150, ENDS 311, ENGL 212, ENGL 219, ENGL 251, ENGL 312, ENGL 317, ENGL 340, ENGL 351, ENGL 356, ENGL 385, ENGL 412, FILM 201, FILM 301, FILM 394, FREN 414, HORT 203, KINE 160, KINE 161, KINE 162, KINE 163, KINE 164, KINE 165, KINE 166, KINE 167, KINE 168, KINE 169, KINE 170, KINE 171, KINE 172, KINE 173, KINE 174, KINE 311, LAND 240, MODL 341, MODL 352, MUSC 102, MUSC 200, MUSC 201, MUSC 202, MUSC 302, MUSC 311, MUSC 312, MUSC 315, MUSC 319, MUSC 321, MUSC 324, PHIL 330, PHIL 375, SCOM 430, SPAN 410, THAR 101, THAR 110, THAR 155, THAR 210, THAR 280, THAR 281, THAR 380, THAR 385 and THAR 407.

\* Note: Students graduating from the Galveston Campus may choose to complete 3 additional hours of the Humanities in place of Visual and Performing Arts.

5. Social and Behavioral Sciences/U.S. History and Political Science (see Note 4).

A. Social and Behavioral Sciences (3 hours) Courses used to satisfy this requirement shall address one of the following subject areas: anthropology, economics, political science, geography, psychology, sociology or communication.

Acceptable courses are: AGEC 105, AGEC 350, AGEC 429, AGEC 430, AGEC 452, AGED 340, AGED 400, AGED 440, ANTH 201, ANTH 210, ANTH 225, ANTH 300, ANTH 311, ANTH 314, ANTH 403, ANTH 404, ANTH 410, ECON (any course), ENGL 209, ENGL 311, ENGR 400, EPSY 320, EPSY 321, GEOG 201, GEOG 204, GEOG 306, GEOG 311, GEOG 330, GEOG 401, GEOG 440, HITH 236, HORT 335, INST 322, JOUR 102, JOUR 301, JOUR 401, JOUR 440, KINE 304, KINE 319, LBAR 204, LING 209, LING 311, LING 402, MGMT 475, POLS (any course), PSYC (any course except 203, 204), RELS 403, SCOM 105, SCOM 315, SCOM 320, SCOM 325, SCOM 335, SOCI (any course except 220, 420), VTPB 221, WMST 207, WMST 300, WMST 316, WMST 317, WMST 404, WMST 424, WMST 462 and ZOO 225.

B. U.S. History and Political Science (12 hours, 6 hours of history and 6 hours of political science). POLS 206 and 207 and HIST 105 and 106 or other courses in American and Texas history, except that courses pertaining solely to Texas history may not comprise more than 3 hours.

6. International and Cultural Diversity (6 hours)

Two courses from the following list are to be taken by the student. If a course listed below also satisfies another Core Curriculum requirement, it can be used to satisfy both requirements if the student wishes to do so. For example, a course that satisfies the Social and Behavioral Sciences requirement may be used to satisfy the International and Cultural Diversity requirement if that course also appears on the list below.

Acceptable courses are: ACCT 445, AGEC 452, AGED 422, ANTH 205, ANTH 210, ANTH 300, ANTH 301, ANTH 306, ANTH 311, ANTH 314, ANTH 315, ANTH 319, ANTH 324, ANTH 403, ANTH 404, ANTH 426, ARCH 448, ARTS 150, BICH 302, CARC 331, ECON 312, ECON 319, ECON 320, ECON 324, ECON 330, ENDS 150, ENGL 222, ENGL 232, ENGL 251, ENGL 333, ENGL 336, ENGL 337, ENGL 338, ENGL 339, ENGL 340, ENGL 352, ENGL 362, ENGL 374, ENGL 378, ENGL 474, FREN 301, FREN 322, FREN 336, FREN 414, FREN 418, GEOG 202, GEOG 301, GEOG 305, GEOG 306, GEOG 311, GEOG 320, GEOG 321, GEOG 323, GEOG 402, GERM 305, GERM 322, HIST 210, HIST 214, HIST 258, HIST 301, HIST 305, HIST 307, HIST 319, HIST 324, HIST 336, HIST 339, HIST 342, HIST 343, HIST 345, HIST 346, HIST 348, HIST 352, HIST 355, HIST 356, HIST 402, HIST 405, HIST 407, HIST 412, HIST 439, HIST 440, HIST 441, HIST 449, HIST 451, HIST 455, HIST 460, HIST 461, HIST 464, HIST 473, HIST 477, HITH 236, HITH 334, HORT 335, HUMA 303, HUMA 304, IBUS 401, IBUS 445, IBUS 450, IBUS 452, INST 322, JOUR 406, JOUR 407, LAND 240, LBAR 331, LBAR 332, LBAR 333, LING 307, LING 402, MGMT 430, MGMT 450, MGMT 452, MKTG 330, MKTG 401, MODL 222, MODL 341, MODL 342, MODL 352, MODL 362, MUSC 312, MUSC 315, MUSC 319, MUSC 324, NUTR 302, PHIL 283, PHIL 416, PHIL 419, PLAN 415, POLS 317, POLS 322, POLS 323, POLS 324, POLS 329, POLS 331, POLS 338, POLS 365, POLS 462, PSYC 300, RELS 303, RELS 304, RELS 403, RPTS 340, RUSS 341, RUSS 401, SCOM 327, SCOM 335, SCOM 425, SCOM 430, SOCI 316, SOCI 317, SOCI 321, SOCI 323, SOCI 324, SOCI 325, SOCI 329, SOCI 330, SOCI 340, SOCI 350, SOCI 403, SOCI 419, SOCI 424, SPAN 301, SPAN 312, SPAN 320, SPAN 410, SPAN 411, SPAN 412, SPAN 421, SPAN 450, TEFB 271, THAR 281, THAR 380, VTPB 221, WMST 300, WMST 316, WMST 317, WMST 333, WMST 374, WMST 404, WMST 407, WMST 412, WMST 424, WMST 430, WMST 461, WMST 462, WMST 473, WMST 474 and WMST 477.

7. Kinesiology

Requirements are to be fulfilled by completing KINE 198 Health and Fitness and any other one KINE 199 course. KINE 199 used to fulfill University Core Curriculum requirements must be taken S/U. KINE 199 courses not included in the University Core Curriculum can be taken for a grade in accordance with the student's college policy. Transfer students with fewer than 2 hours of kinesiology credit must meet the KINE 198 requirement either by transfer of credit or by taking the course at Texas A&M.

### Core Curriculum Notes:

1. Individual degree programs may impose more restrictive requirements in any of these areas. Students should consult the degree listing in this catalog and their academic advisors to ensure that they are satisfying all requirements of their majors.
2. With the exception of courses satisfying the International and Cultural Diversity requirement, no course shall be counted twice by the same student toward satisfaction of the University Core Curriculum requirements. For example, if a student elects to use ARCH 349 to satisfy the Visual and Performing Arts requirement, the student may not use the course to satisfy the Humanities requirement.
3. Courses numbered 285, 289, 484, 485 or 489 do not satisfy University Core Curriculum requirements.
4. No student may satisfy all Core Curriculum requirements in the categories of Humanities, Visual and Performing Arts, and Social and Behavioral Sciences by courses having the same prefix.
5. If courses in MODL are used to fulfill the Humanities requirement, they must be in a different language than taken in high school or, if in the same language, at the 200-level or higher. For example, if the student took Spanish in high school, then the student may not use SPAN 101 or 102 in satisfying the Humanities requirement.
6. Students transferring course credit to satisfy the University Core Curriculum requirements should refer to the Texas Common Course Numbering System (last section of this catalog) and the Transfer Course Credit Policies in this catalog.

## ADMISSION

Texas A&M University at Galveston has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to the University and any of its sponsored programs is open to all qualified individuals. To be admitted, an applicant must meet the admission requirements in effect for the desired term of entry. Texas A&M University at Galveston reserves the right to defer the initial registration of newly admitted applicants if it appears their enrollment for a given semester will exceed the physical capabilities of the TAMUG campus and jeopardize the quality of education offered students to whom the University is already committed.

You can apply to TAMUG and all other Texas public universities using only one application. You can find this application "on the web" at [www.applytexas.org](http://www.applytexas.org) (see instructions below). Acceptance by the Office of Admissions and Records does not constitute admission to the U.S. Maritime Service Corps of Cadets.

When admission requirements have been satisfied, the Office of Admissions and Records will send the applicant a letter of acceptance. The Office of Student Relations will send an acceptance packet and a medical history and immunization form to the student. State law requires that all students enrolled in an institution of higher education present evidence of immunization against diphtheria, tetanus and, if under 19 years of age, poliomyelitis. Students entering or reentering TAMUG must furnish proof of the required immunization by completing and returning the medical history and immunization form prior to the first day of classes.

### Application Information

The three applications for undergraduate admission in the year 2003 are the State of Texas Common Application for Admission to Texas Public Universities for freshman, transfer and international admission. While a paper application should be available from any high school or community college in Texas, we recommend you access the appropriate application from the State of Texas Common Application Internet address ([www.applytexas.org](http://www.applytexas.org)) or the TAMUG internet address ([www.tamug.edu](http://www.tamug.edu)).

A paper application may be obtained from the Office of Student Relations by calling toll free at 1-877-322-4443 or by email at [seaaggie@tamug.tamu.edu](mailto:seaaggie@tamug.tamu.edu).

The admission guidelines presented in this catalog are for admission to the fall, spring and summer 2003 semester. These admission criteria are subject to change.

### Types of Students and Application Deadlines

A Freshman student is an applicant who is a citizen or permanent resident of the United States; is a degree-seeking applicant and is without college credit; or is still in high school, with or without college credit. Freshman may apply during the following date periods:\*

To apply for Spring 2003 - Sept 1, 2002 to Nov. 15, 2002

To apply for Summer I 2003 - Sept 1, 2002 to May 15, 2003

To apply for Summer II or Fall 2003 - Sept 1, 2002 to July 1, 2003

\* Although the following deadlines are posted as read, TAMUG will continue to accept applications until all seats are full in the freshman class.

A Transfer student is an applicant who is a citizen or permanent resident of the United States; is a degree-seeking applicant; has graduated from high school or equivalent; has enrolled in a post-secondary institution; does not have a bachelor's degree; and does not qualify for readmission. Transfer students may apply during the following date periods:

To apply for Spring 2003 - Sept 1, 2002 to (no deadline)

To apply for Summer/Fall 2003 - January 1, 2003 to (no deadline)

An International student is an applicant who is not a citizen or permanent resident of the United States; and has never enrolled at Texas A&M as an undergraduate degree-seeking student. International students may apply during the following date periods:

To apply for Summer 2003 - Sept. 1, 2002 to Nov. 1, 2002

To apply for Fall 2003 - Sept. 1, 2002 to Feb. 1, 2003

To apply for Spring 2004 - April 1, 2003 to Aug. 1, 2003

A Readmission student is an applicant who is a former degree-seeking Texas A&M undergraduate student (including an international student); does not have a bachelor's degree; did not officially register for the previous semester (excluding summer sessions) at Texas A&M. Readmission does not include applicants whose only previous enrollment at Texas A&M has been as a non-degree student. Readmission students may apply during the following date periods:

To apply for Spring 2003 - Sept 1, 2002 to (no deadline)

To apply for Summer 2003 - January 1, 2003 to (no deadline)

To apply for Fall 2003 - Jan. 1, 2003 - (no deadline)

A Postbaccalaureate Undergraduate student is an applicant who has a bachelor's degree; wishes to apply for further study at the undergraduate level; and wishes privileges of a degree-seeking student. These may apply during the following date periods:

To apply for Spring 2003 - Sept 1, 2002 to (no deadline)

To apply for Summer/Fall 2003 - January 1, 2003 to (no deadline)

A Non-degree Seeking student is an applicant who wishes to take specific undergraduate course work and does not wish to pursue a degree at Texas A&M. These may apply during the following date periods:

To apply for Spring 2003 - Sept 1, 2002 to (no deadline)

To apply for Summer/Fall 2003 - January 1, 2003 to (no deadline)

### Items Necessary to Complete an Application File

Please see the Readmission, International, Postbaccalaureate or Non-degree sections for other items required to complete the transfer application for those types of admission. U.S. citizens completing a non-U.S. high school program should refer to the Texas A&M University Office of International Admissions for questions concerning transcripts, examination results and foreign credentials.

An application is reviewed to make a decision about admission after all items listed below have been received. The items must be received by the appropriate deadlines to assure consideration (please see deadlines on the previous page):

Texas Common Application - preferably submitted electronically, completed and signed by applicant.

Application Fee - Domestic fee is \$35, International fee is \$75. (If payment of the application fee creates an extreme financial hardship, please enclose verification of need for a fee waiver from the applicant's school counselor or another knowledgeable official. No waiver of the international application fee is available.) Make checks and money orders payable to Texas A&M University at Galveston. The applicant's name and Social Security Number should be included on the face of the check or money order. TAMUG will accept payment by VISA, MasterCard, American Express or Discover. Do not send cash.

SAT or ACT Scores - Required of all freshman applicants. Scores should be sent directly from the testing agency. The SAT code is 6835; the ACT code is 6592. Test scores must be from a test date within five years of the date of planned enrollment.

#### Official High School Transcripts:

Freshman applicants who have not graduated from high school at the time of application are to submit an official transcript indicating grades and class rank at least through their junior year.

Freshman applicants who have graduated from high school at the time of application are to submit an official high school transcript that includes class rank and date of graduation or a certificate verifying completion of a GED program. If the applicant's high school does not rank its students, an official statement from the high school must be presented as part of the application file.

Transfer applicants must provide an official high school transcript verifying date of graduation or completion of a GED program prior to enrollment.

Readmit and postbaccalaureate applicants are not required to submit a high school transcript as part of the application file.

To be considered official, a transcript on paper must bear an original signature of a school official or an original school seal. Transcripts in a language other than English must be accompanied by an official English translation.

Applicants who have attended high school both in the U.S. and out of the country should submit official transcripts from each school attended.

For students enrolled in the United States, official transcripts from other countries will be accepted provided the copies are verified by the U.S. institution.

Fax copies are not official.

#### Official College Transcripts:

An official transcript is required from every post-secondary institution attended even if the applicant did not earn credit, receive a course grade or the course is not transferable. Course work from one college posted on the transcript of another college will not satisfy this requirement.

Official transcripts on paper are to be sent by the sending institution in a sealed envelope. The transcript will not be considered official if the student has had access to the actual transcript.

Transcripts in a language other than English must be accompanied by an official English translation.

Fax copies are not official.

**Permanent Resident Card** - An applicant who has permanent resident status in the United States is to include a copy of both sides of the permanent resident card with the application.

#### Notification of Application Status

Check the Office of Admissions and Records Internet address at [www.tamug.tamu.edu/admrc](http://www.tamug.tamu.edu/admrc) to verify your application has been received and to determine if any credentials are missing. Please allow us two weeks to process your credentials.

The Office of Admissions and Records will make every effort to inform applicants of incomplete files. If incomplete applications are received within one month of the closing date, there may not be sufficient time for the Office of Admissions to notify applicants. Applicants may, however, check the above Internet address. All items necessary to complete an application must be received by the Office of Admissions and Records by the closing date to assure consideration for admission.

## SUSPECTED FRAUDULENT ADMISSION APPLICATIONS

Applicants for admission to Texas A&M University should be aware that the information submitted will be relied upon by University officials to determine their status for admission and residency for tuition purposes. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by Texas A&M University. The submission of false or incomplete information is grounds for rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action.

For prospective students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Director of Admissions and Records, with a final right of appeal to the Associate Vice President for Academic Affairs and Research.

For enrolled students, the initial determination of whether a student submitted a fraudulent application will be made by the Registrar, with a final right of appeal to the University Disciplinary Appeals Panel or to the Graduate Appeals Panel.

Any University official who suspects that a prospective student or enrolled student has submitted a fraudulent admission application must notify the Director of Admissions and Records.

## FRESHMAN ADMISSION

When all credentials necessary to complete a freshman applicant's file are received during the admission application period, one of the following criteria will be used to determine who will be offered admission:

1. Top 10% Applicants from Texas High Schools - Applicants who are Texas residents or who are enrolled in recognized public or private high schools in Texas with a rank in the top 10% of their high school graduating class will be automatically admitted to TAMUG. These applicants are required to submit all required credentials by the closing date to be admitted.
2. Academic Admits - Applicants who are Texas residents or who are enrolled in recognized public or private high schools in Texas with a rank in the top 50% of their high school graduating class, achieve a 1,300 SAT or 30 ACT and meet minimum course work will be automatically admitted. Applicants who are not Texas residents and are enrolled in recognized public or private high schools outside of Texas with a rank in the top 25% of their high school graduating class, achieve a 1,300 SAT or 30 ACT and meet minimum course work will be automatically admitted. These applicants are required to submit all required credentials by the closing date to be admitted.
3. Other Applicants - Applicants not meeting the above requirement will have their complete application file reviewed to make an admission decision. Factors included in the consideration are:

### A. College Preparatory Coursework

Four years of college preparatory English

Three and a half years of mathematics to include Algebra, Geometry, Algebra II and advanced math

Three years of science with at least two courses from Biology I, Chemistry I or Physics I

Two years of the same foreign language. Note: For students enrolling in Fall 2003 and thereafter, three units (three full years) of high school course work in the same foreign language or two semesters of college work will be required for graduation.

Note: These are our recommended minimum courses. Most applicants who are offered admission will have taken courses well beyond the minimum and will have taken advantage of the most challenging courses offered by their high schools.

B. Class Rank and Standardized Test Scores - Most applicants who are offered admission present a class rank and test score that meet or exceed one of the following combinations:

<u>Rank in class</u>	<u>SAT I</u>	<u>ACT</u>
1st Quarter	920	19
2nd Quarter	1,050	23
3rd and 4th Quarters	1,180	26

C. Information Presented in the Application

- Extracurricular activities including time commitment and duration of involvement
- Leadership and/or exceptional talent as shown in extracurricular activities and/or work
- Community/volunteer work including time commitment and duration of involvement
- Awards and achievements earned while in high school
- Employment and/or internships including dates of work and hours per week, particularly those during the school year
- Family educational background and household income

D. Essay Topic C from the Texas Common Application

- Individual circumstances that may have influenced or would enhance understanding of the applicant's academic record or any other factors such as bilingual proficiency, exceptional work or family responsibilities the applicant wishes to present in the application
- Academic association with Texas A&M University such as campus visits or University sponsored programs
- Family (siblings, parents and grandparents) who now attend or have attended Texas A&M or Texas A&M University at Galveston
- Demonstrated interest in the Corps of Cadets

### Information for all Freshman Applicants

All applicants should use the application questions and the essay topic to present as complete information as possible of their academic background and personal strengths and circumstances.

Letters of recommendation are not required, but will be reviewed. If you choose to submit letters of recommendation, be sure they validate or certify leadership, exceptional talent, or special circumstances. The most helpful letters are from individuals who know you well and who can write about what distinguishes you from other applicants. Please submit no more than two letters of recommendation.

A limited number of applicants who do not have the college preparatory course work or strong academic credentials may be offered provisional admission that requires the successful completion of an enrichment program at Texas A&M University at Galveston.

### Notice of Admission Decision

Admission decisions are made throughout the application period and announced as soon as possible. The decision may be to admit, deny or hold the application for additional review. Although a final decision may not be announced until early December for spring admission or in March for summer, fall or Enrichment Program admission, decisions are made on a rolling basis and are generally made upon file completion.

## TRANSFER STUDENT ADMISSION

### Admission Criteria

Transfer applicants must have at least a 2.25 grade point ratio (GPR) on at least 12 graded semester hours of transferable course work at the time of application to be considered.

Applicants who drop or withdraw from courses frequently and who do not achieve satisfactory grades (B or C, depending upon the intended major) routinely will be at a disadvantage in the review for admission.

Spring grades may be used in the fall admission decision if received by June 1.

The entire application, including the essay, is considered to identify admissible candidates.

A transfer student is deemed as one who has registered at another college or university. An applicant may not disregard the academic record of any previous education received at another institution, other than exceptions stipulated under the Texas Academic Fresh Start Program. Admission may be granted to undergraduate students who have begun their work at other colleges or universities and have also satisfied the requirements as set forth below.

- An applicant must be eligible to return to the institution from which the transfer is sought.
- Applicants seeking admission to the license-option curricula who have attended another maritime academy or college must provide a letter to the Superintendent of the Texas Maritime Training Program from the Superintendent of the other academy or college verifying that the student is eligible to return to that institution.
- Transfer applicants are required to submit an official high school transcript.

Applicants must also submit a formal application for admission as well as official transcripts of their record at each college or university previously attended as early as possible. This material should be sent to the Office of Admissions and Records, Texas A&M University at Galveston, P.O. Box 1675, Galveston, Texas 77553-1675. The applicant must have achieved an overall grade point ratio of 2.25 or better on the work attempted and must meet or surpass this same standard for each of the last two semesters of attendance, if in attendance two or more semesters. A 10-week summer session with a normal load of course work will be considered a full semester. To assist preparation for admission and enrollment at Texas A&M, the following foundation course pattern has been developed. Texas A&M course equivalencies to the Texas Common Course Numbering System (TCCNS) may be requested from the Admissions and Records Office.

The number of hours and the grades earned on transferable courses in the foundation are the primary criteria used to make transfer admissions decisions. Priority will be given to students with a minimum of 24 semester credit hours. However, applicants with a minimum of 12 semester credit hours will be considered.

### Suggested Foundation Courses for Transfer Students

	Hours	Chosen Degree Program
ENGL 104	3	
HIST 105 & 106	6	
POLS 206 & 207	6	
MATH 151	4	
BIOL 113,123, 114, & 124	8	MARB, MARE, MARA, or MARS majors
CHEM 101, 111, 102, & 112	8	MART, MASE, or MARE majors
Humanities Electives	6	Refer to your degree listing for options
Social Science Electives	6	Refer to your degree listing for options

On the basis of the credentials submitted, credit will be given for work completed satisfactorily at another properly accredited college or university as long as the work is equivalent in character and extent to similar work at Texas A&M University at Galveston or Texas A&M University. Credits given by transfer are provisional and may be cancelled at any time if the student's work at the University is unsatisfactory. See the section entitled "Transfer of Credits" for additional information. Students will be classed by the number of credits transferred. Depending on the number of transferred credits used in the student's degree plan, a student could be classed as a senior but be a curriculum sophomore.

Transfer students should read carefully the section of this catalog entitled "Residency Requirements for a Baccalaureate Degree," particularly the portion which explains residency requirements. Transfer students should refer to the Texas Common Course Numbering System section for a reference concerning course credit.

## Residence Requirement for Baccalaureate Degree

A candidate for a baccalaureate degree at Texas A&M University at Galveston must successfully complete a minimum of 36 semester hours of 300- and/or 400-level course work in residence at Texas A&M University at Galveston or College Station to obtain the baccalaureate degree. A minimum of 12 of these semester hours must be in the major. Candidates for license-option curricula must complete the last two years of the minimum three-year training requirement at Texas A&M University at Galveston and participate in the Corps of Cadets. Students enrolled in a license-option curriculum are required to participate in the Corps of Cadets every semester they are registered. Generally this will be eight regular semesters and three summer cruises.

## Change of Curriculum to Another Campus

Texas A&M offers course work off campus. Participation in such programs or course work does not give the participant automatic campus enrollment privileges. Students are eligible to change to another campus, center or location only after completion of a minimum of 24 graded hours earned with a 2.5 GPA while enrolled as a student in residence at the campus, center or location of admission. For a change of curriculum to be approved, students must meet the conditions of their desired curriculum and space must be available at the campus, center or location of desired enrollment. Final approval is granted by the academic dean of the college that administers the curriculum.

## Transfer Course Credit Policies

Transfer credit on course work complete at the time of application to Texas A&M University is transferable only when an official transcript from the originating institution is presented as part of the application for admission or readmission process.

The transfer of course credit will be determined by the Office of Admissions and Records on a course-by-course basis. Credit submitted for transfer must be on an official transcript received by the Office of Admissions and Records from the registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transfer of credit decision will be based on the following criteria. All criteria are to be considered together; for example, criteria 10 may be qualified by criteria 7.

## Credit from Institutions Accredited by One of the Regional Accrediting Associations

1. A course that is normally considered as part of a bachelor's degree program (not including the bachelor of technology or similar terminal degree) may be transferred. The following criteria, taken together, are used:
  - a. The course is applicable to a bachelor's degree at TAMUG.
  - b. The course is similar to a course or courses offered for degree credit by TAMUG.
  - c. The course content is at or above the level of the beginning course in the subject matter offered by TAMUG.
2. A course that is intended for use in a vocational, technical or occupational program will normally not transfer. In certain cases, credit for occupational skill courses will be considered. Transfer of this credit requires either that the student's Texas A&M major is engineering technology or industrial distribution or that the student's major department and dean approve the course for use in the student's degree program.
3. Credit for support courses such as math, science and English intended specifically for use in an occupational program will not be transferred.

4. Credit for the course must be shown on the official transcript in semester hours or in units that are readily converted to semester hours.
5. A graduate-level course will not be transferred for undergraduate credit unless approved for use in the student's undergraduate degree program by the student's major department and dean. This also applies for a course offered in a professional degree program such as nursing, law or medicine.
6. Credit by examination courses which are transcribed from other colleges or universities may be transferred if sequential course work with credit is also indicated. If there is evidence that the credit by examination courses are part of the student's program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines.
7. Courses similar to ones offered by the Colleges of Agriculture and Life Sciences, Business, Geosciences, Engineering or TAMUG at the junior or senior level transfer by title only. Such courses may be used in the student's degree program only if approved by the department head and dean of the student's major field. Validation of such credit, either by examination or the completion of a higher level course, may be required.
8. A field experience, internship or student teaching course may be transferred by title only.
9. Credit for cooperative education will not be transferred.
10. A course that is substantially equivalent to a TAMUG course transfers as an equivalent course. Two or more courses may be combined to form one or more equivalent courses. If there is doubt about the equivalency of a course, the TAMUG department offering the course subject matter is asked to determine if the course is equivalent.
11. As a general policy, credit for admission will be given for transfer work satisfactorily completed with a passing grade at another properly accredited institution.
12. Grade Point Ratio (GPR) for any period shall be computed by dividing the total number of semester hours of transferable courses for which the student received grades into the total number of grade points earned in that period. Credit hours to which grades equivalent to TAMUG grades of W, F, I or U are assigned shall be included; those having grades equivalent to TAMUG grades of WP, Q, S, X and NG shall be excluded.
13. In any case where a decision cannot be made using the above criteria, the Office of Admissions and Records will determine the transfer of credit based on University policy, previous actions of the University and prior experience.

### **Resolution of Transfer Disputes for Lower Division Courses Between Public Institutions in Texas**

The following procedures shall be followed by public institutions of higher education in the resolution of credit transfer disputes involving lower-division courses:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.
2. A student who receives notice as specified in subsection 1 may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.

3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Board rules and guidelines.
4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner's designee shall make the final determination about the dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

### Credit from Nonaccredited Schools

Students who transfer to TAMUG from an institution of higher education that is not accredited by one of the regional accrediting associations may validate the work taken at the institution by one of the following methods:

1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.
2. Successful completion of a higher level course in the same subject area when approved by the head of the department and the dean of the college.

Credit will be given to students transferring from nonaccredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at TAMUG.

### Credit from Abroad

Transfer work from institutions following other than the United States educational system with instruction in English will be evaluated on an individual basis. A-level examinations will transfer. Baccalaureate II examinations will not transfer; however, these students may take placement and proficiency examinations to receive credit by examination. Credit will be given for work satisfactorily completed at international institutions offering programs recognized by Texas A&M. Official credentials submitted directly from the registrar's office and a listing of courses completed and grades awarded must accompany any request for transfer credit. Transfer work will be awarded by course title unless previous arrangements have been made using the Texas A&M University Study Abroad Transfer Credit Agreement form. Courses must be equivalent in character and content to courses offered at Texas A&M.

No English composition courses will be transferred from institutions located in non-English speaking countries. American history and American political science (government) courses will not transfer from foreign institutions. Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the office of a Texas A&M recognized university, institute or language training center. Carefully check the credentials of all language centers and language institutes.

### Credit for Military Experience

The University follows, with limitations, the recommendations of the American Council on Education (ACE) has published in the Guide to the Evaluation of Educational Experiences in the Armed Forces in granting credit for military service schools. At a minimum, the following guidance applies:

- Courses must be in the "baccalaureate/associate degree category" as defined by the ACE guide. This precludes acceptance of almost all of vocational, technical or certificate category courses, or military occupational specialties or job experience.

Students who have completed one year of active duty in the armed forces of the United States may be given academic credit for 4 semester hours for basic ROTC and 4 semester hours of Physical Activity (KINE 199).

For consideration of credit for military service schools, the applicant may submit the following:

1. A certified original of the DD Form 295, or
2. A copy of the DD Form 214, or
3. Course completion certificates
4. Army/ACE Registry Transcript System (AARTS)
5. Sailor/Marine ACE Registry Transcript System (SMARTS)

### Extension and Correspondence Courses

Students may apply a maximum total of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an undergraduate degree, even though Texas A&M does not offer courses by correspondence. The Office of Academic Enhancement is authorized to act as an agent to receive correspondence courses.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order to receive credit for correspondence work toward a bachelor's degree, students should:

- obtain advance written permission from the dean of his or her college;
- present appropriate evidence of having completed the course.

### INTERNATIONAL STUDENT ADMISSION

International students (non-U.S. citizens) with superior academic records will be considered for admission to Texas A&M University at Galveston through the International Admissions Office of Texas A&M University (College Station). For information about application requirements, deadlines, admissions criteria, expenses, and English language proficiency, international students should refer to the Texas A&M University Catalog or contact International Admissions, Texas A&M University, P. O. Box 30014, College Station, TX 77842-3014. Phone: 979-845-1071. Email: [international-admission@tamu.edu](mailto:international-admission@tamu.edu).

### Transcripts/Examination Results

Official academic records (transcripts, marksheets, etc.) are required for all secondary and any university work completed. Records should include all courses taken in high school and every college or university the applicant has attended. Official records require the original seal or signature of the registrar, principal, headmaster or director of student records. Official records should be mailed from the school directly to Texas A&M University, Office of Admissions and Records.

Examination results should be sent directly from the examination agency. In addition to the original records in a language other than English, Texas A&M requires official translations in English. Translations sent directly from the institution attended or from a recognized translator will be accepted. For students enrolled in the United States, we will accept copies of official transcripts from other countries provided the copies are verified by the U.S. institution. Unofficial photocopies, fax copies, notarized copies of records, examination results or translations will not be accepted.

International applicants are normally expected to complete an educational program that would permit them to be considered for admission to a university in their home country. Examples would include the completion of grade 13, Form 6 or three A-level examinations following O-levels. A-level examination results should be received before the application deadline.

## Admission Criteria for U.S. Based Credentials

The admission criteria for Freshman or Transfer International applicants with U.S. based credentials are presented in the Admissions section beginning page 14 of this catalog.

## Admission Criteria for Foreign Credentials

Admissions decisions for Freshman and Transfer applicants with foreign credentials are based on:

### 1. Academic Achievement

International applicants are expected to complete an educational program that will permit them to be considered for admission to a university in their home country. Examples include the completion of Grade 13, Form 6 or 3A-level exams following O-levels. A-level exam results must be received by the application closing date.

Successful applicants will rank near the top of their country's educational system (B average or better) and score well above average on national exams.

Secondary school courses: Appropriate college preparatory course work is required.

### 2. Testing - Applicants whose native language is not English are required to submit:

TOEFL score of 550 or higher (computer-based score: 213) or

SAT Verbal of 480 or ACT English of 19.

### 3. Individual Achievement and Recognition

Leadership positions held

Honors/awards received

Major national, state or Texas A&M scholarships received

Unofficial photocopies, fax copies and notarized copies of records, examination results or translations will not be accepted.

## Additional Requirements for International Admits

If admitted, international applicants must fulfill the following additional requirements before enrollment:

### 1. Declaration and Certification of Finances and Foreign Student Advisor's Report

A Financial Resource Statement is sent with a letter of acceptance. This form must be completed and returned to Texas A&M University before the Certificate of Eligibility (I-20 or IAP-66) is issued. The Foreign Student Advisor's Report is also mailed with the acceptance letter to all international applicants who are attending a school in the United States.

### 2. Advance Deposit

Because of monetary restrictions in some countries, a full year's expenses may be required as a deposit from some accepted applicants. When the student enrolls, the deposit is applied to the first semester expenses. The deposit is refunded to admitted applicants who do not attend Texas A&M.

### 3. English Verification/Certification

Texas A&M requires International undergraduate students to demonstrate the ability to speak, write and understand the English language. Undergraduate students may meet this requirement in one of four ways:

A. official TOEFL score of 600 or higher (computer-based score: 250);

B. have an official SAT Verbal of 480 (400 prior to April 1, 1995 testing), or ACT English of 19 and attended grades nine through twelve of U.S. secondary education and graduate from a U.S. high school;

C. transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours, including the equivalent to Texas A&M ENGL 104; or

D. achieve English Language Proficiency Verification by taking the English Language Proficiency Examination (ELPE) prior to registration for the first semester at Texas A&M University. If remedial English classes are necessary, it will extend the time required to complete a degree.

### Scholarship Information for International Students

Texas law allows a limited number of admitted applicants who are citizens of Mexico and who can document financial need to receive an award which allows them to pay the same tuition as residents of the State of Texas. Other scholarships are not available for first-time international students. International students may apply for a limited number of scholarships after the completion of one academic year at Texas A&M. Additional information and application forms are available from International Student Services/Texas A&M University, 1226 TAMU, College Station, TX 77843-1226. Phone: 979-845-1825. Email: iss@iss.tamu.edu.

### OTHER TYPES OF ADMISSION

#### Provisional Admission

Using the application questions and essay topic, all applicants should present complete information about their academic background, personal strengths and circumstances to the best of their ability. A limited number of applicants who do not have the college preparatory course work or strong academic credentials may be offered provisional admission that requires the successful completion of a summer enrichment program at TAMUG. This program requires attendance on campus at TAMUG.

#### Readmission

Admission decisions for readmission are based on the following:

- GPR on Texas A&M course work;
- GPR on course work since leaving Texas A&M;
- desired major; and
- information presented in the application.

Transcripts from institutions attended since the last enrollment at Texas A&M are required as follows:

If desired Readmission Term is	Must have transcripts through
2003 Spring semester	2002 Summer session
2003 Summer semester	2002 Fall semester
2003 Fall semester	2002 Fall semester if applying by June 1; 2003 Spring semester if applying after June 1

#### Postbaccalaureate Undergraduate Student

Admission is limited and is intended for applicants who wish to apply for further study at the undergraduate level for:

- completing Texas A&M University requirements for teacher or other certification;
- a second undergraduate degree;
- a prescribed set of courses as preparation for application to graduate study or professional programs; i.e., medical school, veterinary school, law school or CPA exam.
- Additional requirements to complete a Postbaccalaureate application:
  - an official transcript indicating the receipt of a recognized baccalaureate degree
  - a statement explaining why enrollment at Texas A&M is necessary
  - official transcripts from all colleges attended
- Admission decisions for postbaccalaureate undergraduates consider:
  - GPR on college course work
  - completion of prerequisite course work

- information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, postbaccalaureate undergraduate admission may be limited or may not be available. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

### Undergraduate Non-degree Seeking Student

Admission is limited and is intended for applicants with a high school diploma (with the exception of high school concurrent enrollment participants) who do not intend to pursue a baccalaureate degree at Texas A&M. This includes:

- local residents or University employees taking courses on a part-time basis
- others as may be deemed appropriate by the Office of Admissions and the college or program of admission.

Additional requirements to complete an undergraduate non-degree application:

- a statement explaining why enrollment at Texas A&M is necessary
- a complete, official transcript showing high school graduation or the highest and latest collegiate course work attempted or completed.

Additional decisions for non-degree considers:

- GPR on college course work
- completion of prerequisite course work
- information presented in the application

Priority is given to qualified applicants for their initial bachelor's degree; therefore, non-degree admission may be limited or not available. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

### Transient Session Only Criteria

Admission is open to applicants who present appropriate credentials for the level of specified course work and apply within the processing period for the specific summer session.

Additional requirements to complete transient summer session only application are:

- a statement explaining why enrollment at Texas A&M is necessary
- a complete, official transcript showing high school graduation or the highest and latest collegiate course work attempted or completed.

### Academic Fresh Start Policy

Applicants for admission or readmission to Texas A&M may choose to have academic course work that was completed at least 10 years prior to their term of application removed from consideration in the admission decision (Texas residents only). All other admission requirements apply. Should a Fresh Start applicant be admitted, he or she will forfeit all credit earned prior to 10 years from the term of admission.

Admitted Fresh Start applicants have "Academic Fresh Start" indicated on their official Texas A&M transcript, are required to satisfy TASP requirements, and will follow the academic requirements of the Undergraduate Catalog of record for the term of admission.

Forfeited course work cannot be considered as prerequisites, but placement examinations are allowed for courses which were not considered for admission because of the Fresh Start Policy. Once admitted on Academic Fresh Start, the applicant or student cannot subsequently request that the Fresh Start policy restrictions be removed.

If an applicant has used the Academic Fresh Start Policy at a previous school, the Academic Fresh Start will remain in effect at Texas A&M upon transfer.

## COURSE CREDIT/TESTING

### Advanced Placement Program (AP)

Examinations offered by the AP are administered during late spring by high schools. Students usually take the examinations after completing Advanced Placement courses, although experience in an AP course is not required. Interested students should contact their high school counselors for information concerning registration and test sites. High school students and currently enrolled students should have the College Board forward their scores to the Office of Academic Enhancement. Advanced Placement scores of entering freshmen are generally received in late July.

The following list includes all AP examinations currently accepted for credit at Texas A&M.

AP Examination	Minimum Score Required	Texas A&M Course(s)	Credit Hours
Biology	4	BIOL 113, 114, 123, 124	8
Calculus AB	4*	MATH 151	4
Calculus BC	3*	MATH 151	4
	4*	MATH 151, 152	8
Chemistry	3	CHEM 101	4
	4	CHEM 101, 102	8
Comparative Governments	4	POIS 329	3
Computer Science A	4	CPSC 110	4
Computer Science AB	4	CPSC 110	4
Economics: Macroeconomics	4	ECON 203	3
Economics: Microeconomics	4	ECON 202	3
English Lang. and Comp.	3	ENGL 104	3
	4	ENGL 104, 241	6
English Lit. and Comp.	3	ENGL 104	3
	4	ENGL 104, 203	6
European History	4	HIST 102	3
French Language	3	FREN 101, 102	8
	5	FREN 101, 102, 201	11
German Language	3	GERM 101, 102	8
	5	GERM 101, 102, 201	11
History of Art	4	ARTS 149, 150	6
Human Geography	3	GEOG 201	3
Latin: Vergil or Catullus-Horace	3	CIAS 121, 122	8
	5	CIAS 121, 122, 221	11
Music Theory	4	MUSC 102	3
Physics B	3†	PHYS 201, 202	8
Physics C: Mechanics	3†	PHYS 201 or PHYS 218	4
Physics C: Electricity and Magnetism	3†	PHYS 202 or PHYS 208 or PHYS 219	4
Psychology	3	PSYC 107	3
Spanish Language	3	SPAN 101, 102	8
	5	SPAN 101, 102, 201	11
Spanish Literature	3	SPAN 202	3
	5	SPAN 202, 320	6
Statistics	3	STAT 301, 302, or 303	3
Studio Art: Drawing Portfolio	3	ARTS 111, 112, 212	9
Studio Art: General Portfolio	3	ARTS 111, 112, 212	9
U.S. Government and Politics	3	POIS 206	3
U.S. History	4	HIST 105, 106	6

\* Credit in MATH 151 may be substituted for MATH 131, 142 or 171. Credit in MATH 152 may be substituted for credit in MATH 172.

† Credit in physics is based on the curriculum of a student's intended major.

## College Level Examination Program (CLEP CBT)

CLEP CBT tests are designed to evaluate nontraditional college-level education such as independent study, correspondence work, etc. Both enrolled undergraduate students and entering freshmen may receive CLEP CBT credit for the courses which are listed below. Only examination titles below are currently accepted. The minimum scores listed below are based on the current version of CLEP CBT Examinations. These score requirements are subject to change as the CLEP CBT Examinations convert to computer based testing.

CLEP CBT Subject Examination	Minimum Score Required	Texas A&M Course (s)	Credit Hours
American Government	50	POIS 206	3
American History I	65†	HIST 105	3
American Literature	52*	ENGL 228	3
Calculus with Elementary Functions	50	MATH 151 or MATH 171	4
College Algebra	50	MATH 102	3
Freshman College Composition	50†*	ENGL 104	3
College French	50**	FREN 101	4
College German	50**	GERM 101	4
College-Level Spanish Language	50**	SPAN 101	4
English Literature	53*	ENGL 231	3
General Biology	50	BIOL 113, 114	6
General Chemistry	45	CHEM 101	4
	50	CHEM 101, 102	8
History of the United States II	65†	HIST 106	3
Human Growth and Develop.	50	EPSY 320 or PSYC 307	3
	50	PSYC 307	3
Introduction to Psychology	50	PSYC 107	3
Principles of Accounting	52	ACCT 209, 210	6
Principles of Macroeconomics	50	ECON 203	3
Principles of Microeconomics	50	ECON 202	3
Introductory Sociology	50	SOCI 205	3
Trigonometry	50	MATH 103	3
Western Civilization I	65†	HIST 101	3
Western Civilization II	65†	HIST 102	3

\* Students must qualify on both the objective and essay parts of the CLEP CBT test.

\*\* Students who score 50 or higher are encouraged to attempt the departmental examination for the opportunity of obtaining additional credit.

† Students are not eligible to earn ENGL 104 or history credit by examination if they have earned more than 90 semester credit hours.

## Credit by Examination

Undergraduate students at Texas A&M at Galveston may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the University and to students who are currently enrolled. Credit earned by examination does not contribute to a student's grade point ratio. The University awards credit for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program (CLEP CBT), the SAT II (Achievement Tests), Dantes Subject Standardized Tests (DSST), the International Baccalaureate (IB) Program and the American College Testing (ACT) Proficiency Examination Program (PEP). Texas A&M University at Galveston also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from Office of Academic Enhancement, 409-741-4341.

### Dantes Subject Standardized Tests (DSST) Program

The DSST Program is available to all interested persons. These tests are untimed. Enrolled undergraduate students and entering freshmen may receive DSST credit for the courses listed below. For more information about the test, please contact the Office of Academic Enhancement.

DSST Examination	Minimum Score Required	Texas A&M Course(s)	Credit Hours
Art of the Western World	50	ARTS 149, 150	6
Astronomy	48	PHYS 306	3
Business Law II	52	MGMT 212	3
Physical Geology	46	GEOL 103	3
Principles of Statistics	48	STAT 201 or	3
	48	PSYC 203	3
Lifespan Develop. Psyc.	47	PSYC 307	3

### American College Testing (ACT) Proficiency Examination Program (PEP)

The ACT PEP is a series of examinations designed to assess college-level learning gained outside the classroom. Enrolled undergraduate students and entering freshmen may receive PEP credit for the courses listed below. Please contact the Office of Academic Enhancement for additional information.

PEP Examination	Minimum Score Required	Texas A&M Course(s)	Credit Hours
Abnormal Psychology	45	PSYC 306	3
Microbiology	50	MICR 206	4
Statistics	45	STAT 201 or	3
	45	PSYC 203	3

### SAT II (Achievement Tests)

Credits are offered to entering freshmen who score high on the SAT II Subject Tests. High school students who are interested in taking these tests should contact their school counselors or write College Board ATP, Box 592, Princeton, NJ 08541.

Subject Test	Minimum Score Required*	Texas A&M Course(s)	Credit Hours
Chemistry	630	CHEM 101	4
French	640	FREN 101	4
	740	FREN 101, 102	8
German	630	GERM 101	4
	740	GERM 101, 102	8
Italian	630	ITAL 101	4
	750	ITAL 101, 102	8
Latin	630	CLAS 121	4
	730	CLAS 121, 122	8
Physics	680	PHYS 201, 202	8
Spanish	630	SPAN 101	4
	750	SPAN 101, 102	8

\* The minimum score required is based on the recentered scale. Students who took tests before April 1, 1995, should contact the Office of Academic Enhancement to determine the minimum score required.

## International Baccalaureate (IB)

The IB tests are offered world-wide to students enrolled in programs affiliated with the IB program. Texas A&M will grant credit on IB Higher Level tests for the courses listed below. Please contact the Office of Academic Enhancement for additional information.

IB Higher Level Examination	Minimum Score Required	Texas A&M Course (s)	Credit Hours
Biology	4	BIOL 113, 123	4
Chemistry	4	CHEM 101	4
	5	CHEM 101, 102	8
Economics	4	ECON 203	3
English Language A	4	ENGL 104	3
	5	ENGL 104, 222	6
French: Lang. A or B	4	FREN 101, 102	8
	5	FREN 101, 102, 201, 202	14
Fundamentals of Music	5	MUSC 102, 202	6
German: Language A or B	4	GERM 101, 102	8
	5	GERM 101, 102, 201, 202	14
Italian: Language A or B	4	ITAL 101, 102	8
	5	ITAL 101, 102, 201, 202	14
Japanese: Language A or B	4	JAPN 101, 102	8
	5	JAPN 101, 102, 201, 202	14
Mathematics	4*	MATH 151	4
Philosophy	4	PHIL 251	3
Physics	4	PHYS 201	4
	5	PHYS 201, 202	8
Psychology	4	PSYC 107	3
Spanish: Language A or B	4	SPAN 101, 102	8
	5	SPAN 101, 102, 201, 202	14

\* Credit for MATH 151 may be substituted for MATH 131, 142 or 171.

## Departmental Examinations for Entering Freshmen and Currently Enrolled Students

Qualified entering freshmen may take departmental tests during New Student Conferences prior to initial enrollment at Texas A&M University at Galveston. A testing date may be reserved when registering for a conference session. Currently enrolled students should contact the Office of Academic Enhancement for registration information. The tests are prepared by participating Texas A&M departments.

CHEM 101, 102	Modern and Classical Languages (up to four semesters of course work in French, German, Italian, Japanese, Latin, Russian and Spanish)
CPSC 110	
ENGL 104*	
PHYS 201, 202, 208, 218, 219	
POLS 206, 207	

\* Students are not eligible to earn ENGL 104 credit by examination if they have earned more than 90 semester credit hours.

Please note these regulations concerning credit by examination:

1. Test scores and/or credit eligibility must be reported formally to Office of Academic Enhancement for credit by examination to be awarded. Credit is posted to the academic record once appropriate scores are received by the Office of Academic Enhancement and the student has officially enrolled in the University.
2. Students may not receive credit by examination for courses that are prerequisites to courses for which they already have credit except with the approval of the department authorizing the examination.
3. A student may not have credit posted for credit by examination for a course in which he or she is currently registered or has acquired a grade other than Q, W or NG.

### Texas Academic Skills Program (TASP)

The Texas Academic Skills Program (TASP) was instituted to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to perform effectively in college and to provide diagnostic information about reading, writing and mathematics skills of each student. All undergraduate students who did not earn at least 3 semester credit hours prior to the 1989 fall semester or did not meet established cut off scores on the SAT, ACT or TAAS test must take the TASP test. Beginning in the 1998 fall semester, students must have taken the TASP test prior to enrollment in college-level courses at all Texas public institutions of higher education. TASP test scores will not be used to determine admission to Texas A&M University at Galveston.

Students who do not meet established cutoff scores for the TASP test are required by Texas law to be enrolled in an academic skills course and/or program each semester prior to completing all TASP requirements. Academic skills courses in each of the three TASP areas are offered by Texas A&M at Galveston. Failure to meet the attendance requirements of the academic skills course will result in withdrawal from Texas A&M University at Galveston. The hours for these courses will not count toward any degree program but may count toward determining full-time status.

Students required to take the TASP test should have their scores sent by the testing agency to Texas A&M University at Galveston. More information can be obtained from testing centers at most Texas public colleges and universities, the TAMUG Office of Student Relations or from National Evaluation Systems, Inc., P. O. Box 140347, Austin, TX 78714-0347. Phone: 512-927-5397 or website: [www.tasp.nesinc.com](http://www.tasp.nesinc.com).

## REGISTRATION AND ACADEMIC STATUS

Registration for the fall and spring semesters is accomplished at several times. In the preceding fall and spring semester (during November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. During the week before classes begin for a particular semester, there is a delayed registration period for students who have not already registered. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of Admissions and Records. The Class Schedule is available shortly before registration periods at the Office of Admissions and Records or is posted at [www.tamug.edu/admissions](http://www.tamug.edu/admissions).

### Academic Advising

Academic advising is coordinated and supervised by the academic department. Within departments, faculty members or advising specialists are available to assist students with course selection, academic program planning and curriculum-related advising in general. If a student has special problems, the department head may be consulted.

### Full-Time Student

A full-time undergraduate student is defined as one who is registered for 12 semester hours during a fall or spring semester, 4 hours in a five-week summer term and 8 hours in a 10-week summer semester. A Q grade or W grade does not count toward the certification of enrollment status. Only hours for which a student is currently enrolled at Texas A&M University at Galveston can be used toward certification of enrollment. A license option student registered for summer cruise (NAUT 200, 300, 400 or MARE 200, 300, 400) will be considered a full time student.

### Undergraduates Registering for Graduate Courses

Senior undergraduate students with a cumulative grade point ratio of at least 3.00 or approval of his/her academic dean, are eligible to enroll in a graduate course and reserve it for graduate credit by filing a petition obtained from the student's undergraduate college and approved by the course instructor, the student's major department head, the dean of the college offering the course, and the dean of the student's undergraduate college.

Academically superior undergraduate students with a cumulative grade point ratio of at least 3.25 or approval of his/her academic dean, are eligible to apply graduate credit hours toward their undergraduate degree programs by filing a petition obtained from the student's undergraduate college and approved by the course instructor, the student's major department head, the dean of the college offering the course, and the dean of the student's undergraduate college. Graduate credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

### Concurrent Enrollment at TAMUG and Other Colleges and Universities

A student enrolled at TAMUG who wishes to take a course or courses concurrently at another institution for degree credit at Texas A&M University at Galveston must receive the prior approval of the appropriate department head.

### Maximum Schedule

An undergraduate student with an overall grade point ratio of 3.0 or better may register for a course load in excess of 19 hours in a fall or spring semester or 6 hours (7 if part is laboratory) in a summer term

with the approval of his or her advisor. An undergraduate student with an overall grade point ratio of less than 3.0 must obtain approval of his or her dean before registering for a course load in excess of 19 hours in a fall or spring semester or 6 hours (7 if part is laboratory) in a summer term.

### Correct Addresses

It is necessary to have on file with the University a correct residence address. A student who changes an address after completing registration should report this address to his or her major department or to the Office of Admissions and Records immediately. The University assumes no obligation for failure of a student to receive communications.

Students may change their local address on BONFIRE Screen 801. Students whose parents/guardians have filed a dependency form may not change their permanent address. If dependent status is no longer in effect, the student should file the correct form, available in the Admissions and Records Office.

### Classification

Each student has a classification which indicates the type of degree program in which the student is enrolled (undergraduate, graduate or professional), and reflects the student's progress within that program at the undergraduate and professional levels. The classifications are:

#### Code Classification Definition

---

##### **U0 Undergraduate Non-degree**

Students with a high school diploma (with the exception of high school concurrent enrollment participants) who do not intend to pursue a baccalaureate degree at Texas A&M University. This includes:

- a. Summer session only students.
- b. Local residents or University employees taking courses on a part-time basis.
- c. Others as may be deemed appropriate by the Office of Admissions and Records and the college or program of admission.

Undergraduate non-degree students are not permitted to enroll in courses until all degree seeking students have had the opportunity to enroll. Undergraduate non-degree enrollment begins on the final day of delayed registration. Enrollment may be limited by college or program policies. Undergraduate non-degree students are limited to part time status except for summer session or because of extenuating circumstances which result in the approval of full-time status at the time of admission. Admitted students are not eligible for refund of the admission processing fee regardless of course availability.

An undergraduate non-degree student must maintain a 2.0 GPR on all course work attempted to remain eligible to register. Enrollment is subject to review at the end of each semester of enrollment. Enrollment beyond two years of attendance will be approved only in exceptional cases.

Should an undergraduate non-degree student desire admission to a degree program, regular formal application is necessary, including: a complete application for admission, the required application processing fee, the submission of all required credentials, and the meeting of all admission requirements.

An undergraduate non-degree student may not take graduate-level course work.

Undergraduate non-degree students are subject to TASP and English proficiency requirements.

An undergraduate non-degree student does not qualify for financial aid through the University.

With few exceptions, undergraduate non-degree status is not available to international students.

##### **U1 Freshman 0–29 hours**

##### **U2 Sophomore 30–59 hours**

##### **U3 Junior 60–94 hours**

##### **U4 Senior 95+ hours**

#### **U5 Postbaccalaureate Undergraduate** (see Graduate Section for classifications, page 48.)

Students with a recognized baccalaureate degree who wish to complete requirements for a second baccalaureate degree at Texas A&M University or to complete established Texas A&M University certification requirements.

The postbaccalaureate undergraduate classification (U5) has all the privileges and responsibilities of a senior classification (U4).

Recipients of a Texas A&M University baccalaureate degree are not eligible for continued enrollment unless they have the specific approval of the college offering the second bachelor's degree or certification. Should they break enrollment, they must apply for readmission as second bachelor's degree candidates.

A candidate for a second baccalaureate degree must complete all the essential work of the second degree not covered in the first. In all such cases, the total semester hours required must be at least 30 semester hours additional to the greater number required for either degree (see the section on Two Degrees in this catalog). To pursue a second baccalaureate degree concurrently with the pursuit of the initial degree, all essential work required for a second degree must be defined in advance in writing by the dean of the college granting the second degree. To pursue a second baccalaureate degree sequentially requires admission to a second bachelor's degree classification. Pursuit of a second baccalaureate degree may be limited or may not be allowed by some colleges.

#### **Distinguished Student and Dean's Honor Roll**

An undergraduate student who completes a semester schedule of at least 15 hours or a summer session schedule of at least 12 hours with no grade lower than C and with a grade point ratio of not less than 3.25 for the semester or for a summer session shall be designated "distinguished student." A student who, under the same circumstances, achieves a grade point ratio of at least 3.75 shall also be designated as a member of the "dean's honor roll." First semester freshmen must complete a semester schedule of at least 12 hours with no grade lower than a C, no Q-drops and with a grade point ratio of not less than 3.25 for "distinguished student" designation and a 3.75 for "dean's honor roll." Official notification of these designations will be issued to the student by the Associate Vice President for Research and Academic Affairs. The hours earned on a satisfactory/unsatisfactory basis shall not be included in determining minimum hours required for the designation of "distinguished student" or "dean's honor roll." A grade of I disqualifies a student from being considered as a "distinguished student" or for the "dean's honor roll." Only undergraduate courses or graduate courses used for the undergraduate degree will be used in either honors calculation.

#### **Scholastic Probation**

Scholastic probation is a conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For University policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University at Galveston University Student Rules at [www.tamug.edu/stulife](http://www.tamug.edu/stulife).

#### **Withdrawal from the University**

A student wishing to withdraw from the University before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated with the Office of Admissions and Records. Students may not withdraw after the Q-drop deadline. The Associate Vice President for Research and Academic Affairs will retain the authority to support a student withdrawal after the deadline.

During the summer session, a student must withdraw from the University under the following circumstances:

1. If the student is currently enrolled in only one of the following terms and decides to drop to zero hours (withdraw) in that term:

- first 5-week summer term
- second 5-week summer term
- 10-week summer semester

2. If the student is currently enrolled in the 10-week summer semester and either of the 5-week terms and decides to drop to zero hours (withdraw) in both terms.

When a student withdraws from the University between the first class day, but before the Q-drop deadline, the registrar will assign a grade of W to all courses enrolled in that semester. Any courses previously graded for that semester will be changed to W, and the W grades will be displayed on the permanent record.

## Grading System

The student's semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.

The basis upon which the final grade will be determined shall be distributed in written form to the class during the first two weeks of a semester and during the first week of a summer term. There are five passing grades at the undergraduate level, A, B, C, D and S, representing varying degrees of achievement. There are two failing grades, F and U, indicating work of unsatisfactory quality. These letters carry grade points and significance as follows:

A	Excellent, 4 grade points per semester hour
B	Good, 3 grade points per semester hour
C	Satisfactory, 2 grade points per semester hour
D	Passing, 1 grade point per semester hour
F	Failing, no grade points (hours included in GPR)
I	Incomplete, no grade points (hours not included in GPR)
NG	No grade, course dropped without penalty (hours not included in GPR)
Q	Dropped course with no penalty (hours not included in GPR)
S	Satisfactory (C or above), hours not included in GPR
U	Unsatisfactory (D or F), no grade points (hours included in GPR)
X	No grade submitted (hours not included in GPR)
W	Withdrew, hours not included in GPR (effective Spring 1996)

### Repetition of a Course to Improve Grade

Any undergraduate student who wishes to repeat a course must do so before he or she completes a more advanced course in the same subject. What constitutes a more advanced course will be determined by the head of the department offering the course.

Credit for a course failed may be obtained only by registering and repeating the course in class. The original grade will remain on the student's permanent record, and both grades will be used in computing the GPR. An F or U previously made is not removed once the course is passed. Credit for each repeated course may only be used once toward degree requirements.

A student repeating a course in which a grade of B or better has been earned will not receive grade points for the repeated course, unless the catalog states the course may be repeated for credit.

### I and X Grades

A temporary grade of I (incomplete) at the end of a semester or summer term indicates that the student (graduate or undergraduate) has completed the course with the exception of a major quiz, final examination or other work. The instructor shall give this grade only when the deficiency is due to an authorized absence or other cause beyond the control of the student. When an instructor reports an incomplete grade to the Office of Admissions and Records, he or she will fill out an "Incomplete Grade Report," which is filed with

the department head. Copies are sent to the student and to the Associate Vice President for Research and Academic Affairs.

This report includes (1) a statement of the instructor's reason for awarding the incomplete grade and (2) a statement concerning the remaining work to be completed before the last day of scheduled classes of the next fall or spring semester in which the student enrolls in the University unless the student's academic dean, with the consent of the instructor (in the absence of the instructor, the department head), grants an extension of time for good reason. If the incomplete work is not completed within this time or if the student registers for the same course again, the I will be changed to an F by the registrar.

The X notation is assigned to a course by the registrar at the end of a semester or summer term only when a grade is not submitted by the instructor. The registrar will notify the department head (of the department offering the course) that an X notation has been made. The department head (of the department offering the course) will request that the instructor submit a Grade Change Report Form removing the X notation and assigning a letter grade with a Grade Change Report. The instructor will have 30 days from the beginning of the succeeding semester or summer term to report a change of grade to the registrar. If a Change of Grade Report is not received during this time period, the registrar will automatically remove the X notation and assign a grade of F. Grades of X assigned to 684, 691 or 692 are excluded from this rule.

### Q-Drop and Add and Drop

1. A student may enroll in a class during the first five class days during the fall or spring semester or during the first four class days of the summer terms or a 10-week summer semester. A student requesting to add a course after these deadlines must have the approval of the student's dean and department.
2. A student may drop a course with no record during the first four class days of a fall or spring semester and during the first three class days of a summer term or a 10-week summer semester. Following this period, if approved by the dean of the student's college, a student may drop a course without penalty through the 50th class day of a fall or spring semester, the 15th class day of summer term or the 35th class day of a 10-week summer semester. The symbol Q shall be given to indicate a drop without penalty. Undergraduate students will normally be permitted three Q-drops during their undergraduate studies. Additional Q-drops will be allowed only in unusual circumstances as determined by a student's dean.
3. Any course taught on a shortened format or between regularly scheduled terms will have add/drop, Q-grade and withdrawal dates proportionally the same as if the course were offered in a regular term. These dates will be determined by the Office of Admissions and Records.
4. A student who drops a course after Q-drop period has elapsed will receive a grade of F unless unusual circumstances exist as determined by the student's dean. A grade of W may be recorded by the dean of the student's college if it is determined such circumstances do exist.

### Satisfactory/Unsatisfactory

1. With the exception of KINE 198 or KINE 199, students must register for courses on a S/U basis during official registration periods and shall not be permitted to change the basis on which their grades will be recorded on their official transcripts, except for unusual circumstances and with the approval of the student's academic dean.  
Students registered for KINE 198 or KINE 199, wishing to change the grade type from a graded course to S/U or from S/U to a graded course, may do so via terminal access on the campus computer network (BONFIRE). All requests for KINE 198 and KINE 199 changes must be accomplished on or before the Q-drop deadline for the fall, spring or summer semester.

All students entering Texas A&M University at Galveston in the fall 2001 semester or later must enroll in their first KINE 199 on a S/U basis.

## 2. Undergraduate Students

- a. Undergraduate students may be permitted to take courses in their degree programs at Texas A&M University on a satisfactory/unsatisfactory (S/U) basis consistent with the requirements of the student's college.
- b. The hours for which a student receives a grade of satisfactory shall not be included in the computation of the student's semester or cumulative grade point ratio; a grade of unsatisfactory shall be included in the computation of the student's grade points per credit hour as an F. A grade of satisfactory will be given only for grades of C and above; a grade of unsatisfactory will be given for grades D and E. The hours earned on a satisfactory/unsatisfactory basis shall not be included in the designation of distinguished student or dean's honor roll.
- c. Students on probationary standing may be required to take KINE 199 or electives on an S/U basis as determined by published college policies.

## Semester Credit Hour

A lecture course which meets one hour per week for 15 weeks is worth 1 semester credit hour. Thus, a course worth 3 semester credit hours, meets three hours per week. Credit hours for laboratory courses are determined to be some fraction of the number of hours spent in class.

## Grade Point Ratio (GPR)

For undergraduate students, only the grade made in course work for which the student was registered in this institution shall be used in determining his or her grade point ratio. Students anticipating graduating with honors should refer to that section of this catalog for information concerning the computation of grade point ratios for that purpose.

An undergraduate student's grade point ratio for any period shall be computed by dividing the total number of semester hours for which he or she received grades into the total number of grade points earned in that period. Semester credit hours to which grades of F or U are assigned shall be included; those involving grades of W, Q, S, X, NG and I shall be excluded.

## Classification

Classification for academic purposes shall be based solely on scholastic progress as shown by the official records in the Office of Admissions and Records. Sophomore, junior and senior classification will be granted students who have passed 30, 60 and 95 semester hours, respectively.

# Grade Reports

## Midsemester Report

Near the middle of the fall and spring semesters, a preliminary report, showing the current progress of all undergraduate students at Texas A&M at Galveston will be made available. Preliminary grades are not recorded on the student's permanent record. Grades are available by telephone (Tele-Grades) or can be obtained via terminal access on the campus computer network (BONFIRE).

## Final Grade Report

End of semester final grades are not mailed to students but are available by telephone (Tele-Grades) or can be obtained via terminal access on the campus computer network (BONFIRE). Parents or guardians may receive grade reports by special request each semester if they certify that the student is carried as a dependent on their current federal income tax return. Certification of Dependency forms are available in the Office of Admissions and Records.

No student grade that is personally identifiable may be posted unless the student has given written consent in advance.

By means of reports at regular intervals and frequent conferences with the deans, the registrar, personnel in the Office of the Vice President for Student Affairs and members of the teaching staff, university officials keep in close touch with the student's progress, and such advice and counsel are offered from time to time as seem justified in each case. For failure to keep up with studies, the student may at any time be dropped from the rolls of the University.

### Degree Audit

Degree audits will be produced on all undergraduate students during the semester that their total registered hours and earned hours are equal to or greater than 95 semester hours. The audit shows degree requirements completed or in progress, requirements remaining, and completed courses which will not apply toward this degree without approval of the department head. The audit is intended for use in advising and may contain errors. It remains the responsibility of the student to fulfill all published catalog requirements. Degree audits can be obtained from the student's academic department or the Office of Admissions and Records.

### Transcripts

Students applying for admission to TAMUG are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Individuals who have attended the University may obtain an official transcript of their completed work, provided they have no financial obligations to the University. A fee, which according to state law must be paid in advance, will be charged for each copy. Transcripts will not be prepared during the final examination and grade posting period for students currently enrolled. Students and former students who order transcripts may do so in writing, or may order by telephone and charge to various credit cards.

## Degree Information

### Which Catalog to Follow

In meeting the requirements for a baccalaureate degree, a student is normally expected to complete the course and hour requirements as outlined in the catalog in effect at the time of his or her declaration of a major or change in major, or those of any later catalog of the student's choice. Normally, a student will not be granted a degree based upon completion of the requirements set forth in a catalog more than seven years old. Before changing catalogs, the student must consult his or her academic advisor. A student changes catalogs by filing a written notification with his or her dean. It is incumbent on the student to verify that the change has been made.

A handbook entitled Texas A&M University at Galveston Student Rules is prepared each year for the benefit of the student body. Texas A&M University at Galveston Student Rules (including periodic revisions) is the governing document in case of conflict between this catalog and Texas A&M University at Galveston Student Rules. It is the responsibility of each individual student to read this handbook carefully and to use it as a reference. Copies are available on the Internet at [www.tamug.edu](http://www.tamug.edu).

Whereas each college must retain the flexibility to improve its curriculum, course offerings may be changed during the student's education. If a course required under a previous catalog is no longer offered, a student eligible to graduate according to that catalog should consult his or her academic advisor to identify another course that may be used to fulfill the requirement. Course substitutions in the degree program are permitted only with the approval of the dean through the department head or program director. The University reserves the right to make any changes in requirements by due notice in the catalog.

Students are required to take the courses listed in a curriculum; however, the display of a curriculum does not in any way indicate the length of time required to finish degree requirements. Rather, this display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be petitioned through the department head to the Associate Vice President for Research and Academic Affairs.

### Degrees Offered

The following degrees are offered by Texas A&M University for the satisfactory completion of resident study in the appropriate curriculum at Texas A&M University at Galveston:

- Bachelor of Science in Ocean and Coastal Resources
- Bachelor of Science in Marine Biology
- Bachelor of Science in Marine Biology/Biomedical Sciences
- Bachelor of Science in Marine Engineering Technology
- Bachelor of Science in Marine Fisheries
- Bachelor of Science in Marine Sciences
- Bachelor of Science in Marine Transportation
- Bachelor of Science in Maritime Administration
- Bachelor of Science in Maritime Systems Engineering
- Bachelor of Arts in Maritime Studies
- Master of Marine Resources Management (see Graduate Studies, page 43)

### Requirements for a Baccalaureate Degree

The diploma of the University, with the appropriate degree, will be granted to the student who has made formal application for the degree by the published deadline, has all grades on record in the Office of Admissions and Records, including grades pertaining to graduation with honors, by no later than 5 p.m., Friday, the first week of classes of the succeeding semester or summer term following commencement and has satisfied the requirements outlined in the following:

1. A curriculum leading to a baccalaureate degree shall contain a minimum of 128 credit hours including the required physical activity courses.
2. The undergraduate student must complete with at least a 2.0 grade point ratio all undergraduate course work attempted at Texas A&M University at Galveston.
3. The undergraduate student must complete with a 2.0 grade point ratio all courses included in the major field of study.
4. The student is required to successfully complete one semester of KINE 198 and one semester of KINE 199 (taken satisfactory/unsatisfactory), unless a substitution for this requirement is petitioned through the student's dean.
5. The undergraduate student must satisfy all areas of the University Core Curriculum as outlined in their catalog.
6. The total number of grade points earned at this institution in courses must be at least twice the number of hours that the student carried in courses at this institution. Grades of F and U shall be included.
  - a. The number of credit hours associated with grades of S in courses taken on a satisfactory/unsatisfactory basis are not included in this computation.
  - b. The number of credit hours associated with grades of U in courses taken on a satisfactory/unsatisfactory basis are included in this computation.

- c. With the approval of a student's dean, grades in courses not applying to the degree may be waived for the purpose of graduation only.
  - d. The waiver of grades in courses as indicated in item c. will not affect the student's official grade point ratio or entitlement to graduation with honors.
  - e. The provisions of item c. will not affect a student's probationary status prior to graduation.
7. The total number of grade points earned at this institution in courses in the student's major department must be at least twice the number of hours that he or she carried at this institution in his or her major department.
  8. Grades made in courses elected in excess of a student's degree requirements shall be counted, but if failed, such courses need not be repeated.
  9. The student must be formally recommended for graduation by the Faculty Senate after consideration of his or her complete record.
  10. The student must have settled all financial obligations to the University.
  11. Graduate and undergraduate students who plan to attend a commencement ceremony must do so the semester they apply for graduation and complete their degree requirements.
  12. To be a degree candidate and participate in the commencement ceremony at the end of the semester or summer term, a student must be currently registered for all the courses, either in residence or at another university, necessary to complete the requirements of his or her curriculum by the last day to add courses for that semester or summer term at Texas A&M University.
  13. Computer Usage: 3 semester hours of computer science is required for many degree programs. Students may also demonstrate proficiency through an examination provided by the Office of Academic Enhancement.
  14. Foreign Language: A year of foreign language is required in many degree programs from Texas A&M. This degree requirement can be satisfied by the satisfactory completion in high school of two units of the same foreign language or one year of college work. For students enrolling in Fall 2003 and thereafter, three units (three full years) of high school course work in the same foreign language or two semesters of college work will be required for graduation.
    - a. International students are not permitted to enroll in courses to satisfy this degree requirement if those courses are taught in their native language.
    - b. Bachelor of Arts degrees from the College of Liberal Arts require an additional 6 semester hours at the 200-level.
    - c. Students who wish to demonstrate foreign language proficiency without taking acceptable high school or college courses may do so through the existing credit by examination process. In cases where students wish to demonstrate proficiency in a language not taught at Texas A&M, the following procedures shall apply. The student shall request an examination from the Office of Academic Enhancement. This department will coordinate the administration of special examinations to demonstrate foreign language proficiency. This will include finding an appropriate examination to test the student's proficiency, informing the student how to arrange to take that examination and certifying the results to the student's advisor. All arrangements shall be made and fees paid by the student.
    - d. American Sign Language (ASL) may be used to fulfill the foreign language degree requirement unless otherwise specified by the student's college or department. Students may either transfer ASL credits or arrange to be tested at another institution. (Texas A&M does not offer courses in ASL.)

## Residence Requirement

A minimum of 36 semester hours of 300 and/or 400 level course work must be successfully completed in residence at Texas A&M to obtain a baccalaureate degree. A minimum of 12 of these 36 semester hours must be in the major.

To fulfill degree requirements for graduation that semester, transfer courses taken during a student's final semester must be completed and cited on an official transcript in the Office of Admissions and Records by the stated deadline.

## Tuition Charged for Excess Credit Hours

The State of Texas will not provide funds to state institutions of higher education for excess semester credit hours earned by a resident student. Because funding will not be provided by the State, and as permitted by State law, Texas A&M University will charge tuition at the non-resident rate to all students who exceed the semester credit hour limit for their program. Excess semester credit hours are those which accrue after the student exceeds by 45 hours the number of semester credit hours required for the completion of the degree program in which the student is enrolled. Thus, the student may accumulate up to 45 hours beyond those required for the chosen degree program and not exceed the limitation. The limitation on excess credit hours applies only to those undergraduate students who first enter higher education in the fall 1999 and thereafter. The semester credit hours counted toward the limitation include all hours attempted except:

- Semester credit hours earned by the student before receiving a baccalaureate degree that has been previously awarded.
- Semester credit hours earned by the student by examination or other procedure by which credit is earned without registering for a course for which tuition is charged.
- Credit for remedial education courses, technical courses, workforce education courses funded according to contact hours, or other courses that do not count toward a degree program at Texas A&M University.
- Semester credit hours earned by the student at a private or an out-of-state institution.

## Requirement in Political Science (Government) and History

In order to meet the legal requirements for a baccalaureate degree, all students must have at least 6 credit hours in political science (government) and at least 6 credit hours in American history. POLS 206 (American National Government) and POLS 207 (State and Local Government with emphasis on Texas) fulfill the political science requirement. Both the political science and American history requirements may be met, in whole or in part, by equivalent course work satisfactorily completed at another accredited college or university.

State law permits the substitution of 3 hours of history and 3 hours of political science for a student in the program of an approved senior ROTC unit. With the approval of the dean of the appropriate college, students successfully completing the required 12 hours of upper-level ROTC courses will be deemed to have completed the equivalent of Political Science 206 or 207 plus History 105 or 106 (or another appropriate course) for a total of 6 hours. Students pursuing teacher certification are not allowed to substitute ROTC credits for this requirement.

## Graduation Requirements in Computer Science and Foreign Language

Computer Usage—Because the computer is a necessary and useful tool, proficiency in its use is required to graduate from Texas A&M University. This requirement can be met by:

- completing one unit (one full year) of computer science course work in high school chosen from the following: Computer Mathematics I or II, Business Computer Applications I, Business Computer Programming I or Data Processing;
- demonstrating proficiency by an examination provided by the University's Office of Academic Enhancement; or

- completing a computer usage course for college credit selected from the following: AGEC 221; AGLS 201; ANSC 401; CPSC 110, 203, 206, 207; EDTC 345; GEOG 332, 390; HLTH 240, 430; INFO 209; KINE 240, 430; PHYS 401; RENR 201.

**Foreign Language**—To understand the major cultures of the world as expressed in art, philosophy, politics or economy, it is necessary to know and appreciate languages other than one's native language. Therefore, some proficiency in a foreign language is also required to graduate from Texas A&M University. This requirement can be met by:

- completing two units (two full years) of high school course work in the same foreign language. For students enrolling in Fall 2003 and thereafter, three units (three full years) of high school course work in the same foreign language will be required for graduation;
- completing two semesters (one full year) of course work at the college level in the same foreign language; or
- demonstrating proficiency in a foreign language by examination.

Notes:

- International students are not permitted to enroll in courses which satisfy foreign language requirement if those courses are taught in their native language.
- Students who wish to demonstrate foreign language proficiency without taking acceptable high school or college courses may do so through the existing credit by examination process for the first two college courses in the foreign language. In cases where students wish to demonstrate proficiency in a language not taught at Texas A&M, the following procedures shall apply. The student shall request an examination from the Office of Academic Enhancement. This department will coordinate the administration of special examinations to demonstrate foreign language proficiency. This will include finding an appropriate examination to test the student's proficiency, informing the student how to arrange to take that examination and certifying the results to the student's advisor. All arrangements shall be made and fees paid by the student.
- American Sign Language (ASL) may be used to fulfill the foreign language requirement unless otherwise specified by the student's college or department. Students may either transfer ASL credits or arrange to be tested at another institution. (Texas A&M does not offer courses in ASL.)

### Application for a Degree

Formal application for degrees must be submitted on forms to the registrar by the deadline stated in the schedule of classes. Under unusual circumstances, an application for a degree may be accepted after the stated deadline; however, no application will be accepted after grade sheets on graduating students have been produced for the faculty. The student must pay a diploma fee and complete the necessary forms in the Office of Admissions and Records.

The buying, selling, creating, duplicating, altering, giving or obtaining the Texas A&M diploma or other academic record is prohibited by state law. A person who violates this statute or who aids another person in violation is guilty of a misdemeanor and is subject to a fine and/or confinement if convicted. The University has the right to rescind a previously granted degree if the University becomes aware of information indicating that the degree never should have been granted.

### Special Examinations

An undergraduate student who has completed all the requirements for graduation, both in hours and grade points, except for a passing grade in one course undertaken and failed during his or her last two semesters may be given, with proper approval, one special examination in that course. Before a student will be considered for a special examination, he or she must have substantially completed the work of the course. A request for such a special examination should be made to the registrar after the close of the semester or

summer term. No special examination shall be given without the approval of both the head of the department in which the course was offered and the Associate Vice President for Research and Academic Affairs.

If a passing grade is made on an authorized special examination, the head of the department will notify the registrar, who will record on the student's permanent academic record a notation of credit by special examination with the appropriate number of semester hours of credit.

### Two Degrees

A candidate pursuing a second baccalaureate degree must have completed all the essential work of the second curriculum not covered in the first. In all such cases, the total semester hours required must be at least 30 hours additional to the greater number required for either degree. The student must have a minimum of 36 hours of 300–400 level courses, 12 hours of which must be in the major field of study, in residence at Texas A&M. The student must also meet the citizenship requirements for history and political science.

### Undergraduate Minor Programs

The minor program should provide either a concentration of prescribed courses that focus on a single content area or an interdisciplinary and/or comparative perspective on more than one area. The minor program comprises 15–18 hours with a minimum of 6 in residence at the 300–400 level. The minor program is recognized on the transcript after graduation, but not on the diploma.

An academic department determines whether or not it grants a minor program, enrollment limits and what courses count. The minor-granting department, program or college is responsible for approving substitutes and may impose and monitor a grade point requirement, prerequisite, residency in minor program, and/or capstone or methodology course to ensure the academic integrity of the minor program.

The student's college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after the student receives signed approval from the department, program or college granting the minor program.

### Graduation with Honors

To be eligible for graduation with honors, a student seeking a baccalaureate degree must enroll in and complete a minimum of 75 undergraduate semester hours preceding graduation at this institution. Course credit received by examination and for graduate level courses is not included in this total. The grade point ratio of all college hours attempted, excluding transfer hours, must equal that required at Texas A&M for the appropriate category of honors.

Categories for honors shall be designated as follows:

- Summa Cum Laude: A student may be graduated Summa Cum Laude with a grade point ratio of 3.90 or above.
- Magna Cum Laude: A student may be graduated Magna Cum Laude with a grade point ratio range of 3.70 through 3.899.
- Cum Laude: A student may be graduated Cum Laude with a grade point ratio range of 3.50 through 3.699.

## GRADUATE STUDIES

### Objectives of Graduate Studies

The Office of Graduate Studies in College Station (OGS) maintains the official record for each graduate student. The OGS and the Research and Graduate Studies Office (RGSO) for Galveston based graduate students serve as the primary administrative bodies and overarching sources of information for graduate education. Once a graduate student is accepted by an academic department or college, OGS/RGSO assists and facilitates progression towards completion of a graduate degree through maintenance of all official documents. OGS/RGSO interacts directly with the Graduate Council and Graduate Operations Committee at TAMU or the Graduate Instruction Committee for TAMUG program based students in order to set minimal university guidelines, which all departments and colleges use as a framework for operation, and setting more stringent standards when needed and appropriate. Clearance for graduation, including final review of theses and dissertations, when required, is performed by OGS. The Registrar's Office at TAMU is responsible for issuing all transcripts.

### Administration of Graduate Studies

The graduate faculty consists of the President, the Executive Vice President and Provost, the Associate Provosts, the Vice President for Research, the Associate Vice President for Research and Academic Affairs on the Galveston Campus, the Dean of Graduate Studies, the Deans of all colleges, selected Assistant Vice Presidents and Directors on the Galveston campus and a properly qualified academic group appointed by the Office of Graduate Studies. Members of the graduate faculty participate in the graduate degree programs of the University by serving on student advisory committees and teaching graduate courses. Individuals who are not members of the graduate faculty of Texas A&M University may not teach graduate courses or serve on student advisory committees unless the Office of Graduate Studies grants special approval.

The Graduate Operations Committee (GOC)/Graduate Instruction Committee (GIC for TAMUG students) serves as an advisory body to the Vice President for Research, (Associate Vice President for Research and Academic Affairs for TAMUG based students). These Committees focus primarily on operations and procedures regarding administration of graduate education throughout the University. The GOC/GIC works very closely with the Graduate Council to coordinate all curriculum and policy issues. They also work closely with the Academic Operations Committee and the Academic Program Council to consider recommendations concerning operations and procedures. Each academic college/ department is represented on GOC/GIC by the associate dean (or other named individual) responsible for graduate studies in that college/department.

### Graduate Faculty

The Graduate Faculty is composed of Members, Associate Members, and Adjunct Members, and Special Appointments. Members and Associate Members are selected from qualified individuals of the academic staff of Texas A&M University at Galveston and College Station from the staff of other parts of the University, The Texas A&M University System, and affiliated research organizations (such as USDA) located in College Station or Galveston.

Nomination for membership on the Graduate Faculty is always initiated by the head of the appropriate academic department of Texas A&M University at Galveston or College Station.

### Graduate Advisors

A graduate student entering the University for the first time is required to consult with a graduate advisor in their department. Departmental Graduate Advisors are available for consultation several days prior to registration. Graduate Advisors are designated by an asterisk in the Faculty section of this catalog.

## Graduate Degree Information

Graduate student progress is guided and evaluated by an advisor and a graduate committee. These individuals give direction and support for the appropriate developmental and learning goals of graduate students. The advisor and the graduate committee also have the obligation of evaluating a graduate student's academic performance. The graduate student, the advisor and the graduate committee constitute the basic core of graduate education. It is the quality, scope and extent to interaction in this group that determine the significance of the graduate experience. The requirements set forth in this catalog are defined as minimum University requirements. Departments and Colleges may opt to establish higher standards and/ or additional requirements.

## Student Responsibility

It is the responsibility of each student to:

1. Know specific degree requirements as established by the Office of Graduate Studies and/or the student's department.
2. Enroll in the appropriate coursework to complete the degree plan.
3. Maintain the appropriate standards to continue in graduate studies.
4. Be acquainted with the Texas A&M University and Texas A&M University at Galveston Student Rules.

Information about general degree requirements is available in this catalog. Specific degree requirements and procedural guidelines are available from the departmental graduate advisor(s).

## Degree Plan

Courses previously used for another degree are not acceptable for degree plan credit. A graduate student must file a degree plan which includes those courses to be applied toward a particular degree. Changes in the approved degree plan may be made by petition to the Office of Graduate Studies. The student must submit the degree plan using the accepted degree plan format as it appears on the Internet at [vpr.tamu.edu](http://vpr.tamu.edu).

Lower division undergraduate course work (100- and 200-level) may not be used for credit toward a graduate degree. Course work may not be used to satisfy requirements for more than one degree. Additional course work may be added to the approved degree plan by the student's advisory committee. Specific details are indicated under the description of requirements for each degree program. Courses listed on the degree plan are subject to degree time limits. Please refer to the Time Limits section in each degree section in which the student is presently enrolled.

## Petitions

Exceptions to published rules may be requested by proper petition to the Office of Graduate Studies. Each petition will be considered on its own merits by the Dean of Graduate Studies. The signature of the student and the signatures of all members of the graduate student's advisory committee, if appointed, are required on a petition.

Furthermore, the signature of the department head, or his or her designee, is required on all petitions, and petitions from graduate students working on a degree supervised by a Faculty Senate-approved intercollegiate faculty require the signature of the faculty chair, in addition to that of the department head. Specific forms for these types of petitions are found on the Office of Graduate Studies Internet address at [vpr.tamu.edu](http://vpr.tamu.edu) and must be used.

## Steps to Fulfill Master's Degree Requirements

1. Meet with department graduate advisor to plan course of study for first semester  
When: Before first semester  
Approved by: Graduate Advisor
2. Establish advisory committee. Submit degree plan  
WHEN: Following the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.  
APPROVED BY: Advisory committee, department head and Office of Graduate Studies.
3. If thesis is required, submit proposal  
WHEN: Prior to final exam and at least 14 weeks before graduation.  
APPROVED BY: Advisory Committee, department head and OGS
4. Apply for degree, pay graduation fee  
WHEN: During the first week of the final semester, see OGS calendar.
5. Check to be sure degree program and advisory committee are up to date and all English Language Proficiency Exam requirements (if applicable), and course work are complete.  
WHEN: Well before submitting request to schedule final exam
6. Complete residence requirement  
WHEN: If applicable, before or during final semester  
APPROVED BY: OGS
7. Submit request for permission to schedule final exam, if applicable.  
WHEN: Must be approved by OGS at least 10 working days before final exam. See OGS calendar for deadlines  
APPROVED BY: Advisory Committee, department head, OGS
8. If required, submit two approved final copies of thesis and Research Focus and Benefits form  
WHEN: See OGS calendar for deadlines  
APPROVED BY: Advisory Committee, department head and OGS
9. Graduate; arrange for cap and gown. For more information, contact TAMUG Bookstore

# Graduate Admission

## General Information

A formal application is required of all persons seeking admission or readmission to graduate studies. The application is available online at [www.applytexas.org](http://www.applytexas.org). A paper copy of the application may be obtained by writing the Office of Student Relations at Texas A&M University at Galveston.

An application fee of \$50 for U.S. citizens and permanent residents or \$75 for international applicants is required to process an application for admission. Application fees are nonrefundable. Checks or money orders (U.S. currency) should be made payable to Texas A&M University at Galveston. All financial dealings with Texas A&M University at Galveston may be done by check or money order provided it displays an agency bank in the U.S. and has magnetic ink character recognition (MICR) routing numbers at the bottom of the check. The \$50 fee required of U.S. citizens or permanent residents may be waived, but only in exceptional cases, for low-income applicants. In such cases, applicants should include with the application for admission a letter from their financial aid officer or other knowledgeable officer verifying the need for a waiver. Waiver of the \$75 international application fee is not available.

With the approval from the degree granting unit providing admission, admission to graduate studies normally remains valid for one year from the date of acceptance with one \$50 or \$75 (as appropriate) application fee. An extension to the one-year time limit may be granted, if requested by the applicant in writing and approved by the degree granting unit.

Departments may have admission requirements in addition to those of the Office of Graduate Studies. In such cases, higher departmental requirements supersede those of the Office of Graduate Studies. The normal requirement for admission to graduate studies is a scholastic record which, over at least the last two years of full-time academic study in a degree program, gives evidence of the applicant's ability to do successful graduate level work. An applicant whose academic record is not satisfactory, or who is changing fields of study, may be required to take additional work in preparation for graduate study. To allow time for processing, application forms should be filed at least six weeks prior to the opening of the semester (International applicants should refer to the deadlines under that heading). Admission to graduate studies cannot be completed until all the credentials requested in the application form have been received and evaluated.

## Regular Admission Status

To be admitted to graduate studies an applicant must:

1. Hold a four-year baccalaureate degree or higher from a college or university of recognized standing (i.e., a degree recognized as equivalent to a baccalaureate degree awarded in the U.S.);
2. Show promise of ability to pursue advanced study and research satisfactorily;
3. Have had adequate preparation to enter graduate study in the field chosen; and
4. Submit, with the application, acceptable scores on the General Test of the Graduate Record Examination (GRE). Approximately six weeks are required for scores to be received by Texas A&M University at Galveston after the regularly scheduled tests are administered. Scores made on the GRE more than five calendar years prior to application for admission to graduate studies may not normally be used to satisfy admission requirements.

## International Admission Status

International students (non-U.S. Citizens) with superior academic records will be considered for admission to Texas A&M University at Galveston through the International Admissions Office of Texas A&M University (College Station). For information about application deadlines, admissions criteria, expenses and English language proficiency, international students should contact: International Admissions, Texas A&M

University, P.O. Box 30014, College Station, Texas 77842-3014. Phone: 979-845-1071. Email: international-admission@tamu.edu.

Application deadlines established for all international applications are as follows:

March 1 for the fall semester

August 1 for the spring semester

November 1 for the summer session

## Graduate Registration and Academic Status

### General Information

Before registering for the first time, a student should seek assistance from the Departmental Graduate Advisor representing the field of his or her major interest. This advisor will assist in planning the student's first registration. International students should consult the section on English Proficiency Requirements for information about additional requirements. Registration requirements for graduate students holding assistantships and fellowships are discussed in the section on Financial Assistance.

### Full-Time Status

A full-time graduate student is considered full-time if he or she is registered for a minimum of:

9 semester credit hours during a fall or spring semester;

6 semester credit hours in a 10-week summer semester; or

3 semester credit hours in a five-week summer term.

A Q grade before the 12th class day does not count toward the certification of enrollment status.

Colleges and departments may impose additional semester credit hour requirements for students holding assistantships or fellowships which exceed the minimum stated above. Students in post-baccalaureate non-degree status (G6) are not eligible for graduate assistantships or fellowships. Students who have financial assistance should consult the Department of Student Financial Aid.

### Maximum Schedule

Graduate students may enroll for a maximum of 15 hours during a regular semester, 6 hours for a 5-week summer term and 10 hours for a 10-week summer semester. Requests for exceptions to exceed the maximum schedule must be made through the student's dean.

### Continuous Registration Requirements

Students in graduate degree programs requiring a thesis, dissertation, internship or record of study, who have completed all course work on their degree plans other than 691 (Research), 684 (Internship) or 692 (Professional Study) are required to be in continuous registration until all requirements for the degree have been completed. The continuous registration requirement may be satisfied by registering either In Absentia or In Residence.

In order to qualify for In Absentia registration, a student must not have access to or use facilities or properties belonging to or under the jurisdiction of The Texas A&M University System at any time during the semester or summer term for which he or she is enrolled. Students who qualify for In Absentia registration are required to register each subsequent fall and spring semester for a minimum of one and maximum of four credit hours of 691, 684, 685 or 692. Departments and colleges may have additional or higher requirements.

Students who are subject to In Residence registration (i.e., on campus) are required to register each subsequent fall and spring semester and each 10-week summer semester for at least one credit hour. University departments and colleges may have additional or higher requirements. Unless a student plans to

take examinations, using University resources or defend, registration during the summer will not be required to fulfill the continuous registration requirement. However, the University, colleges or departments may have additional or higher requirements.

International students may have additional registration requirements depending on their visa status. They should consult the student immigration advisor to obtain current information on these requirements.

Students who do not comply with the continuous registration requirement will be blocked from registration. They will be allowed to register only after receiving a favorable recommendation from a departmental review committee (not the student's advisory committee), the endorsement of the department head, and the approval of the Office of Graduate Studies.

### **In Absentia**

Students may register In Absentia if enrolled in a course which is offered on an individual basis and conducted away from the College Station or Galveston campus and System campuses or facilities such as Agricultural Research and Extension Centers, Research Stations or other properties under the jurisdiction of The Texas A&M University System. Such courses may include, but are not limited to internships, problems, practicums, etc. To qualify for In Absentia registration, the student must not have access to or use of facilities of The Texas A&M University System at any time during the semester or summer term for which he or she is enrolled. The definition of "facilities" includes human resources and services such as those provided by graduate advisory committee members responding to drafts of theses, dissertations or records of study material, etc. Approval of the dean of the college and the head of the department offering the course is required for each student requesting In Absentia registration. A student holding a fellowship or assistantship may not register In Absentia.

## **Graduate Code Classification**

### **G6 Post-baccalaureate Non-degree**

Post-baccalaureate non-degree classification is intended for students with a baccalaureate degree from an institution of higher education. If at a later date, a post-baccalaureate non-degree student decides to pursue a graduate degree, the student must understand that limitations may be placed on course work taken while in G6 status. Specifically, the student must understand that a college or a department may decide whether or not to accept any G6 work toward the student's graduate degree; however, with the approval of the student's graduate advisory committee, the department head, the college dean and the Office of Graduate Studies, a maximum of 12 credit hours taken in post-baccalaureate non-degree status may be used on a student's degree plan. Admission to post-baccalaureate non-degree status does not establish eligibility for admission to degree-seeking status.

Post-baccalaureate non-degree classification applications are handled on a first come, first served basis. Applications submitted within one month of registration may not be processed in time to begin that semester or term. Enrollment of G6 students in courses may be limited by college and departmental policies. Each post-baccalaureate non-degree student must be reviewed by his or her department of affiliation for continuation at the end of each semester.

A post-baccalaureate non-degree student must maintain at least a 3.000 GPR on all course work attempted to remain eligible to register. University departments and colleges may have additional and higher requirements. Post-baccalaureate non-degree status students are not eligible for assistantships, fellowships or scholarships. Post-baccalaureate non-degree status normally is not available to international students.

### **G7 Graduate, Master's**

G7 Classification denotes admission to a masters level program of study, including students in doctoral programs who have not yet completed either a masters degree or 30 hours of post-baccalaureate course work.

### **G8 Graduate, Doctoral**

G8 Classification denotes admission to a doctoral level program of study.

### **G9 Graduate, Conditional**

G9 Classification denotes conditional admission to graduate study. Admission is conditional on submission of required academic credentials and/or official test scores. When the required documents have been received, the student's classification will be changed. Approval of the Dean of Graduate Studies is required to change a student from G9 classification to the appropriate classification (i.e., G7 or G8).

## **Curriculum for the Degree of Master of Marine Resources Management**

The Master of Marine Resources Management will provide graduate students with a broad understanding of issues involving marine resources management and policy. The need for this type of multifaceted marine resources management degree has never been stronger as state and federal agencies such as the U.S. Coast Guard, the U.S. Army Corps of Engineers, the Texas Natural Resource Conservation Commission and similar groups face natural resources management challenges daily. Personnel from these organizations have identified the need for a degree, which focuses on national and international ocean resource law and policy; coastal zone management; physical and geochemical marine resources management strategies; and fisheries management. This new degree program reflects an increasing need to view marine natural resources management and policy development from both an ecological and holistic perspective.

The degree is tailored toward careers with industry and agencies and may be a degree comparable to the MBA as an alternative terminal degree. In addition, the degree program will also address the needs of public school science teachers wishing to obtain a degree outside the field of education.

### **Residence**

Students must complete 9 resident credit hours during one regular semester, one 10-week summer semester or in combination during the two five-week summer semester sessions (i.e., 3 hours first session, 6 hours second session). (See Residence requirements, Texas A&M University Catalog) Exemption from this requirement will be granted if the student's advisory committee and the Office of Graduate Studies approve such a petition.

### **Student's Advisory Committee**

After receiving admission to graduate studies and before enrolling in coursework, the student will meet with the departmental graduate advisor for recommendation on selecting a committee chair and developing the student's advisory committee. The student's advisory committee will consist of no fewer than three members and up to five members with at least one member outside the department. Two must be in Marine Sciences/Oceanography or Maritime Administration in Galveston, one of whom should be the chair of the committee. One member must be from another department in Galveston or College Station.

The chair, in consultation with the student, will select the remainder of the advisory committee. The chair will then notify the tentative members of the advisory committee, giving the student's name and field of study, and a request that they consider serving on this committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. The chair of the committee

has the responsibility for calling required meetings of the committee, and for calling meetings at any other time considered desirable.

If the chair of the student's advisory committee is unavailable for an extended time on any academic period, the student may request in writing the program chair appoint an alternative advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan. In addition, the committee as a group and as individual members is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate Studies.

The committee member's signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

### **The Degree Plan**

The degree plan will be chosen by the student in conjunction with his or her Advisory Committee. Of the 36 hours in the curriculum, 24 are required. The required courses include 6 hours of science, 9 hours of management, 3 hours of Geographic Information Systems (GIS) and 6 hours of law/policy courses. The student will choose electives for 12 credit hours, 3 hours of which will be additional science, 3 hours of which will be additional management, and 3 hours of which will be additional law/policy. The remaining 3 hours can be in an appropriate supporting field such as economics or information management if desired.

### **Credit Requirement**

There is a credit requirement of a minimum of 36 credit hours of courses as approved on the degree plan.

### **Limitations on the Use of Transfer, Extension and Certain Other Courses**

1. The maximum number of transfer credit hours shall not be greater than 12 (one-third of the total hours required.)
2. Extension academic course credit is acceptable from institutions within the Texas A&M University System, if listed in the graduate or undergraduate catalog. These are not the type of courses offered by the agricultural or engineering extension services.
3. A maximum of 12 credit hours of 489 and/or 689 (Special Topics) may be used, but the maximum of 9 credits of undergraduate courses may not be exceeded.
4. A maximum of 12 credit hours of any combination of 1-3 above may be used on the degree plan or one-third of the total hours of the degree.
5. A maximum of 9 hours of undergraduate courses (300-400 level) including 489 is permitted.
6. A maximum of 4 credit hours of 684 (professional internship) may be applied to the degree plan.
7. Enrollment or use of 691 as credit is not allowed.
8. A thesis is not required.
9. Exceptions may be permitted when petitioned by the Student's Advisory Committee and approved by the Office of Graduate Studies.

## Transfer of Credit

The student may transfer a maximum of 12 hours of courses or one-third of the total hours of the degree plan, whichever number is greater, from an approved institution upon the advice of the advisory committee. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or better will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University or at the institution at which the course were taken, and if the courses would be accepted for credit toward a similar degree for students in degree-seeking status at the host institution. Course work without final grades or with grades other than letter grades (for example CR, P, S, U, H, etc.) is not accepted for transfer credit. Transfer credit for course work from any college or university must be shown in semester credit hours or equated to semester credit hours. You must have an official transcript sent directly from the university in which the transfer course work was taken to the Texas A&M at Galveston Office of Admissions and Records. Transfer courses are not included in the calculation of the GPR. Scholastic Requirements.

## Scholastic Requirements

Graduate students must maintain a grade point ratio (GPR) of 3.000 (B average based on a 4.000) scale for all courses which are listed on the degree plan and for all graded graduate and advanced undergraduate course work (300- and 400-level) completed at Texas A&M University at College and/or Texas A&M University at Galveston and eligible to be applied toward a graduate degree. Graduate students will not receive graduate degree credit for undergraduate courses taken on a satisfactory/unsatisfactory (S/U) basis. Graduate courses on the degree plan may not be taken on an S/U/ basis, except for courses bearing the numbers 681, 684, 690, 691, 692, 693, 695, 697. Graduate courses not on the degree plan may be taken on an S/U basis.

Only grades of A, B, C, and S are acceptable for graduate credit. Grades of D, F or Unsatisfactory (U) for courses on the degree plan must be absolved by repeating the courses at Texas A&M University at College Station or Galveston, and achieving grades of C or above or Satisfactory (S). A course in which the final grade is C or lower may be repeated for a higher grade. The original grade will remain on the student's permanent record, and the most recent grade will be used in computing the cumulative and degree plan GPRs.

The cumulative GPR for a graduate student is computed by using all graded graduate (600-level) and advanced undergraduate (300-and 400-level) course work completed at Texas A&M University at College Station and/or Galveston and eligible to be applied toward a graduate degree. Semester credit hours to which grades of Withdraw Failing (WF) are assigned shall be included in computing the GPR. Those involving grades of Withdraw Passing (WP), Satisfactory (S), Unsatisfactory (U), and Q-drop (Q) shall be excluded.

If either of a student's cumulative GPR or the GPR for courses listed on the degree plan falls below the minimum of 3.000, he or she will be considered to be scholastically deficient. If the minimum GPR is not attained in a reasonable length of time, the student may be dropped from graduate studies. The procedures for dismissal are explained in the Texas A&M University Student Rules. Departments or colleges may adopt specific guidelines pertaining to scholastic deficiency or dismissal.

## Time Limit

All degree requirements for a master's degree must be completed within a period of seven consecutive years. Course work, which is over seven years calendar years old, may not be applied to a master's degree. Time limits for course work on the degree plan also apply to transfer courses.

## Application for Degree and Deadlines

Graduate students are conferred at the close of each regular semester and 10-week summer semester. Candidate for advanced degrees who expect to complete their work at the end of a given semester must apply for graduation by submitting the appropriate forms to the Office of Graduate Studies and by paying the required graduation fee at the Fiscal Department no later than the Friday of the second week of the fall or spring semester or the Friday of the first week of the first summer session. Deadlines are in accordance with the provisions of the Office of Graduate Studies of Texas A&M University.

## Final Examination

This program is a professional degree. Because it is a professional degree, the student will not produce a thesis. No final exam will be required for students in this degree program

## Course Offerings (see Course Descriptions)

### Required courses

MARS 625 GIS Based modeling for Coastal Resources  
MARS 615 Physical and Geochemical Marine Resources  
MARS 635 Environmental Impact Statements and NRDA  
MARS 676 Environmental Policy  
MARA 604 Marine Natural Resource Economics  
MARB 620 Biological Marine Resources  
MARS 675 Environmental Mgmt Strategies for Scientists  
RENR 664 Coastal Zone Management\*

### Optional Courses

GEOG 666 Coastal Geomorphology\*  
MARS 610 Environmental Law  
MARS 620 Int'l Env. Business Transactions  
MARS 640 Environmental Administrative Law

### Optional Courses Continued

MARS 645 Wildlife Law and Ethics  
MARS 650 Geochemical Marine Resources Mgmt  
MARS 660 Environmental Alternative Dispute Resolution  
MARS 684 Internship in Marine Resources Management  
MARS 689 Special Topics in Marine Resource Management  
OCNG 620 Biological Oceanography\*  
OCNG 627 Ecology of the Continental Shelf\*  
OCNG 630 Geological Oceanography\*  
OCNG 647 Chemical Contamination of the Marine Environment\*  
WFSC 628 Wetlands Ecology\*  
WFSC 640 Human Dimensions of Wildlife and Fisheries Management\*

\*Courses offered by TAMU (College Station). Please refer to the TAMU Graduate Catalog for complete course descriptions. In general, these courses are offered by distance education for Galveston based students.

# TUITION AND FEES

## General Information

The expenses for each semester will vary according to the personal needs of the student and the course of study pursued. The tuition rate differs according to which of the three following categories a student qualifies: resident of Texas, nonresident of Texas, or pursuing a license-option curriculum.

The tuition and fee amounts provided in this catalog represent the most accurate figures available at the time of publication and are subject to change due to economic conditions, legislative requirements, or actions of the Texas A&M University System Board of Regents.

## Payments

Students must meet all financial obligations to the University by their due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student's registration and their being barred from future enrollment and receiving official transcripts. State law requires that tuition and fees be paid prior to the first day of classes. Students may choose to pay fees in installments which is explained below.

Payments to the Fiscal Office may be in the form of cash, cashier's check, personal check, or money order payable to Texas A&M University at Galveston (or TAMUG). All checks and money orders are accepted subject to final payment. The Discover credit card is accepted for tuition/fee payments.

Notices of amounts owed should be obtained at the Fiscal Office. A bill will not be sent through the mail for students who register late or add courses at the beginning of the semester unless they are on the installment plan.

## Installment Plan

Tuition, most fees, room, board, and parking may be paid in three installments with one-half payable prior to the first day of classes and the remainder payable in two equal payments during the fall or spring semester. A \$15 service charge will be assessed each student who chooses to use the installment plan. Students who wish to pay fees in installments should contact the Fiscal Office (409) 740-4434.

## Late Fees and Penalties

Penalties include:

- \$20 late payment penalty for failure to make payment on the scheduled due date.
- \$100 late registration/re-registration penalty for registration/re-registration between the 1st and 12th class days.
- \$200 late registration penalty for registration after the census day (12th class day).
- \$50 late class-add penalty for adding a course after the census day (12th class day) when a net result of the change is an increase in the number of credit hours.
- \$50 reinstatement fee.

These penalties will apply to all students, including those who are dropped for nonpayment and are required to reregister for classes. Please refer to Payment Due Date table published in the Class Schedule.

## Student Financial Responsibility

Students are responsible for the balance in their accounts. Late payments and delinquent balances (tuition and fees, installments, student loans, returned checks) remaining at the end of the semester will cause a student to be blocked from registering for the next semester or from obtaining a transcript.

### Tuition and Fees: Texas Residents (undergraduate and graduate students)

Texas residents, except those in license-option curricula, pay \$44 per semester credit hour for tuition. The fee schedule listed below is for all Texas resident students except those in license-option curricula or graduate programs. Graduate students pay an additional \$44 per credit hour. This schedule is based on a student registered for 15 credit hours during the regular school year and 6 credit hours during a term of the summer session:

	Fall Semester	Spring Semester	Summer Term (5 weeks)*
Tuition	\$660.00	\$660.00	\$264.00
Student Services	130.20	130.20	65.10
Room (Double)	890.00	890.00	350.00
21 Meal Plan**	1,455.96	1,455.96	509.29
Room Deposit	250.00		
Identification Card	5.00	5.00	3.00
Computer Use Fee	135.00	135.00	54.00
General Property Deposit	10.00		
University Authorized Tuition	660.00	660.00	264.00
Health Center Fee	25.00	25.00	12.50
Library Use Fee	105.00	105.00	42.00
Student Center Complex Fee	12.50	12.50	6.25
Orientation Fee	50.00		
<b>Total</b>	<b>\$4,388.66***</b>	<b>\$4,078.66***</b>	<b>\$1,570.14</b>

\*The fees for one summer session should be doubled if you enroll for both sessions for the same number of credit hours.

\*\*Includes state and city tax of 8.25%.

\*\*\* Graduate students add \$660.

### Tuition and Fees: License Option Students

License-option students pay \$55 per semester credit hour for tuition. The following fees are based on 15 hours during the regular school year and 4 hours for summer cruise (excluding international students):

	Fall Semester	Spring Semester	Summer Cruise
Tuition	\$825.00	\$825.00	\$220.00
Student Services	130.20	130.20	43.40
Room	890.00	890.00	700.00
21 Meal Plan*	1,455.96	1,455.96	1,071.68
Room Deposit	250.00		
General Property Deposit	10.00		
Identification Card	5.00	5.00	3.00
Computer Use Fee	135.00	135.00	36.00
Cruise Fee			850.00
University Authorized Tuition	660.00	660.00	176.00
Health Center Fee	25.00	25.00	25.00
Library Use Fee	105.00	105.00	28.00
Student Center Complex Fee	12.50	12.50	6.25
<b>Total</b>	<b>\$4,503.66</b>	<b>\$4,243.66</b>	<b>\$3,159.33</b>

\*Includes state and city tax of 8.25%.

Students who are dismissed or withdraw from a license-option curriculum after the semester begins will have fees adjusted to the appropriate resident or nonresident rate retroactive to the beginning of the semester.

License-option students who are granted a leave of absence for the summer and who enroll in the onshore summer program at the Mitchell Campus instead of the summer training cruise will pay license-option fees as appropriate for that period. License-option students must complete all three cruises within four summers.

Under special circumstances, non-license option students may be granted permission to participate in the Corps of Cadets. Non-license option students in the Corps of Cadets are not eligible for the special license-option tuition and will pay normal resident or nonresident fees as applicable.

### Tuition and Fees: Nonresident Students (undergraduate and graduate students)

Nonresident students, except those pursuing a license option curriculum, pay \$262 per semester credit hour. Graduate students pay an additional \$44 per credit hour. The fees listed below are based on a student registered for 15 credit hours during the regular school year and 6 credit hours during a term of the summer session:

	Fall Semester	Spring Semester	Summer Term (5 weeks)*
Tuition	\$3,930.00	\$3,930.00	\$1,572.00
Student Services	130.20	130.20	65.10
Room (Double)	890.00	890.00	350.00
21 Meal Plan**	1,455.96	1,455.96	509.29
Room Deposit	250.00		
Identification Card	5.00	5.00	3.00
Computer Use Fee	135.00	135.00	54.00
General Property Deposit	10.00		
University Authorized Tuition	660.00	660.00	264.00
Health Center Fee	25.00	25.00	12.50
Library Use Fee	105.00	105.00	42.00
Student Center Complex Fee	12.50	12.50	6.25
Orientation Fee	50.00		
<b>Total</b>	<b>\$7,658.66***</b>	<b>\$7,348.66***</b>	<b>\$2,878.14</b>

\*The fees for one summer session should be doubled if you enroll for both sessions for the same number of credit hours.

\*\*Includes state and city tax of 8.25%.

\*\*\* Graduate students add \$660.

### Unpaid Check

If a check accepted by the Fiscal Office or bookstore is returned unpaid by the bank on which it is drawn, a penalty of \$25 in the form of cash or money order will be assessed. If not redeemed, the student may be dropped from the rolls of the University. The student is eligible for reinstatement after payment of penalties that include a \$50 reinstatement fee and redemption of the check.

### Computer Use Fee

The computer use fee is charged at the rate of \$9 per semester credit hour. This fee will be used to compensate for services provided by various microcomputer facilities on campus.

## General Property Deposit

Every student, unless registered in-abstentia, must make a property deposit to protect the University from damage to or loss of University property. This deposit, less any outstanding charges, will be returned upon request to the student graduating or withdrawing from school. Deposits not requested within four years from date of last attendance will be forfeited into a student deposit scholarship account.

## Health Center Fee

This fee is required of all students at the rate of \$25 for each regular semester, \$25 for the summer training cruise, and \$12.50 per five-week summer term. This fee will finance health services provided by a local clinic and a physician and two medical assistants on the summer training cruise.

## Housing and Meal Plans

All undergraduate students enrolled in more than nine credit hours are required to reside in campus housing if available and are required to purchase a 15 or 21 meal plan. The limited exceptions are detailed in the Housing section of this catalog. All changes must be made through Housing/Residential Services. Any student living off campus at the beginning of the semester who adds enough hours to require living on campus must pay for room and board for the entire semester. Residence hall fees are included in the fee schedules listed earlier.

## Meal Plan Fees

Students requesting to change meal plans during the semester will have 30 days from the first day of classes to make any change. Requests for changes to a meal plan after that time will not be permitted. All changes must be made through the Food Service Office.

### Fall and Spring

15 Meal Plan - Mon. - Sun., 3 meal/day limit, \$1,254 + \$103.46 tax = \$1,357.46

21 Meal Plan - Mon. - Sun., no limit on meals per day, \$1,345 + 110.96 tax = \$1,455.96

### Each 5-Week Summer Session

15 Meal Plan - Mon. - Sun., 3 meal/day limit, \$412 + \$33.99 tax = \$445.99

21 Meal Plan - Mon. - Sun., no limit on meals per day, \$452 + \$37.29 tax = \$509.29

Summer Cruise - \$990.00 + \$81.68 tax = \$1,071.68

Two optional meal plans are available for off-campus students.

### Fall and Spring

Any 5 meals per week                      \$560 + \$46.20 tax = \$606.20

Any 10 meals per week                    \$970 + \$80.03 tax = \$1,050.03

### Summer (Optional meal plan)

Any 5 meals                                    \$126 + \$10.40 tax = \$136.40

Any 10 meals                                 \$279 + \$23.02 tax = \$302.02

## Identification Card

All students must have an identification card. This card is used in registration procedures, collection of fees, cashing of checks, for dining hall privileges, etc. During the fall and spring semesters, the identification card fee will be \$5.00. Summer identification card fee is \$3.00. Replacement cards will be issued upon payment of an \$8.00 fee.

### **Library Use Access Fee**

The library use fee is assessed at the rate of \$7 per semester credit hour. Funds collected for this fee are devoted to enhancement of library holdings and services.

### **Orientation Conference Fee**

The orientation conference fee is required of all new freshmen and transfer students enrolling in fall or spring semesters and selected summer terms at the rate of \$50 per student. This fee supports the provision of advanced materials to accepted students, the conduct of professional orientations, and state-mandated diagnostic testing.

### **Room Deposit**

A deposit of \$250 is required to apply for a room in a residence hall. This fee will be retained as a deposit against damage or late cancellation, or to keep the application on active file. Upon withdrawal from TAMUG or graduation, any charges associated with damage to the dorms by the student may be withheld from the housing deposit. A reservation may be canceled and the deposit refunded upon written request prior to July 1 for the fall semester, December 15 for the spring semester, May 10 for the first summer session and June 20 for the second summer session. Any cancellation after the above dates will result in forfeiture of the deposit. A refund may be made in accordance with the TAMUG policy for a student graduating or withdrawing from school, upon request, after clearance by the Residential Services and the Student Affairs Offices. The balance of the refund due will be issued through the Fiscal Office after deducting all dorm damage charges owed by the student to the University. Seniority in campus housing and on the residence hall waiting list will be based upon the date of receipt of the room deposit; however, the deposit does not guarantee assignment to on-campus housing.

### **Student Center Complex Fee**

The student center complex fee is required for all students at the rate of \$12.50 per semester (\$6.25 per five-week summer term or cruise). This fee will be used for the operation, maintenance, programming improvement, and purchase of equipment for the student center complex and for the acquisition or construction of additions to the complex.

### **Student Services Fee**

The student service fee is required of all students at the rate of \$10.85 per semester credit hour not to exceed \$130.20 per semester or \$65.10 per five-week summer term. Student services fees finance recreational activities, student government, student publications, student organizations, campus movies, intramural athletic programs, and social activities. The fee also provides counseling, graduate placement, financial aid, and multicultural services.

### **University Authorized Tuition**

This fee of \$44 per semester credit hour is assessed to compensate for occupancy, services, use and/or availability of all or any of the property, buildings, structures, activities, operations and other facilities of the campus.

## Fees for other Services

**Academic Enhancement Fee for Remediation Courses:** This \$50 per course fee will be used to provide classroom materials and textbooks to students required to take academic enhancement developmental courses in math, reading and/or writing in compliance with TASP regulations.

**Application Fee:** Students who submit an application to the University pay a \$35 fee.

**Career Center Fee:** This \$35 fee is required of students in the semester they register for on-campus interviews to support full-time and internship placement services.

**Cruise Fee:** Students pursuing a license-option curriculum pay a \$850 fee for each cruise attended. This fee is assessed to compensate for activities, services, and general operations of the Texas Clipper II.

**Engineering Instructional Enhancement Fee:** A student registering in certain engineering courses may be required to pay a \$70 Engineering Equipment Access Fee. The fee will not exceed \$70 per course or \$210 per semester.

**Field Trip Fees:** A field trip fee ranging from \$15 to \$2,000 may be charged for courses that include field trips.

**Graduation Fee:** A non-refundable fee of \$30 per degree sought is assessed the semester a student applies for graduation. This must be paid within the first 15 class days of the student's final semester. Late payment of the Graduation Fee will result in a \$50 late charge.

**International Student Service Fee:** International students who are not sponsored are assessed a \$20 fee each semester to defray administrative support costs.

**Laboratory Fees:** A laboratory fee ranging from \$8 to \$30 is charged for each laboratory course each semester.

**Mail Service Fee:** The university operates a mail service for students living on campus wishing to receive mail on campus. The fee is \$20 per semester for each student and \$20 per 10-week summer term.

**Parking Permit:** All students parking an automobile or motorcycle on the campus pay a fee of \$66 for the academic year. A \$33 summer parking fee, independent of the academic year fee, is assessed for the entire summer term.

**PE Service Fee:** All students taking Physical Education (kinesiology) courses are required to pay a \$20 service fee for each Physical Education course.

**Sailing Course Fee:** This \$110 fee is charged only to students registered in PE sailing courses to cover the costs of maintaining the boats, fuel for the instructor's boat, and safety equipment.

**Scuba Tank Rental Fee:** \$110 will be charged to students enrolled in a scuba diving course who require the University to supply tanks for the course. This fee is used to maintain tanks, regulators, and compressors.

**10-Week Summer Semester:** Students may register for 10-week summer semester courses during the first summer term registration. They will be charged the minimum tuition of \$120. All other mandatory and/or optional fees will be based on the number of hours taken.

**Testing Administrative Fee:** This \$5 per test fee will be used to pay for graduate students to proctor credit-by-exams and TASP tests and to pay shipping costs to send tests to testing centers.

## Expenses

**Textbooks and Supplies:** The cost of textbooks and supplies will vary with the quality of items purchased and with the course of study pursued. Students can expect to pay an amount ranging from \$650 to \$800. These amounts are estimates for the combined fall and spring semesters. Expenses for the summer term should amount to approximately one-half of the above estimates.

**Uniforms:** License-option students must purchase uniforms with initial outfitting estimated at \$1000.

Tickets to Texas A&M University home games and the TAMUG Yearbook may also be purchased at registration.

The University operates a bookstore which supplies textbooks, stationary, drawing instruments, toiletries and other supplies. All merchandise is sold at retail prices prevailing in the area. Major credit cards are accepted in the bookstore. For more information regarding the bookstore, please call (409) 740-4488.

## Refunds and Adjustments

### Withdrawal from the University

Once the University has accepted a fee payment, a student is considered officially enrolled. Stopping payment on a check for fees or allowing the check to be returned unpaid by the bank for any reason does not constitute official withdrawal. A \$25.00 unpaid check fee will be applicable in this instance. Students wishing to withdraw should contact the Admissions and Records Office. Failure to follow procedures for withdrawing from the University may result in financial penalties and difficulty with future enrollment in the University.

Refunds of fees shall be made to students officially withdrawing according to the following schedule: Tuition, University Authorized Tuition, Computer Access Fee, Student Services Fee, Student Center Complex Fee, Health Center Fee, Equipment Access Fee, P.E. Service Fee, Laboratory Fee, Residence Hall Rent, and Meal Plans:

#### **Fall or Spring Semester:**

Prior to the first class day	100 percent
During the first five class days	80 percent
During the second five class days	70 percent
During the third five class days	50 percent
During the fourth five class days	25 percent
After the fourth five class days	None

#### **Five-week Summer Term**

Prior to the first class day	100 percent
During first, second, third class day	80 percent
During fourth, fifth, or sixth class day	50 percent
Seventh day of class and thereafter	None

### Meal Plan Refunds

Meal fees are refundable in full prior to the first day of classes, after which time refunds will be made on a percentage basis according to the University's refund schedule. In case of a consecutive absence of 10 or more days due to illness of the student or member of his or her family or for some other unavoidable cause, a pro-rata refund will be made, computed on a daily basis.

### Financial Aid Recipients Refunds

Students receiving financial aid may owe some portion of any refund back to the appropriate federal or state programs. Financial aid refunds are determined prior to the release of any funds to the student who has withdrawn.

### Drop/Add Refunds

A student may drop courses during the first 4 class days of a fall or spring semester or 3 days of a summer semester. For Fall or Spring Semesters, students may also drop classes with special permission of the dean/department head between the 5th and 12th class days. Full refunds will be given for courses dropped

during these periods. For a Summer semester, a Student may add classes during the first 4 days of a summer semester. All fees must be received in the Fiscal Office on the day the course is added. Students may drop classes during the 1st through 4th class day with full refunds. Refunds will not be issued for classes dropped after the 4th class day.

Remember, to be eligible for drop refunds, you must remain enrolled for the semester. Otherwise, please refer to the “Withdrawal Refund” section of this book. Refunds will not be issued for classes dropped after the 12th class day. As of the first day of the semester, students may not drop all of their classes through the drop/add process because that would constitute withdrawal from the University. Students must go through the official withdrawal process to drop all courses and withdraw from the University. To withdraw, contact the Admission and Records office.

A student may add courses during the first 5 days of a Fall or Spring semester. You must pay the additional tuition and fees immediately; otherwise your registration will be subject to cancellation.

## Exemptions

Certain students in the following classifications are exempt from paying tuition and some of the required fees by action of the State of Texas and the Texas A&M University System Board of Regents. Specific eligibility requirements under these provisions can be obtained from the Fiscal Office.

Dependent children of disabled or killed-on-duty firemen are exempt from paying tuition and laboratory fees.

Blind and deaf students who are eligible for the rehabilitation services of the State Commission for the Blind and/or Division of Vocational Rehabilitation of the Texas Education Agency are exempt from tuition and laboratory fees.

Certain veterans (and dependents of veterans who died in active service), who are not eligible for federal educational benefits, who are Texas citizens and who were honorably discharged, may be exempt from paying tuition and laboratory fees. Orphans of members of the Texas National Guard and Texas Air National Guard killed since January 1, 1946, while on active duty either in the service of their State or the United States may also be eligible under this provision.

Officers, enlisted persons, selectees, or draftees of the Army, Army Reserve, Army National Guard, Air National Guard, Air Force, Air Force Reserve, Marine Corps, Marine Corps Reserve, Coast Guard, or Coast Guard Reserve of the United States, who are assigned to duty in Texas and their spouses and children, are entitled to pay the tuition fee required of Texas residents.

Teachers or professors employed at least one-half time on a regular monthly salary basis by institutions of higher education in Texas, and their spouses and children, are entitled to pay the tuition fee required of Texas residents.

Most non-resident students who are awarded competitive academic scholarships of at least \$1,000 by the TAMUG Scholarship and Awards Committee for the academic year are entitled to pay Texas resident tuition for the academic year that the scholarship covers. Waivers are limited to 5% of the total number of students enrolled. The non-resident status is unchanged.

Students registered only in courses which have been designated as “off campus” will be charged tuition and fees based on their specific distance education courses category. Please check with the Fiscal Office for the required tuition and fees for each category.

Students registering concurrently at two Texas public institutions of higher education are subject to the following tuition procedure:

1. A student must register at the institution with the lower minimum tuition and pay the full tuition charge.

2. Generally, only the hourly rate is paid at the second institution. However, if the minimum amount is less at the first institution, then the student must pay the difference in the two minimums to the second institution, but not less than the hourly rate.

### Fee Schedule for Distance Education and other Nontraditional Course Offerings

DE: Distance Education Instruction. This group includes traditional off-campus classes, all university centers and telecommunications, video and other nontraditional Distance Education Instruction delivery models.

IA: In Absentia. The traditional student who is performing individual research or completing degree requirements that do not require classroom instruction.

GG: Texas A&M University Graduate Students - Galveston. Texas A&M Graduate students who enrolled at College Station, but who are taking courses exclusively at Galveston.

<i>Required Tuition and Fees</i>	<i>DE</i>	<i>IA</i>	<i>GG</i>

### Tuition Rebates After Graduation

Certain undergraduate students who attempt no more than three hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog which they were graduated may be entitled to a \$1,000 tuition rebate after graduation. Several conditions apply and students must meet all of the specified criteria. Please see website [sfs.tamu.edu](http://sfs.tamu.edu) for a complete set of institutional and student responsibilities and other criteria.

# STUDENT FINANCIAL AID

The purpose of student financial aid at TAMUG is to assist students in meeting the reasonable costs of their education. Financial aid is available to eligible U.S. citizens and resident aliens who are enrolled in degree granting programs making satisfactory academic progress toward a baccalaureate degree.

Financial aid may include federal and state grants, scholarships, work opportunities, and student loans. Students submitting a complete application will be considered for all types of need-based assistance.

To apply for financial aid, please submit the Free Application for Federal Student Aid (FAFSA). Use Title IV Code 003632, Texas A&M, College Station.

If your application is selected for Verification, you will be asked to substantiate the information you reported on the FAFSA.

## Costs of Attendance

TAMUG uses average costs of attendance in determining financial need. These costs include tuition and fees (30 hours per year FTE), room and board, books and supplies, personal expenses, and transportation. Additional costs may be added for child care or disability-related expenses. There are three major categories of student budgets: Texas resident \$10,500 (9 mo.), non-Texas resident \$16,950 (9 mo.), and license-option students \$15,550 (12 months and includes summer cruise).

## General Priority

Priority Deadlines: The Federal Supplemental Educational Opportunity Grant (FSEOG) program requires financial aid applicants to be prioritized by Pell Grant eligibility and Expected Family Contribution (EFC) and awarded based, generally, on Pell eligibility and the lowest EFC. In order to fulfill this requirement, Texas A&M University at Galveston has the following FSEOG priority deadlines for the 2002-2003 academic year:

April 1, 2002	Fall 2002
October 1, 2002	Spring 2003
March 1, 2003	Summer 2003

If FSEOG funds remain after the initial awards are made, an additional deadline will be made to award the remaining funds. This deadline applies only to the FSEOG program. Students who do not meet the deadline are still eligible for other financial aid.

## General Information

The Financial Aid Office at Texas A&M University at Galveston follows the same general policies and procedures as Texas A&M University. A complete general listing may be found at <http://faid.tamu.edu>. Information specific to TAMUG may be found at [www.tamug.edu/fin](http://www.tamug.edu/fin). For information, call 409-740-4500 or email [4finaid@tamug.edu](mailto:4finaid@tamug.edu).

The Financial Aid Office adheres to the following guidelines when awarding financial aid to students who complete their files after the beginning of a semester:

- Students completing their 2002-2003 financial aid letter after November 1, 2002 will only be packaged for Spring 2003.
- Students completing their 2002-2003 financial aid letter after April 1, 2003 will be packaged for the Summer 2003.

These guidelines were developed so that the Financial Aid Office can establish fund balances in the aid programs for the following semester. All students should strive to complete their files before these dates.

## Satisfactory Academic Progress Policy

The purpose of the TAMUG Satisfactory Academic Progress Policy for financial aid is to ensure that students benefiting from financial assistance make reasonable and consistent progress toward a baccalaureate degree. TAMUG'S policy is consistent with U.S. Department of Education and Texas Higher Education Coordinating Board guidelines. The policy measures both qualitative and quantitative progress and is the applicable minimum standard for all types of financial assistance awarded by TAMUG.

The student's academic department determines the student's academic progress and ability. If the student is enrolled, then that student is automatically meeting the qualitative requirement. The student must successfully complete at least 24 credit hours per standard academic year (Fall and Spring semester) to be eligible for financial aid.

### Financial Aid Available:

**Grant Programs:** Grants are awarded based on financial need. Grants do not have to be repaid. TAMUG participates in these programs: Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, State Student Incentive Grant, Texas Grant and Texas Public Education Grant.

**Scholarships:** Scholarships are generally based on academic achievement and leadership. The TAMUG Scholarship and Awards Committee evaluates applicants and makes awards in the spring for the following academic year. The committee uses the admission application for freshman awards. There is not a separate freshman scholarship application for TAMUG-awarded scholarships, except for designated awards..

A limited number of non-resident students awarded a competitive TAMUG scholarship valued at \$1,000 or more are eligible to pay resident tuition.

All students are encouraged to apply for scholarships offered in their hometowns or from national sources. Information regarding such sources is available from high school counselors and reference materials in public libraries.

**Part-Time Student Employment:** All students who are making satisfactory academic progress are eligible to work on campus without regard to financial need. The Human Resources Office coordinates both on- and off-campus employment.

Interested students may seek positions through the job listings posted with the Human Resources Office. Student employment is limited to 20 hours per week, there are no fringe benefits, and students must maintain a 2.0 GPR.

A limited number of Federal and Texas Work-Study awards are made each year through the Financial Aid Office. Students awarded from either source still must seek their positions through the regular student employment process.

**Student Loan Programs:** TAMUG participates in these loan programs: Federal Stafford Student Loan, Federal Unsubsidized Stafford Student Loan and Federal Parent Loan for Undergraduate Students. All loans require an application and a promissory note. Credit reviews may be performed on Federal PLUS loans. New borrowers are required to attend entrance loan counseling before receiving the first disbursement of any loan.

Students who have borrowed money through federal or state student loan programs are required to receive exit loan counseling when they graduate, withdraw, or drop below ½ time enrollment.

**Disposition of Student Aid Funds:** Students awarded grants or TAMUG scholarships will have funds credited to their accounts by the first day of class in the Fiscal Office. Outside scholarship awards must be sent to the Financial Aid Office indicating the recipient and made payable to TAMUG. These will be credited to the student's account. Student employees are paid biweekly.

Student loan and parent loan (PLUS) proceeds are available for EFT. EFT is a system of electronic fund transfer, which credits the loan funds to the student's account. This eliminates standing in line for loan checks. Otherwise, student loan checks are made payable to the student and are available in the Fiscal Office. Veteran's Benefits are paid directly to the student.

Enrollment is verified prior to the release of any financial aid. Fiscal refunds due to financial aid credits are made after the 12th class day.

Students should come to campus prepared to pay for deposits, books, supplies, sundries, and for Cadet uniforms (we suggest \$1000).

Emergency Tuition and Fee Loans are available through the Fiscal Office for students needing assistance with fee payments. The loans are made on a first-come, first served basis.

### **Withdrawing from the University**

Federal law specifies how Texas A&M University must determine the amount of Student Financial Aid program assistance that a student earns if he or she withdraws. This law requires that, when a student withdraws during a semester, the amount of Student Financial Aid program assistance that the student has earned up to that point is determined by a specific formula. If a student received (or Texas A&M University received on the student's behalf) less assistance than the amount the student earned, the student will be able to receive those additional funds. If the student or the parent on the student's behalf received more assistance than the student earned, the excess funds must be returned.

The amount of assistance that a student earns is determined on a pro-rata basis. That is, if the student completed 30 percent of the semester, the student earned 30 percent of the assistance he or she was scheduled to receive. Once the student has completed more than 60 percent of the semester, he or she is considered to have earned all of the assistance disbursed to him or her. (Adapted from the U.S. Department of Education's publication "The Student Guide".)

The specific formula takes into consideration the average institutional costs used to award students financial assistance. For example, the standard cost of attendance at Texas A&M University is based on 15 credit hours per semester for undergraduate students and 9 credit hours for graduate students. Therefore, if a student was registered for fewer credit hours a semester, he or she may be required to return the additional funds disbursed to him or her.

Students should also be aware that as a recipient of financial assistance compliance of the Satisfactory Academic Progress Policy must occur. By withdrawing, a student may not be eligible for financial assistance in the future from Texas A&M University because he or she did not complete a specified number of credit hours for which aid was disbursed. Information regarding this policy can be found on the Texas A&M University homepage at <http://faid.tamu.edu>.

# STUDENT SERVICES

## Veterans Benefits

The Admissions and Records Office files claims for Veterans Benefits verifying a veteran's enrollment at TAMUG. Students are asked to submit the following documents to substantiate their claim: certified copy of their DD-214 showing an honorable discharge from service, a signed degree plan for their major indicating all of the courses necessary to receive that degree, VA form 22-1990 to establish eligibility or VA form 22-1995 to transfer their eligibility. Other documentation may be required. Enrollment is certified and claims are forwarded to the appropriate VA regional office. Adjudication may take four to six weeks; therefore, VA students should come to TAMUG ready to pay the initial costs of enrollment. Veterans are required to maintain a cumulative GPR of 2.0 or greater and successfully complete 24 credit hours per year to maintain eligibility. Students failing to meet the standard are placed on probation for one semester. Students who achieve a 2.5 GPR in the probationary semester and complete every class they start are eligible for a second probationary semester. A student who fails to meet the terms of their VA probation, or have not achieved a cumulative GPR of 2.0 after their second probationary semester, will be reported to the VA as making unsatisfactory progress.

**Hazlewood Tuition Exemption:** Texas residents who have fully exhausted all potential Veterans Benefits and are not eligible for any other federal or student grant benefits (including Pell, SEOG, and SSIG) should contact the Financial Aid Office to determine if they are eligible for a Hazlewood tuition exemption.

Inquiries regarding financial aid or veterans benefits may be addressed to the Office of Admissions and Records, Texas A&M University at Galveston, P.O. Box 1675, Galveston, TX 77553-1675. Phone: 409-740-4416.

## Career Planning and Placement

The Office of Career Planning and Placement provides career development and professional employment assistance to alumni and currently enrolled students. The Office provides individual and group career counseling; workshops on resume preparation, interviewing skills, and job search techniques; and a wide variety of vocational testing and interest assessments. The Office maintains a career resource room containing company and career information, as well as career development materials. Companies and organizations post job vacancy notices on a web-based job board and in the career resource room and visit the campus throughout the year to interview graduating students for full-time positions. Students and alumni may post their resumes on the job board and participate in the resume referral service. In addition, the Office hosts an annual Career Fair targeted to all students and alumni, providing an outstanding opportunity for career exploration and networking with prospective employers.

Students who wish to use the services provided by the Office of Career Planning and Placement should register with the office as early as their sophomore year and acquaint themselves with the available resources. Before participating in on-campus interviews, students are required to complete a credentials file. Appointments are required for individual counseling. All other services are available during regular office hours.

For further information contact the Office of Career Planning and Placement, TAMUG, P.O. Box 1675, Galveston, TX 77553-1675, or call 409-740-4736.

## Student Counseling

The Office of Student Counseling provides free and confidential counseling assistance to students. Counseling services are designed to help students improve personal, academic and professional skills related to academic success. The counseling staff help students meet these needs by providing short-term individual counseling sessions, seminars, workshops and small-group experiences. The following services and resources are available to TAMUG students: Individual counseling, academic skills training, career testing

and counseling, community referrals, entrance exams (including LSAT, GRE, MCAT and GMAT), study abroad programs, and drug/alcohol abuse prevention education.

In addition, the Counseling Office provides access to the Career/Academic Resource Lab, available to students seeking a quiet place to study. Computers, academic skill enhancement software, videos, academic counseling, tutor referrals and written information are available to students wanting academic assistance. Graduate school preparation software including LSAT, GRE and GMAT is also available.

Inquiries or appointments regarding counseling may be addressed to the Office of Student Counseling, P.O. Box 1675, Galveston, TX 77553-1675 or call 409-740-4587.

### International Student Services

The Office of Student Counseling serves as the liaison with the International Student Services Office at Texas A&M University in College Station. Personal counseling, financial planning, liaison with embassies and consulates, legal referrals, academic referrals, immigration matters, orientation programs, and advisement to groups, are among the services offered.

For more information regarding International Student Services, contact the Office of Student Counseling, P.O. Box 1675, Galveston, TX 77553-1675 or call 409-740-4587.

### Disabled Student Services

The Office of Student Counseling provides services to students with documented disabilities. The Office offers information on disabilities, campus services, and related resources. Persons with disabilities are encouraged to apply for services early and to request a meeting to discuss their individual needs prior to registration. Accommodations provided to students are based on individual need. Information regarding disabilities can be obtained through the Office of Student Counseling, P.O. Box 1675, Galveston, TX 77553-1675 or call 409-740-4587.

### Health Services

**Medical Clinic:** Texas A&M University at Galveston contracts with a local community clinic for health services for enrolled students. Terms of the contract may vary from year to year, but generally office visits to the doctor are free of charge. Medications, inoculations, x-rays, physicals, and other services provided at the clinic are available at the student's expense. Hospitalization and emergency room visits are full-charge at the student's expense. Educational pamphlets concerning HIV/AIDS, meningitis and other health concerns are available to students from the Counseling Office.

**Group Insurance:** Since there are numerous health needs and costs which are not provided or paid for by the Campus Health Service, students are strongly encouraged to maintain medical insurance. A group plan is available to all students in The Texas A&M University System. Applications for this program will be distributed during new student orientation and are available from the student counseling office. Students and parents should give careful consideration prior to dropping any current health insurance.

**Summer Cruises:** Each year the T/S Texas Clipper II is staffed with 3 licensed medical practitioners to operate an onboard dispensary. All services provided on board are free of charge. Should a student require hospitalization ashore or evacuation, the student will be responsible for all costs incurred because of such hospitalization or evacuation.

# STUDENT LIFE

## Housing

The Office of Student Life coordinates on-campus housing in modern student residence halls. Rooms are double occupancy and furnished with beds, desks, chairs, wardrobes or closets, and dressers. Students are expected to furnish pillows, blankets, shower curtains, linens, and cleaning supplies. With limited exceptions, all Texas A&M University at Galveston students are required to live in campus housing and participate in the board plan if campus housing is available. Approximately 40 percent of the undergraduate students are housed on campus, and returning students are given priority in granting permission to live off campus. Campus residents accepting housing in the fall semester are required to sign a nine-month contract and are not permitted to move off campus for the spring semester. An application for campus housing, which is separate from the application for admission to the University, is available from the Office of Student Life. This application, along with the \$250 required housing deposit, should be returned to the Texas A&M University at Galveston Fiscal Office. Rooms are assigned in accordance with the date on which the housing application and room deposit are received in the Fiscal Office. Housing applications may be forwarded prior to acceptance to the University, but housing assignments will be contingent upon admission to the University.

It is recommended that housing applications be submitted early. In the event that on-campus housing is not available, information concerning off-campus housing will be provided upon request. Since license-option students are required to live on campus, students will be able to pursue a license option only if campus housing is available for them. A failure to receive campus housing does not preclude students from enrolling in the degree program of their choice but simply restricts participation in license-option programs until campus housing is available. License-option students are housed separately from non-license-option students. Questions concerning license-option housing should be directed to the Office of Student Life.

## Student Activities

A wide variety of student activities are coordinated through the Office of Student Life in the Mary Moody Northen Student Center. The Northen Student Center contains dining facilities, a bookstore, counseling, student activities, and graduate placement offices and other facilities. Adjacent to the Northen Student Center are the P. E. facility, swimming pool, tennis courts, and other outdoor recreational facilities.

Clubs on campus include the American Society of Mechanical Engineers, Sail Club, Caving Club, Dive Club, Propeller Club, Student Life Organization, Student Association of Maritime Administrators, Society of Naval Architects and Mechanical Engineers, the Drama Club, the Sierra Sea Club, Circle K Service Organization, Residence Hall Association, and many others.

The student government of Texas A&M University at Galveston is the Student Senate. This Senate serves as a direct link to the administration regarding student life. Members are elected each year.

## Student Publications

Students publish a newspaper (The Nautilus), a yearbook (The Voyager) and a literary publication (Seaspray).

## Athletics

The Recreational Sports Program provides each student with the opportunity to participate in regularly organized activities. Co-rec teams are organized in flag football, basketball, softball, and volleyball. Facilities for racquetball and tennis are also available. Texas A&M University at Galveston also has softball, volleyball, soccer, and rugby teams which compete in local leagues. The Campus Sail Team and Rowing Club compete in intercollegiate competition.

## Multicultural Services

The Department of Multicultural Services works with other programs on campus to support the cultural, educational, social and personal development of all students attending TAMUG. Departmental services include personal advising; a resource library including multicultural books, articles and video/audio tapes; and tutoring and mentoring services. Computers and skill enhancement software are also provided for incoming students wanting to review basic chemistry and calculus. Graduate school preparation software including LSAT, GRE and GMAT is available for upperclassmen. Multicultural Services is also responsible for the Culture Club which is open to all persons seeking to gain valuable experience in promoting diversity through multicultural programming. For more information, call the Office of Student Life at 409-740-4582.

## Hazing

Anyone who participates in hazing is in violation of University rules as well as state law. Violators may be subject to University disciplinary action in addition to state criminal penalties. Hazing means any intentional, knowing, or reckless act occurring on or off the campus by one person, alone or acting with others, directed against a student that endangers the mental or physical health or safety of a student for the purpose of pledging, being initiated into, affiliating with, holding office in, or maintaining membership in any organization whose members are (or include) students at the University. A complete definition of hazing is available in the Office of Student Life.

## Office of Academic Enhancement

The Office of Academic Enhancement provides support services to maximize the academic experience of all Texas A&M University at Galveston students. Services provided include academic advising, credit by exam, support for students in academic difficulty, freshman transition courses, academic excellence programs, learning disability services, tutoring, supplemental instruction, TASP testing, and developmental education. Students needing support for their courses are encouraged to visit the tutoring lab for one on one, or group support. Supplemental Instruction (SI) is also offered for selected courses and is facilitated by an SI leader who is an undergraduate that has already successfully completed the course. Each SI leader attends all lectures of the course again and conducts 2-3 one hour sessions per week outside of class where they employ a variety of techniques to increase student mastery of the material. Currently, SI support is provided for courses at the freshmen and sophomore level. Both tutoring support and the SI sessions are free of charge and available to all TAMUG students. To learn more about the services of the Office of Academic Enhancement, schedules for tutoring and SI sessions, please visit our web site at [www.tamug.edu/acen](http://www.tamug.edu/acen).

## University Police

The University Police are responsible for the protection of persons and property of Texas A&M University, for the enforcement of the laws of the State of Texas and the rules and regulations of Texas A&M University.

University Police are commissioned peace officers. They are involved in regular foot and vehicle patrol of campus, late-night security escorts, crime prevention programs, criminal investigations for the recovery of property and in the apprehension of criminals.

No firearms are allowed on University property or in vehicles driven on campus.

# CORPS OF CADETS

Students pursuing a University degree program leading to a U. S. Coast Guard license as a Merchant Marine Officer are required to join the U.S. Maritime Service Corps of Cadets. Participation in the Corps provides Cadets with leadership and management training appropriate to the needs of a Merchant Marine Officer. The Corps is organized as a military unit and is subject to special Cadet discipline and performance requirements. Cadets are required to stand watches on the training ship and have muster, training, uniforms, room inspection and similar requirements. Uniforms are worn each day during the academic year and during the summer training cruises. Cadets are required to complete Basic Safety Training, Advanced Firefighting, Radar/Automated Radar Plotting Aids, Global Marine Distress Safety System (GMDSS), Bridge Resource Management and additional professional certifications. Many of these qualifications require payment of fees in excess of those paid by non-license option students. Courses in the curriculum that lead to required professional qualifications or earn sea service require a grade of 70% (75% for GMDSS) or better for licensing. The Cadet will be required to repeat the course until the minimum grade requirement is satisfied.

International students are permitted to join the Corps of Cadets and follow a curriculum leading to a license as a Merchant Marine Officer. However, only American citizens can be licensed. The Coast Guard may administer a license examination to a foreign Cadet and report the results by letter. A foreign Cadet need not take and complete the license examination as a prerequisite to graduation. Questions about the Corps of Cadets should be directed to the Office of the Commandant at (409) 740-4588 or the Student Relations Office at (409) 740-4428.

## Admission to a License-Option (LO) Curriculum

Students who meet the admission criteria established by the U. S. Maritime Administration and the University may participate in the Corps of Cadets and a LO curriculum. Such participation is a privilege and not a right. Serious or excessive violation of Corps Rules may be considered as evidence for a lack of aptitude for the demanding responsibilities of a Merchant Marine Officer and warrant dismissal from the Corps of Cadets and a curriculum which prepares the students for a Merchant Marine Officer's license. Notification of acceptance to the University is not final approval for appointment to a LO program or acceptance into the Corps of Cadets. The application form for acceptance into the Corps of Cadets is available from the Commandant's Office. Final review of a student's credentials cannot be completed until after enrollment and prospective cadets will not be sworn into the program until this review is completed. The initial enrollment of students in a LO curriculum must be at the beginning of a fall or spring semester. Students may not enter the program after the 12th class day of the semester.

License-option students are subject to alcohol and drug screening for admission to the program and to a continuing random drug-testing program while in the license-option programs.

Among the criteria evaluated are:

1. Age. Entering students must be at least 17 years old. There are no maximum age limits for Cadets in the license-option program. Cadets accepted into the various U.S. Armed Forces and Coast Guard commissioning programs must comply with any age restrictions of the applicable program.
2. Physical Requirements. Strict physical requirements are specified for licensing as a merchant marine officer. Prior to entering a license program, prior to certification for licensing, and at any other time deemed appropriate by the University, students are required to furnish verification from a physician that they meet the specified physical requirements. Specific details of the required physical examinations are contained in the Title 46 U.S. Code of Federal Regulations part 10. Waivers cannot be granted by the University. These are summarized as follows:

Deck Cadet - Minimum vision 20/200 in each eye correctable to 20/40 in each eye. Vision beyond these parameters requires a waiver. Pass a Coast Guard approved color vision test.

Engineer Cadet - Minimum vision of 20/200 in each eye correctable to 20/50 in each eye. Vision beyond these parameters requires a waiver. Distinguish between red, blue, green, and yellow.

All Cadets - Epilepsy, insanity, badly impaired hearing, and mind-altering drugs use are disqualifying conditions.

3. **Background Investigation.** All applicants for admission to license-option curricula and enrollment in the Corps of Cadets are subject to a federal background investigation. Adverse information revealed by the investigation may result in denial of license by the U.S. Coast Guard. The University will not accept a candidate into a license-option curriculum nor allow continued participation in the program when conduct infractions preclude license qualification.
4. **Citizenship.** Only United States citizens are eligible for officers' licenses in the U.S. Merchant Marine.
5. **Drug Screening.** All license-option cadets must participate in a drug testing program. All entering cadets will be required to pay for and take a drug screen test prior to entering the Corps. Periodic random tests are required and any serious marine incident will require drug testing. These tests/screenings will be performed at an Approved DHHS Laboratory, in accordance with 46 CFR 16.340. A positive test during initial screening may result in the student not being accepted into the LO program. A positive test during a periodic or other screening may result in dismissal from the Corps of Cadets and LO programs.

### **Fiscal Requirements**

The U.S. Coast Guard presently requires payment for all documents and tests that are required for license and graduation. Firefighting School must be completed prior to the cadet's first cruise and its costs are the cadet's responsibility. Cadets are required to have or have ordered, at their cost, all required Corps uniforms during orientation.

### **Examination Requirement as a Condition for Graduation**

While not a University academic requirement, in accordance with federal regulations and the University's participation agreement with the U.S. Maritime Administration, students who enter the U.S. Merchant Marine Licensing program will be required to meet all license requirements as administered by the Coast Guard for the issuance of a license as a condition of graduation from Texas A&M University. Students who are found to be not physically qualified for Coast Guard licensing just prior to graduation may be exempt from the requirement.

### **U. S. Coast Guard (USCG) License as a Merchant Marine Officer**

To qualify at graduation for certification by the University and for eligibility to take the USCG examinations for Third Mate or Third Assistant Engineer, students must complete all academic degree requirements and successfully complete three summer training cruises. Students must also meet physical qualifications at the time of graduation; and participate in the Corps of Cadets in a satisfactory manner every semester while enrolled in a LO program which will normally require eight long semesters and three summers. Participation in the Corps of Cadets will include the requirement to successfully complete mandatory non-credit training courses such as firefighting, first aid, CPR, and radar certification. USCG evaluation, examination, and issuance fees will be charged over and above fees specified in the University Catalog.

Students pursuing a license option will not be granted leaves of absence from the Corps of Cadets for any fall or spring semesters in which they are enrolled in the University prior to completion of eight fall and/or spring semesters in the Corps of Cadets and three summer training cruises. Students who are dropped from the Corps of Cadets for academic or disciplinary reasons, but are allowed to remain in the University, will normally be disenrolled from the LO program and will not be reenrolled in a LO program except under very special circumstances and after a careful review by the professional staff of the University. Under exceptional circumstances highly-qualified students may accelerate the program, but in no case will the program be completed in less than six long semesters and three summer cruises.

### Student Incentive Payments (SIPs)

Freshmen students who enroll in a LO program during their first semester may be eligible for SIPs of \$750 per calendar quarter provided by the Maritime Administration to offset the costs of uniforms, textbooks and other requirements of Cadet life. SIPs are awarded to students based on competitive criteria that evaluate the student's potential for completing the degree program and license requirements and for a subsequent successful maritime career. If a SIP recipient is withdrawn from TAMUG, or found to be non-physically qualified, or found to not have an aptitude for naval service, the student will automatically be terminated from the SIP program and all payments will stop.

Enrollment in the SIP program requires the Cadet to accept an appointment as Midshipman, USNR and to agree to apply for and accept, if offered, a commission in the U.S. Naval Reserve, Merchant Marine Reserve (USNR/MMR). The Midshipman must meet the physical condition requirements for commissioning at the time of graduation.

### The U.S. Naval Reserve, Merchant Marine Reserve (USNR/MMR) Commission

The Department of Naval Science prepares eligible cadets for eventual commissioning in the United States Naval Reserve/Merchant Marine Reserve (USNR/MMR). Cadets under this program who pass a Navy physical examination become Navy Midshipmen. Upon completion of the Naval Science courses, graduation from TAMUG, and successful completion of the U.S. Coast Guard licensing exam, the Midshipman will be commissioned as a restricted line officer with a merchant marine designator and the rank of Ensign in the USNR/MMR. In addition, licensed graduates have the opportunity to obtain USNR/MMR commissions via the direct commissioning program. Applications may be initiated during the Cadet's final year prior to graduation. Individuals commissioned in the USNR/MMR must fulfill these obligations:

- Maintain the commission for six years.
- Sail on their applicable license at sea for four months each consecutive two-year period for eight years.
- Complete two weeks of active-duty training in the Navy every year for six years.
- Keep the Merchant Marine Reserve Program Office informed of any changes to address, phone or e-mail.
- Maintain a current/valid USCG unlimited license.
- Maintain a current Naval 5-year physical.
- Submit an annual report to the administrator of the USNR/MMR Program.

Active-duty service may be requested by the Midshipman under this program. This program provides Merchant Marine Officers who are familiar with Naval procedures to the merchant marine industry. It also provides the individual USNR/MMR officers, when on active duty, the benefits and pay normally provided U.S. Navy officers.

## The U.S. Coast Guard Commission

The U.S. Coast Guard MARGRAD program offers licensed graduates the opportunity to apply for direct reserve commissions involving extended active duty in the U.S. Coast Guard. Applications may be initiated during a cadet's final year prior to graduation in accordance with U.S. Coast Guard directives.

## The Naval Reserve Officers Training Corps (NROTC) Program

The Naval Reserve Officers Training Corps (NROTC) Program offers men and women an opportunity to qualify for a commission in the Navy while attending TAMUG. NROTC students are required to participate in the U.S. Maritime Service Corps of Cadets.

To become eligible for a commission, NROTC midshipmen must complete all requirements for a bachelor's degree as well as certain courses specified by the Navy. Scholarship students wear uniforms furnished by the Navy and participate in three 4-week summer training period onboard Navy ships and aircraft, if they are in a scholarship status.

Students may join the NROTC program as National Four Year Scholarship winners or as non-subsidized college program students. Applications for the National Four Year Scholarships can be obtained through a Navy recruiting office prior to the submission deadline of January 15 of the year for which the student is applying. College program midshipmen are eligible to compete for three and one half year, three year and two year NROTC scholarships.

All NROTC scholarships pay for full tuition, fees and uniforms. All scholarship midshipmen and junior and senior level college program midshipmen receive an allowance of \$300-400 per month, depending on class standing, and are paid during summer training periods. As of fiscal year 2002, scholarship midshipmen also receive a \$250 book stipend to offset the cost of textbook purchases.

Upon graduation, qualified NROTC midshipmen are commissioned as Ensigns in the Unrestricted Line and receive a reserve commission. Scholarship midshipmen incur a minimum four-year active duty commitment and college program midshipmen incur a minimum three year active duty commitment.

The Naval Science staff advises and counsels midshipmen on academic, personal and naval career matters. Primary emphasis is placed on educational excellence to produce the highest quality Naval officers. Students wishing to discuss the NROTC program or any other officer commissioning program should contact the Naval Science Department at (409) 740-4594 or 740-4595 or 740-4597.

# ACADEMIC CURRICULA

## Curriculum in Marine Biology (MARB)

The Department of Marine Biology offers these four degree programs: Marine Biology (MARB), Marine Biology License Option (MARB/LO), Marine Biology/Biomedical Sciences (MARB/BIMS) and Marine Fisheries (MARF). These curricula are subject to the following rules and requirements:

The student shall have earned at least a grade of C in BIOL 113, 114, 123, and 124. Students may not advance to BIOL 114 and 124 until a grade of C or better is earned in 113 and 123.

Transfer students must have a minimum GPR of 2.25 or approval of the MARB Department Head to be admitted to the Department.

Transfer students with the required courses who meet the criteria listed above may be admitted directly into the MARB, MARB/LO, MARB/BIMS and MARF degree programs.

Preference for available seats in courses in the Department will be given to students who have been admitted to the degree program. If additional spaces are available, students from other departments for whom courses in the Department are on their program of study, and who meet the course prerequisites, may be enrolled.

It is the student's responsibility to satisfactorily complete prerequisite coursework before enrolling in more advanced courses.

The Marine Biology program provides an excellent education in the biological sciences through studies undertaken in a unique coastal environment. The curriculum offers broad training in general biology, while emphasizing the local flora and fauna in estuaries and the marine environment. Students receive hands-on field sampling experience as well as internship opportunities.

Five tracks are offered within the MARB curriculum. These are a Vertebrate Zoology track, a Coastal and Wetlands track, a Comprehensive Biology track, a Fisheries Biology track and an Aquatic Animal Health track. Students will declare a track at the end of their curriculum sophomore year (i.e., when all freshman and sophomore courses have been completed) and will then be assigned to an advisor whose teaching and research activities lie within that option. Students are required to choose three electives from courses within their track and to choose two electives from among the other options. The electives must be five actual classes (485 problems courses are excluded/only one 484 internship may be substituted for a formal course).

Students may choose to complete a minor in consultation with their academic advisor. All minors will require not less than 15 hours and not more than 18 hours in the discipline; at least six hours must be upper division courses in the discipline, and no more than six hours from the minor may be used to fulfill other requirements. Each student choosing to complete a minor must contact the department offering the minor to determine if specific courses are required.

- MARB 335 Fish Physiology
- MARB 405 Mar. Parasitology
- MARB 426 Aq. Animal Nutrition
- MARB 437 Path. Marine Animals
- VTPB 409 Immunology
- MARB 454 Ornam. Fish Health

**Fisheries Biology Track:**

- MARB 311 Ichthyology §
- MARB 312 Field Ichthyology
- MARB 320 Fisheries Tech.
- MARB 360 Mar. Conserv. Biol.
- MARB 423 Mariculture
- MARB 436 Non-vertebrate Fish.
- MARB 445 Mar. Fish. Mgmt.
- MARB 460 Fish. Pop. Dynamics

**Other Track Electives:**

- MARB 345 Intro. to Sci. Diving ‡
- MARB 350 Methods in Res Div. ‡
- MARB 484 Undergraduate Internship
- OCNG 251-2 Intro Oceanography  $\square$

§ - MARB 311 is cross listed in both the Vertebrate Zoology and Fisheries Biology tracks.

† - A maximum of two mammals courses can be taken to satisfy the requirement of Vertebrate Zoology track.

‡ - Only one of the two MARB scientific diving courses (either 345 or 350) can be used as track electives.

$\square$  - Oceanography 251 cannot be used for both a geology elective and for a track elective.

## Minors in Marine Biology or Marine Fisheries

To obtain a minor in Marine Biology, students must choose a minimum of 18 hours in the minor degree plan. These hours may not be used elsewhere in the major degree plan. To obtain a minor in:

Marine Biology, you must take: MARB 311, MARB 400, MARB 408, MARB 425, MARB 435 or an approved option sequence of courses

Marine Fisheries, you must take: MARB 311, MARB 312, MARB 445, MARB 423 plus one of the following: MARB/MF Directed Elective, ECON 203, MICR 351, Botany Elective

## Curriculum in Marine Biology with a License Option

The Marine Biology License Option program allows the marine biology student to prepare for a career as an officer aboard a seagoing vessel by participating in the U.S. Maritime Service Corps of Cadets. The curriculum provides the basics of marine biology as well as courses leading toward licensing as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels, in the U.S. Merchant Marine.

The Marine Biology License Option curriculum is an abbreviated version of the Marine Biology curriculum and is oriented toward field activities consistent with service aboard research vessels. Students who wish to attend a biologically-oriented graduate program, or are interested in the medical professions, are advised to take additional coursework in developmental biology, genetics, biochemistry, and physiology.

Cadets who enroll in and apply to graduate under one of the license option curricula must complete the appropriate license examination for Third Mate or Third Assistant Engineer in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

### Freshman Year

#### Fall Semester

	(Th-Pr)	Cr

**Total Curriculum Hours<sup>⌘</sup> 160**

Note: All electives must be chosen in consultation with, and approved by, the student's academic advisor. See Core Curriculum for a listing of course options for humanities and social sciences electives. The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

† - Indicates required courses in the Marine Biology License Option major. These courses will be used to compute the major GPR.

\* - Indicates license courses leading to a USCG license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Cadets will be required to repeat the course until they earn a grade of C (70%) or better. NAUT 307 requires a grade of 75% or better.

\*\* - Must be taken S/U.

⌘ - The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

## Curriculum in Marine Biology/Biomedical Science

The Marine Biology/Biomedical Science double major provides an applied understanding of aquatic animal health and disease through hands-on exposure to marine organisms and their habitats. Students spend their first two years in Galveston obtaining a prerequisite background in the biological and chemical sciences and then transfer to TAMU-College Station to study applied biology that is directed toward understanding health and disease. This program culminates in a rigorous study of marine biology at TAMUG. The studies at TAMUG emphasize dynamic interactions between disease agents and aquatic organisms, especially bivalve, fisheries and marine mammal stocks. This partnership prepares the graduate for careers in aquatic animal health, seafood technology and various marine-biology related disciplines, as well as advanced studies in veterinary medicine, biological oceanography or related biological disciplines.

In order to receive the maximum benefit from this double major, the participating student is required to have 24 credits of TAMU-College Station courses. Students desiring to pursue a double major in Biomedical Science and Marine Biology must be approved prior to matriculation by both programs. Students must maintain a cumulative 2.5 GPR to remain in good standing in the MARB/BIMS program. Students must complete at least 2 of the courses listed specifically as VTPH 405, VTPB 423 and MICR 351 or VTPB 405. Interested students should visit with academic advisors in both programs to discuss these and other departmental requirements. Please seek additional advising if you are planning to pursue admission to medical school or veterinary medicine school.

<b>TOTAL HOURS</b> ⊠			<b>139</b>

\* Must be taken S/U. Introductory or advanced scuba diving is recommended if feasible.

\*\* BUAD Electives: ACCT209, ACCT229, BANA207, or MGMT211 or approved course.

† MARB Directed Electives should be chosen in consultation with your academic advisor but generally include courses such as Ichthyology, Physiological Ecology, Fish Physiology, Biology of Marine Mammals, Physiological Ecology of Marine Mammals, Mammology, Animal Behavior or Evolution Biology.

⊠-The total hours must be at least 139 hours. Depending on course choices, additional hours of MARB/BIMS electives will be required. The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

Note: The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

## Curriculum in Marine Engineering Technology (MARE)

The Marine Engineering Technology program is designed to prepare the student for a career as an engineering technologist in the maritime profession. The program is available in a License Option version for students who want to serve as an engineering officer aboard seagoing vessels and in a Non-License Option for students who want an education in maritime-related applied engineering but do not plan to serve at sea. The Marine Engineering Technology curriculum is a thermal power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and basic engineering courses is the foundation for further study in ship propulsion plants and electrical power generation and distribution equipment. Marine Engineering Technology focuses on power cycles, principles, and methods used to convert the energy in fossil fuels into useful power, and the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in naval architecture and maritime application of electrical engineering fundamentals. The students' education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University's training ship.

The License Option Program builds on a sound education with professional training obtained by participating in the U.S. Maritime Service Corps of Cadets. Participation in the USMS Corps of Cadets program builds on the Marine Engineering Technology curriculum with three summer cruises on the University's training ship and academic year training in first aid, marine firefighting, and shipboard maintenance.

Cadets who enroll in and apply to graduate under one of the license option curricula must complete the appropriate license examination for Third Mate or Third Assistant Engineer in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

## Curriculum in Marine Fisheries (MARF)

The curriculum in Marine Fisheries provides educational opportunities in the biological sciences, with emphasis on principles of marine fisheries management. Ecology, taxonomy, zoogeography, culture, and general biology of commercial species are emphasized. Course offerings are structured to provide not only a strong basis of formal academic instruction but also considerable hands-on field and collection experience by taking advantage of the coastal location of the University. A strong preparation in the sciences is recommended.

Marine Fisheries graduates are prepared to work as fishery managers or research biologists for state and federal agencies, ecological consulting firms, industry, and educational institutions. Qualified degree recipients may undertake postgraduate studies in resource management, mariculture, systematics, seafood technology, and fisheries economics.

\* - Must be taken S/U.

† Indicates required courses in the Marine Fisheries major. These courses will be used to compute the major GPR.

‡ - Directed Elective must be selected from 300-400 level MARB courses or 200-300-400 level MATH or CPSC courses. Recommended elective courses include: Fish Physiology (MARB 335), Marine Parasitology (MARB 405), Aquatic Animal Nutrition (MARB 426), In-trod. to Computing (CPSC 203), Biochem. (MARS 360).

$\square$ -The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

Note: The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

## Curriculum in Marine Sciences (MARS)

The Marine Sciences curriculum concentrates on the physical and chemical aspects of science of the marine, estuarine, and coastal environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to a solid base of academic instruction in chemistry, geology, physics, biology, and mathematics. Advanced work centers around four semesters of oceanography. Electives in the junior and senior year allow the student to obtain a broader background in ocean studies or to specialize, usually in the areas of environmental science, geology, or chemistry. The Marine Sciences graduate has a strong, well-rounded foundation in the quantitative physical sciences with considerable field and laboratory experience. With suitably chosen electives, graduates are qualified to enter M.S. or Ph.D. programs in Oceanography or related disciplines, or to move directly into jobs in environmental monitoring, oceanographic instrumentation, pollution control, the offshore oil industry and other fields.

Students may choose to pursue a minor in geology or chemistry through TAMU. To obtain a minor in geology you must choose a minimum of 16 hours of geology electives from the following: GEOL 104 (required), MARS 305, 306, 330, 340, 370, or 435. To obtain a minor in chemistry you must take CHEM 101, 102, 227, 228, 237, 238, 383, 316 and 318.

Note: All electives must be chosen in consultation with, and approved by, the student's academic advisor. See Core Curriculum of course options for humanities and social sciences electives. The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

\* - Must be taken S/U.

†-Indicates required courses in the Marine Sciences major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

‡-The American history requirement may also be fulfilled by utilizing other American history courses offered at TAMUG, including HIST 370, 442 or 444. Students should consult their academic advisor.

§-Professional Electives must be chosen from 300 or 400 level Science or Mathematics courses, except GEOL 301.

$\Sigma$ -The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

## Curriculum in Marine Sciences with a License Option

This program retains the basic physical science core of the Marine Sciences curriculum, and leads toward a license as a deck officer in the United States Merchant Marine. The student who successfully completes the license program will be qualified to sit for the U.S. Coast Guard examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels. Students combine a broad base of courses in physical science and mathematics and practical instruction in seamanship and navigation with upper-level oceanography courses chosen by the student.

The objective of the program is to provide students with a sound intellectual and educational background to function in a scientifically and technologically advanced society, while also providing the practical hands-on training needed for employment in the maritime industry. Graduates are particularly well qualified to serve on research vessels where an understanding of the scientific purpose of the voyage is required. Students who wish to enter a physical science graduate program will need to take additional course work in science and mathematics.

Cadets who enroll in and apply to graduate under one of the license option curricula must complete the appropriate license examination for Third Mate or Third Assistant Engineer in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

## Curriculum in Marine Transportation (MART)

This program combines studies in the humanities and sciences with instruction and training in maritime disciplines to provide the U. S. Maritime Service Cadet with a broad-based education. The student who successfully completes the license program will be qualified to sit for the U. S. Coast Guard license examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) credentials. Cadets are also provided with solid fundamentals in business topics related to the maritime industry, ashore and afloat. Cadets who enroll in and apply to graduate in Marine Transportation must successfully complete the license examination for Third Mate in order to graduate from Texas A&M University. Courses earning USCG or STCW qualifications, sea time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

⊠ - The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

## Curriculum in Maritime Administration (MARA)

This curriculum is designed to prepare the graduate for administrative work in marine and maritime industries and/or governmental organizations involved in coastal, marine and maritime activities. The curriculum provides a strong foundation in management, finance, business analysis, accounting, and economics. This business and administrative curriculum integrates courses that specialize in marine and maritime activities such as port operations, brokerage and chartering, maritime law, and inland waterways.

See Core Curriculum for a listing of course options for humanities and social sciences electives. The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

\* - Must be taken S/U.

† - Indicates required courses in the Maritime Administration major. These courses will be used to compute the major GPR.

‡ - The American history requirement may also be fulfilled by utilizing other American history courses offered at TAMUG, including HIST 370, 442 or 444. Students should consult their academic advisor.

§ - Four credit hours in introductory biology, chemistry, physics, oceanography or geology, one credit hour which must be a laboratory.

▣ - The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

## Curriculum in Maritime Studies (MAST)

Maritime Studies, the only Bachelor of Arts program offered at TAMUG, looks at the ocean through a series of liberal arts courses. The program provides a broad-based interdisciplinary education that focuses on various ways of understanding the sea.

The interdisciplinary curriculum allows students to study maritime subjects through courses such as philosophy, political science and anthropology. Students also take an educational voyage on board the TEXAS CLIPPER II.

The program allows students whose interests and aptitudes lie outside science, business or technology to be trained for a wide variety of careers pertaining to the maritime setting. The Maritime Studies curriculum positions graduates for employment opportunities that include jobs in coastal planning, sea-related recreation and tourism and economic and environmental development. The program stems from the fact that the maritime culture makes up a major part of the economic base of Texas and the nation.

**Total Hours ☐ 129**

Note: All electives must be chosen in consultation with, and approved by, the student's academic advisor. Students should be careful when choosing electives that they have fulfilled the residency requirement which mandates 36 hours of MAST 300 and 400 level courses be taken at TAMU. See Core Curriculum for a listing of course options for humanities and social sciences electives. The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

§ Science electives are to be selected from the approved Core Curriculum list for science.

\* - Must be taken S/U.

† - Indicates required courses in the Maritime Studies major. These courses will be used to compute the major GPR.

☐ Any English course in literature may be used to satisfy the literature elective.

‡ Any history course may be used to satisfy the history elective.

☐ The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

## Curriculum in Maritime Systems Engineering (MASE)

The Maritime Systems Engineering program is a design-oriented structural/ocean engineering program with emphasis on steel and concrete structures, offshore and coastal structures, coastal engineering, and hydrodynamics. It offers educational opportunities for students whose interests and talents attract them to engineering in the marine realm.

The program prepares students to apply science and mathematics to analyse, model and design offshore and coastal systems. Offshore engineering addresses the design of marine structures; the calculation of wind and wave forces on marine structures; hydrodynamics; design criteria for marine structures; and ocean engineering technology. Coastal Engineering addresses the applied engineering technologies associated with the design, construction, operation, and maintenance of coastal structures and facilities including breakwaters, piers, wharves, channels, and pipelines. Coastal processes and water wave mechanics involving strong integration of structural, geotechnical, and construction are emphasized. The program also strives to instill an awareness of the societal context in which today's ocean and coastal engineers must function.

The program is accredited by the Accreditation Board for Engineering and Technology (ABET).

† - Indicates required courses in the Maritime Systems Engineering major. These courses will be used to compute the major GPR.

‡ - The American history requirement may be fulfilled by utilizing other American history courses offered at TAMUG, including HIST 370, 442, or 444. Students should consult with their academic advisor.

⊞ - The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

§ - To be selected from CVEN 344, MASE 319, MASE 459, MASE 485 and MASE 489.

SS - To be selected from MASE 411, MASE 421, MASE 483, MASE 485 and MASE 489.

SSS - Directed Electives should be chosen in consultation with your academic advisor but generally include subjects pertaining to strength of materials, such as Mechanics of Deformable Bodies (MASE 214).

\* - Must be taken S/U.

Note 1: All electives must be chosen in consultation with, and approved by, the student's academic advisor. See Core Curriculum for a listing of course options for humanities and social sciences electives. The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

Note 2: A grade of C or better will be required for the Common Body of Knowledge (CKB) Courses (MATH 151, and 152; PHYS 208 and 218; CHEM 107; ENGL 104; ENGR 111 and 112).

Note 3: MASE students are required to earn a grade of C or better in all basic sciences, mathematics and engineering courses taken to satisfy degree requirements.

Note 4: MASE students must complete all mathematics courses (MATH 151, 152, 251 and 308) before taking MASE 310, MASE 405 and OCEN 462.

Note 5: MASE 407 cannot be taken prior to the last semester before graduation.

## Curriculum in Ocean and Coastal Resources (OCRE)

Ocean and Coastal Resources (OCRE) will educate students with regard to the economic, environmental and social issues related to the development of marine resources, while providing them with the scientific background needed to understand these issues. These resources include fisheries, oil and gas, ocean mining and others. The OCRE degree differs considerably in content from the Marine Sciences (MARS) curriculum through increased focus on geological and biological sciences, along with economics, political science and law. While the present MARS program is designed to produce well-rounded physical scientists capable of attending graduate programs in oceanography, the OCRE curriculum is oriented more to societal and environmental impacts of ocean science.

Many of the resource development issues in today's world center around environmental pollution, sustainable development, biological diversity, fisheries and mariculture and oil and gas development. Every aspect of marine resources development is undergoing rapid growth. From fisheries management to ocean mining and offshore oil and gas development, the demand for trained entry-level personnel from both government and industry is extremely high. There is also a strong demand for individuals who understand and can use scientific information in the planning and management process, but who are not themselves bench or field scientists. The OCRE degree is designed to address this need.

\*\* Select from University Core Curriculum

† Field Experience may also be met with MARB 300 plus one credit hour of a field oriented lab course.

‡ Recommended professional electives are: CHEM 316 Quantitative Analysis (see note below), CHEM 318 Quantitative Analysis Laboratory (see Note below), CHEM 383 Chemistry of Environmental Pollution, MARA 470 Environmental Law, MARA 489 Marine Environmental Affairs Research, MARB 345 Introduction to Scientific Diving, MARB 432 GIS Use in Coastal Resources, MARB 423 Mariculture, MARB 320 Fisheries Techniques, MARS 305 Paleontology, MARS 330 Petroleum Geology, MARS 370 Coastal Processes, MARS 410 Introduction to Physical Oceanography, MARS 415 Remote Sensing Technology, MARS 435 Exploration Geophysics, MARS 440 Introduction to Chemical Oceanography, MARS 485 Problems in Marine Sciences.

Note: For this elective credit both CHEM 316 and CHEM 318 are required.

⊞-The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or international and diverse cultures courses.

Note: The 6-hour Core Curriculum requirement for international and cultural diversity may be met with courses used to satisfy other degree requirements. Please consult with your academic advisor.

# COURSE DESCRIPTIONS

All courses offered at the University are described on the following pages and are listed by disciplines, arranged alphabetically.

The course numbering scheme is as follows: 100 to 199, courses primarily open to freshmen; 200 to 299, courses primarily open to sophomores; 300 to 399, courses primarily open to juniors; 400 to 499, courses primarily open to seniors; and 600 to 699, courses limited to graduate students or undergraduate students with special approval.

Figures in parentheses following the number of the courses indicate the clock hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in the laboratory, shop, drawing room, or field. The unit of credit is the semester hour, which involves one hour of theory, or from two to four hours of practice per week for one semester of 15 weeks.

When courses are cross-listed (e.g., offered as MARA 212 at TAMUG and MGMT 212 at TAMU), credit cannot be received for both courses.

Any course may be withdrawn from the semester or summer schedule if the number of registrants is too small to justify its being offered.

## Accounting (ACCT)

229. INTRODUCTORY ACCOUNTING. (3-0). Credit 3. Analysis, recording and reporting of business transactions; partnership and corporation accounting; analysis and use of financial statements. Prerequisite: sophomore standing.

230. INTRODUCTORY ACCOUNTING. (3-0). Credit 3. Continuation of ACCT 229. Use of budgets; introduction to cost accounting; cost control techniques and methods of measuring performance. Prerequisite: ACCT 229 and sophomore standing.

315. INTERMEDIATE ACCOUNTING FOR NON-ACCOUNTING MAJORS I. (3-0). Credit 3. Revenue recognition principles of asset valuation, and disclosure requirements for corporations; interpretation of financial statements, rather than their preparation. Prerequisites: ACCT 230 and junior classification.

## Agricultural Economics (AGEC)

350. ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS. (3-0). Credit 3. Inspection of issues such as environmental degradation, population growth, recycling, water use and depletion, natural habitat protection, water and air pollution, acid deposition, fishery management, and global warming using economically derived principles and tools. Prerequisite: Junior classification or approval of instructor.

## Anthropology (ANTH)

202. INTRODUCTION TO ARCHAEOLOGY. (3-0). Credit 3. An introduction to the study of the human past through the retrieval, analysis, and interpretation of material remains.

210. SOCIAL AND CULTURAL ANTHROPOLOGY. (3-0). Credit 3. Evolution of cultures; differences, similarities and effects of material and non-material culture on economic, social and political organization.

216. NAUTICAL ARCHAEOLOGY. (3-0). Credit 3. Underwater shipwrecks, sunken harbors, and other submerged evidence of human activities; relationship to cultural geography in general; problems of diving technology, surveying and preservation; relevance to modern problems.

318. NAUTICAL ARCHAEOLOGY OF THE AMERICAS. (3-0). Credit 3. Seafaring in the Americas from the 16th to the 20th centuries based on shipwreck archaeology; ship construction, exploration, commerce, naval

warfare and related activity; influence of seafaring on the cultures, economics and history of the Western Hemisphere.

351. CLASSICAL ARCHAEOLOGY. (3-0). Credit 3. Origins and spread of Western civilization through the material remains of Minoan, Mycenaean, Etruscan, and early Greek and Roman cultures.

### **Biology (BIOL)**

113. INTRODUCTORY BIOLOGY. (3-0). Credit 3. Survey of structures and functions common to living forms in general. Principles of cell biology; regulation of growth and development, reproduction, evolution, and ecology. Concurrent registration in BIOL 123 is suggested.

114. BIOLOGY. (3-0). Credit 3. Survey of major groups of living forms; their special structures and functions which enable them to exist. Survey includes prokaryotes, fungi, lower and higher plants, animals, and humans. Concurrent registration in BIOL 124 is suggested. Prerequisite: BIOL 113.

123. INTRODUCTORY BIOLOGY LABORATORY. (0-3). Credit 1. Laboratory supporting BIOL 113. Prerequisite: BIOL 113 or concurrent registration.

124. INTRODUCTORY BIOLOGY LABORATORY. (0-3). Credit 1. Laboratory supporting BIOL 114. Prerequisite: BIOL 113, 123.

### **Botany (BOTN)**

101. BOTANY. (3-3). Credit 4. Structure, physiology and development of plants; emphasis on seed plants. May not be used for credit in MARB, MARE, MARB/LO, MARS or MARS/LO degree programs. (Not open to students who have taken BIOL 113 and 114.)

### **Center for Academic Enhancement (CAEN)**

101. SUCCEEDING IN COLLEGE. (2-0). Credit 2. A seminar course designed to introduce students to the resources, skills, and strategies needed to succeed in college.

### **Chemistry (CHEM)**

101. FUNDAMENTALS OF CHEMISTRY I. (3-3). Credit 4. Introduction to modern theories of atomic structure and chemical bonding; chemical reactions; stoichiometry; states of matter; solutions; equilibrium; acids and bases; coordination chemistry; laboratory: introduction to methods and techniques of chemical experimentation; qualitative and semiquantitative procedures applied to investigative situations.

102. FUNDAMENTALS OF CHEMISTRY II. (3-3). Credit 4. Theory and applications of oxidation-reduction systems; thermodynamics and kinetics; complex equilibria and solubility product; nuclear chemistry; descriptive inorganic and organic chemistry; laboratory: introduction to analytical and synthetic methods and to quantitative techniques to both inorganic and organic compounds. Prerequisites: CHEM 101 or its equivalent.

107. GENERAL CHEMISTRY FOR ENGINEERING STUDENTS. (3-3). Credit 4. Introduction to important concepts and principles of chemistry; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 107 and changing majors to curricula requiring CHEM 101 and CHEM 102 may substitute CHEM 107 for CHEM 101. Students may not receive credit for both CHEM 107 and CHEM 101.

227. ORGANIC CHEMISTRY I. (3-0). Credit 3. Introduction to chemistry of compounds of carbon. General principles and their application to industrial and biological processes. Prerequisite: CHEM 102 or 104. Concurrent registration in CHEM 237 is suggested.

228. ORGANIC CHEMISTRY II. (3-0). Credit 3. Continuation of CHEM 227. Prerequisite: CHEM 227. Concurrent registration in CHEM 238 is suggested.

237. ORGANIC CHEMISTRY LABORATORY. (0-3). Credit 1. Operations and techniques of elementary organic chemistry laboratory. Preparation, reactions and properties of representative organic compounds. Prerequisites: CHEM 112 or 114; CHEM 227 or concurrent registration.

238. ORGANIC CHEMISTRY LABORATORY. (0-3). Credit 1. Continuation of CHEM 237. Prerequisites: CHEM 237; CHEM 228 or registration therein.

285. DIRECTED STUDIES. Credit 1-4. Introduction to research, library, and laboratory work. Prerequisite: Approval of MARS department head.

316. QUANTITATIVE ANALYSIS. (2-0). Credit 2. Introduction to methods of chemical analysis. Chemical equilibrium. Prerequisite: CHEM 102 or 104.

318. QUANTITATIVE ANALYSIS LABORATORY. (0-3). Credit 1. Laboratory work consists of selected experiments in quantitative analysis designed to typify operations of general application; work is primarily volumetric with limited gravimetric experiments. Prerequisites: CHEM 102 or 114; CHEM 315 or 316 or concurrent registration.

383. CHEMISTRY OF ENVIRONMENTAL POLLUTION. (3-0). Credit 3. Chemical pollutants in the air, in water, and on land. Their generation, chemical reactivity, action on environment and disappearance through chemical mechanisms. Chemistry of existing pollution abatement. Prerequisite: CHEM 228 or equivalent.

485. DIRECTED STUDIES. Credit 1-4. Introduction to research, library, and laboratory work. Prerequisites: Senior classification; approval of MARS department head.

### Civil Engineering (CVEN)

311. FLUID DYNAMICS. (3-0). Credit 3. Fluid properties; statics; kinematics; basic conservation principles of continuity, energy and momentum; similitude and hydraulic models; incompressible flow in pipes; fluid dynamic drag. Prerequisite: MASE 206 or equivalent.

336. FLUID DYNAMICS LABORATORY. (0-2) Credit 1. Introduction to laboratory techniques; calibration principles, reports and fluid measurements; determination of fluid properties; visualization of types of flow; experiments in closed conduit flow of air, water and oil; fluid drag and turbomachinery tests; open channel and gravity wave demonstrations.

344. REINFORCED CONCRETE STRUCTURES. (2-3). Credit 3. Analysis and design of reinforced concrete beams, columns, slabs, and footings using ultimate strength methods. Prerequisite: CVEN 345.

345. THEORY OF STRUCTURES. (3-0). Credit 3. Structural engineering-functions of structure, design loads, reactions and force systems. Analysis of statically determinate structures; including beams, trusses, and arches. Methods of determining deflections of structures. Influence lines and criteria for moving loads. Analysis of indeterminate structures; including continuous beams and frames. Prerequisite: MASE 209 or equivalent.

346. STRUCTURAL STEEL DESIGN. (2-3). Credit 3. Materials, types of members and typical arrangements. Design of tension members, compression members, beams, and beam columns. Design of bolted connections and welded connections. Theory and practice as indicated in typical current specifications. Prerequisite: CVEN 345.

365. INTRODUCTION TO GEOTECHNICAL ENGINEERING. (2-2). Credit 3. Physical properties of soils, classification systems, soil exploration, permeability, consolidation, compaction, and shear strength. Laboratory tests conducted to determine the physical and engineering soil properties needed for application in geotechnical engineering design. Prerequisite: ENGR 211.

483. ANALYSIS AND DESIGN OF STRUCTURES. (2-3). Credit 3. Overall procedure of analysis and design; including functions, loads, layouts of force systems; analysis, design drafting, specifications, cost comparisons, and maintenance as applied to typical simple bridge and building structures. Prerequisites: CVEN 344, 346, 365.

## Computer Science (CPSC)

203. INTRODUCTION TO COMPUTING. (3-0). Credit 3. Algorithms, programs, and computers. Basic programming and program structure. Data representation. Computer solution of numerical and non-numerical problems using a high-level programming language, FORTRAN.

285. DIRECTED STUDIES. Credit 1-6. Permits work on special projects in computing science. Project must be approved by MARS department head.

485. DIRECTED STUDIES. Credit 1-6. Permits work on special projects in computing science. Project must be approved by MARS department head. Prerequisite: Senior classification.

## Developmental Studies (CAEX)

001. BASIC MATHEMATICAL SKILLS. Credit 0. Developmental instruction in mathematics; includes the integers and rational numbers and applications, exponents, polynomials, solution of equations, graphing, elementary geometry, and reasoning skills. May not be used for credit toward a degree.

002. BASIC WRITING SKILLS. Credit 0. Individualized instruction in English composition based on an analysis of the student's proofreading, revision, and editing skills; a programmed sequence of study and practice designed for improvement of writing performance through mastery of basic skills at word, sentence, paragraph, and multiparagraph levels. May not be used for credit toward a degree.

003. BASIC READING SKILLS. Credit 0. Individualized instruction in reading based on an analysis of the student's reading comprehension skills; study and practice of reading strategies designed to increase reading comprehension skills. May not be used for credit toward a degree.

## Economics (ECON)

202. PRINCIPLES OF ECONOMICS. (3-0). Credit 3. Elementary principles of economics; the economic problem and the price system; theory of demand, theory of production and the firm, theory of supply; the interaction of demand and supply.

203. PRINCIPLES OF ECONOMICS. (3-0). Credit 3. Measurement and determination of national income, employment, and price; introduction to monetary and fiscal policy analysis; the effects of government deficits and debt, exchange rates and trade balances. Prerequisite: ECON 202 or approval of advisor.

285. DIRECTED STUDIES. Credit 1-3. Research and design of specific problem areas approved on an individual basis with the intention of promoting independent study and to supplement existing course offerings. Results of study presented in writing. Prerequisite: Major or minor in MARA or Economics (TAMU); approval of MARA department head.

311. MONEY AND BANKING. (3-0). Credit 3. Fundamental principles of money, credit, and banking; arbitrage conditions in domestic and international capital markets; theoretical and institutional analysis of money markets. Prerequisite: ECON 203.

322. APPLIED MICROECONOMIC THEORY. (3-0). Credit 3. Use of microeconomic theory in the analysis of problems that would face decision makers, not only in business but also in government, non-profit firms and other institutions. Prerequisite: ECON 202.

412. PUBLIC FINANCE. (3-0). Credit 3. Economic role of governments; the choice of public sector output in a democracy and the effects of various taxes on resource allocation and income distribution. Prerequisites: ECON 322.

452. INTERNATIONAL TRADE THEORY AND POLICY. (3-0). Credit 3. Basis for trade; theory of comparative advantage; determination of product and factor prices; gains from international trade; commercial policy and its implications for income distribution; concept of effective protection; market distortions, policy generated distortions and the arguments for tariffs. Prerequisite: ECON 322.

485. DIRECTED STUDIES. Credit 1-3. Research and design of specific problem areas approved on an individual basis with the intention of promoting independent study and to supplement existing course offerings. Results of study presented in writing. Prerequisite: Major or minor in MARA or Economics (TAMU); approval of MARA department head.

### **Educational Technology (EDTC)**

305. THEORY AND PRACTICE. (1-2) Credit 2. Theoretical and practical study of communication with emphasis on technology; laboratory experiences in the selection, preparation, use and evaluation of instructional materials. For undergraduate students with a minimum of prior educational training.

### **Engineering Design Graphics (ENDG)**

105. ENGINEERING GRAPHICS. (0-6). Credit 2. Graphical approach to the engineering design process as applied to products; methods of graphical communications, three-dimensional geometry, working drawings, data analysis, computer graphics, introduction to team dynamics, and creative problem solving. (ENGR 1204).

106. ENGINEERING DESIGN GRAPHICS. (0-6). Credit 2. Introduction to engineering design; product development and team dynamics using graphical methods and descriptive geometry. Spatial analysis of geometric elements, vectors, data analysis, and graphical applications to a variety of engineering areas. Prerequisite: ENDG 105.

### **Engineering (ENGR)**

109. ENGINEERING PROBLEM SOLVING AND COMPUTING. (2-3). Credit 3. Professional ethics, registration, and disciplines in engineering; engineering problem-solving environments (economic, political, technical, social), requirements, and methodologies; FORTRAN programming on PCs, minis and mainframes. Prerequisites: Admission to engineering curriculum and background in trigonometry.

111. FOUNDATIONS OF ENGINEERING I. (1-3). Credit 2. Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving, logic processing, design and drawing; emphasis on computer applications and CAD tools. Co-requisite: MATH 151.

112. FOUNDATIONS OF ENGINEERING II. (1-3). Credit 2. Development of skills in problem solving, design, analysis. Estimation and teamwork; utilization of computer tools for documentation and presentation; introduction to logic processing and computer programming; introduction to accounting and conservation principles in engineering sciences. Prerequisite: ENGR 111.

211. CONSERVATION PRINCIPLES IN ENGINEERING MECHANICS. (2-2) Credit 3. Conservation principles in engineering and their application to the modeling of mechanical systems and structures; equations of motion for particles and rigid bodies; fundamentals of engineering mechanics. Prerequisites: ENGR 112, MATH 251 or 253 or concurrent registration, PHYS 218.

212. CONSERVATION PRINCIPLES IN THERMALSCIENCES. (2-2) Credit 3. Theory and application of energy methods in engineering; conservation principles to investigate "traditional" thermodynamics and internal flow fluids. Prerequisites: Upper division status in major; MATH 251 or MATH 253 or registration therein; ENGR 211 or concurrent registration.

221. STATICS AND PARTICLE DYNAMICS. (2-2). Credit 3. Application of the fundamental principles of Newtonian mechanics to the statics and dynamics of particles and the equilibrium of trusses, frames, beams and other rigid bodies. Prerequisites: Upper-level classification in civil engineering or mechanical engineering; MATH 251 or 253 or concurrent registration; PHYS 218.

## English (ENGL)

104. COMPOSITION AND RHETORIC. (3-0). Credit 3. Focus on referential and persuasive researched essays through the development of analytical reading ability, critical thinking and library research skills.

203. INTRODUCTION TO LITERATURE. (3-0). Credit 3. Exploration of literature by genre and/or theme; literary analysis and interpretation; intensive writing about literature. Prerequisite: ENGL 104.

212. SHAKESPEARE. (3-0). Credit 3. Exploration of selected works of Shakespeare. Prerequisite: ENGL 104.

222. WORLD LITERATURE. (3-0). Credit 3. Representative works in translation of major authors from A.D. 1500 to present from various cultures, including such authors as Cervantes, Molière, Goethe, Tolstoy, Mahfouz, Munif, Achebe, Tolstaya, Vargas Llosa, and Duras. Prerequisite: ENGL 104.

228. AMERICAN LITERATURE: CIVIL WAR TO PRESENT. (3-0). Credit 3. Expressions of the American experience in realism, regionalism and naturalism; varieties of modernist and contemporary writing; the rise of ethnic literature and experimental literary forms; includes such writers as Dickinson, Twain, James, Crane, Frost, Eliot, Fitzgerald, Hemingway, Faulkner, O'Neill, Baldwin, and Rich. Prerequisite: ENGL 104.

251. THE LANGUAGE OF FILM. (2-2). Credit 3. Development of the language of film: major movements, representative works, theory and techniques; lecture/discussion following film screenings. Prerequisite: ENGL 104.

285. DIRECTED STUDIES. Credit 1-3. Readings selected for specific need of major or minor in English.

301. TECHNICAL WRITING. (3-0). Credit 3. Advanced writing in technical, scientific, and business fields; reports, proposals, and other papers; correspondence. Prerequisite: ENGL 104; junior classification in the major department, or approval of instructor.

330. ARTHURIAN LITERATURE. (3-0) Credit 3. Legend of King Arthur in English and American literature from its Medieval origins to the present. Prerequisite: ENGL 104.

334. SCIENCE FICTION PAST AND PRESENT. (3-0). Credit 3. Origins and development of the science fiction genre, including such authors as Wells, Lewis, Clarke, Miller, and Le Guin. Prerequisite: ENGL 104.

335. LITERATURE OF THE SEA. (3-0). Credit 3. Significance of the sea in fictional and factual accounts, such as novels, short stories, poems, and narratives of sailors and seafaring life. Prerequisite: 3 credits of literature at 200 level or above.

374. WOMEN WRITERS. (3-0). Credit 3. History of literature by women in English primarily from the 16th century to the present; emphasis on continuity of ideas and on literary contributions; study of poetry, essays, novels, short stories, with particular attention to characteristic themes and to racial, social, cultural diversity of women writing in English. Prerequisite: ENGL 104.

485. DIRECTED STUDIES. Credit 1-3. Readings selected for specific need of major or minor in English.

## Finance (FINC)

341. BUSINESS FINANCE. (3-0). Credit 3. Financial practices and financial management of modern business corporations; cash flow, planning, procurement of funds, management of long-term funds and working capital. Prerequisites: ACCT 229 and junior classification.

## Geography (GEOG)

201. INTRODUCTION TO HUMAN GEOGRAPHY. (3-0). Credit 3. A survey of the major systems of man-land relations of the world and their dissimilar developments. The processes of innovation, diffusion, and adaptation stressed with regard to changing relationships between people and their environment.

210. MARINE GEOGRAPHY. (3-0). Credit 3. Introduction to the physical and cultural patterns of the coastal zones of the world. Interrelationships between the physical forms and processes and the cultural patterns are used to analyze human use and abuse of the sea.

301. GEOGRAPHY OF THE UNITED STATES. (3-0). Credit 3. Geographic personality (physical and cultural) of the United States. Note: To be used as a humanities elective for any degree program.

### Geology (GEOL)

104. PHYSICAL GEOLOGY. (3-3). Credit 4. Earth materials, structures, external and internal characteristics; physical processes at work upon or within the planet. A working knowledge of high school chemistry and mathematics is required.

285. DIRECTED STUDIES. Credit (1-4) each semester. Individually supervised research or advanced study on restricted area not covered in regular courses.

301. MINERAL RESOURCES. (2-3) Credit 3. Origin, geologic relations, geographic distribution, reserves and uses of exhaustible mineral and energy resources. Not available to geology majors.

485. DIRECTED STUDIES. Credit (1-4) each semester. Individually supervised research or advanced study on restricted area not covered in regular courses.

### History (HIST)

105. HISTORY OF THE UNITED STATES. (3-0). Credit 3. Colonial Heritage; revolution; adoption of Constitution; growth of nationalism and sectionalism; Civil War; reconstruction.

106. HISTORY OF THE UNITED STATES. (3-0). Credit 3. Since reconstruction; new social and industrial problems; rise of progressivism; U.S. emergence as a world power; World War I; reaction and New Deal; World War II; contemporary America.

226. HISTORY OF TEXAS. (3-0). Credit 3. History of Texas from Spanish period to present day. Stress placed upon period of Anglo-American settlement, revolution, republic, and development of modern state.

232. HISTORY OF AMERICAN SEA POWER. (3-0). Credit 3. Development of American sea power from the 18th century to the present.

285. DIRECTED STUDIES. Credit 1-3. Selected fields of history not covered in depth by other courses. Reports and extensive reading required. Prerequisite: Approval of department head.

370. CIVIL WAR AND RECONSTRUCTION. (3-0). Credit 3. Survey of background and causes of the war; military political, economic, and diplomatic aspects of the war; life behind the lines; reconstruction and post-war adjustments, 1861-1877.

373. THE GREAT DEPRESSION AND WORLD WAR II. (3-0). Credit 3. The United States, 1929-1945; cultural, social, economic, and political developments in the nation; global diplomacy and military strategy.

374. THE UNITED STATES AFTER WORLD WAR II. (3-0). Credit 3. The United States since World War II; political, economic, cultural, and social changes and role as a world leader.

485. DIRECTED STUDIES. Credit 1-3. Selected fields of history not covered in depth by other courses. Reports and extensive reading required. Prerequisite: Approval of department head.

### Information and Operations Management (INFO)

303. STATISTICAL METHODS. (3-0). Credit 3. Collection, tabulation, and presentation of numerical data; sampling, estimation of averages and variation, probability and error, hypothesis testing, and correlation. Prerequisites: MATH 166 and junior classification.

336. DECISION SUPPORT SYSTEMS. (3-0). Credit 3. Application of quantitative decision-making techniques to management decision problems. Planning, analysis, and control of operating systems in organizational settings. Prerequisites: INFO 364 or concurrent registration.

364. OPERATIONS MANAGEMENT. (3-0). Credit 3. Concepts, issues and techniques used to plan, analyze, and control systems of production; operational problems in producing goods and services. Prerequisite: INFO 303 or concurrent registration.

485. DIRECTED STUDIES. Credit 1-4 each semester. Directed study of selected problems in an area of business analysis not covered in other courses. Prerequisite: Approval of MARA department head.

### Interdisciplinary Studies (INST)

210. UNDERSTANDING SPECIAL POPULATIONS. (3-0) Credit 3. Referral, assessment and categorization of special populations including physical, cognitive and affective characteristics; cultural, ethnic, economic and linguistic differences; giftedness; special education and compensatory programs; awareness of legislative history that results in rights for special populations. Prerequisite: Sophomore classification or above.

301. EDUCATIONAL PSYCHOLOGY. (3-0) Credit 3. Application of psychology to problems of teaching. Nature and operation of principles of learning, transfer of training; nature, measurement and significance of individual differences; conditions influencing efficiency of learning. Prerequisite: Junior or senior classification.

### Kinesiology (KINE)

198. Health and Fitness Activity. (0-2). Credit 1. Half lecture; half activity; student choice of designated fitness or strength related activities; lecture portion covers current health topics.

199. Required Physical Activity. (0-2). Credit 1. Selection from a wide variety of activities designed to increase fitness and/or encourage the pursuit of lifetime activity.

### Management (MGMT)

105. INTRODUCTION TO BUSINESS. (3-0). Credit 3. Survey of economic systems, forms of business ownership and running the small business; organizing and managing businesses; managing human resources; managing production and information; managing marketing; introducing financial issues including accounting, money, and banking, securities markets; business issues and challenges including legal and regulatory environment, business ethics, and international business.

211. LEGAL AND SOCIAL ENVIRONMENT OF BUSINESS. (3-0) Credit 3. Role of government in business and society; analysis of social policy and legal institutions; ethical problems in management decisions; administrative law; antitrust law; employment and discrimination law; regulation of business transactions; protection of property rights; regulation of information in markets including securities and product safety; international business law. Prerequisite: Sophomore classification.

481. SEMINAR IN MANAGEMENT. (1-0). Credit 1. Discussions and observation of current management practice in the public and private sectors of the nation. Reading and discussion of current events and changes taking place in management theory and/or its application and practice in actual business and government situations. May be repeated for credit. Prerequisites: Junior classification or approval of instructor.

### Marine Biology (MARB)

101. SUCCEEDING IN SCIENCE. (1-0). Credit 1. An orientation of the biological sciences including the nature of science, functions of scientists, and a better understanding of the fundamentals of science. Students receive hands-on experiences that provide opportunities to work with faculty, graduate and other undergraduate students.

285. DIRECTED STUDIES. Credit 1-6 per semester. Special topics and problems in field and/or laboratory work suited to analysis by individuals or small groups concerning aspects of marine biology. Usually requires a report describing techniques and results. Only 3 credit hours may be used in the degree plan curriculum. Prerequisites: 2.25 GPR, Approval of instructor.

289. SPECIAL TOPICS IN MARINE BIOLOGY. Credit 1-4. Study of selected topics in an identified area of marine biology. Prerequisite: Approval of instructor.

300. SCIENTIFIC METHODS IN MARINE BIOLOGY. (1-3). Credit 2. An introduction to field, laboratory and analytical methods, equipment and instruments. The field portion will include making proper observations, sampling techniques, and data recording. The laboratory portion will include sample analysis methods, use of instruments, introduction to data analysis including elementary statistics, introduction to scientific literature and report writing style. Prerequisites: BIOL 113, 114, 123, 124; curriculum sophomore or approval of instructor.

301. GENETICS. (3-3). Credit 4. Fundamental principles of genetics; physical basis of Mendelian inheritance; expression and interaction of genes, linkage, sex linkage, biochemical nature of genetic material, and mutation. Prerequisites: MARS 360; CHEM 227, 228, 237 and 238; curriculum sophomore or approval of instructor.

303. BIOSTATISTICS. (2-2). Credit 3. Introduction to sampling, experimental design, analysis of data, and testing of hypotheses, with emphasis on methods applied to biological investigations. Parametric and non-parametric techniques. Descriptive statistics, analysis of variance, correlation and regression. Prerequisites: MATH 151, three credit hours of computer science, curriculum sophomore or approval of instructor.

310. INTRODUCTION TO CELL BIOLOGY. (3-3). Credit 4. Cellular structure/function; procaryotic vs. eucaryotic cells. Examination of cellular membranes and membrane transport. Analysis of DNA replication, transcription, and protein translation (an extension of their treatment in MARB 301). Introduction to the components and genetics of immunology. Cell Biology should precede or be concurrent with enrollment in MARB 450. Prerequisites: BIOL 113, BIOL 114, CHEM 228, MARB 301, MARS 360, curriculum junior or approval of instructor.

311. ICHTHYOLOGY. (3-3). Credit 4. Freshwater and marine fishes. Subject will be mainly systematic, but evolution, ecology, life history, and economics of more important species will be treated. Prerequisites: BIOL 113, 114, 123, 124, curriculum sophomore or approval of instructor.

312. FIELD ICHTHYOLOGY. (3-3). Credit 4. Field and laboratory studies on identification and ecology of freshwater and marine fishes of Texas. Field trips required. Prerequisite: MARB 311, curriculum sophomore or approval of instructor.

315. NATURAL HISTORY OF VERTEBRATES. (3-3). Credit 4. Natural history of fishes, amphibians, reptiles, birds, and mammals, with emphasis on coastal Texas vertebrates. Prerequisites: BIOL 113, 114, 123, 124, curriculum sophomore or approval of instructor.

320. FISHERIES TECHNIQUES. (3-3). Credit 4. An introduction to theory and techniques in fisheries biology and ecology. Experience with fisheries equipment and techniques will be provided in both field and laboratory. Practical sampling design, collection, and interpretation of data from estuarine, coastal and offshore environments will be addressed. Prerequisites: BIOL 113, 114, MARB 311 or approval of instructor.

325. BIOSPELEOLOGY. (3-3). Credit 4. A field-oriented introduction to the biology of aquatic and terrestrial cave organisms with discussions on the origin of caves, cave environment, cave fauna, and evolution. Field trips required. Prerequisites: BIOL 114, CHEM 101, GEOL 104 or approval of instructor.

330. PHYSIOLOGICAL ECOLOGY. (3-0). Credit 3. Examination of how ecological pressures dictate individual and interorganismal physiological processes that lead to individual and community adaptation. Discussion of the physiological interrelationships between members of an ecological community. Attention will be directed toward physiological systems of plants and animals. Prerequisites: BIOL 113, 114, 123, 124 or approval of instructor.

335. FISH PHYSIOLOGY. (3-0). Credit 3. Study of the basic physiology of fishes. Examination of fish cardiovascular, renal, digestive, locomotor, reproductive, and central/peripheral nervous systems. Discussion of physiological adaptations enhancing survival in a water medium. Prerequisite: BIOL 113, 114, 123, 124 or MARB 311 or equivalent or approval of instructor.

345. INTRODUCTION TO SCIENTIFIC DIVING. (3-3). Credit 4. Prepare and qualify divers for entry into the TAMUG Scientific Diving Program. Students must pass medical, swimming, skin diving and scuba diving tests. Lectures include diving equipment, physics, physiology, medicine, regulations, environment, emergency and decompression procedures. Prerequisites: BIOL 113, PHYS 201, advanced scuba certification or approval of instructor.

350. METHODS IN RESEARCH DIVING. (2-6). Credit 4. Survey of research methods and techniques using diving. Lecture and lab designed to train students in safe, efficient use of diving to collect and record data underwater for studies primarily in biology, geology, and archaeology. Prerequisites: MARB 345 or approval of instructor.

360. MARINE CONSERVATION BIOLOGY. (3-3). Credit 4. Lectures and laboratories cover the major principles of conservation biology; a new synthetic field that applies concepts of ecology, systematics and evolution, biogeology, genetics, behavioral sciences, and social sciences to the conservation of marine fisheries resources. Lab exercises include morphometric and genetic variation, GIS, molecular systematics and phylogenetic inference.

400. BIOLOGY OF MARINE MAMMALS. (3-3). Credit 4. A broad-spectrum course on the taxonomy, evolution, morphology behavior, and ecology of marine mammals, including sirenians, carnivores, baleen and toothed whales and dolphins. Prerequisite: BIOL 113,114,123,124, MARB 315, 410; or approval of instructor.

401. PHYSIOLOGICAL ECOLOGY OF MARINE MAMMALS. (3-0). Credit 3. Taxonomy, phylogeny and physiological adaptations of marine mammals. Prerequisites: BIOL 113, 114, and MARB 315.

402. GENERAL MAMMALOLOGY. (2-3) Credit 3. Mammalian biology; evolution, classification, biogeography, reproduction, physiology, ecology, and behavior; focuses on basic concepts necessary for a foundation in both wildlife science and biology. Prerequisite: Junior classification and MARB 315.

403. CETACEAN BEHAVIOR AND BEHAVIORAL ECOLOGY. (3-3). Credit 4. This course consists of lecture of up to date descriptions of Cetacean behavior and ecology; and of labs that evaluate the literature of topics of present relevance. Prerequisite: Junior standing and MARB 315 and MARB 400 or instructor permission.

405. MARINE PARASITOLOGY. (3-3). Credit 4. Fundamentals of parasitology, with emphasis on marine applications. Survey of major parasites of marine animals and the diseases they cause, especially in ecologically and commercially-important host species. Prerequisites: BIOL 114, 124 or approval of instructor.

408. MARINE BOTANY. (3-3). Credit 4. Morphology, systematics, ecology, and biochemistry of representative algae, fungi, and submarine grasses. Prerequisites: BIOL 114, 124, curriculum sophomore or approval of instructor.

410. ANIMAL BEHAVIOR. (2-3). Credit 3. Examination of ethological concepts. Discussion of the development, genetics, physiology, and evolution of animal behavior patterns involved in reproduction, territoriality, aggression, communication, population dispersion, sociality, and sociobiology of invertebrates and vertebrates. Prerequisites: BIOL 114, 124, curriculum sophomore or approval of instructor.

412. SOCIOBIOLOGY OF REPRODUCTION. (3-0). Credit 3. Application of sociobiological concepts to examine the evolution and adaptive significance of reproductive strategies utilized by marine and terrestrial animals. Strategy-influencing factors to be discussed include: mate selection and competition, sex roles, bonding, parental investment in offspring, and socialization, Prerequisites: BIOL 114, MARB 301 or equivalent, or concurrent registration, curriculum sophomore or approval of instructor.

420. COMPARATIVE ANIMAL PHYSIOLOGY. (3-3). Credit 4. Principles of animal physiology are examined using invertebrate and vertebrate model systems. Topics include osmoregulation in marine vs. freshwater vs.

terrestrial organisms, excretion, fluid circulation, nervous system structure and function, muscle activity, sensory neurobiology, and endocrine mediation. Prerequisites: BIOL 114, CHEM 228, MARB 310, MARS 360, curriculum junior or approval of instructor.

423. MARICULTURE. (3-3). Credit 4. Study of factors determining the success of efforts to cultivate estuarine and marine species of economic importance. Mariculture practices used worldwide in the production of algae, mollusks, crustaceans, and fishes will be discussed. Prerequisite: Curriculum junior or approval of instructor.

425. MARINE ECOLOGY. (3-3). Credit 4. Relationship between various marine environments and their inhabitants; intra- and interspecific relationships between organisms; structure and function among marine communities. Laboratory emphasis is placed on study of living material and natural habitats in the Gulf of Mexico. Prerequisites: MARB 315, 408, 435; ENGL 301; curriculum senior or approval of instructor.

426. AQUATIC ANIMAL NUTRITION. (3-0). Credit 3. Chemistry, digestion, absorption and intermediary metabolism of nutrient classes with special emphasis on their relationship to warmwater fish nutrition. Determination of nutrient requirements, feed evaluation, feed processing, ration formulation and feeding practices. Prerequisite: CHEM 227 or approval of instructor.

430. COASTAL PLANT ECOLOGY. (3-3). Credit 4. Study of the identification, distribution, production, and ecological importance of estuarine, coastal marsh, and dune vascular plants; the interaction of plants with their abiotic and biotic environments; and techniques of vegetation management and evaluation. Prerequisite: BIOL 114, curriculum junior or approval of instructor.

431. WETLANDS ECOLOGY, MONITORING, AND DELINEATION. (2-6). Credit 4. Study of the characteristics and importance of wetlands and methods for delineating, monitoring, and evaluating wetlands. Students will become knowledgeable in wetland soils, plants, ecological interactions of wetlands and other habitats and animals, and the laws pertaining to obtaining permits and managing wetlands of the U.S. Prerequisites: BIOL 113, 114, 123 and 124 or approval of instructor.

432. G.I.S. USE IN COASTAL RESOURCES. (2-3). Credit 3. Basic concepts of design, planning, and integration of Geographical Information Systems in management of biological systems in coastal environments. Students are taught to input data into GIS, organize the data, and analyze, query, and manage data sets. Prerequisite: junior classification.

435. MARINE INVERTEBRATE ZOOLOGY. (3-3). Credit 4. General biology of marine invertebrate animals; morphology, evolution, and systematics. Laboratory will stress studies of local fauna. Prerequisites: BIOL 113, 114, 123, 124, curriculum junior or approval of instructor.

436. NON-VERTEBRATE FISHERIES. (3-3). Credit 4. A survey of the history and importance of harvesting commercially important algae and invertebrates, with an assessment of the current status, problems and prospects for each fishery. Identification, distribution and biology of commercially important species will also be addressed. Prerequisites: BIOL 113, 114; or approval of instructor.

437. PATHOLOGY OF MARINE ANIMALS. (3-3). Credit 4. An introduction to the structural and functional changes in cells, tissues and organ systems of marine invertebrates and vertebrates as they relate to disease and/or injury. Mechanisms of disease and identification of lesions in common diseases and human-induced injuries will be included. Laboratory will consist of gross and microscopic aspects of pathology in both invertebrate and vertebrate animals. Prerequisites: MARB 315, 435, MICR 351, Junior status or approval of instructor.

438. COASTAL ORNITHOLOGY. (2-3). Credit 3. Field and laboratory studies on the identification, classification, distribution and ecology of birds with special emphasis on birds of the Texas Gulf Coast. Classroom lectures to include anatomy, physiology, behavior and migration. Field trips required. Prerequisites: MARB 315, junior or instructor approval.

445. MARINE FISHERIES MANAGEMENT. (3-3). Credit 4. Basic knowledge from marine ichthyology, biology of fishes and biological oceanography related to applied aspects of marine fisheries sciences. Emphasis

placed on management techniques applicable to tidal-influenced inland water, estuaries, and oceans. Prerequisite: Approval of instructor.

450. DEVELOPMENTAL BIOLOGY OF MARINE ORGANISMS. (3-3). Credit 4. Patterns and mechanisms of development in animal embryos (from sea urchins to mammals) at the molecular, cellular, and tissue levels. Emphasis on cellular differentiation via gene expression. Laboratory includes fixed sections and observations of live animals. Prerequisites: BIOL 113-124; curriculum junior or approval of instructor. Completion of MARB 301 is recommended. Completion or enrollment in MARB 310 is recommended.

454. ORNAMENTAL FISH HEALTH MANAGEMENT. (3-0). Credit 3. Maintenance and health care of ornamental fish in closed recirculating systems; aquariology, anatomy and physiology, nutrition, immunology, infectious and noninfectious diseases, checklists, quarantine procedures and health maintenance of ornamental fish. Prerequisites: MICR 351 and MARS 360.

460. FISHERIES POPULATION DYNAMICS. (3-3). Credit 4. An introduction to the behavior of populations. Classical and recent population theories will be discussed in lecture. In lab, extant and programs written by students will be used to explore population behavior and interactions. Prerequisites: Senior status, MATH 151 or instructor approval.

466. EVOLUTIONARY BIOLOGY. (3-0). Credit 3. A conceptual examination of evolutionary theory, not a survey of specific organismal evolutions. Evidence for the abiotic origin of life is presented, followed by a discussion of micro-evolutionary (including drift and natural selection) and macro-evolutionary (including evolutionary trends) mechanisms. The course concludes with application of these concepts to human evolution. Prerequisites: BIOL 113 and 114. MARB 301 is recommended but not required.

481. SEMINAR IN MARINE BIOLOGY. (1-0). Credit 1. Critique of articles from the current biology literature. Emphasis placed on evaluation of methods and results reported in scientific papers. Prerequisites: Curriculum junior or approval of instructor.

482. SEMINAR IN MARINE BIOLOGY. (1-0). Credit 1. Compilation of literature pertaining to topics in marine biology. Emphasis placed on preparation of a written report and presentation of a synopsis of that report. Prerequisite: Curriculum junior or approval of instructor.

484. UNDERGRADUATE INTERNSHIP. Credit 1-9. Supervised study in a research or teaching laboratory remote from TAMUG. Student involvement is to consist of real-life learning or marine biological research, teaching, management, or a combination of these. Prerequisite: junior classification or approval of instructor.

485. DIRECTED STUDIES. Credit 1-6 per semester. Special topics and problems in field and/or laboratory work suited to analysis by individuals or small groups concerning aspects of marine biology. Usually requires a report describing techniques and results. Only 3 credit hours may be used in the degree plan curriculum. Prerequisites: 2.25 GPR, curriculum sophomore and approval of instructor.

489. SPECIAL TOPICS IN MARINE BIOLOGY. Credit 1-4. Study of selected topics in an identified area of marine biology. Prerequisite: Curriculum junior or approval of instructor.

620. BIOLOGICAL MARINE RESOURCES. (3-0). Credit 3. An introduction to biological resources which can be recovered from the marine environment to provide food, biomass and materials, recreation, and employment to the coastal United States and other regions. With emphasis on fisheries and hatcheries, in: oceanic resources, coastal and estuarine resources, and mariculture. Natural and societal limitations to resource recovery are investigated, and environmental impacts are analyzed. Prerequisites: (at least 3 of these) CHEM 102, BIOL 114, GEOL 104 and/or OCNG 251; graduate status or special approval.

## Marine Engineering Technology (MARE)

100. MARINE ENGINEERING FUNDAMENTALS. (2-3). Credit 3. A study of basic marine engineering systems, with emphasis on propulsion plants. Introduction to propulsion plant machinery, watchstanding organization and duties, shipboard safety practices and equipment.

102. INTRODUCTION TO MECHATRONICS. (0-6). Credit 2. Use of word processing, spreadsheet, CAD, and data acquisition. Engineering ethics. Presentation of engineering data. The design process; generation of ideas, analysis of alternatives, prototype construction, testing and presentation. Writing proposals and progress report. VI construction applied to marine engineering field. Voltage, current, power. Prerequisites: ENDG 105, MARE 100.

180. BASIC MACHINE SHOP TECHNIQUES. (0-3). Credit 1. Safety, care of machines and hand-tools, cutting speeds and feeds, measuring instruments, gauging, standard machine tool work in metals, layouts, drilling, tapping, threading, vertical and horizontal milling and shaving.

200. BASIC OPERATIONS. Credit 4. Practical application of student's classroom studies while at sea on training ship during sea-training period. Student required to complete several projects relating to engineering plant of ship. Prerequisite: NAUT 103.

203. DIESEL ENGINE TECHNOLOGY. (2-3). Credit 3. Basic principles of two- and four-stroke diesel engines; intake, scavenging and exhaust systems, injection systems; starting and reversing methods; cooling and lubricating systems; engine room layout in modern motor vessels.

205. ENGINEERING MECHANICS I. (3-0). Credit 3. Statics, basic vector operations, mechanics of particles and rigid bodies. Center of gravity, analysis of structures, friction, moments of inertia. Prerequisite: MATH 151, PHYS 218.

206. ENGINEERING MECHANICS II. (3-0). Credit 3. Dynamics; scalar and vector solutions of relative linear velocities and acceleration; kinetics; dynamics of translation and rotation; work; energy; impact; momentum. Prerequisite: MARE 205.

207. ELECTRICAL POWER I. (3-3). Credit 4. Application of electromagnetic principles to AC and DC circuits including: batteries, DC motors and generators, AC motors and generators, balanced three-phase systems, transformers, and electrical instruments. Prerequisite: PHYS 208.

209. MECHANICS OF MATERIALS. (2-3). Credit 3. Introduction to the study of stresses, strains, and deformation of a solid body which results when static forces are applied. Transformation of stresses and strains, torsion, beam deflection, and combined loadings are discussed. Prerequisite: MARE 205.

280. WELDING TECHNIQUES. (0-3). Credit 1. To introduce students to the materials, equipment and techniques of welding and brazing and to develop skills required by the marine engineer for this work in the engine room of commercial ships.

285. DIRECTED STUDIES. Credit 1-3 each semester. Special problems in marine engineering technology not covered by any other course in the curriculum. Work may be in either theory or laboratory. Prerequisite: Approval of department head.

289. SPECIAL TOPICS. Credit 1-4 each semester. Selected topics in an identified area of marine engineering technology. May be repeated for credit. Prerequisite: Approval of instructor.

295. ELECTROMECHANICAL SYSTEMS FOR MARINE TECHNOLOGISTS. (3-0). Credit 3. Practical solutions of physical models of electromechanical systems; steady state and transient response of linear electrical and mechanical systems; elements of periodic and random excitations and techniques for practical solutions; computer modeling of elementary continuous systems. Prerequisites: MATH 161 and PHYS 218; PHYS 208 or concurrent registration.

300. INTERMEDIATE OPERATIONS. Credit 4. Training program for second sea-training period. Sea project required of each student under supervision of officer-instructors. Lifeboat and safety training.

303. MARINE THERMODYNAMICS I. (3-0). Credit 3. Energy concepts. First and second law of thermodynamics. Carnot and Rankine principles and reversible heat cycles. Properties and processes of vapors, vapor-power cycles, and vapor refrigeration cycles. Prerequisite: MATH 161.

304. MARINE THERMODYNAMICS & HEAT TRANSFER. (3-2). Credit 4. Advanced topics in gas dynamics: flow through nozzles and through compressor and turbine blades, compressible duct flow with friction. Study of

gas mixtures and chemical combustion. Thermodynamics of propulsion systems, elements of heat transfer and heat exchanger analysis. Prerequisite: MASE 303.

305. FLUID MECHANICS THEORY. (3-2). Credit 4. Theory of incompressible and compressible fluid flow, introduction to fluid power systems and controls, and dynamics of turbomachinery. Mathematical analysis of piping systems to determine pump head, system resistance, and pipe sizing optimization. Topics include physical properties of fluids, continuity equation, Bernoulli's Equation, Darcy's Equation, series and parallel flow, relative roughness, friction factors, dimensional analysis, and laws of similitude.

306. ELECTRICAL POWER II. (2-2). Credit 3. Shipboard electric power generation and distribution; switchboard instrumentation, controls and safety devices; motor controllers and safety devices; operation, maintenance and repair procedures and practices. AC and DC electric ship propulsion systems. Prerequisite: MARE 207.

307. MARINE ELECTRONICS. (3-0). Credit 3. Introduction to the theory of electronic circuits. Fundamentals and basic concepts of semiconductors; solid-state components; power supplies; amplifiers; inverters; rectifiers; oscillators; digital and linear integrated circuits. Applications in automation, motor controllers, battery-charging systems, communications, and propulsion plant performance monitoring systems.

309. MARINE CONSTRUCTION MATERIALS. (3-3). Credit 4. Introduction to materials science; study of the properties of materials as related to marine engineering design and applications. Laboratory includes experimental testing of material properties and heat treatment techniques. Prerequisite: MASE 209.

311. STEAM PROPULSION PLANTS. (2-2). Credit 3. Comprehensive study of fossil fuel steam generators, propulsion turbines and condensers, reduction gears, line shafting. Studies include internal fittings and fluid flow paths, automatic controls; regulatory requirements for safety device settings, and system tests and inspections. Additional topics include boiler water-feed water test and treatment, and turbine/reduction gear lubrication. Laboratory includes computer-aided heat balance and parametric analysis of plant performance. Prerequisite: MARE 304, 305.

312. DIESEL PROPULSION PLANTS. (2-2). Credit 3. Comprehensive study of diesel propulsion plants, including direct-drive low speed diesels, geared medium speed diesels, waste heat recovery systems, engine reversing methods, and heavy fuel processing. Laboratory includes computer-aided parametric analysis of engine performance and use of a low-speed diesel propulsion plant simulator. Prerequisite: MARE 304, 305.

395. ELECTROMECHANICAL SYSTEMS FOR TECHNOLOGISTS. (3-0). Credit 3. Practical solutions of physical models of electromechanical systems; steady state and transient response of linear electrical and mechanical systems; elements of periodic and random excitations and techniques for practical solutions; computer modeling of elementary continuous systems. Prerequisite: MATH 161, PHYS 218, 219 or 208.

400. ADVANCED OPERATIONS. Credit 4. Training program for third sea-training period. At the end of this period each student will have achieved the knowledge and will have demonstrated the ability to take complete charge of a modern marine power plant while underway at sea.

401. MARINE AUXILIARY SYSTEMS. (2-2). Credit 3. Study of the principal shipboard auxiliary systems, including: auxiliary fired-boilers, sea water service, ballast, freshwater service, lubricating oil, fuel oil storage and transfer, distilling, and steering systems. Major components, operation and maintenance, and interrelationship with other auxiliary systems are covered. Additional topics include steam turbine, gas turbine, and diesel-driven electric power generators and support systems, as well as propulsion train power take-off type electric power generation systems. Prerequisites: MARE 304, 305.

402. SHIPBOARD AUTOMATION AND CONTROL. (3-0). Credit 3. Study of automation in marine power plants; including electronic and pneumatic proportional, integral and derivative control elements; applications in boiler combustion and water level control; engine speed control; remote sensing and performance monitoring systems. Prerequisites: MARE 307, 311, 312.

403. MARINE TECHNOLOGY AND THE ENVIRONMENT. (3-0). Credit 3. Study of environmental protection requirements such as the Oil Pollution Act of 1990, Code of Federal Regulations, and international agreements

and conventions addressing prevention of pollution of the seas by oil and sewage. In addition, atmospheric pollution from propulsion plant exhaust gas is addressed. Ships' structure and systems, operational requirements, and licensed-officer liabilities are discussed.

404. MARINE AIR CONDITIONING & REFRIGERATION. (3-0). Credit 3. Study of refrigeration processes, refrigerants, psychometrics, air conditioning and refrigeration systems, and operation and maintenance of AC&R systems. Prerequisite: MARE 304.

405. FUNDAMENTALS OF NAVAL ARCHITECTURE. (3-0). Credit 3. Ship geometry and arrangement; ship-form calculations; intact and damaged stability; ships' structure; fundamentals of resistance and propulsion; ship motion, maneuverability, and control; introduction to ship design, construction, and overhaul. Prerequisite: MASE 309.

406. MARINE ENGINEERING TECHNOLOGY PROJECTS. (3-0). Credit 3. Team approach to analysis and design of basic marine industry-level projects, in particular marine propulsion plants including efficiency enhancement for conventional steam and diesel plants, regenerative and steam injected gas turbine propulsion plants, and combined cycle plants. Additional topics include transmission and drive systems, and propulsors; integration of concepts learned in previous required courses; capstone learning experience. Prerequisites: MARE 311, 312, and MARE 401.

485. DIRECTED STUDIES. Credit 1-3 each semester. Special problems in marine engineering technology not covered by any other course in the curriculum. Work may be in either theory or laboratory. Approval of department head.

489. SPECIAL TOPICS. Credit 1-4 each semester. Selected topics in an identified area of marine engineering technology. May be repeated for credit. Prerequisite: Approval of instructor.

## Marine Sciences (MARS)

101. INTRODUCTION TO MARINE SCIENCES. (1-0). Credit 1. A non-technical introduction to the field of marine sciences, including biology, ocean activities, and marine industries. Course includes lectures, seminars, outside speakers, and industrial contacts.

250. BASIC PROGRAMMING. (2-2). Credit 3. Introduction to microcomputer business and data applications. Fundamental concepts of information technology and algorithm development. Use of integrated wordprocessing, spreadsheet and database applications software to solve science and/or business problems.

280. COASTAL AND OCEAN RESOURCES. (3-0). Credit 3. Resources from the ocean including food, minerals, transportation and recreation. Methods of recovery and utilization of resources from the ocean, efficiency and cost effectiveness. Provides a foundation for understanding the wealth of resources available from the ocean and its margins, to include the impact of human activity on these resources.

285. DIRECTED STUDIES. Credit 1-6 each semester. Special topics and problems suited to analysis by individuals or small groups concerning special aspects of marine sciences. Prerequisite: Approval of department head.

289. SPECIAL TOPICS IN MARINE SCIENCES. Credit 1-4. Study of selected topics in an identified area of marine sciences. Prerequisite: Approval of instructor.

305. PALEONTOLOGY. (2-3). Credit 3. Analysis of history of life and processes controlling it; study of groups of organisms important in the marine fossil record; application of paleontology to geologic problems. Field trips required. Prerequisite: GEOL 104, junior standing or permission of the instructor.

306. STRATIGRAPHY AND SEDIMENTATION. (3-3). Credit 4. Principles of stratigraphy and study of environments of deposition. Laboratory work in sampling, analyzing, and interpreting sedimentary rocks. Field trips required. Prerequisite: GEOL 104, junior standing or permission of the instructor..

310. FIELD METHODS IN MARINE SCIENCES. (1-6). Credit 3. Techniques of documenting collected materials, the methods of reconnaissance and the mapping of traverses in the major coastal environments.

Sampling and recording techniques, interview procedures, and the use of maps and remotely sensed imagery will be introduced. Prerequisites: CHEM 102, PHYS 202 or PHYS 208, GEOL 104, junior standing or permission of the instructor.

330. PETROLEUM GEOLOGY. (3-0). Credit 3. Origin, migration and accumulation of petroleum. Reservoir rock, traps, accumulation and conditions, and subsurface methods. Prerequisite: GEOL 104, junior standing or permission of the instructor.

340. GEOCHEMISTRY. (3-0). Credit 3. Chemical principles and processes that govern the behavior of geologic materials. Silica and carbonate low temperature equilibrium and kinetics. Prerequisites: CHEM 102, GEOL 104, junior standing or permission of the instructor.

360. BIOCHEMISTRY. (3-0). Credit 3. General introductory biochemistry; structures of lipids, saccharides and nucleotides; amino acids and protein structure; relationship of protein structure to biochemical reactivity; kinetics (and inhibition) of enzyme-catalyzed reactions; membrane phospholipids and glycoproteins and the structure and function of membranes; catabolic reaction pathways of monosaccharides and fatty acids; oxidative phosphorylation. Prerequisites: BIOL 114, CHEM 228, junior standing or permission of the instructor.

370. COASTAL PROCESSES. (3-0). Credit 3. Introduction to the coastal system, waves and wave-dominated coasts, shoreline morphodynamics, tidal and lake coasts, long-term coastal development, sea level changes, subtidal and beach ecosystems, coastal dunes and wetlands, structures and organizations, coastal management, and coastal hazards. Prerequisite: GEOL 104, junior standing or permission of the instructor.

375. SCIENCE OF FLUIDS. (3-0). Credit 3. Classical fluid mechanics; fundamental physical principles. Fluid statics, principles of fluid motion, frictionless flow, surface waves, viscous flows, turbulence, molecular basis of fluid mechanics. Prerequisites: MATH 251, PHYS 218, junior standing or permission of the instructor.

376. INTRODUCTION TO UNIX AND C. (3-0). Credit 3. Introduction to the Unix operating system and C-Language programming in a multi-user networked environment. Prerequisite: junior standing or permission of the instructor.

380. INTRODUCTION TO PHYSICAL CHEMISTRY. (3-0). Credit 3. Classical thermodynamics with applications to gases, liquids, solutions, and phase equilibria. Kinetics and transport properties of gases. Statistical mechanics, spectroscopy, instrumentation, and quantum theory at the survey level. Prerequisites: CHEM 102, MATH 151, junior standing or permission of the instructor.

405. WATERBORNE TRANSPORTATION OF HAZARDOUS CHEMICALS. (3-0). Credit 3. Basic concepts associated with the transportation of hazardous chemicals in congested port areas, along the nation's inland waterways, and at sea. Special emphasis on the hazards of fire, health, air and water pollution and chemical reactivity. Promulgation of safe operating practices by industry, the USCG and IMO. Prerequisite: CHEM 101, junior standing or permission of the instructor.

410. INTRODUCTION TO PHYSICAL OCEANOGRAPHY. (3-0). Credit 3. Introduction to elements of the physics of the ocean; descriptive aspects and theoretical explanations of circulation, characteristic structure, and waves. Prerequisites: MATH 251, PHYS 208, junior standing or permission of the instructor.

415. REMOTE SENSING TECHNOLOGY. (3-0). Credit 3. An introduction to the uses of remote sensing technology in the marine sciences, including electromagnetic, acoustic, and seismic methods. Generation, transmission, and reception methods. Active and passive systems, multispectral techniques, and signal analysis systems. Prerequisites: PHYS 202 or 208, BIOL 114, junior standing or permission of the instructor.

430. INTRODUCTION TO GEOLOGICAL OCEANOGRAPHY. (3-0). Credit 3. Introduction to geological processes in the marine system: Physiographic provinces, origin and evolution of basins, shelves, slopes, and beaches. Geological sampling and geophysical methods; coastal beach and estuarine processes. Prerequisites: GEOL 104, junior standing or permission of the instructor.

435. EXPLORATION GEOPHYSICS. (3-0). Credit 3. Physiomechanical properties of rocks and sediments. Seismic reflection and refraction principles applicable to offshore, coastal and onshore exploration. Determina-

tion of media velocity and stratigraphy from reflection and refraction studies in both marine and non-marine systems. Prerequisites: PHYS 202 or PHYS 208, GEOL 104, MATH 151 or approval of instructor.

440. INTRODUCTION TO CHEMICAL OCEANOGRAPHY. (3-0). Credit 3. Introduction to chemical processes in the marine environment. Composition of sea salt, chemical specification of dissolved material in the ocean. Biogeochemistry of oxygen, major elements, nutrient elements, and some trace metals in the surface and deep ocean. Formation, chemical composition, and alterations of detrital material and marine sediments. Simple models which relate ocean chemistry to the circulation of identifiable masses of water. Radioisotopes and stable isotopes in chemical oceanography. Prerequisite: CHEM 102, junior standing or permission of the instructor.

450. ELECTRICAL AND PHYSICAL MEASUREMENTS. (2-3). Credit 3. Study of basic instrumentation pertinent to marine sciences and biology as well as simple circuit design and digital electronics. Laboratory emphasizes spectroscopy, environmental measurements, and basic oceanographic measurements. Prerequisites: CHEM 102, PHYS 202 OR PHYS 208, MATH 151, junior standing or permission of the instructor.

481. SEMINAR. (1-0). Credit 1. Problem-oriented discussion session. Topics and reports selected for current relevance. May be repeated once only for credit. Prerequisite: junior standing or permission of the instructor.

484. UNDERGRADUATE INTERNSHIP. Credit 1-6. Supervised study in a research or teaching laboratory within or outside of the Texas A&M University System. Student involvement is to consist of real-life learning or marine sciences research, teaching, management or a combination of these. Prerequisites: Junior standing or permission of the instructor and approval of the department head.

485. DIRECTED STUDIES. Credit 1-6 each semester. Special topics and problems suited to analysis by individuals or small groups concerning special aspects of marine sciences. Prerequisites: junior standing or permission of the instructor. Approval of department head.

489. SPECIAL TOPICS IN MARINE SCIENCES. Credit 1-4. Study of selected topics in an identified area of marine sciences. Prerequisite: Junior standing or permission of the instructor.

610. ENVIRONMENTAL LAW. (3-0) Credit 3. This course is designed to provide an broad overview of basic environmental laws including statutes, regulations, and cases. It also focuses on the both economic and ethical issues within the context of environmental law and policy. Prerequisite: approval of instructor; graduate status or special approval.

615. PHYSICAL AND GEOCHEMICAL MARINE RESOURCES. (3-0). Credit 3. Location, identification, extraction and exploitation of non-fisheries marine resources, including: water, salt, hydrocarbons, minerals, energy from the thermal, wave, tidal, current and wind fields, chemical compounds, pharmaceuticals, and construction materials in estuarine, coastal and open ocean areas. Prerequisites: OCNG 251 or OCNG 401 or equivalent; graduate status or special approval.

620. INTERNATIONAL ENVIRONMENTAL BUSINESS TRANSACTIONS. (3-0) Credit 3. This course is designed to provide an overview of those laws, regulations, and regimes involved in international environmental business transactions; and to identify those environmental regimes which are triggered when business is conducted internationally. The course includes topics in international law, regional law, and U.S. federal law. Prerequisite: approval of instructor; graduate status or special approval.

625. GIS USE IN COASTAL RESOURCES. (2-3). Credit 3. Basic concepts of design, planning, and implementation of Geographical Information Systems; computer hardware and software evaluation; practical experience in data entry, analysis and update of spatial and characteristic data; use of maps and remotely sensed data as data. Prerequisite: any computer science course or equivalent; graduate status or special approval.

635. ENVIRONMENTAL IMPACT STATEMENTS AND NATURAL RESOURCE DAMAGE ASSESSMENT. (3-0). Credit 3. The course presents an overview of: a) environmental impact statements (EIS) under the National Environmental Policy Act (NEPA); and b) natural resource damage assessment (NRDA) under the Oil Pollution Act of 1990 (OPA 90) and the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). It is designed to cover requirements for a wide variety of EISs. NRDA hypothetical cases will be

presented in which students are asked to calculate assessments. Prerequisite: approval of instructor; graduate status or special approval.

640. ENVIRONMENTAL ADMINISTRATIVE LAW. (3-0) Credit 3. Environmental law is governed, in large part, by administrative law. This course covers the processes involved in administrative environmental law. The primary focus of this course will be on: the Environmental Protection Agency, the U.S. Coast Guard, the Corps of Engineer; and NOAA. A review of international administrative bodies will also be included. Prerequisite: approval of instructor; graduate status or special approval.

645. WILDLIFE LAW AND ETHICS. (3-0) Credit 3. This course provides an overview of the basic wildlife laws including international regimes, bilateral and multilateral treaties, conventions, and cases dealing with conservation, preservation, and management of non-Homo sapien species; federal law, regulations, and cases; and a sampling of state law. It also focuses on the ethical issues of species management. Prerequisite: approval of instructor; graduate status or special approval.

650. GEOCHEMICAL MARINE RESOURCES MANAGEMENT. (3-0) Credit 3. The purpose of this course to provide an overview of the issues involved in geochemical marine resources management. This course explores the management of exploration, production, and protection of the geochemical marine resources of the earth and the interface of the many players. Prerequisite: approval of instructor; graduate status or special approval.

660. ENVIRONMENTAL ALTERNATIVE DISPUTE RESOLUTION. (3-0) Credit 3. Because environmental issues and law were born and raised in the arena of adversarial combat, the traditional adversarial litigative process is far from ideal. This course first explores the traditional method of settling disputes: the court system. It then reviews the increasingly visible dispute resolution alternatives. Finally, it provides certification in mediation. Prerequisite: approval of instructor; graduate status or special approval.

670. ECO-ENVIRONMENTAL MODELING. (3-0). Credit 3. Biological organisms are surrounded by chemical and physical environments which are influenced by the bio-system and flows of energy, water, and chemical species. Coupling to atmospheric, aquatic, and terrestrial systems is important. Modeling entails both mathematical tools and the underlying science. This course focuses on scientific models, from the simplest to more elaborate. Prerequisites: BIOL 113, 114; CHEM. 101, 102; MATH 151 166; graduate status or special approval.

675. ENVIRONMENTAL MANAGEMENT STRATEGIES FOR SCIENTISTS. (3-0). Credit 3. It is designed to provide a scientist with EMS strategies' skills. This includes knowing: what environmental laws may be triggered by activities; the fundamental structure of an EMS; EMS alternatives; concepts in an audit; Alternative Dispute Resolution; and how an effective EMS can reduce costs and increase profits. Prerequisite: approval of instructor; graduate status or special approval.

676. ENVIRONMENTAL POLICY. (3-0). Credit 3. This course will provide a general introduction to the basic concepts and mechanisms of international and U.S. federal environmental law and policy. It will survey the field and its development as well as focus on case studies that illustrate the basic types of environmental problems. Prerequisite: approval of instructor; graduate status or special approval.

684. INTERNSHIP IN MARINE RESOURCES MANAGEMENT. (variable) Credit 1-9. This is a faculty supervised study with an agency or other position within or outside the Texas A&M University System. Student involvement consists of real-life learning of marine resources management issues. It is a full-immersion course that provides students with hands-on experience in marine resources management. Prerequisite(s): approval of Faculty Sponsor; graduate status or special approval.

689. SPECIAL TOPICS IN MARINE RESOURCES MANAGEMENT. (3-0) Credit 3. Selected topics in an identified area of marine resources management. May be repeated for credit. Prerequisite(s): approval of instructor; graduate status or special approval.

## Marine Transportation (MART)

285. DIRECTED STUDIES. Credit 1-4. Directed study in problems in marine transportation not covered by other courses in the department. Prerequisite: approval of department head.

289. SPECIAL TOPICS IN MARINE TRANSPORTATION. Credit 1-3. Study of selected topics in an identified area of marine transportation or nautical science. Prerequisite: approval of department head.

301. OCEAN TRANSPORTATION I. (3-0). Credit 3. Examination of theory and practice in the management of transportation logistics, labor, rate-making, role of government, international conventions and treaties. Exposure to current trends and developments in shipping. Prerequisites: MART Students - NAUT 103 and 201, ECON 202 or concurrent enrollment. MARA students - NAUT 205, ECON 202 or concurrent enrollment.

302. MARINE CARGO OPERATIONS I. (3-0). Credit 3. Objectives and problems with break-bulk cargo handling during loading, discharging, and in-transit carriage. Requirements of special refrigerated and dangerous cargoes. Heavy lift operations with conventional cargo gear and its restraints. Cargo loss prevention, safety and related documentation, as well as log book entries, modern cargo concepts-containerization, roll-on roll-off, lash, and others. Maximum cargo efficiency with relation to space, cargo gear, crew and labor costs. Practical cargo gear use and cargo observations during lab periods. Prerequisite: NAUT 200, 202, 301 or concurrent registration.

304. OCEAN TRANSPORTATION II. (3-0). Credit 3. Marine insurance problems and cases and how they relate directly to a ship's officer. Hull, cargo, and personal injury cases are examined from the officers' and insurers' points of view. Introduction to Admiralty Law and the court process for seamen's rights and ship owners' privileges. Actual hearings and trials are observed to complete the background. Prerequisite for MART students: MART 301 or approval of department head. Prerequisite for MARA students: MARA 212, MART 301.

321. MARITIME LAW I. (2-0). Credit 2. Basic laws governing vessel navigation; International and U.S. Inland Rules for the prevention of collision at sea, and the safety of life at sea convention. Prerequisite: NAUT 200.

406. MARINE CARGO OPERATIONS II. (3-2). Credit 4. Principles and practice of bulk liquid, gas handling, and carriage by water craft. Theoretical and practical problems involved in loading, stowing and discharging of petroleum, chemical, elevated temperature and cryogenic cargoes. Marine pollution abatement, personnel safety, and firefighting techniques and systems. Prerequisites: MART 302, NAUT 300.

416. PORT OPERATIONS, ADMINISTRATION AND ECONOMICS. (3-0). Credit 3. Concepts of the port and methods of intermodal transfer. Port functions divided and analyzed along business lines: economics, management, finance, accounting, and marketing. Cost studies. Prerequisite: ECON 452, MART 301, MGMT 105, or approval of MART department head.

421. MARITIME LAW II. (3-0). Credit 3. Essential principles of admiralty, general maritime, and international law as applicable to the marine industry and ocean shipping. Evolution and state of the law concerning maritime liens, ship mortgages, rights of seamen and harbor workers, limitation of liability, bills of lading and cargo carriage, collision liability, general average, marine salvage, charter parties, and international rights and responsibilities of ships and shipping. Prerequisites: MART 301, 321, OR MARA 212.

485. DIRECTED STUDIES. Credit 1-4. Directed study in problems in marine transportation not covered by other courses in the department. Prerequisite: senior classification or approval of department head.

489. SPECIAL TOPICS IN MARINE TRANSPORTATION. Credit 1-4. Study of selected topics in an identified area of marine transportation or nautical science. Prerequisite: approval of MART department head.

## Maritime Administration (MARA)

212. BUSINESS LAW. (3-0). Credit 3. Legal principles of business, legal reasoning, dispute resolution and procedure, contract law, bankruptcy law, property law, Uniform Commercial Code sections concerning contracts, security interests, negotiable instruments and sales. Prerequisite: sophomore classification.

285. DIRECTED STUDIES. Credit 1-4. Directed study on selected problems in the area of maritime administration not covered in other courses. Prerequisite: approval of MARA department head.

289. SPECIAL TOPICS. Credit 1-3. Study of selected topics in an identified area of maritime administration.

363. THE MANAGEMENT PROCESS. (3-0). Credit 3. Management as an academic discipline; goal setting; planning, controlling and decision-making; models for thinking about organizations; organization design; organization change; models for understanding individual behavior; job performance and job satisfaction; interpersonal behavior, motivation and leadership, behavior in work groups; careers in management, ethics and international management. Prerequisite: junior classification.

373. HUMAN RESOURCE MANAGEMENT. (3-0). Credit 3. Strategic issues in managing human resources; shared responsibilities of line managers and human resource staff for developing and implementing human resource policies and procedures; human resource planning; job design, analysis and evaluation; staffing; compensation; performance appraisal; training and development career management; labor relations; legal, ethical and international issues. Prerequisites: MARA 363 or approval of instructor.

401. BROKERAGE AND CHARTERING. (3-0). Credit 3. Operational and legal environment of ship brokerage and chartering; responsibilities of owner and charterer under various charter forms; American, British and Canadian acts governing charters and bills of lading; rules and regulations concerning loading and discharging. Prerequisites: NAUT 205 and MART 301.

402. INLAND WATERWAYS. (3-0). Credit 3. Development of inland waterways of the U.S. and federal policies relating to them. Port and terminal development, competition with other transportation forms, manpower, rates, environmental concerns and the impact of waterway systems on regional economies. Prerequisites: ECON 203.

424. ECONOMICS OF TRANSPORTATION. (3-0). Credit 3. Historical development, structure, function, and regulation of highway, rail, water, pipeline, and air transportation systems. Application of economic concepts and principles to transportation development and operations. Prerequisite: ECON 203 and senior classification or approval of instructor.

435. LABOR LAW AND POLICY. (3-0). Credit 3. Federal and state public policy and laws regulating human resource management including National Labor Relations Act, Railway Labor Act, Fair Labor Standards Act, employment discrimination statutes, statutes regarding public sector unionization, and other relevant legal authorities; various forms of dispute settlement including litigation, mediation, fact finding and arbitration; legal ramifications of strategic human resource management decision making. Prerequisite: senior classification or approval of instructor.

460. MANAGEMENT SYSTEMS AND CONTROL. (3-0). Credit 3. Application of management processes to complex interdisciplinary organizational environments through the study of program and project management. Adoptions of traditional management theories to the project environment. Student will be expected to master typical project management microcomputer software for project planning; resource allocation; project budgeting; and control of project cost, schedule and performance. Prerequisites: INFO 364, MARA 363 or approval of instructor.

466. STRATEGIC MANAGEMENT. (3-0). Credit 3. Strategic issues facing organizations, including top management decision making and social responsibility; environmental and industry analysis; establishing organizational mission and objectives; corporate, business and functional level strategy formulation; global and multidomestic strategies; strategic implementation and control; integrating operations, finance, marketing and human resource strategies; case analysis. Prerequisites: MARA 363, MKTG 321, INFO 364, FINC 341, and senior classification.

470. ENVIRONMENTAL LAW. (3-0). Credit 3. Designed to provide a broad background of basic statutes, regulations, and cases dealing with the major issues in international and federal environmental law. Specifically, the course will focus on pragmatic training in statutory, regulatory, and treaty reading and interpretation; analysis of administrative and legislative intent for law. Prerequisites: senior classification or approval of instructor.

485. DIRECTED STUDIES. Credit 1-4. Directed study on selected problems in the area of maritime administration not covered in other courses. Prerequisite: approval of MARA department head.

489. SPECIAL TOPICS. Credit 1-3. Study of selected topics in an identified area of maritime administration.

604. MARINE NATURAL RESOURCE ECONOMICS. (3-0) Credit 3. Critical evaluation of policies and procedures in the development and use of natural resources relevant to marine and maritime markets; identification of problems in resource exploration, development, and transportation; the political /economic decision-making processes; analytical tools used to make economic decisions in resource markets. Prerequisite: ECON 322 or its equivalent; graduate status or special approval.

### Maritime Systems Engineering (MASE)

213. PRINCIPLES OF MATERIALS ENGINEERING. (2-2) Credit 3. Description of properties of materials using a unified approach; discussion of the chemical structure, crystalline structure, microstructure, interface structure, and phase diagrams for materials; develop bulk properties and characteristics of metals, polymers, and ceramics; mechanical, electrical, magnetic, thermal, and optical properties for these materials. Prerequisites: ENGR 211, 212; PHYS 208; MATH 308 or registration therein.

214. MECHANICS OF DEFORMABLE BODIES. (3-0). Credit 3. Concepts of stress, strain and deformation. Factor of safety. Stress-strain relationships and material properties. Stress concentrations. Area moments of inertia. Axially loaded members, torsionally loaded members, bending of beams. Shear and moment diagrams. Stresses due to combined loading. Thin-walled pressure vessels. Transformation of stress including Mohr's circle. Beam deflections and buckling stability. Prerequisites: ENGR 221; MATH 308 or concurrent registration.

215. PRINCIPLES OF ELECTRICAL ENGINEERING (2-2). Credit 3. Fundamentals of electric circuit analysis, AC power, and electronics; intended as a terminal course in these areas for most engineering disciplines. Prerequisites: ENGR 211, 212; PHYS 208, MATH 308 or registration therein.

285. DIRECTED STUDIES. Credit 1-8. Directed study on selected current problems in the ocean and/or maritime industry. Offered to enable individuals or groups to undertake and complete with credit some specialized investigation not covered by other courses. Prerequisite: approval of department head.

301. DYNAMICS OF WAVES AND STRUCTURES. (3-0). Credit 3. Prediction of loads due to wind, current, and waves; introduction to concepts of linear structural dynamics and to the design of ocean structures; mooring and towing analysis; fluid-structure interactions; vibration of submerged structures. Prerequisites: CVEN 345; OCEN 300 or concurrent registration.

310. ENGINEERING ANALYSIS. (3-0). Credit 3. Application of numerical methods to ocean-related engineering problems; development, evaluation, and comparison of various techniques for root finding, curve fitting, numerical integration, simultaneous linear algebraic equations, matrix methods, probability and statistics, and ordinary differential equations in ocean-related engineering applications. Prerequisites: ENGR 111, 112 and MATH 308.

319. NAVAL ARCHITECTURE DESIGN I. (2-3). Credit 3. Introduction to Naval Architecture. Terminology. Hydrostatics and hydrostatic stability. Processes of the design of ships, semi-submersibles and underwater vehicles including layout, arrangements, construction and construction techniques. Hull design of ships, underwater vehicles and mobile offshore drilling units (MODUs). Prerequisites: ENGR 211, 214, CVEN 311, 345.

336. FLOW MEASUREMENT FUNDAMENTALS. (2-2). Credit 3. Introduction to fundamental principles of measuring fluctuating velocities in flows, emphasis on the properties of lasers particularly relevant to Laser Doppler Measurements; probe methods for velocity measurement. The laboratory includes the experimental investigation of surface waves and classic fluid dynamic problems. Prerequisites: PHYS 208, CVEN 311 or concurrent registration.

401. UNDERWATER ACOUSTICS. (3-0). Credit 3. Fundamentals of underwater acoustics, SONAR equations, propagation of underwater sound, acoustic transducers and arrays, noise in the ocean environment, design and

prediction of SONAR systems, ocean engineering applications of underwater sound. Prerequisites: CVEN 311, MASE 336.

405. FINITE ELEMENT ANALYSIS IN ENGINEERING DESIGN. (3-0). Credit 3. Introduction to the fundamental theory and techniques; direct approach and energy formulation; element equations, assembly and solution schemes; computer implementation, design considerations; applications to field problems; original computer project required. Prerequisites: CVEN 345, 346, ENGR 214, MASE 310.

407. DESIGN OF OCEAN ENGINEERING FACILITIES. (1-6). Credit 4. Design of structures, equipment and systems for the ocean; environmental, logistical, and reliability requirements. Complete design process followed through a group design project. Delineation of alternatives, constraints, economics and environmental consequences included to strengthen real-life problem solving skills. Prerequisites: CVEN 346, OCEN 300, 400.

410. MEASUREMENTS IN THE OCEAN LABORATORY. (0-3). Credit 1. Fundamental techniques and instrumentation for field and laboratory measurements pertaining to coastal and ocean engineering (e.g., currents, wave height, wave/sediment interaction, mass transport, surveying, etc) experiment planning; data analysis and presentation; written reports on methodology, analysis, and results of experiments. Prerequisites: OCEN 300, 400.

411. ENVIRONMENTAL NEARSHORE HYDRODYNAMICS. (3-0). Credit 3. Fundamentals of current and shallow water wave motions. Beach response to nearshore processes. Coastal sediment and pollutant transport including nearshore currents, longshore onshore-offshore transport and shoreline configuration; facilities for shoreline stabilization, backshore protection and inlet stabilization. Environmentally conscious coastal engineering design is emphasized. Prerequisite: OCEN 300.

415. OFFSHORE STRUCTURE DESIGN. (3-0). Credit 3. Design of large structures using diffraction analysis. Design project: Design of a fixed offshore structure including dynamics effects. Prerequisite: MASE 301.

421. NAVAL ARCHITECTURE DESIGN II. (2-3). Credit 3. Ship motion and mooring. Theory and practice of naval architecture, basic principles and design calculations. Hull structural design considerations, ship resistance and propulsion power prediction, propeller selection concepts, dynamic positioning systems, mobile offshore drilling unit (MODU) design considerations, practical design work on a vessel or MODU of the student's choosing under the guidance of the instructor. Prerequisites: MASE 319, CVEN 346, OCEN 462.

459. MECHANICAL VIBRATIONS. (3-0). Credit 3. Basic theory of vibrating systems with single and multiple degrees of freedom and principles of transmission and isolation of vibrations. Prerequisite: MASE 211, 310.

461. OCEAN INSTRUMENTATION AND CONTROL THEORY. (3-0). Credit 3. Electrical systems components; analog and digital filters-amplifiers; network analysis; instrument behavior and displacement, velocity, acceleration, force, and flow measurements; simple feedback and control theory for linear electromechanical systems; digital data acquisition. Prerequisites: PHYS 208 and ENGR 215.

482. SEMINAR. (1-0). Credit 1. State of technology topics in ocean engineering; professional ethics, membership in professional societies and professional registrations; case studies and lectures presented by staff and practicing engineers. Prerequisite: junior or senior classification.

483. MARINE FOUNDATION ANALYSIS AND DESIGN. (2-3). Credit 3. Design of foundations for onshore, alongshore, and offshore structures, including prediction of settlement and the bearing capacity of shallow and deep foundations; determination of earth pressure acting on retaining structures and design of steel and concrete bulkheads; design of pile foundations; and design of cofferdams and caissons. Laboratory tests conducted to determine the physical and engineering properties needed for application in geotechnical engineering design. Prerequisites: CVEN 344, CVEN 345, AND CVEN 346, CVEN 365.

485. DIRECTED STUDIES. Credit 1-8. Directed study on selected current problems in the ocean and/or maritime industry. Offered to enable individuals or groups to undertake and complete with credit some specialized investigation not covered by other courses. Prerequisite: approval of department head.

### Maritime Studies (MAST)

285. DIRECTED STUDIES. Credit (1-6). Individually supervised research or advanced study on restricted area not covered in regular courses.

289. SPECIALTOPICS. Credit (1-4). Selected topics in a identified area of maritime studies. May be repeated for credit.

411. INTERNATIONAL MARITIME CULTURE. (3-0) Credit 3. Strategies used in the exploitation of marine, coastal, and island habitats throughout human evolutionary history and the variety and complexity of adaptations in such environments. Classes will be devoted to lectures and group discussions with occasional slide or movie presentations.

481. SEMINAR IN MARITIME STUDIES. (1-0). Credit 1. This course is intended to provide students with the opportunity to conduct in-depth research on a particular issue, event, period, or people in maritime studies. This one-credit hour course is open to senior maritime studies majors or those who obtain instructor's approval.

485. DIRECTED STUDIES. Credit (1-6). Individually supervised research or advanced study on restricted area not covered in regular courses.

489. SPECIALTOPICS. Credit (1-4). Selected topics in a identified area of maritime studies. May be repeated for credit.

### Marketing (MKTG)

321. MARKETING. (3-0). Credit 3. Institutions, processes, and problems involved in transferring goods from producers to consumers; economic and social aspects. Prerequisite: ECON 202 and junior classification.

### Mathematics (MATH)

102. ALGEBRA. (3-0). Credit 3. Sets, structure of number system. Absolute values, solution sets of equations of second and higher degree, systems of equations, and inequalities. Relations and functions, graphical representations, variation, progressions, mathematical induction, determinants.

106. PLANE AND SPHERICAL TRIGONOMETRY. (4-0). Credit 4. Definitions of trigonometric functions; evaluation of functions of special angles, fundamental relations; solution of triangles; trigonometric reductions; angular measure; functions of composite angles; logarithms, inverse trigonometric functions; trigonometric equations; basic ideas and formulas of spherical trigonometry; solution of spherical trigonometry; solution of spherical triangles, application to terrestrial and astronomical triangles.

150. FUNCTIONS, TRIGONOMETRY, AND LINEAR SYSTEMS. (3-2). Credit 4. Graphs, functions, college algebra and trigonometry, linear systems and vectors.

151. ENGINEERING MATHEMATICS I. (3-2). Credit 4. Rectangular coordinates, analytical geometry, functions, limits, derivatives of functions, applications, integration, areas and volumes by integration. Prerequisites: High school algebra, trigonometry and geometry or satisfactory performance on qualifying exam. Credit will not be given for more than one of MATH 121, 131 142, 151, and 171.

152. ENGINEERING MATHEMATICS II. (3-2). Credit 4. Differentiation and integration techniques and their applications (area, volumes, work), improper integrals, approximate integration, analytic geometry, vectors, infinite series, power series, Taylor series, computer algebra (Maple). Prerequisite: MATH 151 or equivalent. Credit will not be given for both MATH 152 and 172.

161. ENGINEERING MATHEMATICS II. (3-0). Credit 3. Differentiation and integration techniques and their applications, improper integrals, approximate integration, analytical geometry, infinite series, power series, Taylor series. Prerequisite: MATH 151 or equivalent.

166. TOPICS IN CONTEMPORARY MATHEMATICS II. (3-0). Credit 3. Finite mathematics, matrix theory, probability theory, game theory. Prerequisites: high school algebra I, algebra II and geometry. Credit will not be given for more than one of MATH 141 and 166.

251. ENGINEERING MATHEMATICS III. (3-0). Credit 3. Vector calculus, calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line integrals, Stoke's theorems. Prerequisite: MATH 152 or 161 or equivalent.

285. DIRECTED STUDIES. Credit 1 or more. Special problems in mathematics not covered by any other course in the curriculum. Work may be in either theory or laboratory. Prerequisite: approval of department head.

308. DIFFERENTIAL EQUATIONS. (3-0). Credit 3. Linear ordinary differential equations, solutions in series, solutions using Laplace transforms, systems of differential equations. Prerequisite: MATH 251 or equivalent.

485. DIRECTED STUDIES. Credit 1 or more. Special problems in mathematics not covered by any other course in the curriculum. Work may be in either theory or laboratory. Prerequisite: approval of department head.

### Mechanical Engineering (MEEN)

363. DYNAMICS AND VIBRATION. (2-2). Credit 3. Application of Newtonian and energy methods to model dynamic systems (particles and rigid bodies) with ordinary differential equations; solutions of models using analytical and numerical approaches; interpreting solutions; linear vibrations. Prerequisites: ENGR 211, MATH 308.

### Meteorology (METR)

302. WEATHER REPORTS AND FORECASTING. (3-0). Credit 3. Basic description of atmospheric characteristics and processes relevant to the understanding of weather patterns and atmospheric principles.

### Microbiology (MICR)

351. FUNDAMENTALS OF MICROBIOLOGY. (3-4). Credit 4. Basic microbiology; comparative morphology, taxonomy, pathogenesis, ecology, variation and physiology of microorganisms. Prerequisites: CHEM 227, 237; three hours of biology; or approval of instructor.

### Nautical Science (NAUT)

103. MARITIME ORIENTATION AND LIFESAVING. (2-3). Credit 3. Introduction to the maritime industry, the ships, the seaman, and the purpose of the U.S. Merchant Marine. Shipboard nomenclature, cargoes, and recent trends in the marine industry. Practical lifeboat and lifesaving training for certification as Lifeboatman by the U.S. Coast Guard.

200. BASIC COMMUNICATIONS, NAVIGATION AND SEAMANSHIP. Credit 4. Practical application of student's classroom studies aboard training ship during first training cruise. Student completes basic projects in communications, navigation, seamanship and rules of the road. Prerequisites: NAUT 103, 203, 204 or permission of MART department head.

201. NAVAL ARCHITECTURE I. (3-2). Credit 4. Description of ship as self-sustaining unit. Shipbuilding nomenclature and dimensions, types of construction, and classification of merchant ships. Classification societies, shipbuilding materials and methods, and structural components of ships. Prerequisite: NAUT 103.

202. NAVAL ARCHITECTURE II. (3-0). Credit 3. Ship's lines drawing and form calculations; principles of flotation and buoyancy; inclining experiments, free liquids, transverse stability; motion of ships in waves, seaway and dynamic loads, ship structure tests. Prerequisite: NAUT 201.

203. SEAMANSHIP I. (2-3). Credit 3. Intermediate lifeboat, lifesaving and firefighting procedures. Practical use in lab of manila lines, wire, splicing, knots, block and tackle, cargo gear, anchoring, mooring, and steering

gear operations. Introduction to the international rules of the road. Projects aboard merchant, research and offshore oil vessels in the ports of Galveston and Texas City. Prerequisite: NAUT 103 or concurrent registration.

204. TERRESTRIAL NAVIGATION. (2-2). Credit 3. Fundamentals of piloting, chart construction and development, aids to navigation, useful publications, principles of magnetism and the magnetic compass, great circle, Mercator and middle latitude sailing. Prerequisites: algebra and trigonometry recommended.

205. INTRODUCTION TO SHIPS AND SHIPPING. (3-2). Credit 4. Introduction to the maritime industry and ships used in transportation of goods and services. Shipboard nomenclature, types and missions of merchant ships, shipbuilding nomenclature and dimensions, shipbuilding materials and methods, modes of cargo handling and their impact on ship design.

300. INTERMEDIATE COMMUNICATIONS, NAVIGATION AND SEAMANSHIP. Credit 4. Practical application of student's classroom studies aboard training ship during second training cruise. Student completes intermediate projects in communications, navigation, seamanship, and rules of the road. Thorough study made of U.S. Public Health requirements in first aid. Prerequisite: METR 302, NAUT 200, 301, 303 or permission of MART department head.

301. SEAMANSHIP II. (2-3). Credit 3. Mechanical appliances aboard ship, accident prevention, vessel sanitation, marine inspection laws and regulations, search and rescue procedures, communications. Prerequisite: NAUT 203 or concurrent registration.

302. SEAMANSHIP III. (1-3). Credit 2. Principles and methods of propulsion and steering of ships. Ship handling in narrow channels and heavy seas, docking, undocking, mooring and towing. Prerequisite: NAUT 202, 301 or concurrent registration.

303. CELESTIAL NAVIGATION. (2-3). Credit 3. Full range of celestial navigation. Survey of nautical astronomy, sight reduction, sextants, compass error determination, and solutions of the navigational triangle by various methods. Prerequisites: NAUT 200, 204 or permission of MART department head.

304. ELECTRONIC NAVIGATION. (2-2). Credit 3. Theory, operation and application of marine electronic navigation aids and systems; marine gyro compass, radio direction finder, Loran, Omega, Decca, satellite, echo sounder, Doppler and integrated navigation systems. Marine radar theory, operation and interpretation. Student examined for U.S. Coast Guard Certification as "Radar Observer" following completion of course. Prerequisite: NAUT 303.

305. SHIP CONSTRUCTION AND STABILITY. (3-3). Credit 4. Shipbuilding nomenclature, dimensions, construction and classification. Classification societies, shipbuilding materials and methods, structural components. Ship's line drawing and form calculations; principles of flotation and buoyancy, inclining experiments; free liquids; transverse stability, trim and longitudinal stability; motion of ship in waves, seaway and dynamic loads; ship's structure tests and propulsion. Prerequisites: NAUT 103, PHYS 201 or 218.

306. RADAR/ARPA. (3-3). Credit 4. Introduction to the theory, operation and interpretation of marine radar and automatic radar plotting aids (ARPA). Student examined for U.S. Coast Guard Certification as "RADAR Observer" and for Standards of Training and Certification and Watchkeeping (STCW) Radar and ARPA endorsements. Minimum grade of 70% required for USCG and STCW endorsements. Prerequisites: NAUT 200, PHYS 202 or approval of instructor.

307. GLOBAL MARITIME DISTRESS SAFETY SYSTEM. (3-3). Credit 4. Requirements, regulations, equipment, principles and hands-on operating procedures of each Global Maritime Distress Safety System subsystem, including: SARTS, EPIRBs, NAVTEX, INMARSAT, SAFETYNET, VHF Survival Craft Transceivers, DSC, and HF Radiotelephone. USCG and FCC certification as GMDSS Operator and Maintainer (USCG/FCC fees required to sit for certification examinations). Minimum passing grade 75%. Prerequisites: NAUT 300, PHYS 202 or 208.

400. ADVANCED COMMUNICATIONS, NAVIGATION AND SEAMANSHIP. Credit 4. Practical application of student's classroom studies aboard training ship during third training cruise. Student completes advanced projects in communications, navigation, seamanship and rules of the road. Prerequisites: NAUT 200, 300, 302, 304; MART 321, 406.

404. THE NAVIGATOR. (2-3). Credit 3. Intensive, in-depth review of the principles of electronic, celestial, and terrestrial navigation in preparation for the U.S. Coast Guard examination for Third Mate. Prerequisites: NAUT 204, 304, 400.

406. BRIDGE WATCHSTANDING. (1-3). Credit 2. Bridge Watchstanding (simulator-based training) is a Bridge Resource Management (BRM) capstone course designed to enhance the third mate candidate's decision-making skills as they apply to ship traffic and voyage planning situations. Practical application of the Nautical rules of the road and correct bridge procedures. Day and night open sea, coastal transit and harbor conditions will be simulated. Prerequisites: NAUT 304, 306, 400. MART 321.

### Naval Science (NVSC)

101. INTRODUCTION TO NAVAL SCIENCE. (2-1). Credit 2. Seapower and the naval service; mission, organization, regulations, and broad warfare components of the Navy; overview of officer and enlisted rank and rating structures, procurement and recruitment, training and education, promotion and advancement, and retirement policies. Basic tenets of naval courtesy and customs, discipline, naval leadership, and ship's nomenclature. Major challenges facing naval officers; areas of equal opportunity and drug/alcohol abuse. Prerequisite: approval of department head.

102. LEADERSHIP AND MANAGEMENT I. (3-1). Credit 3. Principles of leadership and management and their application to the duties and responsibilities of a junior naval officer; management theory, professional responsibility and human resource system programs; skills in leadership, goal setting and communication developed through guided participation in case studies and situational problems. Prerequisite: NVSC 101 or approval of department head.

200. NAVAL SCIENCE FOR THE MERCHANT MARINE OFFICER. (3-0). Credit 3. Organization of the U.S. Navy (including the U.S. Navy Control of Shipping Organization) with discussion of the Merchant Marine Naval Reserve commission in order to provide a sound basis for liaison between the U.S. Navy and the Merchant Marine. Seapower will be analyzed and naval damage control procedures and underway replenishment procedures will be introduced.

201. NAVAL SHIP SYSTEMS I. (3-0). Credit 3. Introduction to naval ship systems. Types, structure, and purpose of naval ships; ship propulsion systems; auxiliary power systems; interior communication and damage control; elements of ship design and stability characteristics. Prerequisite: NVSC 101 or approval of department head.

285. DIRECTED STUDIES. Credit 1-3. Directed study in problems in the field of naval science not covered by other courses in department. Prerequisite: senior classification and approval of department head.

302. NAVIGATION AND NAVAL OPERATIONS II. (2-2). Credit 3. Duties and responsibilities of the OOD (u/w), navigator/bridge watch team during routine and special at sea evolutions; relative motion, formations tactics, internationals and inland rules of the nautical road and applied aspects of ship handling; familiarization with naval communications and messages. Prerequisite: NVSC 301.

401. NAVAL SHIP SYSTEMS II. (3-0). Credit 3. Theory and principles of operation of naval weapons systems; types of weapons and fire control systems, capabilities and limitations, theory of target acquisition, identification and tracking, trajectory principles, and basics of naval ordinance. Prerequisite: NVSC 102 or approval of department head.

402. LEADERSHIP AND ETHICS. (3-1). Credit 3. Practical applications of leadership and management as an academic discipline; interpersonal behavior and performance evaluation; skills in leadership, control, direction, planning, communication, counseling and discipline developed through guided participation in case studies and situational problems. Prerequisite: NVSC 102 or approval of department head.

485. DIRECTED STUDIES. Credit 1-3. Directed study in problems in the field of naval science not covered by other courses in department. Prerequisites: senior classification and approval of department head.

## Ocean Engineering (OCEN)

300. OCEAN ENGINEERING WAVE MECHANICS. (3-0). Credit 3. Physical and mathematical fundamentals of ocean wave behavior. Mechanics of wave motion. Use of statistics and probability to develop design wave criteria. Prerequisite: CVEN 311 or MEEN 213.

400. BASIC COASTAL ENGINEERING. (3-0). Credit 3. Mechanics of wave motion. Wave refraction, diffraction, and reflection. Wave forecasting. Shore processes. Planning of coastal engineering projects. Design of seawalls, breakwaters, and fixed offshore installations. Offshore pipelines. Dredging. Control of oil spills in estuaries and at sea. Prerequisites: CVEN 311; OCEN 300.

462. HYDROMECHANICS. (3-0). Credit 3. Kinematics of fluids, incompressible, irrotational and turbulent flow. Navier-Stokes equations, flow of viscous fluids. Prerequisites: CVEN 311; MATH 308.

## Oceanography (OCNG)

251. OCEANOGRAPHY. (3-0). Credit 3. Overview of the ocean environment; interrelation of the subdisciplines of ocean sciences; importance of the oceans to human beings; human impact on the oceans. Prerequisite: Concurrent registration in ONCG 252 if necessary for meeting the 8 credit hour science core curriculum requirement.

252. OCEANOGRAPHY LABORATORY. (0-3). Credit 1. Practical laboratory experiments and exercises demonstrating principles of ocean sciences. May include weekend field trips. Prerequisite: OCNG 251 or concurrent registration.

285. DIRECTED STUDIES. Credit 1-4. Individually supervised research or advanced study on restricted area not covered in regular courses.

401. INTRODUCTION TO OCEANOGRAPHY. (3-0). Credit 3. Quantitative survey of interdisciplinary relationship between biological, chemical, geological, geophysical, and physical aspects of the ocean. Prerequisites: Approval of instructor; junior or senior classification; MATH 131 or equivalent and CHEM 101.

420. INTRODUCTION TO BIOLOGICAL OCEANOGRAPHY. (3-0). Credit 3. Biological aspects of the marine environment. Use of the sea and problems of productivity, pollution, fouling and boring organisms. Prerequisites: BIOL 114; junior or senior classification.

485. DIRECTED STUDIES. Credit 1-4. Individually supervised research or advanced study on restricted area not covered in regular courses.

## Philosophy (PHIL)

240. INTRODUCTION TO LOGIC. (3-0). Credit 3. Methods and principles used to distinguish between correct and incorrect reasoning; uses of language, informal and formal fallacies, Venn diagrams, truth-tables, symbolic notation, formal deductive proof, induction.

314. ENVIRONMENTAL ETHICS. (3-0). Credit 3. Moral basis of duties to preserve or protect plants, animals and environmental systems; foundations of environmental law and policy; the idea of nature in philosophy; critique of social and economic analyses of environmental values. Prerequisite: sophomore classification or approval of instructor.

## Physics (PHYS)

201. COLLEGE PHYSICS. (3-3). Credit 4. Fundamentals of classical mechanics, heat, and sound. Prerequisite: MATH 150 or equivalent.

202. COLLEGE PHYSICS. (3-3). Credit 4. Continuation of PHYS 201. Fundamentals of classical electricity and light; introduction to contemporary physics. Prerequisite: PHYS 201.

208. ELECTRICITY AND OPTICS. (3-3). Credit 4. Continuation of PHYS 218. Electricity, magnetism and introduction to optics. Primarily for engineering students. Prerequisites: MATH 152, 161 or 172 and PHYS 218.

218. MECHANICS. (3-3). Credit 4. Mechanics for students in science and engineering. Prerequisite: MATH 151 or concurrent registration.

219. ELECTRICITY. (3-3). Credit 4. Continuation of PHYS 218. Electricity, magnetism and introduction to optics. Prerequisite: MATH 161 or equivalent; PHYS 218.

285. DIRECTED STUDIES. Credit 1-4. Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum. Prerequisite: approval of department head.

485. DIRECTED STUDIES. Credit 1-4. Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum. Prerequisite: approval of department head.

### Political Science (POLS)

206. AMERICAN NATIONAL GOVERNMENT. (3-0). Credit 3. Survey of American national government, politics, and constitutional development.

207. STATE AND LOCAL GOVERNMENT. (3-0). Credit 3. Survey of state and local government and politics with special reference to the constitution and politics of Texas.

331. INTRODUCTION TO WORLD POLITICS. (3-0). Credit 3. Analysis of contemporary world from point of view of nation-state; political problems, factors involved in foreign policies and relations of nations. Prerequisite: POLS 206 or approval of department head.

340. INTRODUCTION TO PUBLIC ADMINISTRATION. (3-0). Credit 3. American public administration; development of public service; theories of organization and management, executive leadership and policy formation, bureaucratic politics, administrative accountability, and personnel practices. Prerequisite: POLS 206 or approval of department head.

347. POLITICS OF ENERGY AND THE ENVIRONMENT. (3-0). Credit 3. U.S. energy and environmental problems and politics and the political, legal, and institutional factors influencing their development and implementation. Prerequisites: POLS 206 and approval of department head.

### Psychology (PSYC)

107. INTRODUCTION TO PSYCHOLOGY. (3-0). Credit 3. Introductory course dealing with elementary principles of human behavior.

306. ABNORMAL PSYCHOLOGY. (3-0) Credit 3. Survey of behavior pathology; functional and organic psychoses, psychoneurosis, character disorders, psychophysiological disorders, alcohol and drug addiction and mental retardation; therapeutic and diagnostic methods. Prerequisites: junior classification or PSYC 203 and 204.

### Recreation, Park and Tourism Sciences (RPTS)

301. LEISURE AND OUTDOOR RECREATION. (3-0) Credit 3. Development and administration of recreational facilities in natural and indoor settings. Development of community, land and water resources to provide recreational opportunities in which environmental factors play major roles. Fundamental concepts of recreation and leisure and their roles in modern American culture.

### Spanish (SPAN)

101. BEGINNING SPANISH I. (3-2). Credit 4. Elementary language study with oral, written and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory. Students with prior instruction are required to take the Spanish Placement Test before enrolling for the first time in college Spanish course.

102. BEGINNING SPANISH II. (3-2). Credit 4. Continuation of SPAN 101. Part of class preparation will be done in language laboratory. Prerequisite: SPAN 101. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling the first time in a college Spanish course.

201. INTERMEDIATE SPANISH I. (3-0). Credit 3. Readings of average difficulty. Review of grammar; practice in conversation and composition. Prerequisite: SPAN 102. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

202. INTERMEDIATE SPANISH II. (3-0). Credit 3. Continuation of SPAN 201 with more advanced material. Prerequisite: SPAN 201. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

### Speech Communication (SCOM)

203. PUBLIC SPEAKING. (3-0). Credit 3. Training in speeches of social and technical interest designed to teach students to develop and illustrate ideas/ information and to inform, stimulate and persuade their audiences.

### Statistics (STAT)

201. ELEMENTARY STATISTICAL INFERENCE. (3-0). Credit 3. Data collection, tabulation and presentation. Elementary description of the tools of statistical inference; probability, sampling and hypothesis testing. Applications of statistical techniques to practical problems. May not be taken for credit after any other course in statistics or BANA 303 has been taken.

### Teacher Education (TEED)

323. PRINCIPLES AND PRACTICES OF TEACHING. (2-3) Credit 3. Secondary school instructional design. Structure and management of secondary schools; planning, organizing and evaluating learning activities; unit and lesson preparation; diagnosis of learner differences; alternative instructional strategies; mainstreaming; ethical and legal aspects of teaching; responses to reading problems of secondary school learners. For students pursuing a Secondary Certification with the Special Education Delivery System, the requirements of this course may be met by completing SPED 415. Prerequisites: junior classification; admission to teacher education.

### Teacher Education Field Based (TEFB).

201. SELF-DIRECTED EXPERIENCES WITH ADOLESCENTS. (1-3) Credit 1. Study of adolescents in diverse school and community settings; issues in physical, mental, social and emotional development; issues relating to racism, sexism, and cultural diversity; development, presentation, and defense of portfolio required. Attendance at seminars required. Phase I of secondary program. Must be taken on a satisfactory/unsatisfactory basis.

406. SCIENCE IN THE MIDDLE AND SECONDARY SCHOOL. (2-6) Credit 3. Methods course for the prospective secondary teacher in the physical and biological sciences; implementation of contemporary curricula. Phase IV, Practicum I. Prerequisite: Completion of Phases I, II, and III of the secondary program, admission to teacher education, and enrollment in science related teaching field; successful completion of EDTC competency test.

429. SUPERVISED STUDENT TEACHING. (0-36) Credit 9. Observation and participation in an accredited public school classroom; techniques of teaching student's teaching fields, and appropriate instructional strategies for assigned student population. For students pursuing the extended program option in interdisciplinary studies. Prerequisites: admission to teacher education program and student teaching.

### **Veterinary Pathobiology (VTPB)**

409. INTRODUCTION TO IMMUNOLOGY. (3-0) Credit 3. Diverse concepts relative to immunologic mechanisms inherent to domestic and laboratory animals. Prerequisites: VTPB 405 or approval of instructor and advanced classification.

### **Wildlife and Fisheries Science (WFSC)**

420. ECOLOGY FOR TEACHERS. (3-0). Credit 3. Lectures, discussions, and readings in principles of ecology and their application in today's problems in environmental conservation. Prerequisites: junior or senior classification.

### **Zoology (ZOOL)**

107. ZOOLOGY. (3-3). Credit 4. Structure, physiology and development of animals; emphasis on vertebrate animals. May not be used for credit in MARB, MARE, MARB/LO, MARS or MARS/LO degree programs. (Not open to students who have taken BIOL 113 and 114.)

# THE FACULTY

The faculty and administrative positions are current as of Spring, 2002. Figures in parentheses indicate date of first appointment at the University and date of appointment to present positions, respectively. An asterisk indicates a graduate teaching appointment and a double asterisk indicates a pending graduate teaching appointment.

- ALVARADO-BREMER, JAIME, Assistant Professor of Marine Biology, Wildlife and Fisheries Sciences\* and Marine Sciences\*\* (1999). B.S., Universidad, Autonoma Metropolitana, Mexico, 1985; M.S., Ph.D., University of Toronto, 1988, 1994.
- ANIS, AYAL, Assistant Professor of Oceanography\* and Marine Sciences\*\* (2000). B.S., Tel-Aviv University, 1982; M.S., Hebrew University, 1984; Ph.D., Oregon State University, 1993.
- ATKINSON, CHRISTI L., Lecturer in General Academics (Kinesiology) (2000). B.S., Texas A&M University, 1997.
- BALABAN, ALEXANDRU, Professor of Marine Sciences\*\* (2000). Diploma, Radiochemist, Ph.D., Polytecnic University, Bucharest, Romania, 1953, 1957, 1959.
- BALDWIN, JANETTA, Senior Lecturer in General Academics (Kinesiology) (1980, 1994). B.S., University of Texas, 1969; M.S., Texas A&M University, 1980.
- BATEMAN, CRAIG A., Lecturer in Maritime Systems Engineering (2000). B.S., University of Michigan, 1979; M.S., Naval Postgraduate School, 1993.
- BOURGEOIS, PETER J., Lecturer in Marine Transportation (1991). B.S., U.S. Merchant Marine Academy, 1956.
- BROWN, PHILIP R., Assistant Professor of General Academics, (Math) (2001). BS, University of Witwatersrand, Johannesburg, South Africa, 1991; MS University of Witwatersrand, Johannesburg, South Africa 1993; Ph.D, Texas A&M University, Mathematics, 2000.
- BURKE, JANE A., Lecturer in General Academics, (Math) (2001). B.S., University of Texas, Edinburg, 1972; M.B.A., University of Texas, Edinburg, 1987; M.S., University of Houston at Clear Lake, 2000.
- BUTTS, JAMES L., Lecturer in General Academics (Kinesiology) (1998). B.S., Ithaca College, 1969; M.S., University of Arizona, 1980; Ed.D., Texas A&M University, 1985.
- CARHART, JOHN W., Lecturer in General Academics (Political Science) (1988). B.A., M.A., Southwest Texas State University, 1981, 1988.
- CHANG, TYNE-HSIEN (TED), Associate Professor of Maritime Systems Engineering (1981). B.S., National Chen-kung University, 1974; M.S., Ph.D., University of Florida, 1978, 1981.
- CIMINELLO, VITO J., JR., Lecturer in Maritime Administration (1994). B.A., Brown University, 1977; M.S., Northwestern University, 1979.
- CLAYTON, WILLIAM H., President Emeritus (1971) (1987). B.S., Bucknell University, 1949; Ph.D., Texas A&M University, 1965.
- COLE, COLLIER M., Lecturer in General Academics (Psychology) (1983). B.A., University of California at Los Angeles, 1971; M.A., Ph.D., University of Houston, 1973, 1976.

- COLEMAN, CHARLES H., Jr., Lecturer in Marine Sciences and Director of the Geology Laboratory (1981, 1992). B.S., Texas A&M University, 1975; M.S., University of Houston at Clear Lake, 1986.
- COLEMAN, CHERYL L., Lecturer in General Academics (Kinesiology) (1997). B.S., United States Naval Academy, 1984; J.D., Northwestern University, 1993.
- COLEMAN, GERARD T., Senior Lecturer in Marine Engineering Technology (1996). B.S., U.S. Naval Academy, 1980; M.S., George Washington University, 1996.
- COTTEN, CAROL L., Assistant Professor of General Academics (English) (2001). B.S., University of Texas, 1972; M.Ed., University of Houston at Victoria, 1982; Ed.D., University of Houston, 2000.
- COYLE, ROBERT A., Lecturer in General Academics (History) (2000). B.A., Achreiner College, 1990; M.A., Marquette University, 1992.
- CURLEY, STEPHEN J., Professor of General Academics (English) (1973, 1996). B.A., Fordham University, 1968; Ph.D., Rice University, 1974.
- DAVIS, RANDALL W., Professor of Marine Biology and Wildlife and Fisheries Sciences\* (1990, 1994). B.S., University of California, Riverside, 1974; Ph.D., University of California, San Diego, 1980.
- DAVISON, DON E., Lecturer in Maritime Administration (2002). B.S., Southern Methodist University, 1975; M.A., University of Texas, 1977; M.B.A., Southern Methodist University, 1989.
- DELLAPENNA, TIMOTHY M., Assistant Professor of Marine Sciences\*\* and Oceanography\* (Geology) (1999). B.S., Michigan State University, 1986; M.S. Western Michigan University, 1993; Ph.D., College of William and Mary, 1999.
- ESTES III, ERNEST L., Professor of Marine Sciences\*\* and Head of Marine Sciences (1976, 1987, 1996). B.S., Lawrence University, 1965; M.S., Duke University, 1967; Ph.D., University of North Carolina, 1971.
- EVANS, WILLIAM E., Professor Emeritus of Marine Sciences\*\*, Oceanography\*, Wildlife and Fisheries Sciences\* and Marine Biology (1989, 1989, 1999). B.S., Bowling Green State University, 1953; M.A., Ohio State University, 1954; Ph.D., University of California at Los Angeles, 1975.
- FANNING, KARL P., Lecturer in Marine Transportation (2001). B.S., Texas A&M University, 1967; M.A., Texas A&M University, 1977.
- FIEGLEIN, J. MICHAEL, Lecturer in Maritime Administration (1999). B.S.M.E., University of Houston, 1970; J.D., Villanova School of Law, 1974.
- FIEGLEIN, SUSAN A., Lecturer in General Academics (Mathematics) (1999). B.A., College of William and Mary, 1964.
- FITZHUGH III, THOMAS C., Lecturer in Maritime Administration (1996). B.S., Texas A&M University, 1971; J.D., University of Texas, 1976.
- FOLDEN, CHARLES A., Lecturer in Marine Sciences (1980). B.S., California State University, Long Beach, 1975; M.A., Governors State University, 1979.
- GEORGE, GINA, Lecturer and Technical Services Librarian (1999). B.A., B.S., M.S.L.S., University of North Texas, 1993, 1993, 1997.

- GILL, GARY A., Associate Professor of Marine Sciences\*\* and Oceanography\* (1992, 1996). B.S., University of Washington, 1976; M.S., Ph.D., University of Connecticut, 1980, 1986.
- GLENN, WILLIAM, Lecturer in Maritime Administration and Marine Transportation (1997). B.S., Texas A&M University, 1981; J.D., Franklin Pierce Law Center, 1992.
- GRACIA, PETE A., Lecturer in General Academics (Mathematics) (1993). B.S., Lamar University, 1959; M.S., University of Houston at Clear Lake, 1991.
- GRIFFIN, LAWRENCE L., Associate Professor of Marine Sciences\*\* and Oceanography\* (Chemistry) (1976, 1984). B.A., M.S., Ph.D., University of Texas, 1962, 1965, 1972.
- HARK, JOHN F., Lecturer in Maritime Administration (2002). B.S., Texas A&M University, 1989.
- HARPER, DONALD E., JR., Professor of Marine Biology and Biology\* (1975, 1997). B.S., University of Miami, 1963; M.S., Ph.D., Texas A&M University, 1966, 1970.
- HAUPT, KARL H., Lecturer in Marine Transportation (1995). B.S. Texas A&M University, 1981.
- HAYMES, WILLIAM E., Lecturer in Marine Sciences and Director of the Physics Laboratory (1989, 1992). B.S., M.S., University of Missouri-Rolla, 1964, 1971; Ph.D., University of Manchester, England, 1976.
- HITE, GERALD E., Professor of Marine Sciences\*\* (1980, 1998). B.S., Case Western Reserve, 1962; M.S., Ph.D., University of Illinois, 1965, 1967; Habilitation, Universitat Kaiserslautern, 1974.
- HORNING, MARKUS, Associate Research Scientist, Department of Wildlife and Fisheries Sciences\* (1996) Dip., University of Freiburg, 1988; Doct., University of Bielefeld, 1992
- ILIFFE, THOMAS M., Associate Professor of Marine Biology, Wildlife and Fisheries Sciences\* and Oceanography\* (1989, 1997). B.S., Penn State University, 1970; M.S., Florida State University, 1973; Ph.D., University of Texas Medical Branch, 1977.
- JAMES, ARTHUR P., Associate Professor of Maritime Administration (1995, 2001). B.A., Birmingham-Southern College, 1971; M.A., University of Alabama, 1974; Ph.D., University of Missouri-Columbia, 1989.
- JOHNSON, THOMAS S., Associate Professor of General Academics (English) (1974, 1981). B.A., Loyola University of Los Angeles, 1966; M.A., University of California at Los Angeles, 1968; Ph.D., University of Texas, 1973.
- JONES, GLENN, Professor of Marine Sciences\*\* and Oceanography\* (1996). B.A., University of Rhode Island, 1977; M.S., Columbia University, 1979; Ph.D., Columbia University, 1983.
- JONES, VICTORIA L., Lecturer in Maritime Systems Engineering, (1993). B.S., Texas A&M University, 1991; M.S., University of Florida, 1993.
- KANZ, JAMES E., Associate Professor of Marine Biology and Biology\* (1978, 1985). B.A., University of Washington, 1966; Ph.D., Tufts University, 1973.
- KEMP, WALTER M., Professor of Biology\* (1975), Vice President and C.E.O. (1997). B.S.E. Abilene Christian University, 1966; Ph.D., Tulane University, 1970.
- KENYON, LISA O., Lecturer in Marine Biology (2001). B.S., University of Missouri-Kansas City, 1992; M.S., Texas A&M University, 1997.

- KLEIN, DOUGLAS J., Professor of Marine Sciences\*\* and Oceanography\* (Chemistry, Physics) (1979, 1987). B.S., Oregon State University, 1965; M.A., Ph.D., University of Texas, 1967, 1969.
- KNOCK, SUSAN L., Lecturer in Marine Sciences\*\* and Director of Chemistry Laboratories (1996). B.A., Colorado State College, 1975; Ph.D., University of Texas Medical Branch, 1988.
- KNOX, KRIS J., C.P.A., Lecturer in Maritime Administration (1984). B.B.A, M.B.A., University of Houston, 1979,1984; Ph.D., University of Texas Health Science Center at Houston, 1992.
- KUHLMAN, DEBORAH J., Lecturer in General Academics (English) (1986). B.A., Texas Christian University, 1970; M.A., University of Arkansas, 1980; Ph.D., Texas Christian University, 1985.
- LANDRY Jr., ANDRÉ M., Professor of Marine Sciences\*\*, Wildlife and Fisheries Sciences\* and Marine Biology (1977, 1991). B.S., Tulane University, 1968; M.S., Ph.D., Texas A&M University, 1971, 1977.
- LANG, DONNA C., Lecturer in Maritime Administration (1996). B.S., Texas A&M University, 1988; M.A. University of Houston at Clear Lake, 1992; Ed.D., University of Houston, 2000.
- LANG, VICTOR J., Lecturer in General Academics (Speech) (1997). B.A., University of Texas, 1960.
- LESKO, MELANIE J., Senior Lecturer in Marine Sciences\*\* (Chemistry) (1983, 1991). Associate Department Head (1996). B.S., Lamar University, 1972; Ph.D., University of Houston, 1977.
- LINTON, THOMAS LARUE, Senior Lecturer in Marine Sciences\*\* and Wildlife and Fisheries Sciences\*. (1981, 1989) B.S., Lamar University, 1959; M.S., University of Oklahoma, 1961; Ph.D., University of Michigan, 1965.
- LOFFREDO, VINCENT J., Lecturer in General Academics (Kinesiology) (2000). B.S., Syracuse University, 1991; M.Ed., University of Houston, 1993; Ed.D., University of Houston, 2001.
- LUKENS, RICHARD W., Department Head, Marine Engineering Technology (1997). Department Head, Marine Transportation (1998), Superintendent, Texas State Maritime Program (1999). B.S., University of Oklahoma, 1976; M.S., Naval Post Graduate School, 1983.
- MACEO, DEBRA, Lecturer in General Academics (Kinesiology) (1994). B.S., Lamar University, 1975; M.A., University of Houston, 1995.
- MARK, SAM, Assistant Professor of General Academics (Anthropology/Archeology) (2001). B.S., Ball State University, 1980; M.A., Ph.D., Texas A&M University, 1993, 2000.
- MARSHALL, CHRISTOPHER D., Assistant Professor of Marine Biology and Wildlife and Fisheries Science\* (2001). B.S., Virginia Polytechnic Institute and State University, 1990; M.S., Nova Southeast University Oceanographic Center, 1992; Ph.D., University of Florida, 1997.
- MAYFIELD, SARA C., Lecturer in Marine Sciences (2000). B.A., University of Oklahoma, 1966.
- MCCAULEY, ANNE, Lecturer in General Academics (English) (2000). B.A., M.A., Ph.D., University of Dallas, 1987, 1989, 1993.
- MCCLOY, JAMES M., Professor of Marine Sciences\*\* (Marine Geography). Associate Vice President for Research and Academic Affairs (1971, 1984, 1999). B.A., State College at Los Angeles, 1961; Ph.D., Louisiana State University, 1969.

- MCGONAGLE, W. Brad, Lecturer in Maritime Administration (2001). B.B.A. (Management), B.B.A. (Marketing), M.S., Ph.D., (1990, 1992, 1993, 1996), Texas A&M University.
- MCMULLEN, WILLIAM T., Professor of Maritime Administration and Interim Department Head, (1995, 2000). B.S., State University of New York Maritime College, 1964; M.B.A., University of Houston, 1973; Ph.D., University of Wales, 1993.
- MERIDA, ABDELLA., Lecturer in General Academics (Spanish) (2000). M.A., Universidad Pedagogica Experimental, Libertador, Venezuela, 1976.
- MERRELL, WILLIAM J., Professor of Marine Sciences,\*\* (1987, 1992), B.S., M.A., Sam Houston State University, 1965, 1967; Ph.D. Texas A&M University, 1971.
- MILLER, MICHAEL B., Lecturer in Marine Transportation (2001). B.S. Texas A&M University, 1981.
- MOHLER, ROBERT, Lecturer in Marine Sciences (Marine Geography) 2001. M.S., University of Houston at Clear Lake, Ph.D., Texas A&M University.
- OERTLING, THOMAS J., Lecturer in General Academics (Nautical Archaeology) (2000). B.S., Tulane University, 1977; M.A., Texas A&M University, 1984.
- PANCHANG, VIJAY G., Professor of Maritime Systems Engineering and Department Head (2002). B.S., University of Poona, India, 1980; M.S., University of Maine, 1982; Ph.D., University of Maine, 1985.
- PASCALI, RARESH, Senior Lecturer in Marine Engineering Technology (1999). B.S., Polytech University, Brooklyn, N.Y., 1990; M.S., Polytechnic University, Farmingdale, N.Y., 1993.
- PEARL, FREDERIC B., Assistant Professor of General Academics (Anthropology) (2000). B.A., San Diego State University, 1991; M.A., Texas A&M University, 1997, Ph.D., Texas A&M University, 2001.
- PENUEL, VIC, Lecturer in General Academics (English) (1994). B.A., M.A., University of Houston at Clear Lake, 1989, 1994.
- PERRIGO JR., JAMES, Lecturer in Marine Sciences (Chemistry) (1983, 1997). B.S., Texas A&M University, 1981.
- RAVENS, THOMAS M., Assistant Professor of Maritime Systems Engineering and Civil Engineering\* (1999). B.E., B.A., M.B., Dartmouth College, 1983; M.A., University of Massachusetts, 1990; Ph.D., Massachusetts Institute of Technology, 1997.
- RAY, SAMMY M., Professor Emeritus of Marine Biology and Wildlife and Fisheries Sciences\* (1990). B.S., Louisiana State University, 1942; M.S., Ph.D., Rice University, 1952, 1954.
- ROOKER, JAY R., Assistant Professor of Marine Sciences\*\*, Wildlife and Fisheries Sciences\* and Marine Biology (1998). B.A., Gustavus Adolphus College, 1985; M.S., University of Puerto Rico, 1991; Ph.D., University of Texas, 1997.
- ROTH, AUGUSTA D., Lecturer in Marine Transportation (2000). B.S., Texas A&M University, 1996.
- RYAN, JAMES G., Associate Professor of General Academics (History) (1990, 1996). B.A., M.A., University of Delaware, 1970, 1973; M.A., Ph.D., University of Notre Dame, 1975, 1981.
- SANTSCHI, PETER H., Professor of Marine Sciences\*\* and Oceanography\* (1988). B.S., Gymnasium Berne, Switzerland, Matura, 1963; M.S., Ph.D., University of Berne, 1971, 1975; Privatdozent, Switzerland Federal Institute of Technology, 1984.

SAUNDERS, LLOYD H., Lecturer in Maritime Administration (2002). B.A., University of North Carolina (Wilmington), 1966; Ph.D., University of Waterloo (Canada), 1970.

SCANIO, STEVEN J., Lecturer in Maritime Systems Engineering (1999). B.S., Texas A&M University, 1991; M.S., University of Houston, 1996.

SCHLEMMER II, FREDERICK C., Associate Professor of Marine Sciences\*\* and Oceanography\* (1978, 1985). B.S., U.S. Naval Academy, 1965; M.A., University of South Florida, 1971; Ph.D., Texas A&M University, 1978.

SCHMALZ, THOMAS G., Professor of Marine Sciences\*\* and Oceanography\* (Chemistry, Computer Science) (1981, 1996). B.S., Montana State University, 1970; Ph.D., University of Illinois, 1975.

SCHWARZ, JOHN R., Professor of Marine Biology and Oceanography\* (1976, 1986). B.S., Ph.D., Rensselaer Polytechnic Institute, 1967, 1972.

SEITZ, WILLIAM A., Professor of Marine Sciences\*\* and Oceanography\* (Chemistry, Computer Science) (1977, 1988). B.A., Rice University, 1970; Ph.D., University of Texas at Austin, 1973.

SIMMONS, CHRISTOPHER S., Instructor (2000). Department of Naval Science. B.S., Texas A&M University, 1996.

STAFFORD, DAVID C., Instructor (2001). Department of Naval Science. A.A., Columbia, 1995. Certified U.S. Naval Instructor, 2000.

STUNZ, GREGORY W., Lecturer in Marine Biology (2000). B.S., University of Texas, San Antonio, 1990; M.S., Ph.D., Texas A&M University, 1995, 1999.

SUCHON, MARK T., Lecturer in Maritime Administration (2002). B.S.M.E., Massachusetts Institute of Technology, (1976); M.B.A., University of Chicago, 1981.

SUEN, CHING Y., Professor of General Academics (Mathematics) (1984, 1998). M.S., Tsing Hua University, 1978; Ph.D., University of Houston, 1983.

SZUCS, JOSEPH M., Professor of General Academics (Mathematics) (1980, 1991). M.S., Ph.D., Szeged University, 1965, 1967.

TABER, DANIEL S., Assistant Professor of General Academics, (English) (2001). B.A., University of Texas, Austin, 1991; M.A., University of Texas, El Paso, 1995, Ph.D., University of Houston, 2000.

THOMAS, MICHAEL, Laboratory Instructor for Marine Sciences, (Chemistry) (2001). B.S., Texas A&M University at Corpus Christi, 1998, Ph.D., University of Texas Medical Branch, 2003.

TREGLIA, VINCENT A., Lecturer in Marine Engineering Technology (2001). B.S., State University of New York Maritime College, 1966.

VON ZHAREN, WYNDIYLN M., Professor of Maritime Administration and Marine Sciences\*\*, Wildlife and Fisheries Sciences\* and Oceanography\* (1990, 2000). B.A., M.Ed., Ed.D., (1970, 1971, 1976), University of Florida; J.D., University of South Carolina Law School, 1987; LL.M., University of Texas, 1998.

WADDELL JR., MATHIS T., Lecturer in General Academics (Political Science) (1995). B.A., M.A., University of Texas, 1962, 1963.

- WALSH, BETH W., Lecturer in General Academics (English) (1999). B.A., M.P.A., University of Texas, 1984, 1986; M.L.A., University of St. Thomas, 1997.
- WARDLE, WILLIAM J., Associate Professor of Marine Biology and Wildlife and Fisheries Sciences\* (1973, 1983). B.S., Lynchburg College, 1963; M.S., Ph.D., Texas A&M University, 1970, 1974.
- WATERS, JEFFREY P., Lecturer in Marine Sciences (Remote Sensing) (2002). B.A., University of Southern Maine, 1985; M.S., Northern Arizona University, 1988; Ph.D., University of New Orleans, 2000.
- WATSON, DIANE B., Lecturer in Library Science (1988). B.S., University of Oklahoma, 1968; M.L.S., Vanderbilt University/Peabody College, 1973.
- WEBB, JAMES W., Associate Professor of Marine Biology and Rangeland Ecology and Management\* (1978, 1988). B.S., University of South Carolina, 1966; M.S., University of Georgia, 1973; Ph.D., Texas A&M University, 1977.
- WIEST, NATALIE H., Lecturer and Library Director (1982). B.A., Pennsylvania State University, 1971; M.S., Drexel University, 1973; M.S., University of Tennessee, 1980.
- WILLETT, DONALD E., Associate Professor of General Academics (History) (1985, 1993). B.A., St. Edward's University, 1972; M.A., Stephen F Austin University, 1976; Ph.D., Texas A&M University, 1985.
- WURSIG, BERND W., Professor of Marine Biology and Wildlife and Fisheries Sciences\* (1989). B.A., College of New Rochelle, 1969; B.S., Ohio State University, 1971; Ph.D., State University of New York, Stony Brook, 1978.

# Texas Common Course Numbering System

The Texas Common Course Numbering System (TCCNS) has been designed for the purpose of aiding students in the transfer of general academic courses between colleges and universities throughout Texas. Common courses are freshman and sophomore academic credit courses that have been identified as common by institutions that are members of the common course numbering system. The system ensures that if the student takes the courses the receiving institution designates as common, then the courses will be accepted in transfer and the credit will be treated as if the courses had actually been taken on the receiving institution's campus.

The table below lists the courses Texas A&M University has identified as common and their TCCNS equivalents. Before using this table students should be sure that the institution they attend employs the TCCNS.

The current version of this document may be found on the Office of Admissions and Records Internet site at [www.tamu.edu/admissions/undergrad/tccns.shtml](http://www.tamu.edu/admissions/undergrad/tccns.shtml).

**NOTES:**

1. The sequence of calculus courses for science and engineering majors may be offered in several ways. The credit value of these courses varies among institutions; the second digit of each course number designates the semester hour credit and may be 3, 4, or 5, but the course content for the sequence is comparable among most institutions. Students are encouraged to complete the entire sequence at the same institution.

2. MATH 2315 will transfer as MATH 251 only if it requires at least 8 semester hours of calculus as a prerequisite. Otherwise, MATH 2315, accompanied by MATH 2314, will transfer as MATH 152.

\* Must include a lab.
